Message From The Chairman

"Every financial year is a chapter in our growth story each written with strategy, commitment, and ambition."

Mr. Krishan Kumar
Promoter-Director

Dear Stakeholders,

It is with great pride that I present to you the Annual Report of Capital Trade Links Limited (CTL) for the financial year 2024–25. This year has been one of meaningful progress and resilience. Guided by our core values of financial inclusion, innovation, and sustainability, CTL has achieved strong and steady growth, despite a challenging macroeconomic environment. Our well-diversified portfolio, strategic alliances, and disciplined risk management practices have enabled us to expand our market presence and deepen our impact. We have successfully scaled our business operations, resulting in a larger book size and enhanced value for our shareholders. Technology has been a powerful enabler in our journey. We have introduced customized financial solutions that align with the evolving needs of our customers. Notably, our initiatives in E-Vehicle Loans highlight our commitment to promoting green and sustainable development.

I would like to extend my heartfelt appreciation to our dedicated employees, respected Board of Directors, and loyal shareholders for their unwavering trust and support. Your confidence fuels our ambition to seize new opportunities and reach greater heights in the years ahead.

Sincerely,
Krishan Kumar

SEBI/HO/ OIAE/OIAE_IAD1/P/CIR/2023/145 dated August 11, 2023, had issued guidelines towards an additional mechanism for investors to resolve their grievances by way of Online Dispute Resolution ('ODR') through a common ODR portal. Pursuant to above-mentioned circulars, post exhausting the option to resolve their grievance with the Company/its RTA directly and through existing SCORES platform, the investors can initiate dispute resolution through the ODR Portal (<https://smartodr.in/login>) and the same can also be accessed through our website at <https://www.capitaltrade.in/>.

27. Shareholders are informed that in terms of the provisions of the Listing Regulations, the Company is required to intimate the Stock Exchanges the details of the agreements entered into by the shareholders, promoter(s), members of the promoter(s) group, related parties, directors, key managerial personnel, employees of the Company or of its holding, subsidiary or associate company, among themselves or with the Company or with a third party, solely or jointly, which, either directly or indirectly or potentially or whose purpose and effect is to, impact the

management or control of the Company or impose any restriction or create any liability upon the Company, including disclosure of any rescission, amendment or alteration of such agreements thereto, whether or not the Company is a party to such agreements.

Accordingly, it is hereby advised to the shareholders to inform the Company about any such agreement to which the Company is not a party, within two working days of entering into such agreements or signing an agreement to enter into such agreements. The Company will inform the details of such agreements to the Stock Exchanges on it becoming aware of it within the prescribed timelines.

[Explanation: For the purpose of this clause, the term 'directly or indirectly' includes agreements creating an obligation on the parties to such agreements to ensure that the listed entity shall or shall not act in a particular manner.]

28. Shareholders of the Company are informed that pursuant to the provisions of the Act and the relevant rules the amount of dividend which remains unpaid/unclaimed for a period of 7 years is transferred to the 'Investor Education & Protection Fund (IEPF)' constituted by the Central Government. Shareholders who have not encashed their dividend warrant(s), transferred in the year 2016-17 are requested to make claim with the Registrar & Share Transfer Agent of the Company immediately.

Further, pursuant to the provisions of Section 124(6) of the Act read with the relevant Rules made thereunder, shares on which dividend has not been paid or claimed for seven (7) consecutive years or more shall be transferred to the IEPF as notified by the Ministry of Corporate Affairs. In accordance with the IEPF Rules, the Company has sent notices to all the Shareholders whose shares are due for transfer to the IEPF and has also published the details thereof in notices published in newspapers.

The Members whose dividend/shares are transferred to the IEPF may claim the dividend/shares by making an application to the IEPF by following the procedure as detailed in the IEPF Rules and as enumerated on the website of IEPF at <http://www.iepf.gov.in/IEPF/refund.html>.

2. STATE OF THE COMPANY AFFAIRS/OVERVIEW:

The Board of Directors is pleased to present the financial highlights of the Company for the year ended March 31, 2025.

During the financial year 2024–25, the Company recorded a total income of INR 2819.42 Lakhs. While this is a moderation compared to INR 4392.16 Lakhs in the previous year, it reflects our strategic focus on sustainable and quality growth, prudent risk management, and long-term value creation for all stakeholders.

The Company's Assets Under Management (AUM) stood at INR 17784.32 Lakhs as of March 31, 2025. Although this shows a decline from INR 19417.02 Lakhs in the previous year, it aligns with our approach of recalibrating the portfolio mix to improve asset quality and ensure financial resilience in a dynamic economic environment.

Despite the challenging macro-economic landscape, the Company delivered a healthy **Profit After Tax (PAT) of INR 225.96 Lakhs**, underscoring our commitment to operational efficiency and cost discipline. The Company continues to maintain a strong capital base, with a paid-up share capital of INR 643.80 Lakhs and Net Worth of INR 6983.50 Lakhs, providing a solid foundation for future growth.

The Company remains focused on strengthening its core business, enhancing operational effectiveness, and unlocking new growth opportunities. We are confident that our proactive strategy and disciplined execution will continue to generate long-term value for our shareholders and stakeholders.

Since its establishment in 1984, CTL has earned a reputation as a trusted provider of expert financial service and strategic investment services. Over the next five years, the company aims to strengthen its position as a leader and role model in the financial services sector by expanding its nationwide presence and deepening its impact on both businesses and individuals.

The company plans to harness advanced financial technologies to enhance its lending operations, offering AI-powered platforms for personal, business, and bridge loans that cater to a wide range of client needs. Driven by a strong commitment to inclusive finance, CTL also plans to launch new loan products aimed at empowering underserved communities and sectors. By 2030, the company targets substantial growth in assets under management (AUM), customer base, and geographic coverage—operating in more than 12 states and serving over one million clients. Guided by a client-centric and service-oriented approach, Capital Trade Links Limited remains firmly dedicated to fostering entrepreneurship, promoting financial inclusion, and delivering long-term value to its stakeholders.

NBFCs are projected to continue growing in the coming years, though at a slightly slower pace than the previous two fiscals. While credit growth is expected to moderate to 13-15% in FY25 and FY26, this is still considered a healthy rate and above the historical average. Factors like economic revival, rising consumer demand, and the ability to reach underserved segments are expected to drive this growth.

CORPORATE GOVERNANCE REPORT

REPORT ON CORPORATE GOVERNANCE

Corporate governance embodies principles of fairness, transparency, accountability, and ethical business conduct, prioritizing the interests of all stakeholders in business operations.

In accordance with the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and subsequent amendments (the 'SEBI Listing Regulations'), we present Capital Trade Link Limited's corporate governance policies and practices for the fiscal year 2024-25.

This report details our adherence to the Companies Act, 2013, as amended (the 'Act'), SEBI Listing Regulations, and Reserve Bank of India regulations applicable to Non-Banking Financial Companies (NBFCs). Our corporate governance practices and disclosures not only meet but exceed the statutory and regulatory requirements mandated for transparency and accountability.

1. THE COMPANY'S PHILOSOPHY

Our approach to Corporate Governance rests on principles of transparency, accountability, comprehensive disclosure, and equitable governance in our interactions with all stakeholders. We are committed to aligning our Corporate Governance standards with the best practices, continually enhancing them as we progress. The company meticulously adheres to regulatory mandates, ensuring compliance not just in form but in essence.

Efficient Corporate Governance requires a clear understanding of the roles of the Board of Directors ("Board") and the Senior Management and their relationships with others in the Corporate Structure. Sincerity, fairness, good citizenship, and commitment to compliance are the key characteristics that drive the Board and Senior Management relationships with other Stakeholders.

2. BOARD OF DIRECTORS

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

GLOBAL ECONOMY system under which most countries have operated for the last 80 years is being reset, ushering the world into a new era. In FY 2025, growth forecasts have been revised downward by major institutions. The IMF now expects global GDP to grow by just 2.8%, the World Bank projects 2.3%, and the OECD forecasts 2.9%, all citing heightened trade tensions, inflation, and sluggish investment. Nevertheless, the world economy has thus far avoided a recession. Despite persistent inflation and a global cost-of-living crisis, financial systems remain stable, and most emerging markets have withstood external shocks without sudden stops. Inflation, while still elevated, is gradually easing, allowing central banks in advanced economies to conclude monetary tightening cycles, though real interest rates remain high and the policy stance restrictive.

Amid these crosscurrents, financial conditions have improved modestly, equity valuations have recovered, and capital flows to emerging markets—excluding China—have resumed. A handful of low-income and frontier economies have regained limited market access. Yet the world economy remains vulnerable, with escalating trade disputes, inflation risks, and geopolitical fragmentation threatening progress on the Sustainable Development Goals (SDGs). These mounting challenges underscore the urgent need for global cooperation, stable trade rules, and a recommitment to inclusive, sustainable growth in a rapidly evolving geopolitical landscape.

Global inflation is on a decelerating trajectory but is expected to be above pre-pandemic norms through 2025. Most multi-lateral and private-sector panels now place headline CPI falling between 3.8-4.5% in 2025 and 3.2-3.5% in 2026, with sizable dispersion driven by fresh trade frictions. Many emerging markets, though not all, have been seen to entering 2025 with inflation back near pre-pandemic averages. In India, inflation has aligned with the Reserve Bank of India's (RBI) 4 % medium-term target, prompting two 25-basis-point repo cuts in February and April 2025 and 50 basis points in June 2025, which lowered the rate to 5.50 % and shifted the stance to “accommodative.”

