## Management Discussion and Analysis

Foundry Services was born of an idea that took shape in a small town of Birmingham in England in 1932. “**FOSECO**” as the name stands originates from the term **FO**undry **SER**VICES **CO**mpany. One of the most recognised brand names in the world, it has become an integral part of the foundry industry as a supplier of high quality consumable products to the various sectors.

FOSECO is the Foundry Technologies Division of Vesuvius Group plc which has presence in six continents. Vesuvius Group is engaged in supporting the development of global steel and foundry manufacturing processes with new technologies. It has manufacturing capabilities in all the main steel and foundry markets in the world. It trains its engineers who are progressively integrated within the Vesuvius network of experts. Local manufacturing, local expertise and leveraging global knowledge of the foundry processes positions Foseco in a special relationship with its customers. Helping them optimise their processes and product performances, it provides its customers, products and expertise to create best solutions and reap full benefits for success.

### Industrial Sectors

Foseco services the needs of the following industrial sectors:

### Foundry Process

The foundry process is highly sequential and, similar to the continuous casting of steel and is critically dependent on consistency of product quality and productivity optimisation. Foseco is a leading supplier of consumable products, solutions and associated services in the areas of foundry process as shown below:

### Business Model

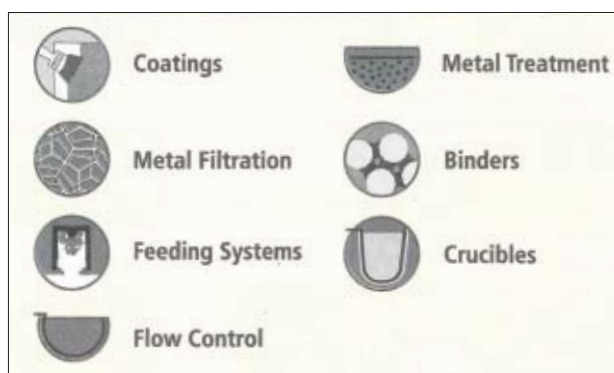

Foseco operates a profitable, flexible, cash generative and growth-building business model centred around strong Customer Relationships and local presence. We have built the brand equity of our products through reliability, technology and service over many decades. We provide a comprehensive range of foundry technologies, equipment and consumable supplies backed by world-leading foundry process and product application expertise. These are delivered to the customers by an international team of experts, passionate about consistently creating better castings through a partnership model with Foundries. The value addition is made through improvements in process capability, casting yields, resource utilisation, efficiency and development of new business opportunities.

### Business strategy

Foseco India follows a strategy known as “Solution Partnering” that is founded on its five core area of strength viz., Product Technology, Application Expertise, Process Knowledge, Process Control and Customer Relationships. The Solutions offered help the customers in conserving natural resources e.g. energy consumed in metal handling and reducing the number of melt heats by pouring more

number of castings per mould. It continually works to improve its Solutions offerings and thereby deliver the Greatest Value to its customers.

**Product Technology:** Foseco is the only supplier to offer products and services across the entire foundry process in Ferrous and Non Ferrous foundries. The offerings are further strengthened with the Vesuvius range of products for melt shops and pouring stations. The global proprietary consumable product technology consists of:

**Application Expertise:** Foseco has in-depth knowledge of customers' operations and application of its products across wide range of foundry processes.

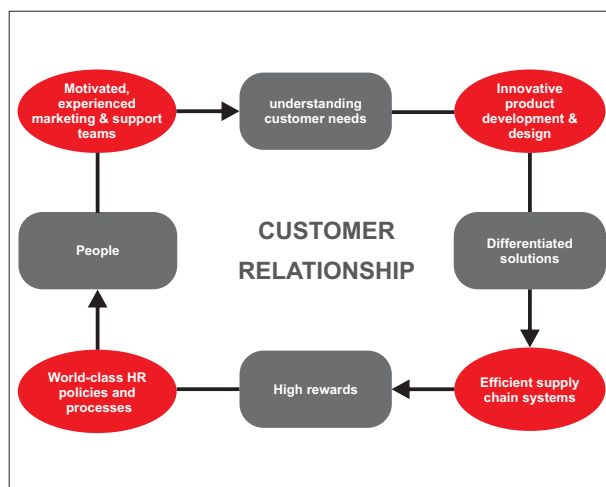

**Process Knowledge:** Foseco's Engineers possess in-depth understanding of customer's processes for manufacturing of casting from melting to post cast treatment.

