COMPANY PERFORMANCE

Q3 & 9M FY24 Results

30 JANUARY 2024

SAFE HARBOR STATEMENT

This presentation and the accompanying slides (the “Presentation”), which have been prepared by Dwarikesh Sugar Industries Ltd (the “Company”), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

This presentation contains certain forward-looking statements concerning the Company’s future business prospects and business profitability, which are subject to a number of risks and uncertainties and the actual results could materially differ from those in such forward looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, competition (both domestic and international), economic growth in India and abroad, ability to attract and retain highly skilled professionals, time and cost overruns on contracts, our ability to manage our international operations, government policies and actions regulations, interest and other fiscal costs generally prevailing in the economy. The Company does not undertake to make any announcement in case any of these forward-looking statements become materially incorrect in future or update any forward-looking statements made from time to time by or on behalf of the Company.

SECTOR OUTLOOK

According to the latest report from S&P Global the projected sugar surplus for the 2023-24 period has witnessed a notable increase, rising by 1.5 million metric tons as compared to the October estimate, reaching a total of 4.74 million metric tons. This upward revision is attributed to a combination of factors, including elevated production levels and decreased consumption. Brazil has played a significant role in this shift, with increased production.

Global production outlook for the year is now adjusted to 193 million tons. Current estimates suggest that Brazil is poised to achieve a record-breaking sugar production of over 40 million tons. Despite this promising forecast, logistical challenges in Brazil may impede trade flows from the country, thereby providing support to global sugar prices. The persisting El Niño conditions pose a significant concern, not only affecting the sugar crops in the 2023-24 season, but also raising fears that the damage could extend into the Sugar Season (SS) of 2024-25.

Concerns over the impact of the current El Niño weather pattern, coupled with India's sugar export ban, are contributing to a decreased availability in the global sugar trade. This decline in production, particularly in a major sugar-producing country like India & Thailand, is adding upward pressure on sugar prices. Presently, raw sugar is quoted in excess of 23.5 cents per pound, and whites are quoted in excess of US\$ 660 per metric ton.

The Sugar Season (SS) for 2023-24 in India began with an initial estimate of sugar production at 32 million tons, accounting for a sacrifice of more than 4 million tons for ethanol production. However, the rapid onset of the El-Niño phenomenon had discernible effects, particularly in the states of Maharashtra and Karnataka and it soon became apparent that the actual production would be considerably lower than the initial estimates. The prospects of lower sugar production prompted the Government to revisit the Ethanol Blending program.

In the early part of the recently concluded quarter, sugar prices surged, reaching approximately Rs. 4000 per quintal. The anticipated shortage in sugar production prompted the Central Government to take measures to discourage the use of sugarcane juice for ethanol production, and the Government issued orders to curtail use of sugarcane juice / syrup for producing ethanol.

Continued..

As per the orders of the Central Government, not only was there an immediate curb on use of juice / syrup for making ethanol, but the quantity of ethanol produced using B heavy molasses was also limited to the original quantity offered by sugar mills / distilleries to the Oil Marketing Companies (OMCs). Notably, there was no upward revision in the prices of ethanol made from juice and B heavy molasses, thus breaking the convention observed in the past.

However, there was an increase in the price of ethanol derived from C heavy molasses, and also for ethanol produced from grains. This strategic move aims to restrict the sacrifice of sugar production to 1.7 million tons while concurrently boosting overall sugar production.

Contrary to initial expectations of a weakening trend during the early stages of the season, there has been an unexpected shift in the estimates. Mills in Maharashtra & Karnataka are likely to report more crush days than previously anticipated. As a result, over the past two weeks, estimates for sugar production in 2023-24 have been revised upward by approximately 1 million to 1.5 million metric tons, reflecting the changing scenario

AISTA, has recently estimated that sugar production of SS 2023-24, net of diversion of around 2 million tons for ethanol, is likely to be around 31.6 million tons. ISMA is also likely to revise its production estimate soon. Considering the positive trend in production estimates, ISMA has formally requested that the allowable sugar sacrifice be increased for the continued success of the ethanol blending program, and also for moderation of sugar production to reasonable levels.

After experiencing a brief period of resurgence, sugar prices have recently moderated, and are currently at around Rs. 3800 per quintal.