U.S. tariff rates recently reached their highest level since the 1930s; however, a provisional U.S.–China agreement announced in May 2025 aims to roll back a portion of these duties. This uncertainty continues to weigh on global growth prospects, though the IMF still does not foresee a U.S. recession in calendar-year 2025. If the trade friction escalates, it could trigger a demand shock event in the US, which can hit output and prices.

Amid ongoing global uncertainty, investor sentiment toward emerging markets (EMs) remains cautiously optimistic. On the one hand, expectations of a weaker U.S. dollar are seen as a potential catalyst for increased capital flows into EMs. Additionally, the prospect of monetary

easing by EM central banks—driven by a global disinflationary trend—is expected to support domestic growth momentum. In Financial year 2025, foreign investors added approximately USD 273.5 billion to emerging market equity and debt portfolios, marking a notable increase of USD 100 billion over 2024. However, this figure still falls short of the USD 375 billion annual average recorded between 2019 and 2021. Elevated foreign exchange volatility continues to pose a significant risk, potentially limiting further inflows.

India stands out within the EM landscape as relatively insulated from global trade shocks, owing to its lower trade dependency and substantial progress on fiscal consolidation. The International Monetary Fund (IMF) projects India to remain the fastest-growing major economy, with real GDP growth expected at 6.2% in 2025 and 6.3% in 2026. This robust outlook is anchored in resilient domestic demand, with a notable pickup in rural consumption acting as a key growth driver. Overall, India's macroeconomic fundamentals position it well to navigate external headwinds while sustaining strong medium-term growth.

CHALLENGES FOR GLOBAL ECONOMY

The economic survey identifies various challenges confronting the global economy:

1. Escalating Trade Tensions and Tariffs

The sharp rise in U.S. tariffs on key trade partners (China, Mexico, Canada, EU) and retaliatory measures have disrupted global trade flows. Effective global tariff rates have reached multidecade highs, surpassing even Great Depression-era levels in some sectors.

This has led to increased policy uncertainty, reduced investment confidence, and a slowdown in global trade volumes.

2. Slowing Global Growth

The IMF, World Bank, and OECD have revised down global growth projections for FY 2025 to the 2.3%–2.9% range. Trade fragmentation, tighter financial conditions, and weak investment are key contributing factors.

Advanced economies are expected to grow below trend, while emerging markets face mixed prospects due to capital flow volatility and inflation pressures.

3. Persistent Inflation and Cost-of-Living Pressures

Although global inflation has shown signs of moderation, it remains persistently above target in many economies, posing ongoing challenges. In particular, food and energy prices continue to stay elevated in several regions, especially affecting lower-income countries where these costs form a larger share of household budgets. This dynamic has intensified the cost-of-living pressures, disproportionately impacting vulnerable populations. In response, central banks have paused their cycles of interest rate hikes but maintain a deliberately tight monetary policy stance. This cautious approach aims to anchor inflation expectations and prevent a resurgence of price pressures while supporting a gradual return to price stability.

4. Volatile Financial Markets and Capital Flows

Heightened interest rate differentials and global uncertainty have led to high FX volatility, impacting portfolio inflows into emerging markets. Despite a pickup in EM capital inflows in FY 2025, they remain below pre-pandemic averages.

Frontier and low-income countries still face limited access to international capital markets.

5. Geopolitical Risks and Global Fragmentation

The global economy in FY 2024–25 continues to be shaped by heightened geopolitical tensions that contribute to economic fragmentation and uncertainty. Key flashpoints such as the ongoing conflict in Eastern Europe, unresolved tensions in the Middle East, and the intensifying strategic competition between the United States and China have profound economic implications. These conflicts disrupt global supply chains, increase commodity price volatility, and raise the cost of doing business internationally.

Moreover, heightened national security concerns have prompted stricter controls on technology transfers and foreign investment, particularly in sensitive sectors such as semiconductors, telecommunications, and artificial intelligence. This decoupling of technology ecosystems can slow innovation and raise costs, especially for emerging markets that rely on access to global technology networks.

Geopolitical uncertainty also leads to greater market volatility and cautious investor behaviour, which can reduce cross-border capital flows, especially into emerging and frontier markets. In sum, the persistence and potential escalation of geopolitical risks pose significant challenges to global economic stability, growth, and cooperation in FY 2024–25.

6. Climate Change and Sustainability Challenges

Extreme weather events, food insecurity, and water stress continue to threaten economic stability, especially in vulnerable regions.

Many countries face a tough balancing act between meeting fiscal targets and investing in climate adaptation and the SDGs.

7. Debt Vulnerabilities in Emerging and Low-Income Economies

Emerging and low-income economies face mounting debt vulnerabilities as rising global interest rates increase borrowing costs and strain fiscal balances. Many countries accumulated significant debt during the pandemic to support health and economic recovery, leaving them with limited fiscal space today. The combination of higher debt servicing costs and slower economic growth has heightened the risk of debt distress and potential defaults, particularly in countries heavily reliant on external financing. Currency depreciation in several emerging markets has further amplified debt burdens denominated in foreign currencies, worsening repayment challenges. Additionally, constrained government revenues limit the ability to invest in critical infrastructure and social programs, jeopardizing long-term development

goals. International efforts to provide debt relief and restructuring remain crucial to prevent economic instability and support sustainable growth in these vulnerable economies.

8. Technological Disruption and Labor Market Shift

Rapid digitization and the widespread adoption of AI technologies are driving significant productivity improvements across many sectors. However, this technological transformation is also leading to the displacement of certain job categories, creating challenges for labor markets.

Emerging economies, in particular, face the risk of lagging behind due to gaps in digital infrastructure and limited access to advanced skills development. Without targeted investments and inclusive policies, these disparities could deepen existing inequalities both within and between countries.

Fed Rate Outlook

In FY 2023–24, the Federal Reserve undertook a series of aggressive interest rate hikes to combat persistently high inflation, pushing the federal funds rate to a peak range of approximately 5.25% to 5.50%, the highest level in over 15 years. This tightening cycle was aimed at cooling demand and bringing inflation closer to the 2% target.

For FY 2024–25, the outlook signals a pause or near pause in further rate increases, as inflation shows signs of gradually easing but remains somewhat above target. The Fed is expected to maintain a restrictive monetary policy stance, keeping rates elevated for an extended period to ensure inflation is firmly under control. Compared to the prior year's aggressive hikes, monetary policy will likely shift toward a more data-dependent, cautious approach, with potential minor adjustments based on inflation dynamics and economic growth.

In its March 2025 Summary of Economic Projections, the Fed signalled two more cuts in the year, tied to forecasts of 1.7% GDP growth and 2.7% inflation. However, market participants anticipate a deeper easing cycle – between three to five cuts – driven by concerns that rising tariffs and weakening domestic demand could trigger stagflation risks. The Fed's near-term stance remains cautious but clearly oriented toward growth support.

Overall, while the Fed's rate increases may slow or halt in FY 2024–25, real policy rates will remain relatively high, reflecting a continued commitment to price stability amid uncertain global and domestic economic conditions.

Monetary Policy Trends Globally

As of mid-2025, global monetary policy is undergoing a gradual shift from an aggressive inflation-fighting stance to a more growth-supportive approach. After sharp interest rate hikes in 2022 and 2023, many central banks have begun easing their policy rates in response to cooling inflation and slowing economic momentum. Notably, the U.S. Federal Reserve

started cutting rates in mid-2024, bringing the federal funds rate down to 4.75% by early 2025. The European Central Bank (ECB) also lowered rates in the second quarter of 2024, citing subdued inflation and sluggish growth in the eurozone. Similarly, other advanced economies like Canada and Australia have adopted a cautious easing stance.

Emerging market economies such as India, Brazil, and Indonesia began their rate-cutting cycles earlier due to relatively better inflation control and more stable external balances. India's Reserve Bank has cut its repo rate by 100 basis points in 2025 alone, bringing it to 5.50%. Meanwhile, China has maintained an accommodative policy with targeted stimulus to support domestic demand and stabilize its property sector. However, countries like Turkey and Argentina remain exceptions, having to keep interest rates elevated due to persistent inflation and currency instability.

While headline inflation has moderated across most economies, core inflation remains sticky in some regions, prompting central banks to remain cautious. The overall trend now leans toward supporting economic recovery, especially in sectors like housing, MSMEs, and infrastructure. At the same time, there is increased focus on financial system resilience, digital finance regulation, and climate-related risks. Looking ahead, most central banks are expected to proceed with gradual rate cuts depending on inflation dynamics, though geopolitical risks, supply chain uncertainties, and energy price volatility could influence the pace and extent of monetary easing.

INDIAN ECONOMY in FY 2024-25 remained a global standout, registering estimated GDP growth between 6.4% and 6.7%, sustaining its position as the fastest-growing major economy. This growth, though a moderation from 8.2% in the previous year, was driven by strong domestic consumption, public infrastructure investment, and a robust services sector, particularly in IT, financial services, and communication. Rural consumption rebounded due to a favorable monsoon and targeted government support, while urban demand remained resilient. Manufacturing showed mixed performance—strength in automobiles, pharmaceuticals, and electronics was offset by weaker output in textiles and capital goods. Inflation eased steadily through the year, with headline CPI averaging between 4.5% and 4.8%, aided by declining core inflation and relative stability in energy prices, though food inflation remained volatile.

