OUR VALUES

MANAGING DIRECTOR & CEO'S MESSAGE

Dear Shareholders,

The year 2016-2017 was a tough year for AYM Syntex. Sales remained flat for the year & profitability declined year-on- year for the first time in 5 years. While our company continues to slowly transform itself into a stronger business, weakness in a sizeable portion (Nylon) of the business led to a decline in profitability. The local Nylon business, which was once the largest contributor of profitability for AYM is now itself eating away at the profitability of other business segments. The challenge now is to transform the product & customer mix of the company into more profitable products of nylon (PA6) as well as polyester (PA6 & PET lines in AYM are interchangeable). We have been successful in a similar endeavor before when, 10 years back, lines were converted from Polyester (PET) to Nylon. However, this time, we must do it once again not only keeping profitability in mind but also its long-term sustainability.

While things have turned for the worse on the nylon side of business, there are several positive developments that have taken place in other areas, which are worth highlighting. Our business embarked on a transformational journey about 2 years back and while the inflection point is still further down the road, there have been a few positive steps in the right direction. Focus on innovation & product development continued & few new products were developed. While no large-scale commercialization took place, several customers showed interest in these products & we hope to achieve success in the coming years.

In both our Palghar dyed yarns as well as textile yarns (PET & PA6) area, business development was initiated with several new high-quality customers all around the world. In the BCF area, the efforts that the management team has been putting in all these years have started to bear fruit. Solution dyed nylon was commercialized for the first time & has garnered a lot of interest from some of our highest quality customers. In this segment, we will be competing against the world's best; companies primarily based in Europe & the US. Another important milestone was that of acquiring the Dupont Sorona license. This puts us firmly on the world map in the BCF area. From the point of view of building a strong foundation, we moved a few steps forward. A new and qualified management team was put into place at the Palghar plant & HO. This team is now capable enough to manage the complexities of working with high-quality customers. A lot of work was done in both plants on upgrading infrastructure & most importantly, in building new & improved systems in the area of quality, product development & production planning. Despite all this progress, I believe that we still have some way to go until our foundations are robust enough to be compared to the world's best.

A sizeable proportion of the new developments that we are carrying out are products with high-quality requirements and significant barriers to entry. It is difficult to win the trust of such customers for initial sampling, following which our internal quality of talent and systems need to be strong enough to sustain consistent on time delivery. Customers expect continuous innovations, flawless deliveries & impeccable service, as is the case with their current supply base, which comes from countries such as USA, Europe, Taiwan & Korea. In an otherwise commoditized industry driven by price & volumes as opposed to quality, service and innovation, it requires us to do things very differently if we are to succeed. Changing the mind-set and culture of an organization is an incredibly difficult thing to do. Few, if not none in the industry in our country have succeeded (or even tried to embark) on the journey that we are on.

STRATEGIC REPORT

It will require us to make difficult decisions some of which might even impact us adversely in the short-term. Once successful, however, this also means that customers will be reluctant to switch sources leading to closer relationships & stickiness. Combined with innovation & superior new product development capabilities, it is this overall package that will be the source of our competitive advantage in the future.

Given the commoditized and cyclical nature of AYM's current Nylon business, warning signs were always visible. As mentioned in several of my previous quarterly calls, even though we could see it coming, the pace of decline was accelerated by several external factors. Although it was a positive long-term step, demonetization brought the domestic fabric market to a grinding halt, leading to our plant running dry for several weeks & incurring losses. Another factor was the shortage of Caprolactam in the marketplace leading to an appreciation of raw material (Nylon chips) prices by over 60% in fewer than 90 days followed by a fall of over a third in fewer than 60 days leading to enormous stock losses. Rapid increase in capacity by existing players and entry of several new players in this period didn't help either.

While it is important to record the role of these external events, we as an organization also need to accept the harsh truth – our business model in the current nylon segment is weak. We are competing against unorganized players with a lower cost structure & newer/more efficient machines in a market, where switching cost is close to nil thereby being totally driven by price. The only way to win in such a marketplace is by having the lowest cost. Our dreams are different. We wish to compete on quality, consistency & innovation as opposed to cost. While the long-term vision is clear & we can see light at the end of the tunnel, a lot of effort is required to change the organization culture, customer mix, product mix & the overall business model.

We hope that eventually, our journey of growth will mirror that of a Chinese bamboo tree. Like any other tree, it requires a tremendous amount of care and nurturing. One needs to continuously water the tree but little or no growth is seen above the ground for all of the first 4 years! And then Io & behold! All of a sudden, within 6 weeks the tree leaps upwards to several tens of feet in the sky! All this time, despite no progress being seen above the ground, all that nurturing was going in to build the roots and foundation that could support such exponential growth. The bamboo tree is a true lesson in persistence & faith. It's a lesson, which reiterates the age-old wisdom of staying on the path and never giving up!

Finally, I would like to thank all our shareholders for their continued support & encouragement. Last but not the least, I would like to thank all our employees for their continued efforts & commitment; for working hard towards our vision despite the setbacks that we have encountered along the way. I remain confident that the path that we have chosen is headed in the right direction. Nothing in life that is great is easy. If it were easy, it wouldn't be great!