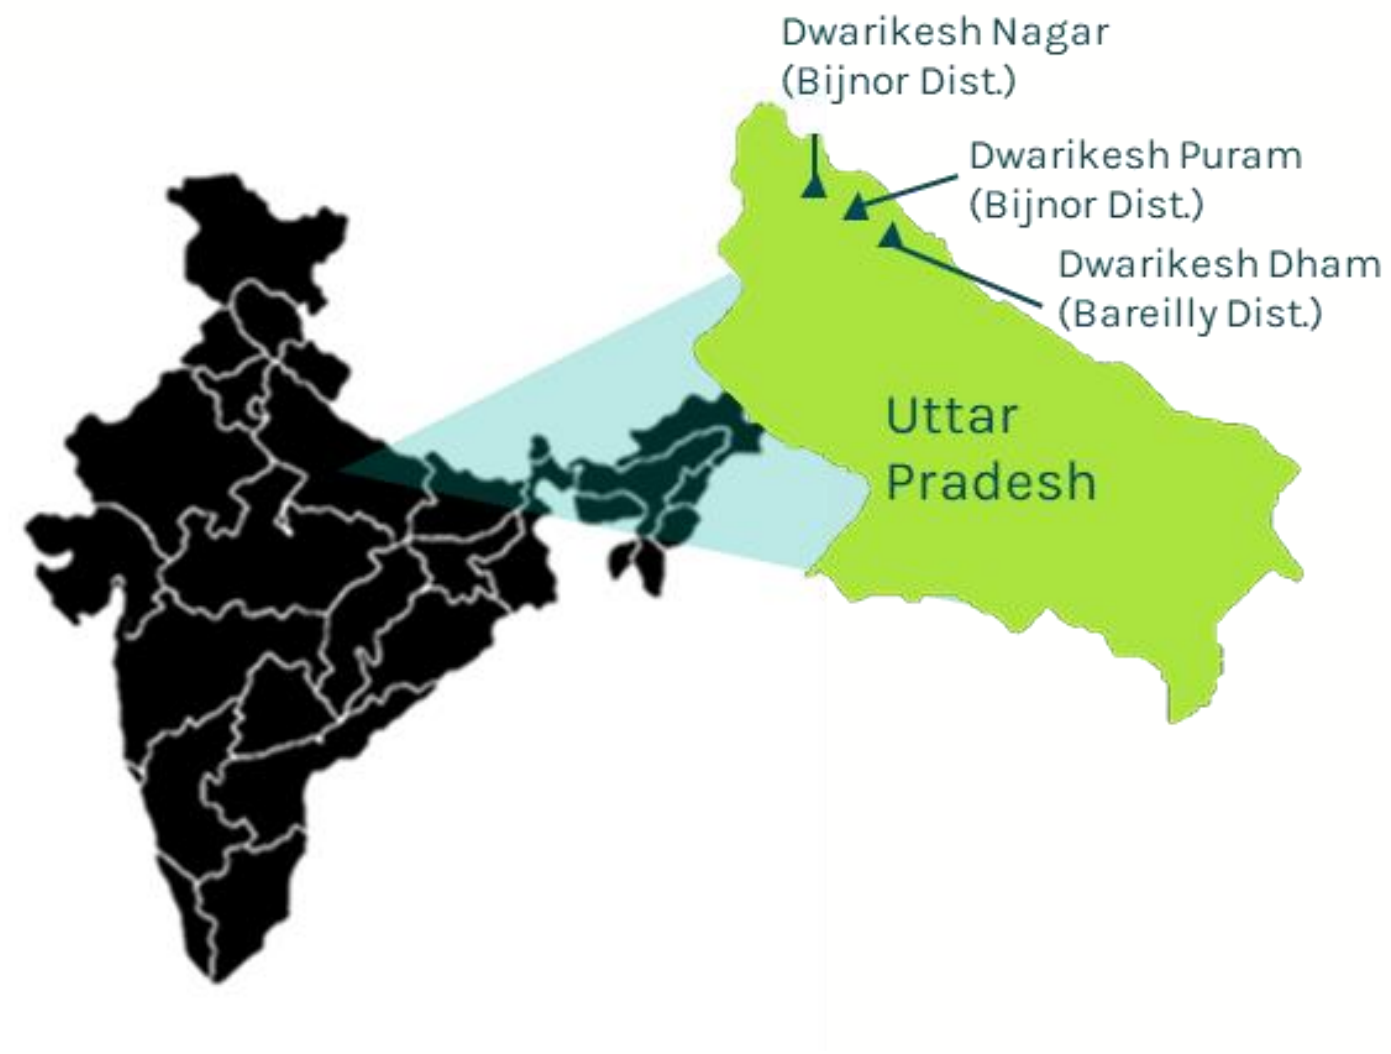

It is expected that during SS 2023-24 sugar industry in Uttar Pradesh is likely to produce in excess of 11.5 million tons of sugar

The State Government of Uttar Pradesh has announced SAP for the sugar season 2023-24, with an increase of Rs. 20 per quintal. Additionally, the society commission rate has been maintained at Rs. 5.50 per quintal. There is revision in the transportation rebate, now standing at Rs. 9 per quintal, up from the previous Rs. 8.35 per quintal. Furthermore, the slab rate within the transport rebate has been adjusted to Rs. 0.45 per quintal per KM, from the earlier Rs. 0.42 per quintal per KM.

BUSINESS OVERVIEW

AT A GLANCE

Note: TCD stands for tonnes of cane per day, MW stands for Megawatts, LPD stands for litres per day; KLPD stands for kilo litres per day; SS stands for Sugar Season defined as 12 months period ending September 30 of the particular year

Capacity	Dwarikesh Nagar	Dwarikesh Puram	Dwarikesh Dham	Aggregate
Sugar (TCD)	6,500	7,500	7,500	21,500
Cogeneration (MW)	22	33	41	96 (Surplus: c. 56)
Distillery (LPD)	1,62,500	-	1,75,000	3,37,500

- Three plants located in Uttar Pradesh, one of India's largest sugar producing states
 - Two plants located in Bijnor district– a district with focused concentration on cane production on highly fertile & well-irrigated land
 - One plant in Bareilly district – the low-lying Ganges plains district with fertile alluvial soil
- Access to large, clearly defined cane-producing areas in the region
- All the three plants are well connected with major sugar consuming markets of the country, the Bareilly plant being located on the National Highway itself
- The 175 KLPD distillery project embarked upon at Dwarikesh Dham commenced commercial production on 7th July, 2022

FINANCIAL PERFORMANCE

Q3 & 9M FY24

PERFORMANCE HIGHLIGHT

In INR million	Q3FY24	9MFY24	Q3FY23	9MFY23	FY23
Total Income	3,189.6	13,391.8	3,917.3	15,825.7	21,170.0
EBIDTA	320.2	1,413.2	343.9	1,402.5	2,285.7
PAT	98.1	606.9	105.2	580.6	1,048.1

In INR	Q3FY24	9MFY24	Q3FY23	9MFY23	FY23
EPS	0.52	3.22	0.56	3.08	5.57