With inflation moving closer to its target, the Reserve Bank of India (RBI) shifted its policy stance, cutting the repo rate by 50 basis points to 5.5% in June 2025 and easing the cash reserve ratio, signaling a more neutral approach to monetary policy. On the fiscal side, the government continued its path of consolidation, targeting a fiscal deficit below 4.9% of GDP while maintaining strong capital spending on infrastructure, green energy, and logistics. Revenue collections remained buoyant, supported by robust GST and direct tax performance.

India's external position remained stable, with the current account deficit contained at 1.2–1.3% of GDP, backed by resilient service exports, steady remittances, and strong foreign exchange reserves. Although merchandise exports faced global headwinds, the overall balance

of payments stayed healthy. Foreign portfolio investments surged in the latter half of the year, particularly in debt markets, driven by improved rate outlooks and stable macroeconomic

conditions. Financial markets reflected this optimism, with stock indices reaching record highs and the banking sector reporting strong credit growth, declining NPAs, and healthy capital buffers.

However, structural challenges persist—unemployment, particularly among youth and low-skilled workers, remains elevated, and private investment recovery is still cautious amid global uncertainty and domestic regulatory concerns. Inflationary risks from food and climate shocks, along with geopolitical disruptions and global trade fragmentation, continue to pose threats. Despite these risks, India's large consumer base, strong policy buffers, expanding digital infrastructure, and focus on inclusive development position it well for continued growth and resilience in the years ahead.

In FY 2024–25, NBFCs in India are well-positioned to capitalize on the country's resilient economic growth, strong domestic demand, and a supportive policy environment. With GDP expected to grow between 6.4% and 6.7%, and rural consumption recovering steadily, NBFCs should focus on expanding their presence in retail and MSME lending—especially in underserved segments such as small businesses, informal workers, and first-time borrowers. The rebound in rural demand presents a strategic opportunity to grow loan books in Tier 2 and Tier 3 cities through products like gold loans, farm equipment finance, and small-ticket consumer credit. Additionally, used vehicle financing and affordable housing loans offer promising avenues, particularly for borrowers outside the formal banking system. As inflation moderates and interest rates begin to ease, NBFCs must continue strengthening their digital capabilities to improve cost efficiency, underwriting accuracy, and customer reach. Collaborating with fintechs and participating in co-lending models with banks can further enhance scale and competitiveness. At the same time, maintaining asset quality will be critical, especially amid residual inflationary pressures and elevated credit risk in lower-income segments. Prudent risk management, improved collections infrastructure, and compliance with evolving RBI norms should remain a priority. Overall, a balanced approach that combines digital innovation with responsible lending can help NBFCs achieve sustainable growth in FY 2024–25.

Our strategic focus on sustainable growth led to healthy portfolio performance, stable asset quality, and deeper customer engagement across geographies. The strengthening of Pulse, our in-house technology platform, enhanced operational agility, improved risk oversight, and enriched the borrower experience through real-time intelligence and predictive insights—enabling faster turnaround times for loan approvals.

As we scale responsibly, our emphasis remains on building a resilient, technology-enabled, and professionally managed platform aligned with the aspirations of India's emerging middle class and underserved communities. With a future-focused lens, CTL is poised to contribute meaningfully to India's financial inclusion journey while delivering consistent value to all stakeholders.

ECONOMIC OUTLOOK

India's economy is expected to remain robust in FY 2024–25, with real GDP growth projected between 6.4% and 6.7%, maintaining its status as the world's fastest-growing major economy. This growth is driven primarily by resilient domestic consumption, ongoing public infrastructure investment, and a strong performance in the services sector, especially IT, financial services, and retail trade. The government's continued focus on capital expenditure, logistics development, and digital infrastructure under initiatives like Gati Shakti and PM Gati Shakti Master Plan is expected to further support medium-term growth. Inflation is projected to moderate to 4.5%–4.8%, supported by stable fuel prices and easing core inflation, though food inflation remains a key risk due to climate volatility. With inflation gradually easing, the Reserve Bank of India (RBI) has begun loosening its monetary policy stance, having cut the repo rate to 5.5% in mid-2025. This is expected to boost credit demand and lower borrowing costs for businesses and households.

India's domestic interest rate outlook for FY2025–26 indicates a continuation of the Reserve Bank of India's (RBI) accommodative monetary policy stance, aimed at supporting economic growth amid global uncertainties. In April 2025, the RBI reduced the repo rate by 25 basis points to 6.00%, marking the second consecutive rate cut of the year. This decision was driven by a significant decline in retail inflation, which fell to 4.60% in March 2025—the lowest in over five years—primarily due to easing food prices. The central bank also shifted its policy stance to 'accommodative,' signalling a readiness to implement further easing measures if necessary.

To enhance liquidity and reduce borrowing costs, the RBI has injected substantial funds into the banking system. In May 2025 alone, it plans to purchase government bonds worth ₹1.25 lakh-crore (approximately \$14.66 billion), adding to the over ₹4.8 lakh-crore infused since January 2025 through OMOs. These actions are expected to lower short-term interest rates and improve the transmission of monetary policy. Looking ahead, economists anticipate that the RBI may implement additional rate cuts, potentially bringing the repo rate down to 5.75% by mid-2025, depending on the evolving economic landscape and inflation trends.

The RBI Governor has indicated that any further easing will be “data-dependent”, noting that a spike in food prices or renewed oil shock could pause or even reverse the rate-cut cycle. The central bank is expected to proceed cautiously, balancing the need to support growth with the imperative to maintain inflation within its target range.

Overall, the RBI's monetary policy in FY2025–26 is expected to remain supportive of economic activity, with a focus on ensuring adequate liquidity and favourable borrowing conditions to foster investment and consumption.

FINANCIAL SECTOR

India's financial sector has been one of the fastest growing sectors in the economy. The economy has witnessed increased private sector activity including an explosion of foreign

banks, insurance companies, mutual funds, venture capital and investment institutions. The various steps taken by the government and the regulators since liberalization to meet the challenges of a complex financial architecture have ensured that a new face of the Indian financial sector is emerging to culminate into a strong, transparent and resilient system.

India's economic progress, which is largely dependent on the Financial Sector, is not only a key factor of stability in the global economy, but also a source of immense economic opportunity for the world. The far-reaching changes in the Indian economy since liberalization in the early 1990s have had a deep impact on the Indian financial sector.

Several new instruments and products have been introduced. Existing sectors have been opened to new private players. The entry of new players has led to existing players upgrading their product offerings and distribution channels. Financial intermediaries too have gradually moved to internationally acceptable norms for income recognition, asset classification, provisioning and capital adequacy. This has given a strong impetus to the development and modernization of the financial sector.

Going forward the aim would be to achieve international standards in this area within the shortest possible time frame. With this firm resolve, FICCI's Financial Sector aims to facilitate a comprehensive forum for dialogue between India Inc. and policy makers thereby aiming to provide necessary directions to all stake holders and business processes.

India's financial sector is undergoing significant growth and diversification, comprising a wide range of entities, including commercial banks, insurance companies, non-banking financial companies, cooperatives, pension funds, mutual funds, and other smaller financial entities.

The financial sector in India is predominantly a banking sector, with commercial banks accounting for more than 64% of the total assets held by the financial system. The Government of India and the Reserve Bank of India (RBI) have introduced several reforms to liberalize, regulate, and enhance this industry. These measures aim to facilitate easy access to finance for Micro, Small, and Medium Enterprises (MSMEs).

In the fiscal year 2025, the mutual fund (MF) industry experienced a remarkable surge in new investors, with an increase of 70% compared to the previous year. This significant rise was largely driven by the recovery in the equity market. As a result, 6.8 million unique investors joined the mutual fund market, bringing the total number of MF subscribers to 44.5 million. The industry's assets under management (AUM) saw substantial growth, increasing by 35%, which is the second highest growth rate recorded in a fiscal year. Additionally, the number of folios reached an unprecedented 147.8 million, reflecting the robust expansion of the industry. Investor enthusiasm was not limited to mutual funds; it extended to other equity investment opportunities, indicating a broader trend of growing participation in the capital markets. Active Systematic Investment Plan (SIP) accounts also saw a significant increase, with net additions doubling from the previous year. Over 82% of these new SIP accounts were dedicated to active equity schemes.

The fiscal year 2025 highlighted a notable shift towards an investment culture driven by market performance, advancing financial literacy, and the ongoing transition from saving to investing in the economy. The recovery in equity market indices such as Nifty 50 and Sensex by over 25%, combined with the introduction of new fund options in popular categories, boosted investor confidence. The adoption of mobile wallets is rapidly rising in India, outpacing traditional payment methods like cash and cards. Global Data forecasts mobile wallet transactions to exceed \$6.39 trillion (Rs. 531.8 trillion) by 2028, growing at a robust compound annual growth rate (CAGR) of 18.3% between 2024 and 2028. This growth is fueled by government initiatives promoting digital payments, particularly through the unified payments interface (UPI), which saw transactions valued at \$2.5 trillion (Rs. 202.8 trillion) in 2023, with a staggering CAGR of 72.1% from 2019 to 2023.

MARKET SHARE

In FY 2024–25, India's capital markets and financial sectors demonstrated remarkable growth and resilience, underscoring the country's rising prominence in the global financial landscape. The Bombay Stock Exchange (BSE) progressed with its strategic joint venture with Ebix Inc., aiming to establish one of the most extensive insurance distribution networks across the country, capitalizing on the rapidly expanding insurance market. The IPO market remained robust, with companies raising approximately \$19.5 billion across 78 public offerings, a significant jump from \$7.17 billion raised in FY 2023. This surge reflects growing investor confidence and heightened capital formation, supported by regulatory reforms and greater market participation. Meanwhile, the National Stock Exchange of India (NSE) continued to solidify its leadership, maintaining its position as the world's largest derivatives exchange by the number of contracts traded and ranking fourth globally in cash equity trades. The number of companies listed on NSE has surged dramatically over the decades, reaching over 2,300 listings by FY 2025, up from just 135 in 1995, reflecting the broadening of India's equity markets.