Regards,

Abhishek Mandawewala

Earning per share (Basic & Diluted)	10.23	12.17

II. Dividend

In order to conserve resources of the Company, the Board has not recommended dividend on equity shares.

III. Performance and Outlook

During the year under review, revenue from operations (net) at ₹ 79,075.59 Lakhs was little less as compared to ₹ 80,381.61 Lakhs for previous year. Exports during the financial year 2016-17 were of ₹ 16,703 Lakhs as compared to ₹ 19,679 Lakhs during the previous year.

Increase in production capacity of Nylon / mono yarn led to competition in the business resulting into erosion of the margins of profit. Raw material prices of Nylon chips have suddenly gone up in fourth quarter and it could not be passed on fully to customers. Emergency in Turkey for three months during second quarter has hit export of the dyed yarn. Demonetisation of ₹ 500 and ₹1000 notes had slowed down volume of sales in third quarter. The market is slowly picking up. Raw material prices of Nylon chips have now started coming down, export to Turkey has now resumed and the Company is concentrating on developing export markets in other countries.

The Company continuously develops new products to have better margin of products.

The Company has completed remaining part of the expansion project II at an estimated project cost of ₹ 70 crores by increasing capacity of Nylon Mother yarn on 15th May 2016. The Company has installed three cabling machines for cabling of BCF yarn and Heat setting machine for BCF yarn in September 2016 which was part of expansion project IV of ₹ 34.71 crores.

The Company has now undertaken expansion project at an estimated project cost of ₹ 76.50 crores for installation of spinning line, texturised machinery, sewing thread set up, setting up of automated warehouse and constructing separate building for spinning line.

During the year, your company's long term credit rating and short term credit rating has been reaffirmed by CARE as CARE A and CARE A1 respectively. India Rating and Research Private Limited has upgraded rating from IND A- to IND A for long term loans and for working capital limits.

IV. Directors' Responsibility Statement

- a) in the preparation of the annual accounts, the applicable accounting standards had been followed along with proper explanation relating to material departures;
- b) the directors had selected such accounting policies and applied them consistently and made judgments and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the Company at the end of the financial year 31st March 2017 and of the profit and loss of the Company for that period;

Economic Overview:

Global Economy

Global economy witnessed a year of unstable growth in FY17 along with shifting policies and heightened uncertainty. Global growth in 2016 at 3.1% vis-à-vis 3.4% in 2015 continued to stagnate following slow trades, low investments and policy uncertainties in advanced economies as well as sluggish productivity growth, in the first half of CY 2016. However, the second half saw a stronger pickup in growth in advanced economies on account of some recovery in manufacturing output. Major global events during the year like the Brexit vote and Presidential elections in the US which are expected to have long term effect on Global economy. Commodity prices showed a recovery during the year with Oil prices increasing by around 38% in FY17, majorly in the second half of the year, reflecting an agreement among major producers to trim supply.

Economic activity is forecasted to accelerate in 2017 & 2018, with global growth projected to be 3.4% & 3.6%, respectively on the back of fiscal stimulus measures in developed economies & narrowing of divergence between commodity exporters & importers. Keeping the supply cut in view, the oil prices are expected to increase gradually from an average of \$43 a barrel in 2016 to \$51 a barrel in the coming year. However, the global outlook remains tilted downwards in the medium-term, due to lingering concerns in global markets, which are weak investments, below par levels of productivity coupled with heightened policy uncertainty, & protectionist pressures. Indian Economy

Even as the world experiences another difficult year as far as economic growth is concerned, India continues to deliver a standout performance with 7.1% GDP growth for FY 17 supported by strong consumption & government spending. Against the backdrop of robust macroeconomic stability, the year was marked by two major domestic policy developments, the passage of the Constitutional amendment, paving the way for implementing the transformational Goods & Services Tax (GST) and the action to demonetize the two highest denomination notes.

The GST is expected to create a common Indian market, improve tax compliance & governance & boost investment & growth while aligning it with practices in developed countries. However, there could be temporary transition challenges during the implementation of this landmark reform. Demonetization has created short term cost particularly in the informal & cash intensive sectors of the economy particularly textile market which has lowered down sales during the third quarter of the financial year 2016-17; however, demonetization is expected to provide the basis for long run benefits.

There are signs that the negative effects of demonetization are abating, & that the economy would turn around in the upcoming quarters by quickly reversing this downward trend in the investment. Exports are improving in line with higher global demand. For 2017-18, it is expected that the growth would return to normal with key factors driving as normal monsoon, an increase in the level of exports following the projected increase in global growth & above all various reform measures taken by the Government to strengthen the economy. In that context, GDP growth is set to expand by +7.2% in FY2017-18. (Source: Euler Hermes Economic Research)

Over a medium to long-term, India's potential to emerge as one of the largest consumption economies of the world is intact. Apart from population growth, India is witnessing other trends that make it a favorable market from the company perspective which include urbanization, an increase in the number of nuclear families, improvement in education level, more women in the workforce and modernization of lifestyles.