## Quality and Reliability

Reliability in quality, delivery and all its interactions with its customers is intrinsic to Foseco's business model and part of its brand equity. It strives to deliver reliability and consistency through best-in-class quality management in its production sites and major customer locations. Its quality policy clearly defines the commitments and responsibilities which apply to all aspects of the business. Foseco has renewed its focus on quality, improving customer relationships and adding to operating efficiency.

## The Global Economy

United Kingdom's decision to exit the EU has brought complexity to the global financial markets. Brexit is expected to delay the recovery in global growth potentially reducing the flow of funds to India in the short term. The developments emanating from the US elections, demonetisation of the high value Indian currency notes, gradual rise in the prices of crude oil have caused uncertainties in the market. Fuel inflation has been inching up, and is likely to increase or remain elevated, in light of the OPEC's decision to reduce oil output. The result of these external factor will be felt during the coming period and will affect the foundry industry.

## Indian Economy – Opportunities and Threats

India being largely a domestically-driven economy, most investors, domestic and international, remain positive about its economic future. In 2016, the Indian economy witnessed a healthy GDP growth, better than China, comfortable trade and current account balance, adequate foreign exchange reserves and strong FDI inflows. While the Indian currency weakened (to around Rs. 68 to the US dollar) it has by and large remained stable. The inflation has been under control but the threat of high NPAs in banks looms over credit availability to the industry. The Indian economy is also entering a phase of digitisation, post demonetisation. The Government of India's dream project of transforming into "Digital India" will bring about the much needed transparency in business dealings largely done in cash. The Foundry industry with a large unorganised sector is expected to undergo change due to this potential shift away from cash. One of the biggest economic reforms, the Goods and Services Tax (GST) to be launched on 1<sup>st</sup> July 2017, will provide transparency and an opportunity for foundries operating in the small and micro sectors to become more organised. Your Company is in the process of preparing itself for GST, upgrading the ERP and actively engaging with its vendors and dealers for a smooth transition.

## Foundry Industry scenario – Future Outlook

China accounts for 44% of the total casting production in the World, whereas India and USA's combined share is 20%. In 2015, world casting production was 104.1 million MT. The world's two top producing nation in 2014 reported a drop in production. China's total decreased by 1.3% from 46.2 million to 45.6 million MT, while USA's production

dropped by 0.8% to 10.39 million MT from 10.47 million MT. The Indian foundry industry, on the other hand recorded an increase of 7.5% to 10.77 million tons rising to the 2<sup>nd</sup> position from the 5<sup>th</sup> position as a castings producer. It has a revenue of USD 18 billion and exports of approximately USD 2.7 billion and employs 2 million people (directly and indirectly) with one-third in the unorganised sector. Despite the growth in 2015, major foundries reported excess capacity due to low demand take-off from big industrial players and exports. Valve Industries were affected due to absence of any major projects, both domestic as-well-as global and Tractors and Pumps industries were hit by lower demand.

## Exports-Import Trends:

The growth in exports have picked up since 2012-13 and the trend continued till 2014-15. The year 2015-16 however, saw a slowdown in both exports and imports due to weak demand globally.

## New Government Initiatives

The Government of India's programmes of Make in India, Skill Development and Ease of Doing business are expected to drive the demand for castings. The Auto and Capital goods sectors have drawn ambitious growth plans which will impact a corresponding growth of the foundry sector. Auto sector has envisaged to grow to USD 300 billion by 2026 under the New Automotive Mission plan and the Capital Goods Policy foresees the sector to grow from USD 35 billion to USD 115 billion by 2025 providing new job opportunities to about 22 million people. These initiatives augur well for the foundry sector.

# Dissemination of Information to the Market Policy

**1. Introduction:** This document briefly summarises the policies and guidelines adopted by Foseco India Limited in relation to the Company's communications with investors, analysts and the Market generally. Any amendment to the Company's policies on these matters requires the approval of the Board of Directors.

**2. Responsibility for Communications:** The following individuals have exclusive responsibility (subject to the directions from the Board) for the Company's communications with the Market:

Pradeep Mallick - Chairman  
Sanjay Mathur - Managing Director

In the normal course, no other individuals within the Company are authorised to communicate with the investors, analysts or the Market without the actual involvement or express permission of at least one of the persons named above. The Company will arrange for appropriate training and advice to be provided to any individual involved in Market communications.