The private wealth management industry in India exhibited immense potential, driven by an expanding base of high-net-worth individuals (HNWIs), projected to reach over 1.9 million by 2027, positioning India as the fourth-largest private wealth market globally by 2028. This wealth accumulation is fueling demand for sophisticated financial products and wealth advisory services. Simultaneously, the insurance sector grew substantially, with the total market size nearing \$230 billion in gross written premiums by 2025. Life insurance premiums alone are expected to add an incremental \$80 billion between 2020 and 2030, reflecting rising penetration and evolving consumer awareness.

Private Equity and Venture Capital (PE/VC) investments sustained their momentum, with India attracting over \$85 billion in investments in 2024, continuing the sharp upward trajectory since the \$77 billion recorded in 2021. This influx underscores the confidence of global investors in India's burgeoning startup ecosystem and infrastructure development. The government's revamp of the Credit Guarantee Fund Trust for Micro and Small Enterprises (CGTMSE) with an infusion of ₹9,000 crore has enhanced MSMEs' access to collateral-free loans, bolstering financial inclusion and entrepreneurship.

The mutual fund industry is also poised for rapid expansion, with the Association of Mutual Funds in India (AMFI) targeting a nearly five-fold increase in Assets Under Management (AUM) to approximately \$1.2 trillion by 2025, alongside a rise in investor accounts to around 135 million, reflecting deepening retail participation. According to Goldman Sachs and other global financial analysts, India's stock market capitalization is expected to cross \$5.3 trillion in FY 2024–25, surpassing the UK to become the fifth-largest stock market worldwide. This growth is driven by strong domestic economic fundamentals, ongoing reforms, and increased foreign and domestic investor interest, marking India's ascendance as a key player in the global financial ecosystem.

There have been several growth drivers for the sustainable growth of financial services in India in future:

Growing Demand:

- Increasing income levels are fueling the need for financial services across various income groups.
- The investment potential in the Indian insurance industry is projected to reach US\$ 1 trillion by 2025.
- With over 2,100 FinTech companies currently operational, India is poised to emerge as one of the largest digital markets due to the rapid expansion of mobile and internet usage.

Growth Penetration

- Access to credit, insurance, and investment opportunities is on the rise in rural areas.
- High Net Worth Individual (HNWI) involvement is increasing in wealth management.
- Despite mutual fund penetration currently standing at 5-6%, there remains substantial room for growth, indicating latent opportunities.

NBFC SECTOR

Non-Banking Financial Companies (NBFCs) are an important constituent of Indian financial system. NBFCs play a crucial role in credit disbursement within the country be it financing people uncovered by the banks, entrepreneurs & corporates, housing and infrastructure sectors. NBFCs provide collateral/non-based loans and their reach has spread to far flung areas.

NBFC has emerged as a vital source of finance for a diverse range of individuals and businesses, including Small and Medium Enterprises (SMEs) and economically unserved and underserved people. NBFCs have excelled in meeting the varied needs of borrowers with remarkable speed and efficiency, leveraging their extensive geographical reach, understanding of diverse financial requirements, and rapid turnaround times. By supporting the growth of millions of MSMEs and facilitating independent employment opportunities, nonbank money lenders have played a pivotal role in fostering financial inclusion.

Importance of NBFCs in Economic Growth:

Promoting Inclusive Growth:

NBFCs are involved in offering credit facilities to both the urban and the rural clientele for the development of the economy. It helps micro-businesses and build low-cost houses, promoting the economic growth of the countryside, and providing microcredit for women.

Enhancing Financial Market Stability:

Being able to manage various risks and also operate as strong financial intermediaries, NBFCs have a significant impact on the stability of the financial market. They offer product and service differentiation which assists in reducing the risks and enhancing the stability of the financial system.

Job Creation and Economic Development:

NBFCs help in the growth of small-scale industries and trading companies which in turn leads to the creation of more employment opportunities and thereby enhancing the standards of living and thus the economic growth.

Mobilisation of Resources:

In return, NBFCs provide higher deposit rates and mobilise the public's savings, turning it into investments. This capital deployment fosters the growth of trade and industries, which are key players in the economic transformation process.

The Future Outlook for NBFCs:

The future of NBFCs in India looks promising. Despite occasional economic slowdowns, the sector continues to expand and improve operations. NBFCs have outperformed banks in year-on-year growth rates due to lower operating expenses, allowing them to offer competitive interest rates. NBFCs lead in developing innovative financial products and solutions. They are more flexible in lending and investment options, offering value-added services such as P2P lending, factoring, and bill payment solutions.

KEY REASONS FOR GROWTH

- **Deep demographic and addressable market understanding:** With their operations in the unorganized and underdeveloped segments of the economy, NBFCs have created a niche for themselves by understanding what customers want from them and guaranteeing last-mile delivery of goods and services.
- **Tailored product offerings:** NBFCs have adapted their product offering to meet the specific characteristics of a customer group and are focused on meeting appropriate needs by carefully analysing this target segment and customizing pricing models.
- **Wider and effective reach:** NBFCs are now reaching out to Tier 2, Tier 3 and Tier 4 markets, distributing the loan across several customer touchpoints. In addition, they are building a

connected channel experience that provides an omnichannel, seamless experience of sales and service 24 hours a day, seven days a week.

- **Co-lending:** RBI, in November 2020, issued co-lending norms that enable banks and NBFCs to collaborate for priority sector lending (PSL).

Overall, between FY2023 and FY2025, research shows NBFC credit will increase at a **CAGR of 13–15per cent**.

Regulatory developments and tighter liquidity shall push up the weighted average cost of funds (CoF) by 30-50 basis points (bps) in H2 FY2024 and further 20-40 bps in FY2025. Moreover, as most NBFCs have a fixed rate loan book, they are expected to face further margin pressure in FY2025. This, along with the bottoming out of credit costs, would impact the net profitability, which would moderate by 20- 40 bps in FY2025 vis-à-vis FY2024.

SOURCES OF BORROWINGS

In Fiscal 2023, there was a notable surge in NBFCs' borrowings from banks, leading to a significant uptick in their share of total funding to 36%, up from 29% at the conclusion of Fiscal 2022. Over the past decade, the proportion of bank lending to NBFCs has nearly doubled. However, it is anticipated that NBFCs will continue to rely heavily on funding from banks, as well as from other NBFCs and small finance banks, throughout Fiscal 2024 and Fiscal 2025.

Emerging sources of fund in addition to traditional sources are as following;

- **Green bonds and sustainable funding:** NBFCs inclined towards environmental sustainability can issue green bonds, attracting investors keen on making positive social and environmental impacts.
- **Co-lending:** **Co-lending**, also known as co-origination, is gaining prominence as a collaborative lending model where multiple financial entities jointly extend loans to borrowers, sharing risks and rewards based on pre-agreed terms. This model, typically involving banks and NBFCs, offers increased liquidity and profitability opportunities if utilized effectively.
- **Securitization and asset reconstruction:** Securitization and asset reconstruction are increasingly adopted strategies by NBFCs, involving the sale of loan portfolios to investors and collaboration with Asset Reconstruction Companies (ARCs) to optimize balance sheets and manage risk.

REGULATIONS

- **Capital adequacy requirements:** Regulatory directives regarding capital adequacy requirements entail an increase in risk weights for consumer lending from 100 percent to 125 percent. Consequently, NBFCs with a higher proportion of such loans in their portfolio will be

impacted. Maintaining a balanced mix of secured and unsecured assets becomes crucial to meet capital adequacy parameters effectively.

- **Bank borrowing for NBFCs with higher rating:** This signifies that banks will be required to maintain higher capital on loans extended to such NBFCs, potentially influencing the funding profile of these entities. Additionally, the cost of borrowing funds from banks may escalate as banks could adjust interest rates to compensate for their elevated cost of capital.

COST OF FUNDS

During the pandemic period, NBFCs became cautious in lending to preserve the asset quality, which restricted AUM growth. The restricted demand drove AUM growth, especially across higher-yielding segments, which impacted profitability positively. The low-interest environment translated into lower cost of funds, resulting in higher spreads, which further impacted profitability positively. The microfinance segment also witnessed equity infusion from private equity and Alternative Investment Funds (AIFs). This in turn has helped the NBFCs to increase their spreads and decrease their debt levels in FY23 which is expected to remain consistent for the next 2 years with a marginal increase in the cost of funds only due to the rate hikes.

NBFCs are gaining market share from banks in small business loans, here is why

- **Quick Disbursal of Funds:** Small businesses often operate with tight cash flow and may need capital quickly to seize opportunities or address emergencies. NBFCs' streamlined processes ensure faster loan approvals and disbursements, allowing businesses to act swiftly and not miss out on crucial moments.
- **Competitive Interest Rates & Lower Fees:** For small businesses, keeping costs down is essential. NBFCs' competitive interest rates and lower processing fees compared to banks make borrowing more affordable. This allows businesses to invest a higher proportion of their capital back into growth initiatives.
- **Flexible Eligibility Criteria:** Many small businesses, especially startups or those in their early stages, may not meet the strict credit score or business history requirements of traditional banks. NBFCs, with their more relaxed approach, open the door for these businesses to access much-needed funding and fuel their growth.
- **Pre-Approved Loan Limits:** Pre-approved loan limits from NBFCs provide small businesses with financial flexibility. Businesses can access funds as needed, managing their cash flow efficiently and keeping loan repayments manageable. This also offers a safety net for unexpected expenses.