Industry Overview:

Global Textile Industry

Globally, the textile yarn market is fragmented, capital intensive and competitive, with a large number of players operating at regional and local levels. It has resilient long-term demand on account of rising middle classes in emerging markets, however, profitability remains undermined by volatile raw material prices, rising wages, fierce competition & rapid Changing consumer behavior CY2016 proved more challenging than expected for the Textile & Clothing (T&C) sector as output sales decreased by -1.5%. As a result, international trade, which accounts for a third of total T&C output, lost USD 40bn worth of business. (Source: Euler Hermes Economic Research)

The outlook for 2017 is looking better as price increases are resuming due to firmer demand prospects. The global textile and apparel industry will continue to grow along with growing consumption of textile and apparel products in developing countries and a gradual economic recovery of major developed markets. Along with the growing consumption, global textile & apparel trade is estimated at US \$820 bn and has grown at 5.6% CAGR since 2005 and is expected to grow further at 6.3% CAGR and reach US \$1600 bn by 2025.

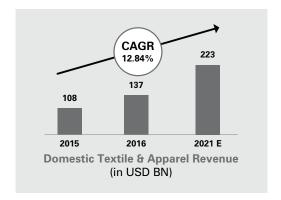

Domestic Textile Industry

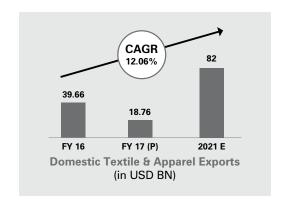

India's textile sector is one of the oldest industries in the Indian economy as well as one of the largest contributors to India's exports, contributing nearly 15 per cent to total exports. The textile industry is also labor intensive and is one of the largest employers. It employs about 45 million workers directly and 60 million workers indirectly. The Indian Textile Industry contributes approximately 4% to India's Gross Domestic Product (GDP) and 14% to overall Index of Industrial Production (IIP). (Source: Ministry of Textiles, IBEF research report)

The adverse impact of demonetization on disposable incomes and hence consumer spending resulted in poor demand for apparels in the second half of FY17. The resulting inventory accumulation with the retailers, in turn, caused deferment of purchases from apparel and home-textile manufacturers in the near-term, besides resulting in stretched payments. This, in turn, has affected the cash flow of the textile industry & acted as a constraint in the demand for the entire textile value-chain for a shorter period.

Goods & Services tax (GST) constitutes the last mile of a long journey of reforms of indirect taxes in India. Given the huge number of inter-state & inter-industry movement of goods & services & interdependence of organized & unorganized sectors in the textile industry, the GST will have significant effects on the growth & productivity of the textile sector. Although for a long run, this landmark reform is going to benefit all including the end consumer with higher compliance & cheaper & seamless movement of goods across the country, however in a shorter run it might impact the industry significantly, which is highly fragmented & unorganized.

On a medium to long term, India offers huge scope for manmade fiber and filament manufacturing as currently, India's fiber consumption is cotton dominated which is contrary to the global trends. With change in consumer preferences and awareness about health and hygiene, consumption of man-made fibers is poised to grow in future. Indian spinning sector is highly advanced and competent globally in terms of price, quality & standards. (Source: Ministry of Textiles, Make in India, Technopak, TechSci Research)

Notes: CAGR - Compound Annual Growth Rate, E - Estimate, P - Provisional

According to the Ministry of Textiles, the domestic textile & apparel industry in India is estimated to reach US\$ 223 bn by 2021 from US\$ 137 bn in 2016. With a promising export market and cost-effective production, the future for the Indian textile industry looks promising. The textile yarn market is projected to grow at a CAGR of 4.2% from 2015 to 2020, and reach a projected value of USD 12.64 Billion by 2020. Indian textile and apparel exports are estimated to touch US\$ 82 billion in 2021 from US\$ 40 billion in 2016, which implies a CAGR of 12% in 2016-21.

Business Overview:

The year FY 17 was a mixed bag with respect to business performance as the year started on a promising note with the line and Bottom line, however the latter part of the year saw a huge pressure on bottom line on account of several macro factors like demonetization, unprecedented volatility in RM prices, excess capacity in the market contributing to the slowdown. For the full year, sales remained flat for the year and profitability declined year-on-year for the first time in 5 years. AYM business has four different categories of the business, each one of which forms the significant part of the Topline:

Nylon

As AYM continued its journey to slowly transform itself into a stronger business, weakness in a sizeable portion (Nylon) of the business led to a decline in profitability. The local Nylon commodity business, which was once the largest contributor to profitability for AYM in H1 FY 17, had dented the overall profitability in the latter part of the year on account of Raw material price volatility and excessive supply in the market. Shortage of Caprolactam in the marketplace leading to an appreciation of raw material (Nylon chips) prices by over 60% in fewer than 90 days followed by a fall of over a third in fewer than 60 days led to enormous stock losses. The rapid increase in capacity by existing players & entry of several new players also added to the pressure on margins.

The company plans to transform the product & customer mix of the company from commodity Nylon space into more profitable products of nylon as well as polyester in line with a profitable sustainable growth for future.

Conventional Dyeing

Conventional Dyeing business of the company is hosted in the Palghar Plant, which during FY 17 picked up slightly in terms of volumes as compared to the last year despite exports getting affected in Q2 FY 17 on account of political instability in Turkey & domestic sales on account of demonetization, which impacted the second half of FY 17. The margins have remained muted in the later half of the year on account of increase in operating costs like power; consumables on account of mix change etc. The plant continued to operate at significantly lower CapEx levels as compared to installed capacity.

