A testament to our
Gold Standard in
Exceptional patient care.

- Country's **first pediatric hospital** to have 2 **flagship hub hospitals**, one each in Hyderabad and Bengaluru, **awarded with JCI Accreditation**
- Country's **first standalone fertility center** BirthRight Fertility, Kondapur, Hyderabad received **re-accreditation** from **JCI**

An insight into the Rainbow approach

Dr. Ramesh Kancharla

Pediatric Healthcare Visionary

Chairman & Managing Director

Dr. Ramesh comes from an agricultural background from a village in Andhra Pradesh, India where the accessibility to healthcare was very poor. This motivated Dr. Ramesh to pursue medical education

Garnered rich experience in pediatric gastroenterology and liver disease at best pediatric hospitals in the United Kingdom and got exposed to the nuances of pediatric healthcare model at these hospitals

Lack of quality pediatric healthcare in the country and his resolve that no child should suffer due to lack of dedicated medical facilities led to the foundation of Rainbow Children's Hospitals in 1999

Rainbow is currently the country's largest pediatric hospital chain with 20¹ hospitals spread across 7 cities

Bestowed with Healthcare leader of year award by the Financial Express, Healthcare award, 2024

¹ Including the acquisition of Prashanthi Hospital, Warangal

25 years of Rainbow Journey

1999-2010

Established standalone pediatric specialty hospital concept

Integrated perinatal services within the children's hospital

Expansion within Hyderabad and a new city - Vijayawada

2011-2020

Nurtured perinatal services

Enhanced Pediatric multi specialty and tertiary care services

Investment by the CDC Group, UK

Foray into newer cities - Bengaluru and New Delhi

Hub and Spoke model nurtured in Hyderabad

2021-2024

Successful listing on the stock exchanges - NSE and BSE

Largest chain of comprehensive pediatric care with cutting-edge quaternary care services

Largest pediatric training program in private healthcare in the country

Venturing into newer territories: Chennai and Visakhapatnam

Pioneering the way: The first pediatric and fertility hospital to earn prestigious JCI accreditation in the country

2025

Acquisition of Prashanthi Hospital, Warangal

Footprint of Rainbow Hospital

Note: ¹ Including the acquisition of Prashanthi Hospital, Warangal; ² Numbers for Q1 FY26; ³ Including full time residents and DNB

A novel approach in pediatrics healthcare services

Ability to conceptualize, create and operate specialized children's hospitals

Children Centric Hospitals

Children centric environment and soothing interiors help in children to recover faster

Allocation of significant portion of capex towards interiors of hospitals for creating congenial environment

Doctor engagement model fostering loyalty and sustainability with an institution-first approach

- **925+ full time doctors**
- **A number of doctors trained or possess qualifications from the UK, USA, Canada, Australia**
- **Modern infrastructure and clinical back-up to provide quality care**
- **Recognised as MRCPCH Examination Centre**
- **Recognised as training center¹ by National Board of Examinations**
- **Leading training program in India approved by National Board of Examinations**

- **Retainer/Support in beginning years**
- **Competitive compensation and rewards**
- **Opportunities to grow, absorb in the Rainbow network**
- **Multidisciplinary approach to create comprehensive clinical environment and better work life balance**

Note: ¹ For offering training in Pediatrics, Neonatology, Pediatrics Intensive Care, Pediatric sub specialities, Obstetrics and Gynaecology

The specialist in **comprehensive children's care**

Full suite of Pediatric offerings

Pediatric Secondary Care

- Pediatric outpatients
- Immunizations
- Developmental Screening
- Acute and seasonal illness

Pediatric Tertiary Intensive Care

- Care of preterm babies with low/extremely low birth weight
- Newborn emergency transports
- Neonatal surgical Services
- Advanced ventilation including HFOV
- Pediatric neurocritical care services
- ECMO services