KEY STRENGTHS

The company operates with the following key strengths:

Robust Technology: The use of technology in conducting operations enhances efforts of financial inclusion by placing transparency, accessibility and technology at the heart of in this endeavor. The technology is mainly based on:

1. **Digio:** The use of digio in bank statement and KYC verification ensures credit availability to right borrower and maintains quality of assets. This enhances efficiency of the borrower verification process.
2. **Payment:** We provide multiple secure payment options to borrower to suit their convenience which includes dynamic QR code for specific amount payment, Payment Aggregators, NACH etc.
3. **Automation:** Customers now get recorded calls for their due amount, arrears and newer eligible loans using OBD calls, SMS etc. Staff has been enabled with real-time information of customers demand sheet, arrears etc.

4. **Effective Internal Audit:** The Company has strong internal audit teams who do frequent internal audits of the branches. The frequency being quite regular helps in reduction in frauds and implementation of company's policies.
5. **Customer Identification:** We use geographical tagging application to ensure identification of borrower location on real time basis, which in turn help us I securely expanding our reach to rural area borrowers and suitably serve their needs.

KEY WEAKNESS

Technology Adoption: With the proliferation of digital technologies, Company leverages mobile banking, digital payments, and online application processes to reach remote rural areas cost-effectively and efficiently.

OPPORTUNITIES

Unmet Demand: There is often a considerable unmet demand for credit in rural areas due to the limited presence of traditional banks. NBFCs can fill this gap by offering customized loan products tailored to the needs of MSMEs in these regions.

THREATS:

Economic Downturns: Economic downturns pose a significant threat to NBFCs that cater to corporates. During periods of economic slowdown, business often experience reduced cash flow and revenue, which can severely impact their ability to repay loans. This leads to higher default rates, affecting the financial health of NBFCs. Additionally, certain sectors are more vulnerable to market fluctuations, resulting in inconsistent repayment patterns and increased credit risk for lenders.

Regulatory Changes: Regulatory changes present another critical threat to NBFCs. New compliance requirements can increase operational costs and complicate business processes, thereby reducing profitability. The regulatory environment for financial institutions is constantly evolving, necessitating quick adaptation from NBFCs. Sudden shifts in government policies or financial regulations can create uncertainty, making strategic planning and consistent operations challenging.

RISK MANAGEMENT

The company has a robust risk management framework in place to identify, which measures, monitors and manages the critical risks. While risk is inherent to every institution, it assumes greater significance in the context of Micro Credit due to the very nature of the business with its absence of collaterals quality and the vulnerable, financially excluded customer segment it serves.

Risks may be avoided through pre-emptive action and hence the need to identify the risks and put in place various mitigation mechanisms. CTL has identified the following potential risks that could have an adverse impact on the company:

Credit Risk

Credit Risk for CTL is the risk of loss of interest income and the Company's inability to recover of the principal amount of the loan disbursed to its customers.

This risk can result from:

- Information asymmetry and excessive reliance on Credit Bureau check, not backed by soft information or market intelligence on a territory or group of borrowers, leading to adverse selection of borrowers.
 - Exposure to activities with a high probability of variation in earnings
- Credit Risk also includes Credit Concentration Risk, arising out of concentrated exposure to a particular geographical location/territory or to an activity in which a large group of borrowers are engaged in, vulnerable to external events.

Mitigation

Credit Bureau Check - A credit check is done for every customer through an automated system-to-system integration with the Credit Bureau. As part of this check, the parameters like default history, multiple borrowings, Indebtedness and income check are looked at to verify a customer's credit-worthiness and also ensure that they are not overburdened. This mitigates the risk of customer defaults.

Multi-Step Customer Verification CTL has established separate customer relationship (acquisition and maintenance) and customer evaluation (credit) personnel in order to ensure the quality of customers acquired as well as eliminate coerced borrowing practices which may lead to genuine customers becoming delinquent. This mitigates the risk of ghost borrowing and ring-leader scenario. Internal audit will be monitoring that customer verification process is followed properly else action to be recommended which should be accepted by business.

Operational Risk

Operational Risk is the risk of possible losses, resulting from inadequate or failed internal processes, people and systems or from external events, which includes legal risks but excludes strategic and reputation risk. The risk can emanate from:

- Procedural lapses arising due to higher volumes of small-ticket transactions.
- Misplaced/lost documents, collusion and fraud.
- Skill gap and sudden attrition of key personnel in the organization, is also an operational risk, which needs to be countered and addressed by the application of appropriate HR strategies.

Mitigation

CTL has an independent Internal Audit department which carries out surprise checks on field branches and rates them on pre-defined compliance parameters, identifies gaps in process compliance and rolls out initiatives to correct loopholes. This is done primarily to

- Ensure that the designed processes are being followed on the field – including interaction with the customers during various stages of the relationship lifecycle.
- Identify any process lapses/deviations and provide guidance to branches/employees to ensure compliance. This ensures that risks arising out of process lapses are mitigated. Risk should ensure that above mentioned guidelines is being followed up.

Portfolio Concentration Risk

Portfolio Concentration Risk is the risk to the company due to a very high credit exposure to a particular business segment, industry, geography, location, etc. though in the context of micro finance, it pertains predominantly to geographical concentration.

Mitigation

CTL intends to maintain a diversified exposure in advances across various states to mitigate the risks that could arise due to political or other factors within a particular state. With this in mind, Capital Trust has steadily diversified its presence from Delhi to 4-5 states.

Compliance Risk

Capital Trade is present in an industry where the Company has to ensure compliance with regulatory and statutory requirements. Non-Compliance can result in stringent actions and penalties from the Regulator and/or Statutory Authorities and which also poses a risk to CTL reputation.

Mitigation

The company has implemented a Compliance Management with in-built work-flows to track, update and monitor compliances. The company has strong compliance team who monitors statutory compliances.

Reputation Risk

Reputation risk is the risk to earnings and capital arising from adverse perception of the image or the company, on the part of customers, counter parties' shareholders, investors and regulators. It refers to the potential adverse effects, which can arise from the company's reputation getting tarnished due to factors such as unethical practices, regulatory actions, customer dissatisfaction and complaints leading to negative publicity.

Mitigation

We have in place Strict Adherence to Fair Practices Code, Grievance, Redressal Mechanism, Customer Connect and Delinquency Management. The Company does not resort to any

coercive recovery practices and has an approved delinquency management policy including restructuring of loans where necessary.

Strategic Risk

It is the risk to earnings and capital arising from lack of responsiveness to changes in the business environment and/or adverse business decisions, besides adoption of wrong strategies and choices.

Mitigation

This is being addressed and the risk mitigated to a great extent, by referring matters of strategic importance to the Management, consisting of members with diversified experience in the respective fields, for intense deliberations, so as to derive the benefit of collective wisdom.

Contagion Risk

Contagion risk as an enlarged version of systemic risk, refers to the probability of credit default among a large group of borrowers in a particular geographical Territory or State, arising out of external factors, thereby escalating the risk of possible default.

Mitigation

This is being addressed by customer connect program wherein we pro-actively reach out to each individual customer as well as customers in each center to validate that the customers have genuinely applied for the loan and there has been no incidence of commission, following a relationship-based mode of engagement so the customer feels a sense of loyalty to the company.

INTERNAL CONTROL SYSTEM is crucial for a (NBFC) to ensure operational efficiency, financial accuracy, and regulatory compliance. It involves a comprehensive framework of policies, procedures, and practices designed to safeguard assets, prevent fraud, and ensure the accuracy and reliability of financial reporting. By implementing robust internal controls, an NBFC can mitigate risks, maintain transparency, and uphold stakeholder trust, ultimately contributing to its long-term stability and success.

HUMAN RESOURCES

CTL policy offers equal employment opportunity for all persons, without bias or discrimination. It applies to all employment practices including (but not limited to) recruitment, promotion and training.

It is CTL's policy to maintain a working environment free of harassment and intimidation. Any type of harassment (including sexual harassment, verbal or implicit), or intimidation, is a violation of CTL policy, and is dealt with in accordance with corrective action procedures. The company has in place the Sexual Harassment policy, where the company has zero tolerance for any offence.

The human capital is major component in the finance industry besides capital. So having the right people at right place is the major strength of CTL. We believe that the employees working with CTL are realizing their dreams and in return the company achieves its goal.

CTL does not hesitate in recognizing the co-existence of the Company and its Human Capital. Some of the employees in the company have been for more than 8 years with us. The company believes in long term relations with employees and the company has good retention rate.

The company has hired some senior people from reputed companies who are expert in their area of activity. With professionals at the top and fully motivated team at the field, the company is bound to grow in the future.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has implemented adequate internal control practices and has well laid down processes across all functions and departments. The Company has a proper and adequate system of internal controls commensurate with the nature of its business and the size of its operations. These controls ensure transactions are authorized, recorded and reported correctly and assets are safeguarded and protected against loss from unauthorized use or disposition.

There is adequate segregation of duties in the front and back-office functions to ensure that there is absolute independence in the functions. The Company has three lines of control, wherein the first line is the risk owners or risk managers who own the risk, the second line of control is the risk and compliance functions, who oversee risk control and compliance, and the third line is internal audit who provides independent assurance to all stakeholders.