AYM is able to fetch a premium in the market on account of quality & its logistic capability to serve small lots & orders. Moreover, the company is working on changing the sales mix towards customers who are more quality conscious & sticky & therefore do not mind giving a premium to the premium quality of the product as well as services.

Bulk Continuous Filament Yarn (BCF)

The company continues to retain and reinforce its market leadership in India in selling BCF yarns, which is primarily used in the manufacturing of carpets & rugs, in domestic as well as international market. A lot of focus on quality & branding over the last few years has started giving positive results in this year. The strength of the business increased dramatically over the latter half of the year with significant improvement in the quality of the product as well as customer satisfaction. This has led us to start strategic partnerships with many of the prestigious customers in the international market.

The company was able to sign an exclusive agreement with Dupont (Fortune 500 company) for the joint marketing of their Sorona brand in the carpet segment in key international markets. Although it is a remarkable achievement for the company, it will take two to three years before the sizeable business starts coming in. Also, the company has to the solution dyed nylon business in the current year.

The company is focused on its journey to develop a lot of new products in this space in coming years & also add the capacity in this business segment to improve its sales mix

Polyester

The polyester segment registered a decent progress in FY 17 in terms of quality enhancements & new product development. With Nylon commodity business declining, the focus is to gradually reduce some exposure in the commodity Nylon space & fill the gap partially with the Polyester business, which is stickier in nature & can deliver sustainable margins.

AYM's business embarked itself on a transformational journey 2 years ago & there is still a lot to do, the focus is on innovation & New Product Development (NPD) with high-quality requirements & significant barriers to entry. The company is in process of putting internal talent & systems in place to sustain quality and on-time delivery on a sustained basis, which will create a long term competitive advantage.

SWOT Analysis

Over the period of time company has been focusing on developing significant strength & capability to tap the opportunities while overcoming its weakness and external threat to business.

STRENGTH

- Established market position in BCF yarn
- Diversified Product Portfolio
- Strong R&D set up & innovation pipeline
- Experienced & capable Management team
- Integrated & advanced technology, manufacturing facilities

WEAKNESS

- · Lower capacity utilization
- Low bargaining power with suppliers
- Significant share of Commodity products / markets in portfolio
- Limited cashflows to fund future capex plans
- Quality talent retention / attraction

OPPORTUNITY

- Increase in domestic demand – favourable demographics
- Access to quality Customers internationally
- Capacity Expansion in BCF segment
- Business process & product mix reengineering to benefit margins
- Focus on speciality products to penetrate new markets

THREAT

- Increase in competition domestic & International
- Vulnerability / volatility in Raw material prices & Forex rates
- Not able to supply desired quality - higher customer rejections
- Labour Industrial relations unrest at Plants

Key Risks & Concerns

Risk is integral to any business and AYM is no exception. The company has incorporated processes and systems to proactively monitor, manage and mitigate these risks along with appropriate review mechanisms. The various external factors that could impact business, going forward with its mitigation measures are discussed below:

Price Volatility Risk

Volatility in prices of raw materials, energy inputs and finished goods may adversely impact profitability. Overcapacity in the sector, in which the company operates, may result into lower capacity utilization as well as price wars impacting profitability. The company looks to mitigate the risks by:

- · Increasing share of value-added products which have high entry barriers to sustaining margins
- Stringent Quality norms & product differentiation
- · Maintaining cost competitiveness through regular efficiency improvement.
- Forward booking, Inventory management & alternate raw material development practices
- Developing alternate source of vendor

New Product Development Risk

The success rate for new product launches is very low. New products may not be accepted by the consumer or may fail to achieve the sales target. Even more so in cases where the other industry players, as well as the consumers, are not focusing on the said route. The company has adopted the cautious approach to new product introductions backed by an intense market study, a lot of prototypes & sampling to maintain a healthy pipeline and limit the downside risks.

Strategic Risks

Emerging businesses, capital expenditure for capacity expansion, product Mix changeover as well as business process re-engineering etc, are normal strategic risks faced by any company. Keeping the long-term vision, a lot of strategic changes are required in the company like changing the organizational culture, customer mix, product mix & the overall business model. Inadequate planning, uncertainty & failure in meticulous execution could deeply impact the financial performance. The company has defined processes for obtaining approvals for investments & capacity expansion. Company is also gradually trying to improve customer & product mix by prioritizing few categories & tasting success in it before going to other categories

Talent Acquisition & Retention Risk

Inappropriate hiring & inability to attract or retain top talent may result in a firm's inability to pursue its growth strategies effectively. Company identified having a robust Talent Value Proposition as one of the Transformation areas to drive sustainable growth over the long run. The company adopts the strategy of Continuous benchmarking of the best HR practices across the industry & carrying out necessary improvements to attract & retain the best talent. It also continuously provides its workforce vocational training to improve their skill level on on-going basis

Competition Risk

Increase in a number of players in the marketplace & aggressive pricing by competitors have the potential of creating a disruption. With no barriers to the entry of any new players, company is always exposed to competition risk in a commodity-driven market space. More competition can create pressure on margins, market share, etc. Continuous efforts are underway to enhance the brand image of the company by focusing on R&D, quality, cost, timely delivery & customer service as well as changing the sales mixes from commodity & price driven market to the specialized & innovative products & quality conscious customers.