Pediatric Multi-specialty & Quaternary Care

- Pediatric Surgery, urology and minimal invasive surgery
- Pediatric Cardiology and cardiac surgery
- Pediatric Neurology and neuro-surgery
- Pediatric Haemato-oncology
- Pediatric Gastroenterology and liver diseases
- Pediatric Nephrology
- Pediatric Pulmonology and allergy
- Pediatric transplantation (liver, kidney, bone-marrow)
- CRRT, plasmapheresis, hemodialysis

**~1/3 of Beds Allocated
to Critical Care**

**3 Hospitals
Accredited by JCI#**

**13 Hospitals
Accredited by NABH**

Comprehensive perinatal care provider, with synergies between paediatric and perinatal services

Comprehensive services for all pediatric care needs

Pediatrics

- 24*7 full spectrum of Pediatric multi specialty cover with level 4 NICU care

Coordinated handholding for both perinatal and pediatric services

Ease of seeing both pediatrician and obstetrician

- Comprehensive perinatal service
- 24/7 Obstetrics, anesthesia, blood bank
- Maternity ICU

Obstetrics, Fetal Medicine & Fertility

Fully integrated maternity care and fertility services

**Accessibility/nativity/comfort/
knows the system/strong
recommendation from pediatrician**

**Full range of fetal service included
cardiac echo/neonatologist
consultation prior to delivery**

Hub and Spoke approach to **optimise delivery of patient care services** at scale

City level hub and spoke model

Accessibility of super-specialty at hubs, general pediatrics at spokes

Regional level "South Connect" model

Regional spokes at 200-250 kms from city hubs

Regional spokes to provide high quality Pediatric, obstetrics and gynaecology care at tier-II cities and act as connecting bridge to address a large market

- Robust transport network to save sick newborn and children from districts
- Establish Pediatric sub-specialty outreach clinic at districts
- Provide emergency service for maternal and Pediatric patients

Financially prudent expansion

Network effect and synergies enhance operational efficiencies

Hub & Spoke Model

Hyderabad

Bengaluru

Chennai

● Hub ● Spoke ● Upcoming Hospital

- Hub Hospital is centrally situated, providing accessibility from all part of the city
- Spokes hospitals are situated at areas experiencing rapid growth and development, strategically located to ensure convenient access for nearby towns and cities

Robust governance framework

High Governance Standard

Board of directors

Dr. Ramesh Kancharla

Appendix

Winter feels like magic again : Cured from Sickle beta thalassemia by Bone marrow transplantation

- A 15-year-old adolescent diagnosed with Sickle Beta Thalassemia in infancy
- The child received over 30 blood transfusions until now. The condition led to repeated painful sickle cell crises triggered by dehydration, infections, and cold weather, and eventually resulted in avascular necrosis of the hip joint — a serious complication caused by restricted blood supply.
- In a significant step toward cure, the individual underwent a bone marrow transplant at Rainbow Children's Hospital, Marathahalli, Bengaluru, with a sibling serving as the donor.
- Despite complex challenges post-transplant — including Passenger Lymphocyte Syndrome, a rare immune complication due to differing blood groups — the situation was managed with expertise and precision by the hospital's Bone Marrow Transplant team.
- **The successful outcome highlights Rainbow's capabilities in delivering advanced, life-changing care for rare pediatric hematological disorders.**

Congenital Absence of Sternum : A Rare and a challenging Entity

- A 5-day-old newborn was brought to the Rainbow Children's Heart Institute, Hyderabad with **a rare anterior chest wall deformity** where visible and paradoxical chest movements were observed, despite normal heart structure on echocardiography
- The pediatric surgical team performed a **reconstructive procedure using bilateral pectoralis major myocutaneous flaps** — a technique that utilizes the chest muscles to restore structural integrity.
- Post-operatively, the child experienced temporary diaphragmatic weakness, which resolved over time.
- The baby was discharged in a stable condition, breathing comfortably without support and feeding well.
- This case underscores Rainbow's multidisciplinary expertise in managing complex neonatal thoracic conditions with excellent outcomes.