During 9M FY23, depreciation has been suitably adjusted to exclude amounts pertaining to pre-operative & trial period. Accordingly, EBIDTA has been computed .

Results for the 9 months are impacted on account of additional levy obligation for Molasses year 2022-23 cast up on the company which unfairly treats both B heavy and C heavy molasses as equivalent regardless of their respective potential ethanol output.

Results are drawn on the basis of enhanced sugarcane price (SAP) for SS 2023-24

OPERATIONAL TRENDS

SUGAR BUSINESS

HIGHLIGHTS

- Crushing operations for SS 2023-24 commenced at DN & DP units on 31st October, 2023 and at DD unit on 5th November, 2023.
- Crushing during the quarter is lower by 1.89% at 122.72 lakh quintals, as compared to 125.08 lakh quintals during corresponding quarter of last year. However, sugar production in Q3FY24 increased by 6.3% at 9.97 lakh quintals, as compared to 9.38 lakh quintals (including 4.46 lakh quintals of raw sugar) in corresponding quarter of last year. Sugar production is higher because of discontinuation of use of cane juice / syrup for producing ethanol in view of the amended policies of the Central Government.
- Quantity of domestic sugar sales in Q3FY24 has increased by 132%, and in 9MFY24 declined by 9% in comparison to corresponding periods of last year. Whereas overall quantity of sugar sold (including exports) is lower by 24% in Q3FY24 and 34% in 9MFY24 as compared to the corresponding periods of FY23.
- The average domestic sugar realization in Q3FY24 has increased by 8%. The same is Rs. 3,852/- per quintal, as compared to Rs. 3,560/- per quintal during Q3FY23. During 9MFY24 the average domestic sugar realization has increased by 6%. The same is Rs. 3,692/- per quintal, as compared to Rs. 3,483/- per quintal during 9MFY23.
- Results of sugar segment for 9MFY24 are impacted on account of additional levy obligation for Molasses year 2022-23 cast up on the company which unfairly treats both B heavy and C heavy molasses as equivalent regardless of their respective potential ethanol output.
- Results are drawn on the basis of enhanced sugarcane price (SAP) for SS 2023-24.