Political & Economic Risks

Unrest & instability in countries of operation can significantly impact the business. The company has business dealings in the Developing & Emerging economies of Asia as well as developed economies of West. It is exposed to political risk & unrest in these markets. In situations of economic constraints on account of factors such as low GDP growth & high food inflation can result in a slowdown in consumption & demand. However, the company operates with well-defined risk management policies to mitigate the risk through diversification of sales across geographies as well as diversification of product offerings by introducing high-end specialty products.

Regulatory Compliance Risk

The Company is exposed to risks attached to various statutes, laws & regulations. Inadequate compliance systems & processes pose a reputation risk for an organization. They may result in financial losses & penalties. The company has invested in compliance systems & processes to mitigate these risks through regular review of legal compliances carried out through internal as well as external compliance audits.

Interest Rate & Funding Risk

Being in a capital-intensive industry, fund requirements arise on account of inventory position building, capital expenditure undertaken or funding inorganic growth. Changes in interest regime & in the terms of borrowing will impact the financial performance of the company. The company makes judicious use of fixed & floating interest rate debts apart from continuously monitoring interest rate trends & managing the Capex plans as cash flow permits.

Foreign Exchange Risks

The Company has significant exposure in form of exports to and imports from various countries & thereby exposed to foreign currency exchange risk. Significant fluctuation in these currencies could impact the Company's financial performance. The Company is, however, conservative in its approach & uses plain vanilla hedging mechanisms in line with the internal policy.

Human Resources

AYM is at the juncture of transformation where not only the company's direction or Product mix is evolving but also the organization culture. For AYM to succeed the company believes that employees play a pivotal role in building the core competence, thereby achieving competitive advantage. Talent & Culture are two strategic drivers for AYM to achieve its business aspiration of becoming an emerging market leader. Talented & engaged workforce will help the Company to attain excellence through creating consistent value. The company has invested significantly in on-boarding leadership talent across the areas of Finance, HR, Exports, & Plant technical areas. The company's mission has been to attract & nurture talent to not only take the company to new heights, but also make them succeed individually & collectively. In the years to come, the company is sure about making itself a great place to work.

During the year, the Company strengthened its relationship with employees through maintaining a culture of harmony across the organization. Identifying internal training needs; designing & implementing those training programs to enhance knowledge, skills & doing various employee engagement initiatives has been a focus area in this year. Our company prides itself for its culture of care, concern, employee-centricity & transparency.

The organization ensures regular interventions to communicate & align members to organizational goals. This ensures that the entire organization is geared up towards greater performance delivery with collaboration. Multiple interaction forums have been designed among functions such that they are able to table their priorities & action upon them with requisite support from each other.

Organizational communication to employees has been strengthened with updates being shared regularly to all employees vide multiple channels. Besides, Management has laid special emphasis on making itself a performance led organization, with an introduction of objective Performance Management System (PMS). The organization is also working towards establishing a culture of appreciation by designing a robust reward & recognition scheme for its employees.

Industrial relations during the year were cordial.

Internal Controls

AYM has established a wide-ranging system of Internal Controls to ensure that all assets are safeguarded & protected. Further, the system is designed to adequately ensure that financial & other records are accurate & reliable for preparing financial information & other data. The MIS forms an integral part of the Company's control mechanism & thus all operating parameters are monitored & controlled, with material deviations from the annual planning & budgeting.

The internal control procedures are augmented by an extensive program of internal, external audits & periodic reviews by the management covering various areas across the value chain like procurement, manufacturing, supply chain, sales, marketing & finance.

The Company has an integrated approach to management of risk & has formulated the framework for regulatory & risk management & regulatory compliance, which requires risk assessments & related policies, a control-based environment & activities, information & communication procedures, & a monitoring mechanism for the control environment.

The management believes that strengthening Internal Controls is a continuous process & therefore it will continue its efforts to make the controls smarter with a focus on preventive & automated controls as opposed to mitigating & manual controls.

Financial Performance Overview

During the year ended 31st March 2017, the company registered revenue from operations of Rs 786.8 crs, a decline of 2% over previous year. The volume growth underlying this revenue growth declined by 10% over previous year. Profit after tax (PAT) for the year was Rs 40.1 crsvs Rs 47.8 crs in FY 16.

The following tables summarize the results of operations for the year ended March 31st, 2017:

	FOR THE YEAR ENDING MARCH 31						
Particulars	2	017	2016				
	Rs Crores	% of Revenue	Rs Crores	% of Revenue

Revenue

Net Revenue from operations stood at Rs 786.8 crs, a decline of 2% over previous year. Sales declined by 10% over the previous year in terms of volumes. Company focus was on getting the product sales mix right in the current year for sustainable profitable growth in future. Dip in sales is contributed by several macro factors like demonetization, political instability in a key international market like Turkey and excess capacity in the market on few product categories.