The Company has adequate monitoring processes and controls. The Company has engaged an independent firm of Chartered Accountants to assist the internal audit division. The Independent Internal Audit Function provides risk-based assurance across all material Risk and Compliance exposures of the Company.

COMPLIANCES

Key regulatory Updates

Important Regulatory Framework Issued by the Reserve Bank of India (RBI):

In line with its objective to align the regulatory and supervisory framework with global best practices, the Reserve Bank of India (RBI) introduced significant updates throughout the financial year. These measures primarily focus on strengthening risk management, improving regulatory compliance, and enhancing enforcement across various financial sectors. Below are some Key regulatory guidelines and notifications issued by RBI, which cover areas such as fraud risk management, operational risk management, fair practices for lenders, and disclosure norms for financial products. These updates aim to ensure the stability,

transparency, and resilience of India's financial system, ensuring better protection for both consumers and lenders while fostering trust in the regulatory environment.

1. **Master Direction – Credit Information Reporting, 2025:**

The RBI issued the Master Direction – Credit Information Reporting, 2025 on January 06, 2025 to standardize and strengthen credit reporting across financial institutions. It mandates fortnightly data submissions, stricter correction protocols, a Data Quality Index, and mandatory credit reports in loan appraisals. The directive emphasizes transparency, data protection, grievance redressal, and board-level oversight, reinforcing credit discipline and data accuracy in the financial ecosystem.

2. **Change in REPO Rate:**

The **Reserve Bank of India's (RBI) Monetary Policy Committee (MPC)** initiated a series of repo rate cuts in 2025 to support economic growth amid moderating inflation and improving macroeconomic conditions. On **February 7, 2025**, the RBI reduced the **repo rate by 25 basis points**, bringing it down from **6.50% to 6.25%**. The move was intended to lower borrowing costs and revive credit demand in key sectors like housing, manufacturing, and infrastructure.

Continuing its accommodative approach, the RBI again cut the repo rate by **25 basis points** on **April 9, 2025**, reducing it further to **6.00%**. This decision came on the back of sustained moderation in inflation, a stable rupee, and the need to accelerate private consumption and investment. The RBI emphasized that the economy required continued policy support to consolidate recovery and ensure broad-based growth.

On **June 6, 2025**, the RBI made a more aggressive move by cutting the **repo rate by 50 basis points**, bringing it down to **5.50%**. Alongside this, the **Cash Reserve Ratio (CRR)** was also reduced by **100 basis points**, from 4% to 3%, injecting substantial liquidity into the banking system. This larger-than-usual rate cut reflected RBI's confidence in the inflation outlook and its intention to further strengthen the economic recovery. The impact of this easing cycle has been significant, resulting in reduced EMIs, improved credit flow, and stronger support for sectors sensitive to interest rates, such as real estate and consumer durables.

In total, the repo rate was cut by **100 basis points** in the first half of 2025, demonstrating the RBI's commitment to fostering a supportive environment for sustainable and inclusive economic growth.

3. **Treatment of Right-of-Use (ROU) Asset for Regulatory Capital Purposes:**

The RBI on March 21, 2025 has clarified that ROU assets arising from leases under Ind AS 116 need not be deducted from regulatory capital if the underlying asset is tangible (e.g., buildings, equipment); instead, they will be risk-weighted at **100%**. However, ROU assets linked to intangible assets must continue to be deducted. This applies to NBFCs, HFCs, CICs, ARCs, Mortgage Guarantee Companies, and Standalone Primary Dealers following Ind AS.

4. Amendment to the Master Direction - Know Your Customer (KYC) Direction, 2016

The RBI, through its notification dated 6th November, 2024, amended the Master Direction - KYC, 2016 to streamline and strengthen the KYC process. Regulated Entities (“RE”) must follow a “one customer, one KYC” approach at the UCIC level. Monitoring intensity must match the customer’s risk profile, with clearer guidance for high-risk accounts. Periodic KYC updation is emphasized, including updates initiated by the RE. Updated customer data must be filed with CKYCR within 7 days of receipt.

5. Master Direction on Treatment of Wilful Defaulters and Large Defaulters:

The RBI’s Master Direction dated July 30, 2025 on Treatment of Wilful Defaulters and Large Defaulters, effective from October 28, 2024, sets out a structured process to identify and act against borrowers who deliberately default. It defines Large Defaults as ₹1 crore+ and Wilful Defaults as ₹25 lakh+ involving intentional non-payment, fund diversion, or misuse of assets. Regulated Entities must form dedicated committees, follow a transparent classification process, report cases to Credit Information Companies (CICs), and restrict credit facilities to such defaulters. The framework also covers internal audits, compromise settlements, and safeguards during credit appraisal and loan transfers.

6. Master Directions on Fraud Risk Management:

The RBI, via notification dated 15th July, 2024, issued Master Directions on Fraud Risk Management for Non-Banking Financial Companies, including Housing Finance Companies. The framework enhances fraud prevention, detection, reporting, and monitoring mechanisms. Key provisions include stricter timelines for fraud classification and reporting to RBI, adoption of robust internal controls, and regular fraud risk assessments. NBFCs are also required to strengthen governance, conduct root cause analysis, and ensure accountability of staff involved in fraudulent activities.

7. Operational Risk Management and Operational Resilience:

The RBI’s Guidance Note on Operational Risk Management and Operational Resilience dated April 30, 2024 now applies to NBFCs and HFCs. It introduces a framework based on three pillars: Prepare and Protect, Build Resilience, and Learn and Adapt. The note emphasizes strong governance, internal controls, and risk management. It advocates for business continuity, third-party dependency management, and robust ICT and cybersecurity systems. The guidance encourages continuous learning from disruptions to improve operational resilience.

8. Fair Practices Code for Lenders – Charging of Interest:

The RBI's circular dated April 29, 2024 on Fair Practices Code for Lenders – Charging of Interest addresses unfair practices observed during inspections. Key issues include charging interest from the loan sanction date or cheque issuance rather than the disbursement date, charging interest for an entire month despite mid-month disbursal or repayment, and collecting advance installments while charging interest on the full loan amount. To ensure fairness and transparency, RBI has directed all regulated entities (REs) to review and correct their practices, including making necessary system adjustments.

9. Key Facts Statements (KFS) for Loans & Advances:

RBI vide Circular dated April 15, 2024 mandates that Key Facts Statements (KFS) be provided for all retail and MSME term loans by regulated entities (including NBFCs and HFCs), aimed at enhancing transparency and reducing information asymmetry between lenders and borrowers. KFS must be in clear language, include details like the Annual Percentage Rate (APR), loan proposal number, and amortization schedule, and be validity period. All charges, including third-party service fees, must be disclosed in the APR. The guidelines apply to all new loans from October 1, 2024. Credit card receivables are exempt from this circular.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements, or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either

intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of The Financial Statements:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order 2020 (the Order), issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in Annexure A, a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The Standalone Balance Sheet, the Standalone Statement of Profit and Loss including Other Comprehensive Income, the Standalone Statement of Changes in Equity and the Standalone Cash Flow Statement dealt with by this report are in agreement with the books of account;
 - d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended;

- e) On the basis of the written representations received from the directors as on 31st March, 2025 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2025 from being appointed as a director in terms of Section 164(2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure- B". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
- g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended. In our opinion and to the best of our information and according to the explanations given to us, we report that the Managerial Remuneration for the year ended 31st March, 2025 has been paid/ provided to its directors in accordance with the provisions of section 197 and schedule V to the act.
- h) With respect to the other matters to be included in the Auditors' Report in accordance with the requirements of Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:
 - I. The Company does not have any pending litigation, which would impact its financial position.
 - II. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any and to the extent ascertainable, on long-term contracts including derivative contracts; and
 - III. There were no amounts, which were required to be transferred to the Investor Education and Protection Fund by the Company.
 - i)
 - a) The management has represented that, to the best of its knowledge and believe, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person(s) or entity (ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.
 - b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person(s) or entity (ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding

Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

- c) Based on such audit procedures that we considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement; and
- d) Since the Company has not declared or paid any dividend during the year, accordingly, commenting on whether dividend declared or paid is in accordance with Section 123 of the Companies Act, 2013 is not applicable.
- e) Based on our examination, which included test checks, the Company has used accounting software for maintaining its books of account for the year ended 31st March, 2025 which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software.

Further, during the course of our audit, we did not come across any instance of tampering with the audit trail feature. However, many entries were edited due to the restatement of financial statements.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

[Referred to in paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date]

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Capital Trade Links Limited** ("the Company") as of 31st March, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting. Assessing the risk that a

material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the

auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We have also relied upon the Internal Audit Report submitted by the Internal Auditor of the Company.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanation given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2025, based on the internal control over financial

reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes to the financial statements

1 General Information

Capital Trade Link Limited is a Non-Banking Finance Company ("NBFC"), holding a Certificate of Registration from the Reserve Bank of India ("RBI") dated 19/11/2001, domiciled in India with CIN L51909DL1984PLC019622, and was incorporated on 19/12/1984.

2 Summary of significant accounting policies

2.1 Statement of compliance

In accordance with the notification issued by the Ministry of Corporate Affairs, the Company has adopted Indian Accounting Standards (referred to as "Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015. The Company has adopted Ind AS from April 1, 2019 with effective transition date as April 1, 2018. These financial statements have been prepared in accordance with Ind AS as notified under the Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013 (the "Act"). The transition was carried out from Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP.