## UNAUTHORISED COMMUNICATIONS ARE PROHIBITED.

**3. Preparation and Release of Announcements:** The Company is required to take reasonable care in the preparation of formal announcements. The individuals named in Section 2 above will be responsible for coordinating the review and checking of announcements, in conjunction with advisers. It is particularly important to confirm in each case that nothing has been omitted which makes an announcement misleading. Verification procedures may also be necessary and undertaken with the assistance of advisers and the Company's Auditors prior to the release of some announcements to ensure no incorrect statement is made and that due consideration has been given to the content.

No announcement (including financial results) may be released without the express authority of the individuals named in Section 2 above, following the approval by the Board where required.

Release of announcements containing inside information must be made as soon as possible and posted on the Company's website by the end of the business day. If the Company is faced with an unexpected and significant event, a short delay may

be acceptable if it is necessary to clarify the situation.

Further, the Company must take reasonable care to ensure that the disclosure of inside information to the public is synchronised as closely as possible in all jurisdictions in which its securities are traded.

**4. Communications with Analysts:** There are legal risks in relation to "early or selective disclosure" of relevant information to third parties, including analysts. The Company's policy is that:

- as a strict rule, no meetings or scheduled communications with analysts will take place during closed periods;
- at no time can inside information be discussed with analysts;
- following release of interim or final financial results, the Company may discuss current trading in similar terms to any comments made in the announcement but will not brief analysts on expectations for results in the current year;
- communications with analysts outside closed periods are likely to be more frequent but in any event no unpublished relevant information will be revealed and care will need to be taken to avoid inadvertently divulging inside information, for example, where cumulative disclosure could amount to inside information;
- the Company will keep a contemporaneous note of meetings with analysts and try to ensure at least two representatives of the Company are present; and
- the Company will not correct an analyst's estimates or conclusions which it believes to be mistaken (whether in a draft or a published report), but through a formal announcement may correct any widespread misapprehension in the Market regarding the Company's trading or prospects.

**5. Insider Lists:** The Company must ensure that it and persons acting on its behalf (for example banks, accountants and lawyers) or on its account, draw up and maintain a list of those persons working for them, whether under a contract of employment or otherwise who have access to inside information relating, directly or indirectly, to the Company, whether on a

regular or occasional basis. The Company must also ensure that those on the insider list acknowledges the legal and regulatory duties entailed and are aware of the sanctions for misusing or improperly circulating the Company's inside information. Insider lists must be kept for at least five years from the date on which they are drawn up or updated, whichever is the latest.

6. **Records:** A record should be kept of any meetings or other scheduled communications with analysts, investors or journalists. Documents relating to the preparation and approval of the financial results and other announcements (including contemporaneous records of the Company's reasons for not making an announcement or for delaying an announcement) relating to Market communications, should always be prepared with care. This will include board minutes, internal memos, notes of meetings and board packs.
7. **Journalists / Newspapers:** Similar rules apply to communications with journalists as in the case of analysts. Inside information should not be released to a single journalist, analyst or newspaper.
8. **Leaks and Press Speculation:** The Company will not normally comment on rumours or speculations which appear in the media. If it appears that important unpublished information which amounts to inside information has been leaked to a newspaper, urgent consideration will be given to whether an announcement should be made. If the Market has reacted to the leak, a prompt announcement will normally be needed. An announcement may also be required if press speculation or market rumour regarding the Company is largely accurate without a leak having occurred and the information underlying

the press speculation or market rumour is inside information to which the Market is reacting and the confidentiality of the inside information cannot be ensured. However, the more accurate a rumour, the more likely it is that there has been a breach of confidentiality and that an announcement should be made as soon as possible. In addition, if there is a danger of inside information leaking before the facts and their impact can be confirmed or wherever the confidentiality of inside information cannot be ensured, a holding announcement should be released immediately. The level of detail required will depend on the circumstances.

However, the knowledge that a rumour or press speculation is false is not likely to amount to inside information. In the event it does amount to inside information, it may be possible for the Company to delay disclosure in accordance with the Disclosure Rules.