Cost of Materials

The cost of materials comprises consumption of raw material, packing material, dyes & chemicals, changes in inventories of finished goods, work-in-process, Consumption of consumables and stores and spare parts as well as Contract manufacturing expenses. The cost of materials at 51.7% of Net Revenue declined by over 200 basis points as compared to previous year on account of favorable sales mix leading to margin expansion. However, the Shortage of Caprolactam in the marketplace leading to an appreciation of raw material (Nylon chips) prices impacted the margins in the second half of the year.

Employee Costs

Employee cost includes salaries, wages, annual performance incentives, statutory bonus and gratuity, contribution to provident & other funds and staff welfare schemes expenses. During the year under review, employee cost as % of revenue is higher compared to last year mainly due to induction of qualified team at Head office & Plant.

Earnings before Interest, Tax, Depreciation & Amortization (EBITDA) Margins.

EBITDA in FY17 was reported at Rs 100.4 crs (12.8% margin) down from Rs 108.5 crs (13.5% margin) in FY 16. EBITDA margin was adversely affected by the increase in raw material prices, lower utilization of capacities & increase in energy cost.

Finance Charges

Finance charges include interest on loans and other financial charges. The increase in finance charges is in line with the increase in the Company's Debt position. Net Financial Expenses in FY17 was Rs 22.7 crs as compared to Rs 21.5 crs in the previous year. However, The costs of these facilities are constantly been reduced through judicial, planned & proactive fund management along with continuous monitoring and negotiations with lenders to garner the benefits accruing from money market changes. The Company continues to focus on judicial management of its working capital with various initiatives for bringing down the cost of borrowings.

Depreciation

Depreciation has increased from Rs 24.1 crs in FY 16 to Rs 30.3 crs in the current year. The increase is on account of capitalization of on-going modernization & expansion projects.

Tax Expense

The Effective Tax Rate (ETR) for the Company during FY17 was 16.1% as compared to 24.1% during FY16 on account of higher depreciation and R&D expenditure benefit. The company continues to be pay taxes under MAT provision in FY 17.

Profit after Tax

Profit after Tax stood at Rs 40.1 crs in FY17 as compared to Rs 47.8 crs in FY16 down by 90 bps as a % of Net revenue as compared to previous year.

Total Debt

Debt figure includes all the long-term & short-term borrowings, cash credits, Interest bearing acceptances as well as Buyers Credit. Gross Debt as on March 31, 2017, stands at Rs 287.5 crs as against Rs 278.7 crs at the end of FY 16. Cash and cash equivalents of the Company in FY17 stood at Rs 44.7 crs as compared to Rs 55 crs in the previous year. Net Debt as on March 31, 2017, stands at Rs 246.6 crs after reducing the cash and bank balance and liquid investment versus Rs 223.2 crs at the end of FY16. The debt has increased on account of lower EBIDTA & planned capex on capability enhancement and expansion.

Fixed Assets

Gross Block of fixed assets (tangible & intangible) including Capital work-in-progress stands at Rs 662.4 crs at end of FY17 as compared to Rs 583.5 crs at the end of previous year. This increase was mainly on account of capex for the capability enhancement & marginal capacity addition. Net block of fixed assets stood at Rs 345.9 crs as compared to Rs 296.5 crs in FY16.

Key Ratios

Key capital efficiency ratios for AYM Syntex have been highlighted here which provides a snapshot of the health of Balance sheet. Key ratios like the return of capital employed have reduced in the current year on account of lower profits & the continued infusion of capital employed in the form of planned CapEx. However other ratios like current ratio, Debt to Equity ratio & Debt service coverage ratio are fairly same as last year.

Key Ratios	FY 17	FY 16
Return on Capital employed (ROCE)	15.1%	21.6%
Working Capital (no. of days)	22	17
Current Ratio	1.26	1.24
Debt: Equity	1.03	1.11
Net Debt: EBIDTA	2.41	2.15
Debt Service Coverage Ratio	1.57	1.60

Outlook

With the expectation of Government Policies yielding favorable results, strong government reforms like GST, Make-in-India campaign, RBI's inflation focus, Digital India initiative etc., the Indian Textile Industry is set for good growth. India Ratings & Research has revised its outlook for synthetic textiles to stable for FY18 from negative for FY17. The stable textile outlook is in view of stable input prices, healthy capacity utilization & steady domestic demand scenario in FY18, however, there could be temporary challenges in the first half of the coming year on account of implementation of GST &volatile Raw material prices.

The company plans to compete on quality, consistency & innovation as opposed to cost & hence will continue to focus on expanding BCF market, partnering with key strategic customers in all the fronts & improve product quality & customer connect. The enhancing product mix of specialty & innovative products will be yet another focus area. While a lot of effort is yet required in the direction to change the organization culture, customer mix, product mix & the overall business model, coming year will be a key stepping stone into building a foundation & root system that could support such exponential growth in future.

Annexure C Form No. MR-3 SECRETARIAL AUDIT REPORT

For The Financial Year ended March 31, 2017

[Pursuant to section 204(1) of the Companies Act, 2013 and rule no.9 of the Companies (Appointment and Remuneration Personnel) Rules, 2014]

To,

The Members,

AYM Syntex Limited

I have conducted the Secretarial Audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by AYM Syntex Limited, (hereinafter called "the Company"). Secretarial Audit was conducted in a manner that provided me a reasonable basis for evaluating the corporate conducts / statutory compliances and expressing my opinion thereon.