2.2 Presentation of financial statements

The Balance Sheet, Statement of Profit and Loss and Statement of changes in Equity are prepared and presented in the format prescribed in the Division III of Schedule III to the Companies Act, 2013 ("the Act"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS. Amounts in the financial statements are presented in Indian Rupees.

2.3 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services at the time of entering into the transaction.

Measurement of fair values:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. Fair value for measurement and/or disclosure purposes for certain items in these financial statements is determined considering following methods:

Items	Measurement Basis
Certain financial assets and liabilities (including derivatives instruments)	Fair value
Net defined benefit (asset)/liability	Fair value of planned assets less present value of defined benefit obligations
Property plant and equipment	Value in use under Ind AS 36

Fair value measurements under Ind AS are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date
- Level 2: inputs other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs are unobservable inputs for the valuation of assets or liabilities that the Company can access at measurement date.

2.4 Use of estimates and judgment

The preparation of financial statements requires the management of the Company to make judgments, assumptions and estimates that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expenses for the reporting period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in the financial statements have been disclosed as applicable in the respective notes to accounts. Accounting estimates could change from period to period. Future results could differ from these estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Judgments:

Information about judgments made in applying accounting policies that have a most significant effect on the amount recognized in the consolidated financial statements is included following notes:

Classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding.

Assumptions and estimation uncertainties :

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ending March 31, 2024 is included in the following notes:

Note 21 – impairment of financial instruments: assessment of whether credit risk on the financial asset has increased/ (Decreased) significantly since initial recognition and incorporation of forward-looking information in the measurement of ECL

Note 21 – determination of the fair value of financial instruments with significant unobservable inputs.

Notes 14– recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources

Note 21 – impairment of financial instruments: key assumptions used in estimating recoverable cash flows.

Note 9- impairment test of non-financial assets: key assumption underlying recoverable amounts

Note 9- useful life of property, plant, equipment and intangibles

2.5 Interest

Interest income are recognized using the Flat/Reducing Interest rate method or as per the agreement . Rate of Interest on segment are as follows:

Personal Loan: 12% to 36% or as mentioned in the agreement

Business Loan: 9% to 24% or as mentioned in the agreement

Commercial Vehicle Loan: 17% to 36%

Consumer Loan: 20% to 36%

2.6 Financial Instruments

Financial assets and financial liabilities are recognized in the Company's balance sheet on settlement date when the Company becomes a party to the contractual provisions of the instrument. Recognized financial assets and financial liabilities are initially measured at fair value. Transaction costs and revenues that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs and revenues directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in the Statement of Profit or Loss.

If the transaction price differs from fair value at initial recognition, the Company will account for such difference as follows:

- a) if fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets, then the difference is recognized in profit or loss on initial recognition (i.e. day 1 profit or loss);
- b) in all other cases, the fair value will be adjusted to bring it in line with the transaction price (i.e. day 1 profit or loss will be deferred by including it in the initial carrying amount of the asset or liability).

After initial recognition, the deferred gain or loss will be released to profit or loss on a rational basis, only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.

a) Financial assets

Classification

On initial recognition, depending on the Company's business model for managing the financial assets and its contractual cash flow characteristics, a financial asset is classified as measured at;

- 1) amortized cost;
- 2) fair value through other comprehensive income (FVTOCI); or
- 3) fair value through profit and loss (FVTPL).

Initial recognition and measurement

Financial asset is recognized on trade date initially at cost of acquisition net of transaction cost and income that is attributable to the acquisition of the financial asset. Cost equates the fair value on acquisition. Financial asset measured at amortized cost and Financial measured at fair value through profit and loss account is presented at gross carrying value in the Financial statements. Unamortized transaction cost and incomes and impairment allowance on Financial asset is shown separately under the heading "Other non-financial asset", Other non-financial liability" and "Provisions" respectively.

Impairment of Financial Asset

Impairment approach

The Company is required to recognize expected credit losses (ECLs) based on forward-looking information for all financial assets at Amortized cost, lease receivables, debt financial assets at fair value through other comprehensive income, loan commitments and financial guarantee contracts. No impairment loss is applicable on equity investments. At the reporting date, an allowance (or provision for loan commitments and financial guarantees) is required for the 12 month ECLs. If the credit risk has significantly increased since initial recognition (Stage 1), an allowance (or provision) should be recognized for the lifetime ECLs for financial instruments for which the credit risk has increased significantly since initial recognition (Stage 2) or which are credit impaired (Stage 3). The measurement of ECL is calculated using three main components: (i) probability of default (PD) (ii) loss given default (LGD) and (iii) the exposure at default (EAD). The 12 month ECL is calculated by multiplying the 12 month PD, LGD and the EAD. The 12 month and lifetime PDs represent the PD occurring over the next 12 months and the remaining maturity of the instrument respectively. The EAD represents the expected balance at default, taking into account the repayment of principal and interest from the balance sheet date to the default event together with any expected drawdown's of committed facilities. The LGD represents expected losses on the EAD given the event of default, taking into account, among other attributes, the mitigating effect of collateral value at the time it is expected to be realized and the time value of money. . The Company applies a three-stage approach to measure ECL on financial assets accounted for at amortized cost and FVTPL. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

1. Stage 1:

12-months ECL For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognized. Exposures with days past due (DPD) less than or equal to 29 days are classified as stage 1. The Company has identified zero bucket and bucket with DPD less than or equal to 29 days as two separate buckets.

2. Stage 2:

Lifetime ECL – not credit impaired For credit exposures where there has been a significant increase in credit risk since initial recognition but that are not credit impaired, a lifetime ECL is recognized. Exposures with DPD equal to 30 days but less than or equal to 89 days are classified as stage 2. At each reporting date, the Company assesses whether there has been a significant increase in credit risk for financial asset since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Company has identified cases with DPD equal to or more than 30 days and less than or equal to 59 days and cases with DPD equal to or more than 60 days and less than or equal to 89 days as two separate buckets

3. Stage 3:

Lifetime ECL – credit impaired Financial asset is assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For financial asset that have become credit impaired, a lifetime ECL is recognized on principal outstanding as at period end. Exposures with DPD equal to or more than 90 days are classified as stage 3. A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. ECL is recognized on EAD as at period end. If the terms of a financial asset are renegotiated or modified due to financial difficulties of the borrower, then such asset is moved to stage 3, lifetime ECL under stage 3 on the outstanding amount is applied.

The Company assesses when a significant increase in credit risk has occurred based on quantitative and qualitative assessments. Exposures are considered to have resulted in a significant increase in credit risk and are moved to Stage 2 when: 1. Quantitative test: Accounts that are 30 calendar days or more past due move to Stage 2 automatically. Accounts that are 90 calendar days or more past due move to Stage 3 automatically. 2. Qualitative test: Accounts that meet the portfolio's 'high risk' criteria and are subject to closer credit monitoring. High risk customers may not be in arrears but either through an event or an observed behavior exhibit credit distress. 3. Reversal in Stages: Exposures will move back to Stage 2 or Stage 1 respectively, once they no longer meet the quantitative criteria set out above. For exposures classified using the qualitative test, when they no longer meet the criteria for a significant increase in credit risk and when any cure criteria used for credit risk management are met.

The definition of default for the purpose of determining ECLs has been aligned to the Reserve Bank of India definition of default, which considers indicators that the debtor is unlikely to pay and is no later than when the exposure is more than 90 days past due. The Company continues to incrementally provide for the asset post initial recognition in Stage 3, based on its estimate of the recovery.

In line with the above policy, the Company has thus fully provided for/ written off the entire receivables in the current financial year as per table below:

Product	Overdue criteria
Commercial Vehicle, Equipment	12 Month
Personal Loan	12 Month
Business Loan	12 Month
Consumer Loan	12 Month
E- Rickshaw	06 Month

The measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. The measurement of ECL involves increased complexity and judgment, including estimation of PDs, LGD, a range of unbiased future economic scenarios, estimation of expected lives, and estimation of EAD and assessing significant increases in credit risk.

Presentation of ECL allowance for financial asset:

Type of Financial asset	Disclosure
Financial asset measured at amortized cost	shown separately under the head “provisions” and not as a deduction from the gross carrying amount of the assets
Financial assets measured at FVTOCI	
Loan commitments and financial guarantee contracts	shown separately under the head “provisions”

Where a financial instrument includes both a drawn and an undrawn component and the Company cannot identify the ECL on the loan commitment separately from those on the drawn component, the Company presents a combined loss allowance for both components under “provisions”

2.7 Financial liability, Equity and Compound Financial Instruments**"Financial liabilities and equity**

Debt and equity instruments that are issued are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Financial liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company or a contract that will or may be settled in the Company's own equity instruments and is a non-derivative contract for which the Company is or may be obliged to deliver a variable number of its own equity instruments, or a derivative contract over own equity that will or may be settled other than by the exchange of a fixed amount of cash (or another financial asset) for a fixed number of the Company's own equity instruments.

Classification

The Company classifies its financial liability as "Financial liability at amortized cost" except for financial liability at fair value through profit and loss (FVTPL).

Initial recognition and measurement

Financial liability is recognized initially at cost of acquisition net of transaction costs and incomes that is attributable to the acquisition of the financial liability. Cost equates the fair value on acquisition. Company may irrevocably designate a financial liability that meet the amortized cost as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (referred to as the fair value option).

De-recognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss

Equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

No gain/loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments"

Cash, Cash equivalents and bank balances

Cash, Cash equivalents and bank balances include fixed deposits, margin money deposits, and earmarked balances with banks are carried at amortized cost. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents.