9. **Trading Updates:** In addition to regular announcements, consideration will be given at appropriate times to the formal release of trading updates (to enable fuller communication with the Market).
10. **Other Announcements:** During a closed period or at other times, the Company may be required to announce a significant development, such as a new contract or "preferred bidder" status on a concession. If such an announcement is required during a closed period, brief comment on the Company's forthcoming results may be misleading and should normally be avoided.

## **Annexure B to the Independent Auditors' Report – 31 December 2016**

Referred to in paragraph 2(f) in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of Foseco India Limited on the financial statements for the year ended 31 December 2016.

### **Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act**

We have audited the internal financial controls over financial reporting of Foseco India Limited ("the Company") as of 31 December 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

#### **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Control over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Annexure B to the Independent Auditors' Report – 31 December 2016 (continued)

### Inherent Limitations of Internal Financial Control over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 December 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on 'Audit of Internal Financial Controls Over Financial Reporting' issued by the Institute of Chartered Accountants of India.

## Notes to Financial Statements

### Note 1 : Company Background

#### Nature of Operations

The Company is engaged in the manufacture of products used in the metallurgical industry. The products are in the nature of additives and consumables that improve the physical properties and performance of castings. The manufacturing activities are at Sanaswadi and Puducherry.

### Note 2 : Significant Accounting Policies

The accounting policies set out below have been applied consistently to the periods presented in these financial statements

#### 1.1 Basis of Preparation of Financial Statements

The financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting and comply with the Accounting Standards prescribed in the Companies (Accounting Standards) Rules, 2006 which continue to apply under Section 133 of the Companies Act 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014. The financial statements are presented in Indian Rupees.

#### 1.2 Use of Estimates

The preparation of financial statements in accordance with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, revenue and expenses and the disclosure of contingent liabilities on the date of the financial statements. Actual results may differ from those estimates. Any difference between the actual results and estimates are recognised in the period in which the results are known / materialise. Any revision to accounting estimates is recognised prospectively in the current and future periods.

#### 1.3 Current and Non-current Classification

All assets and liabilities are classified into current and non-current.

##### Assets

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle
- it is held primarily for the purpose of being traded;
- it is expected to be realised within 12 months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets. All other assets are classified as non-current.

##### Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the company's normal operating cycle
- it is held primarily for the purpose of being traded;
- it is due to be settled within 12 months after the reporting date; or
- the Company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification

Current liabilities include current portion of non-current financial liabilities. All other liabilities are classified as non-current.

##### Operating Cycle

Operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalents. The Company's operating cycle is less than 12 months

## Notes to Financial Statements (continued)

### Note 2 : Significant Accounting Policies (continued)

#### 1.4 Tangible Fixed Assets and Depreciation

Tangible fixed assets are stated at cost of acquisition less accumulated depreciation. Cost includes inward freight, duties, taxes and other incidental expenses related to the acquisition, construction and installation of the fixed assets.

A fixed asset is eliminated from the financial statements on disposal or when no further benefit is expected from its use and disposed. Loss or gains arising from retirement on account of disposals of fixed assets are carried at cost and recognised in the Statement of Profit and Loss.

Depreciation on fixed assets is provided on the Straight Line Method ("SLM") pro-rata to the period of use. Depreciation is provided based on the following useful lives of the assets as estimated by the management. Assets individually costing Rs 5,000 or less are depreciated fully in the year of purchase.

Category / Group of Asset	Useful Estimated Life (in years)
Buildings	
Factory and Other Building	25
<b>Plant and Machinery</b>	
Computer Hardware	3
Production Machinery	10
Energy Saving Devices	6 / 7
Effluent Treatment Plant	5
Other Machinery	5
Machinery at Customers' / Processors' Site	4
<b>Laboratory and Office Equipment's</b>	
Laboratory Equipments	6 / 7
Office Equipments	5
Electrical Equipment	6 / 7
<b>Furniture and Fittings</b>	
Furniture and Fixtures	10
<b>Motor Vehicles</b>	
Vehicles	4

Leasehold land is depreciated over the initial period of the lease.

#### Note

For these class of assets, based on internal assessment and independent technical evaluation carried out by external professional valuer, the management believes that the useful lives as given above best represent the period over which management expects to use these assets.

#### 1.5 Intangible Assets and Amortization

Intangible assets representing computer software are recorded at their acquisition price and are amortised over their estimated useful life of 2 years on a straight line basis commencing from the date the assets are available for use. The useful life of the intangible assets is reviewed by the Management at each balance sheet date.

