Q2 – Key Strengths:

Management Commentary:

As the second quarter of the Financial Year 2020-21 has concluded, we are happy to announce that the Company's continued to demonstrate its resilience on all performance / operational parameters. This has been possible by facing the challenges, drawing effective strategies and marching with determination. Considering the current scenario, the result has been extremely satisfying. The net profit stands at Rs. 32 crore, with an improvement in our net interest margins to 3.58%. With much needed liquidity boost, we are now increasing our focus on lending towards sustainable infrastructure projects, renewables, HAM annuity projects, waste management, sewage treatment plants, gas distribution and electric vehicle charging. Safe to say, the consolidation phase of the Company is now over and we are looking ahead towards a future of resurgence, expansion and growth. Our priority towards maintaining a clean balance sheet, both in terms of nature of business and quality of assets, remains untethered. We strive to improve our NIMs, Cost of Borrowings and all Operating Margins, to position the Company for sustainable growth.