Based on my verification of AYM Syntex Ltd's books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of Secretarial Audit, I hereby report that in my opinion, the Company has, during the audit period covering the financial year ended on 31st March, 2017 complied with the statutory provisions listed hereunder and also that the Company has proper Board processes and compliance mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

I have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the financial year ended on 31st March, 2017 according to the provisions of:

- (i) The Companies Act, 2013 (the Act) and the Rules made thereunder;
- (ii) The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the Rules made thereunder;
- (iii) The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder;
- (iv) Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings;

Auditor's Responsibility

3. Our responsibility is to express an opinion on these financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Opinion

4. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India,

of the state of affairs of the Company as at 31 March 2017, and its profit and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory requirements

- 5. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of Section 143(11) of the Act, and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the "Annexure A", a Statement on the matters specified in paragraphs 3 and 4 of the Order.
- 6. As required by Section 143 (3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

Annexure - B to the Independent Auditor's Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act") as referred to in paragraph 6(f) under "Report on Other Legal and Regulatory Requirements" of our report of even date to the members of **AYM Syntex Limited (Formerly Welspun Syntex Limited)** ("the Company") on the financial statements for the year ended 31 March 2017.

We have audited the internal financial controls over financial reporting of AYM Syntex Limited (Formerly Welspun Syntex Limited) ("the Company") as of 31 March 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial

controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes forming part of the financial statements

1. Corporate Information

AYM Syntex Limited (formerly Welspun Syntex Limited) is a Company incorporated under the Companies Act, 1956. AYM Syntex Limited was established in 1983. Since its inception, it has grown manifold and today is amongst the largest manufacturers and exporters of Polyester Texturised Filament Yarn, Nylon Filament Yarn and Bulk Continuous Filament Yarn from India.

2. Significant Accounting Policies

i) Basis of preparation of financial statements

The financial statements are prepared on going concern basis in accordance with Generally Accepted Accounting Principles in India (Indian GAAP) and comply in all material respects with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014, the Companies (Accounting Standards) Amendment Rules, 2016 and the relevant provisions of the Companies Act, 2013 and guidelines issued by the Securities and Exchange Board of India (SEBI). The financial statements have been prepared on accrual basis and under the historical cost convention. The accounting policies adopted in the preparation of these financial statements are consistent with those of previous year.

ii) Use of estimates

The preparation of the financial statements requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amount of revenue and expenses of the year. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements. Actual results could differ from those estimates and in such case the difference is recognized when known or materialized.

iii) Property, plant and equipment

- a) Property, plant and equipment (excluding freehold land which is carried at cost) are stated at original cost of acquisition / installation (net of cenvat credit availed) net of accumulated depreciation, amortization and impairment losses, if any. Cost includes cost of acquisition, construction and installation, taxes, duties, freight, other incidental expenses related to the acquisition, trial run expenses (net of revenue) and preoperative expenses including borrowing costs incurred during pre-operational period.
- b) Capital work-in-progress comprises cost of property, plant and equipment and related expenses that are not yet ready for their intended use at the reporting date.

Depreciation on property, plant and equipment

- a) Depreciation on property, plant and equipment is provided on straight line method based on the useful lives specified in Schedule II of the Companies Act, 2013. Depreciation on both Partially Oriented Yarn (POY) and Bulk Continuous Filament Yarn (BCF) plant and machinery is charged as continuous process plant based on technical opinion taken by the Company / Expert.
- b) Leasehold improvements are amortized over the normal period of lease.

iv) Intangible assets

Intangible assets acquired are measured on initial recognition at cost and stated at cost, net of accumulated amortization and impairment loss, if any.

Amortization of intangible assets

Intangible assets are amortized on a straight-line basis over the economic useful life estimated by the management.

Notes forming part of the financial statements

v) Impairment of property, plant and equipment and intangible assets

At each balance sheet date, the Company reviews the carrying amount of property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered impairment loss. If any such indication exists, the recoverable amount of the assets is estimated in order to determine the extent of impairment loss. The recoverable amount is higher of the net selling price and value in use, determined by discounting the estimated future cash flows expected from the continuing use of the asset to their present value.

vi) Borrowing costs

Borrowing costs attributable to the acquisition or construction of qualifying assets till the time such assets are ready for intended use, are capitalized as part of the cost of the assets. All other borrowing costs are expensed in the period they occur.

vii) Revenue recognition

- a) Revenue from sale of goods is recognized on transfer of significant risks and rewards of ownership to the customers. Gross sales include excise duty and adjustments for price variations and are net of sales tax / value added tax. Consignment sales are recognized on confirmation from consignee / consignment agent. Export sales are accounted for on the basis of date of bill of lading.
- b) Export incentives / benefits are accounted on accrual basis.
- c) Revenue from services is recognized when the services are completed.
- d) Dividend income is recognized when right to receive the dividend is established.
- e) Interest income is recognized on a time proportion basis taking into consideration the amount outstanding and the applicable interest rate except interest income from customers which is accounted on receipt basis.

viii) Operating lease

Lease of assets under which all the risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments under operating leases are recognized as an expense on accrual basis in accordance with the respective lease agreements.

ix) Investments

- a) Investments, which are readily realizable and are intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.
- b) Long-term investments are stated at cost less provision for diminution other than temporary, in the value of such investments. Current investments are stated at lower of cost and fair market value determined on individual investment basis.

x) Inventories

Inventories are valued at lower of cost and estimated net realizable value. The basis of determining cost for various categories of inventories is as follows:

- a) Cost of raw materials, stores and spares, dyes and chemicals and packing materials are determined on moving average cost method.
- b) Cost of finished goods and goods-in-process includes cost of direct materials, labour and other production overheads.
- c) Excise duty is included in the valuation of inventory of finished goods.