## Notes to Financial Statements (continued)

### Note 2 : Significant Accounting Policies (continued)

#### 1.6 Impairment of Assets

In accordance with Accounting Standard 28 - Impairment of Assets (AS 28), the carrying amounts of the Company's assets are reviewed at each Balance sheet date to determine whether there is any indication of impairment. If any such indications exist, the assets' recoverable amount is estimated, as the higher of the net selling price and the value in use. An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. If at the Balance Sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount, subject to a maximum of depreciable historical cost.

#### 1.7 Investments

Long-term investments are stated at cost less any other-than-temporary diminution in value, determined separately for each individual investment.

#### 1.8 Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and other costs necessary to make the sale. Cost is determined on the basis of weighted average method and includes expenditure in acquiring the inventories and bringing them to the present location and condition. In the case of manufactured inventories, cost includes cost of direct materials and labour and an appropriate share of overheads based on normal operating capacity of the production facilities. The comparison of cost and net realisable value is made on an item-by-item basis. Finished goods inventory includes excise duty payable.

Raw materials and other supplies held for use in production of inventories are not written down below cost except in cases where material prices have declined, and it is estimated that the cost of finished products will exceed their net realisable value.

#### 1.9 Revenue Recognition

Revenue from sale of goods is recognised when all significant risks and rewards of ownership of goods transfers to the customers. Sales are recorded net of sales tax / VAT, discounts and rebates.

Revenue from 'solutions partnering' services is recognized when the rendering of services is completed and to the extent that it is probable that the economic benefits will flow to the Company and the revenue from such services can be reliably measured.

Commission income is recognised on an accrual basis, when it is reasonably certain that the economic benefits will flow to the Company.

Interest income is recognised on a time proportionate basis taking into account the amount invested and the rate applicable.

#### 1.10 Foreign Exchange Transactions

Transactions in foreign currencies are recorded at the exchange rate prevailing at the date of the transaction. Exchange differences arising on foreign currency transactions settled during the year are recognised in the Statement of Profit and Loss of the year.

Monetary assets and liabilities denominated in foreign currency at the Balance Sheet date are translated at the year end exchange rate and the resultant exchange differences are recognised in the Statement of Profit and Loss.

#### 1.11 Cash and Cash Equivalents

Cash and bank balances in the Balance Sheet comprise cash at bank and in hand including bank deposits with an original maturity of three months or less.

#### 1.12 Employee Benefits

##### a) Short-term employee benefits

Employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits and are recognised in the period in which the employee renders the related service.

##### b) Post-employment benefits (defined benefit plans)

The employees' gratuity scheme is a defined benefit plan. The present value of the obligation under such defined

## Notes to Financial Statements (continued)

### Note 2 : Significant Accounting Policies (continued)

benefit plan is determined at each Balance Sheet date based on an actuarial valuation, carried out by an independent actuary, using the Projected Unit Credit method. The liability for gratuity is funded annually to a gratuity fund maintained with the Life Insurance Corporation of India ('LIC'). Actuarial gains and losses are recognised immediately in the Statement of Profit and Loss.

#### **c) Post-employment benefits (defined contribution plans)**

Contributions to the provident fund and superannuation scheme which are defined contribution schemes are charged to the Statement of Profit and Loss as incurred.

#### **d) Long-term employee benefits**

Long term employee benefits comprise of compensated absences. These are measured based on an actuarial valuation carried out by an independent actuary at each Balance Sheet date. Actuarial gains and losses are recognised immediately in the Statement of Profit and Loss.

### **1.13 Taxation**

Income-tax comprises current tax, (i.e. amount of tax for the year determined in accordance with the income-tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the asset can be realised in future; however, where there is unabsorbed depreciation and carried forward losses under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of the assets. Deferred tax assets are reviewed at each Balance Sheet date and written down or written-up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

### **1.14 Earnings Per Share**

The basic earnings per share ('EPS') is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding during the reporting period.

Diluted EPS is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity and equivalent dilutive equity shares outstanding during the year, except where the results would be anti-dilutive.

### **1.15 Provisions**

A provision is recognised in the Balance Sheet when the Company has a present obligation as a result of a past event and it is probable that an outflow of economic resources will be required to settle the obligation, in respect of which a reliable estimate of the amount of the obligation can be made. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

### **1.16 Contingent Liabilities and Contingent Assets**

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognised nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.