2.8 Property, plant and equipment

a. Tangible

Tangible property, plant and equipment (PPE) acquired by the Company are reported at acquisition cost less accumulated depreciation and accumulated impairment losses, if any. The acquisition cost includes any cost attributable for bringing asset to its working condition net of tax/duty credits availed, which comprises of purchase consideration, other directly attributable costs of bringing the assets to their working condition for their intended use. PPE is recognized when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

b. Capital work-in-progress

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as “capital work-in-progress” and carried at cost, comprising direct cost, related incidental expenses and attributable interest.

c. Intangible

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortization and cumulative impairment. Administrative and other general overhead expenses that are specifically attributable to acquisition of intangible assets are allocated and capitalized as a part of the cost of the intangible assets. Expenses on software support and maintenance are charged to the Statement of Profit and Loss during the year in which such costs are incurred.

d. Intangible assets under development

Intangible assets not ready for the intended use on the date of Balance Sheet are disclosed as “Intangible assets under development”.

e. Depreciation and Amortization

Depreciable amount for tangible property, plant and equipment is the cost of an asset, or other amount substituted for cost, less its estimated residual value. The residual value of each asset given on Operating lease is determined at the time of recording of the lease asset. If the residual value of the Operating lease asset is higher than 5%, the Company has a justification in place for considering the same. Depreciation on tangible property, plant and equipment deployed for own use has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of Buildings, Computer Equipment networking assets, electrical installation and equipment and Vehicles, in whose case the life of the assets has been assessed based on the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, etc. Depreciation on tangible property, plant and equipment deployed on operating lease has been provided on the straight-line method over the primary lease period of the asset.

Depreciation method is reviewed at each financial year end to reflect expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end with the effect of any change in the estimates of useful life/residual value is accounted on prospective basis. Depreciation for additions to/deductions from, owned assets is calculated pro rata to the remaining period of use.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life. All capital assets with individual value less than Rs. 5,000 are depreciated fully in the year in which they are purchased.

Purchased software / licenses are amortized over the estimated useful life during which the benefits are expected to accrue, while Goodwill if any is tested for impairment at each Balance Sheet date. The method of amortization and useful life are reviewed at the end of each accounting year with the effect of any changes in the estimate being accounted for on a prospective basis. Amortization on impaired assets is provided by adjusting the amortization charge in the remaining periods so as to allocate the asset's revised carrying amount over its remaining useful life.

Estimated useful life considered by the Company are:

Assets	Estimated useful life
Furniture and Fixtures	10 Years
Office Equipment	5 Years
Buildings	60 Years
Plant & Machinery	10 Years
Computers such as, desktops, laptops, etc.	3 Years

2.9 Employee Benefits

Defined Employee benefits include provident fund, superannuation fund, employee state insurance scheme, Defined contribution benefits includes gratuity fund, compensated absences, long service awards and post-employment medical benefits.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognized during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the year in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the year in which the employee renders the related service are recognized as a liability at the present value of the defined benefit obligation as at the balance sheet date less the fair value of the plan assets out of which the obligations are expected to be settled. Long term service awards are recognized as a liability at the present value of the defined benefit obligation as at the balance sheet date.

2.10 Securities premium account

The Company records premium on account of

1. On issuance of new equity shares;

The issue expenses of securities which qualify as equity instruments are written off against securities premium account.

2.11 Operating Segments

The Company's main business is financing by way of loans for Commercial Vehicle Loan, Personal Loan, Consumer and Equipment Loan and Business Loan and Trading in India. The Company's operating segments consist of "Financing Activity only in lending and borrowing.

This in the context of Ind AS 108 – operating segments reporting are considered to constitute reportable segment. Operating segment disclosures are consistent with the information reviewed by the CFO.

An operating segment is a component of the company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the company's other components, and for which discrete financial information is available. Accordingly all operating segment's operating results of the Company are reviewed regularly by the Board of Directors to make decisions about resources to be allocated to the segments and assess their performance.

Revenue and expense directly attributable to segments are reported under each operating segment. Expenses not directly identifiable to each of the segments have been allocated to each segment on the basis of associated revenues of each segment. All other expenses which are not attributable or allocable to segments have been disclosed as un-allocable expenses.

Assets and liabilities that are directly attributable to segments are disclosed under each reportable segment. All other assets and liabilities are disclosed as un-allocable.

2.12 Earnings per share

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Partly paid up shares are included as fully paid equivalents according to the fraction paid up. Diluted earnings per share has been computed using the weighted average number of shares and dilutive potential shares, except where the result would be anti-dilutive

2.13 Taxation

Income Tax

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the Statement of Profit and Loss except when they relate to items that are recognized outside profit or loss (whether in other comprehensive income or directly in equity), in which case tax is also recognized outside profit or loss.

Current Tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax law) enacted or substantively enacted by the reporting date.

Current tax asset and liabilities are offset only if there is a legally enforceable right to set off the recognized amounts and it is intended to realize the asset and settle the liability on a net basis or simultaneously.

Deferred Tax

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity. Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

2.14 Goods and Services Input Tax Credit

Goods and Services tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/utilizing the credits.

2.15 Provisions, contingent liabilities and contingent assets

Provisions are recognized only when:

- (i) an entity has a present obligation (legal or constructive) as a result of a past event; and
- (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- (iii) a reliable estimate can be made of the amount of the obligation

Provision is measured using the cash flows estimated to settle the present obligation and when the effect of time value of money is material, the carrying amount of the provision is the present value of those cash flows. Reimbursement expected in respect of expenditure required to settle a provision is recognized only when it is virtually certain that the reimbursement will be received.

Contingent liability is disclosed in case of:

(i) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and

(ii) a present obligation arising from past events, when no reliable estimate is possible.

Contingent assets are disclosed where an inflow of economic benefits is probable. Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

Where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under such contract, the present obligation under the contract is recognized and measured as a provision.

Contingent assets are not recognized in the financial statements.

2.16 Write off

The gross carrying amount of a financial asset is written-off (either partially or in full) to the extent that there is no reasonable expectation of recovering the asset in its entirety or a portion thereof. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

2.17 Leases

The Company has adopted Ind-AS 116 - Leases and applied it to all lease contracts entered. Based on the same and as permitted under the specific transitional provisions in the standard, the Company is not required to restate the comparative figures.

All leases are accounted for by recognizing a right-of-use asset and a lease liability except for:

- Leases of low value assets; and
- Leases with a duration of 12 months or less

The following policies applied-

Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by reference to the rate inherent in the lease unless (as is typically the case) this is not readily determinable, in which case the Company's incremental borrowing rate on commencement of the lease is used. Variable lease payments are only included in the measurement of the lease liability if they depend on an index or rate. In such cases, the initial measurement of the lease liability assumes the variable element will remain unchanged throughout the lease term. Other variable lease payments are expensed in the period to which they relate.

Right-of-use assets are initially measured at the amount of the lease liability, reduced for any lease incentives received, and increased for:

- initial direct costs incurred; and
- the amount of any provision recognized where the Company IS contractually required to dismantle.

Subsequent to initial measurement lease liabilities increase as a result of interest charged at a constant rate on the balance outstanding and are reduced for lease payments made. Right-of-use assets are amortized on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if, rarely, this is judged to be shorter than the lease term.

2.18 Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- i. changes during the period in operating receivables and payables transactions of a non-cash nature;
- ii. non-cash items such as depreciation, provisions, deferred taxes, unrealized foreign currency gains and losses, and undistributed profits of associates and joint ventures; and
- iii. all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of Balance Sheet.

Note:-16.4 Capital management

The primary objectives of the Company's capital management policy is to ensure that the Company complies with capital adequacy requirements required by the Reserve Bank of India and maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholder value.

The Company's capital management objectives are

- to ensure the Company's ability to continue as a going concern
- to comply with externally imposed capital requirement and maintain strong credit ratings
- to provide an adequate return to shareholders

Management assesses the Company's capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the sub-ordination levels of the Company's various classes of debt. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Qualitative Information

The Company has implemented the guidelines on Liquidity Risk Management Framework prescribed by the Reserve Bank of India requiring maintenance of Liquidity

Coverage Ratio (LCR), which aim to ensure that an NBFC maintains an adequate level of unencumbered HQLAs that can be converted into cash to meet its liquidity needs for a 30 calendar day time horizon under a significantly severe liquidity stress scenario $LCR = \text{Stock of High-Quality Liquid Assets (HQLAs)} / \text{Total Net Cash Outflows over the next 30 calendar days}$ HQLAs comprise of Cash*, Investment in Central and State Government Securities, and highly-rated Corporate Bonds and Commercial papers, including those of Public Sector Enterprises, as adjusted after assigning the haircuts as prescribed by RBI.

* Cash would mean cash on hand and demand deposits with Scheduled Commercial Banks. Total net cash outflows are arrived after taking into consideration total expected cash outflows minus total expected cash inflows for the subsequent 30 calendar days. As prescribed by RBI, total net cash outflows over the next 30 days = Stressed Outflows - [Min (stressed inflows; 75% of stressed outflows)]. Total expected cash outflows (stressed outflows) are calculated by multiplying the outstanding balances of various categories or types of liabilities and off-balance sheet commitments by 115% (15% being the rate at which they are expected to run off further or be drawn down). Total expected cash inflows (stressed inflows) are calculated by multiplying the outstanding balances of various categories of contractual receivables by 75% (25% being the rate at which they are expected to under-flow).