Notes forming part of the financial statements

xi) Accounting for taxes on income

- a) Current tax is determined as the amount of tax payable in respect of taxable income for the year as per the provisions of the Income Tax Act, 1961.
- b) Deferred tax is recognized subject to consideration of prudence, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods and measured using relevant enacted tax rates.
- c) Minimum Alternate Tax (MAT) paid in accordance with tax laws, which give rise to future economic benefits in the form of adjustment of future tax liability, is recognized as an asset only when, based on convincing evidence, it is probable that the future economic benefits associated with it will flow to the Company and the assets can be measured reliably.

xii) Retirement and other employee benefits

- a) Short-term employee benefits are recognized as an expense at the undiscounted amount in the statement of profit and loss of the year in which the related services are rendered.
- b) Post-employment and other long-term benefits are recognized as an expense in the statement of profit and loss at the present value of amounts payable determined using actuarial valuation techniques in the year the employee renders the services. Actuarial gains and losses are charged to the statement of profit and loss.
- c) Payments to defined contribution retirement benefit schemes are expensed as they fall due.

xiii) Foreign currency transactions

- a) Transactions in foreign currency are accounted at the exchange rate prevailing on the date of such transactions. Current monetary assets and liabilities are translated at the exchange rate prevailing at the reporting date. Non-monetary items are carried at cost.
- b) Gains or losses arising on settlement / translation of foreign currency monetary assets and liabilities at the year-end rates are recognized in the statement of profit and loss except treatment as per amendment to AS-11 effective till 31 March 2020 (Refer note 37).
- c) In respect of forward contracts assigned to the foreign currency monetary assets and liabilities as at balance sheet date, the premium / discount for the period up to the date of balance sheet is recognized in the statement of profit and loss. The exchange difference measured by the change rate between the inception of forward contract and date of balance sheet is applied on foreign currency amount of the forward contract and is recognized in the statement of profit and loss. Profit or loss on settlement / cancellation of forward contract is recognized as an income or expense for the year in which they arise except treatment as per amendment to AS-11 effective till 31 March 2020 (Refer note 37).

xiv) Earnings per share

Basic earnings per share is computed and disclosed using the weighted average number of equity shares outstanding during the year. Dilutive earnings per share is computed and disclosed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the year, except when the results would be anti-dilutive.

xv) Provisions, contingent liabilities and contingent assets

Provisions involving substantial degree of estimation in measurement are recognized when there is present obligation as a result of past events and it is probable that there will be an outflow of resources. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Contingent liabilities are not recognized but are disclosed in the financial statements. Contingent assets are neither recognized nor disclosed in the financial statements.

NOTES

NOTES

THE AYM LOGO

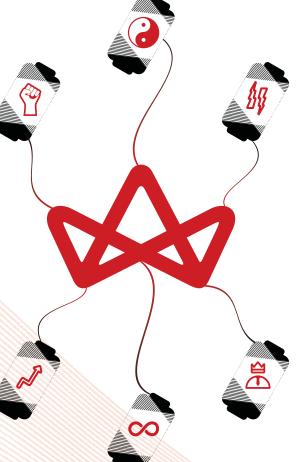

Representing a new direction of the organization as it defines the core DNA & philosophy

The contours of the logo are seamless, suggesting a fluid & harmonious work environment born of a cohesive work ethic. The flow of the lines of the logo is in continuum indicating smooth and efficient performance & inner strength. This inner strength is indeed the epitome of all that the corporation desires to achieve.

The aim of the logo is to stand for the collective & exponential strength derived from the team and the people, talents & skills, vision & mission. The aim has been to imbue this new entity with energy & spirit, speed & dynamism.

The three turrets of the logo stand tall against the business backdrop, defying all vicissitudes and odds and making a statement through policies, practices & a ceaseless innovative spirit. The tallest of them rises as an arrow, pointing northwards towards the pinnacle of achievement. This is a true representation of our collective effort to rise above the ordinary &

achieve the extraordinary.

To that end, the colour red symbolizes a red - blooded zeal, a purpose and a youthful, vibrant approach.

and M, the logo forms a unique crest, a distinctive crown – an unmistakable insignia of leadership and powerful bearing. Taken as a whole, the logo is alive, vital, born of an inner strength and an energy waiting to be unleashed. It is a stronghold of excellence that is, & always will be, unassailable & unbeatable.

Made from the letters A, Y

The base of the logo forms an infinity symbol – again a reiteration of the endless potential & boundless flow of imagination. This is the infinite energy, the unstoppable power, the inner strength and stamina that will form the bedrock of a limitless future.