SUGAR BUSINESS - QUARTERLY SNAPSHOT

EBITDA Margin is EBITDA / Revenue from operations (including internal revenue)

SUGAR BUSINESS – 9M FY24 SNAPSHOT

EBITDA Margin is EBITDA / Revenue from operations (including internal revenue)

COGENERATION DATA

HIGHLIGHTS – 9M FY24

- Revenue from Power sale during has increased by 8% during 9MFY24, reaching Rs. 26.95 crore, as compared to Rs. 24.88 crore during the corresponding period of last year. The generation of power is incidental to the steam required for sugar and ethanol production, resulting in savings of bagasse.
- However in view of the falling bagasse prices, efforts are being made to maximize power generation and evacuation.

DISTILLERY QUARTERLY SNAPSHOT

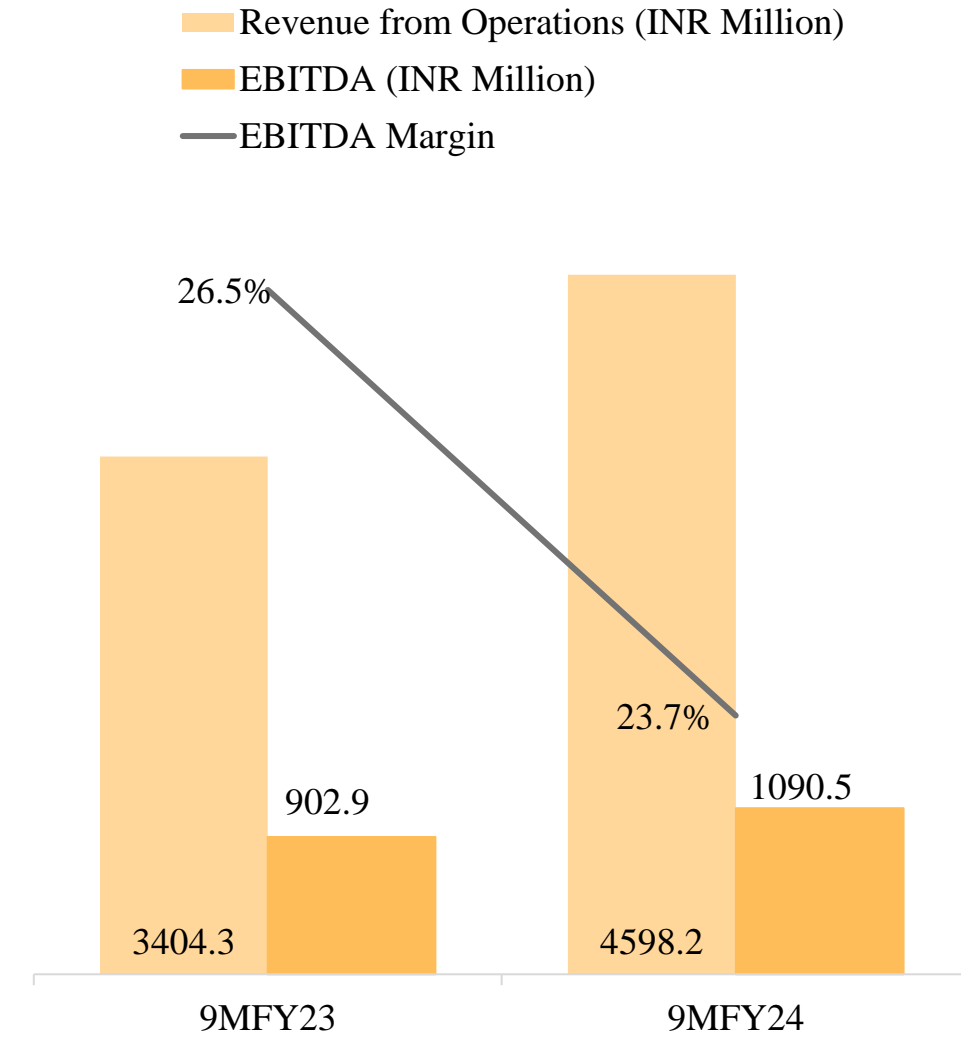

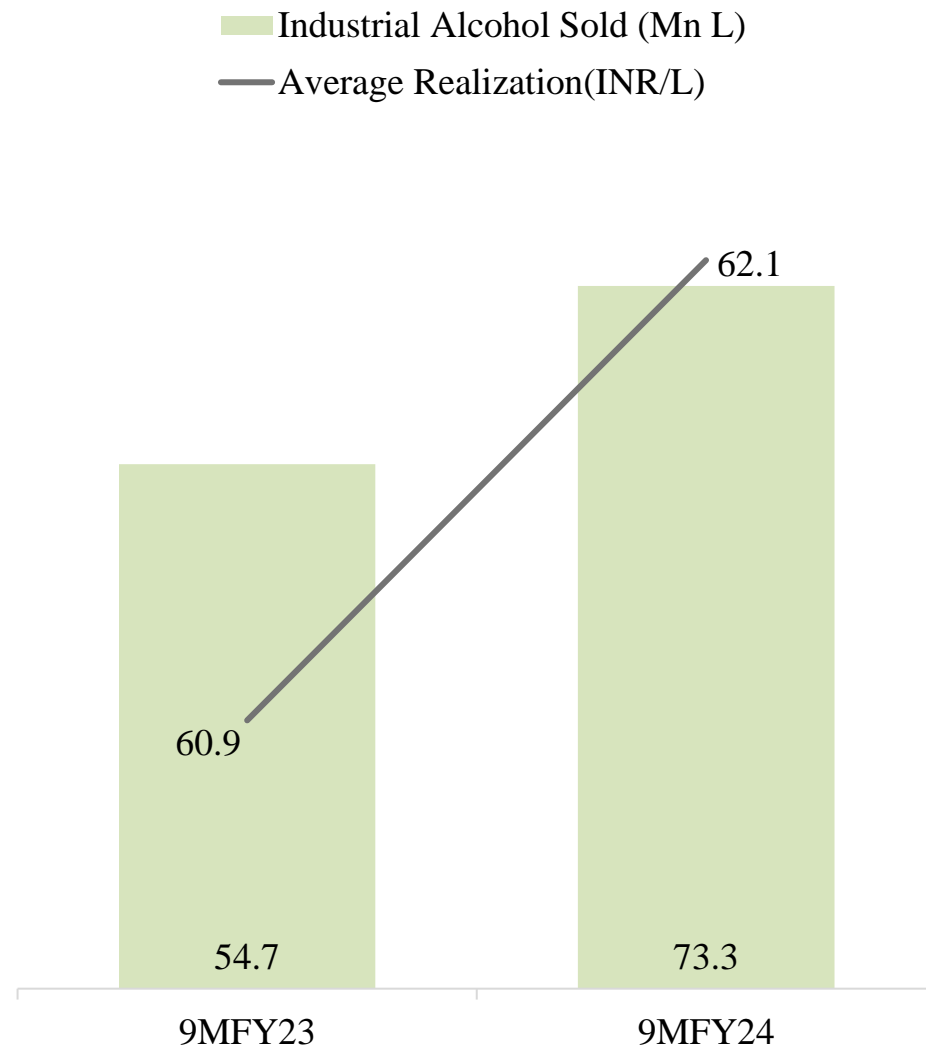

HIGHLIGHTS

- The sale volume of Industrial Alcohol declined by 16% in Q3FY24, and increased by 34% in 9MFY24 as compared to the corresponding periods of FY23. Similarly revenue also declined by 17% during Q3FY24 and increased by 35% in 9MFY24 as compared to corresponding periods of last year.