Mother's Hope Rekindled : From multiple failed Conception to the gift of Twins

- A couple in their late 30s had been trying to conceive for over two years. Despite having regular cycles and two successful IUIs, both pregnancies sadly ended in miscarriage.
- After multiple failed IVF attempts outside and being advised to consider donor eggs, the couple arrived at BirthRight by Rainbow with renewed hope.
- The mother was diagnosed with poor ovarian reserve, a condition indicating a lower number of eggs than typical for her age.
- The fertility team at BirthRight crafted a customized IVF protocol, specifically tailored to her clinical profile.
- With continuous guidance, emotional support, and medical expertise, the couple's journey culminated in joy — they were blessed with healthy twins conceived using the mother's own eggs within a year.
- **This case exemplifies BirthRight's strength in providing empathetic, individualized fertility solutions that deliver both scientific success and emotional fulfillment.**

Innovative Heart Device (US-Patented KONAR-MF) – Multifunctional Occluder Broadens its reach across the age spectrum

- Dr. Nageswara Rao Koneti, senior paediatric cardiologist at Rainbow Children's Heart Institute, has been granted a U.S. patent for his innovative heart device – the KONAR-MF Occluder.
- A 22-year-old individual was admitted in heart failure and diagnosed with a ruptured sinus of Valsalva — a rare and serious condition where a rupture near the aortic root creates an abnormal connection between the aorta and the heart.
- In a minimally invasive procedure, the KONAR-MF Occluder was successfully implanted in the cardiac catheterization lab, effectively closing the defect.
- The patient showed significant improvement and was discharged within days, highlighting both the clinical impact of the innovation and Rainbow's leadership in advanced, device-based cardiac care.

**KONAR-MF
Device**

When Virus and bacteria collide : The clinical Conundrum of Neonatal Dengue

- A 2.6 kg late preterm baby was born to a first-time mother at Rainbow Children's Hospital, Anna Nagar, Chennai, shortly after the mother was diagnosed with dengue infection.
- By the second day of life, the newborn developed **fever, skin rashes, breathing difficulty, and signs of poor blood circulation** — symptoms linked to neonatal dengue with systemic complications.
- The medical team initiated non-invasive respiratory support (CPAP) and started cardiovascular stabilizing medications.
- The baby's clinical course was further complicated by a bacterial brain infection, likely due to severe dengue-related gut barrier disruption, necessitating the placement of a ventriculoperitoneal (VP) shunt to drain excess fluid from the brain.
- Through coordinated neonatal and critical care, the child made a gradual recovery — showcasing Rainbow's capability in managing complex neonatal infections and multi-organ complications with precision and compassion.

About Us

Rainbow network comprises of 20¹ hospitals and 5 clinics in 6 cities, with a total bed capacity of 2,035 beds. Our Pediatric services under “Rainbow Children’s Hospital” includes newborn and pediatric intensive care, pediatric multi-specialty services, pediatric quaternary care (including organ transplantation); whereas our women care services under “Birthright by Rainbow” offers perinatal care services which includes normal and complex obstetric care, multi-disciplinary fetal care, perinatal genetic and fertility care along with gynecology services.

Rainbow Children’s Hospital built on strong fundamentals of multidisciplinary approach with a full-time consultant led clinical service along with 24/7 commitment in a child centric environment. The company follows a hub-and-spoke operating model where the hub hospital provides comprehensive outpatient, inpatient care, with a focus on tertiary and quaternary services, while the spokes provide emergency care in pediatrics and obstetrics, large outpatient services and comprehensive obstetrics, pediatric and level 3 NICU services. This model is successfully operational at Hyderabad and is gaining traction in Bengaluru. The endeavor is to replicate this approach in Chennai and across the National Capital Region. Subsequently Rainbow intends to expand into tier-2 cities of Southern India.

Rainbow embraces a unique doctor engagement model, where doctors work exclusively on a full-time, retainer basis. The doctors work in teams and have 24/7 commitment, which is particularly important for children’s emergency, neonatal, pediatric intensive care services and to support pediatric retrieval services. The Company also operates the country’s largest pediatric DNB training programme in private healthcare, offering post graduate residential DNB and fellowship programme.
