Dear Sir / Madam,

Sub: Investor Presentation

Pursuant to regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we enclose herewith Investor Presentation on the Unaudited financial results of the Company for the quarter ended 30th June, 2025.

The aforesaid presentation has been uploaded on the Company's website viz., www.grpweb.com

You are requested to take the above information on your records.

Thanking you,

Yours faithfully,

For **GRP Limited**

Jyoti Sancheti

Company Secretary & Compliance Officer

encl.: a/a

INVESTOR PRESENTATION

Disclaimer

This presentation and the accompanying slides (the "Presentation"), which have been prepared by **GRP Limited** (the "Company"), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company's market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company's ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company's market preferences and its exposure to market risks, as well as other risks. The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third-party statements and projections.

Managing Director's Message

Commenting on the Q1FY26 performance of the company Mr. Harsh Gandhi, Managing Director for GRP Limited said,

"We began FY26 on a challenging note, with headwinds impacting both revenue and profitability. Total income for Q1 FY26 stood at Rs 1,247 million, reflecting a marginal year-on-year decline, primarily due to a 7% drop in volumes caused by global uncertainties and a temporary maintenance-related pause of one of our production lines, which resulted in utilisation levels of around 80% in the reclaim business. Revenue performance was impacted by an unfavorable geographic mix while domestic revenue registered a 5% year-on-year growth, export revenue declined by 9% amid softer demand in key overseas markets.

Despite upward price revisions, lower export volumes and an unfavorable product mix weighed on topline performance. Congestion at key ports disrupted shipments, while newly announced tariffs in the US led to sourcing uncertainties among global tyre manufacturers. Globally, in the first half of CY2025, Original Equipment (OE) markets remained subdued, while Replacement Tyre (RT) demand continued to show moderate growth. On the industry front, India's reclaim rubber exports rose 5% during the quarter lower than the FY25 10% growth—with shipments to Asia and North America declining by 14%.

Profitability was further pressured by sustained raw material cost inflation and mix challenges, although we made progress in optimizing operating expenses.

In the Non-RR segment, revenue rose 17% year-on-year, supported by growth in volumes. While Engineering Plastics volumes were impacted by subdued virgin polymer prices, Polymer Composite and Custom Die Forms recorded a healthy uptick in volumes, driving margin improvements through better scale and efficiency. Our Repurposed Polyolefins business continues to operate at a loss but is on a gradual path to improvement.

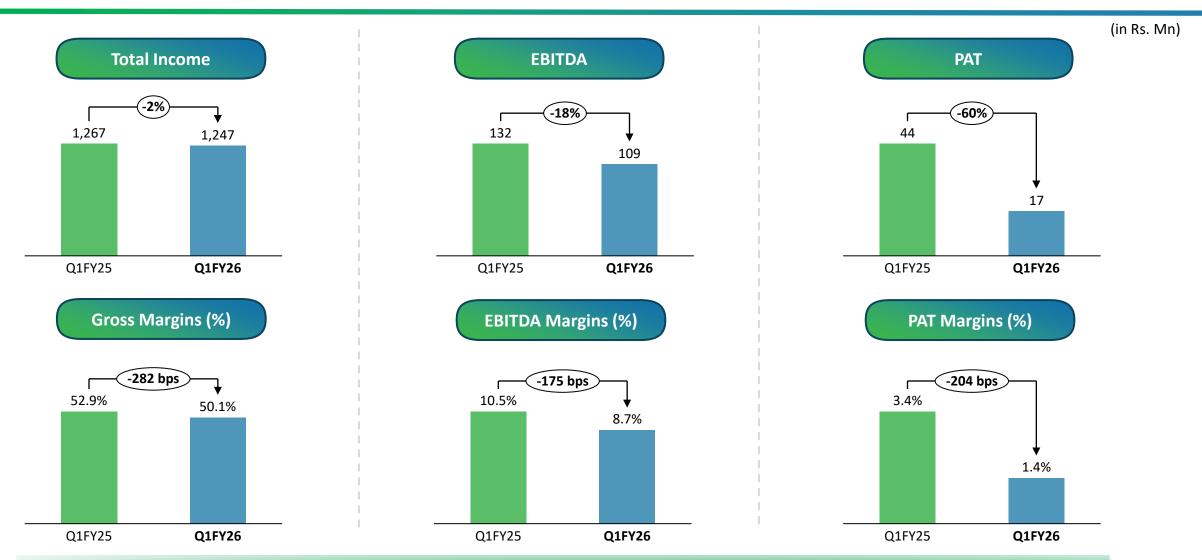

As part of our ongoing strategic investments, we drew €7.5 million from the Proparco-backed ECB facility till Q1 FY26. This will support the commissioning of our continuous pyrolysis facility at Solapur, with operations expected to begin soon.

We remain committed to navigating the current headwinds with resilience and agility, and shall continue to strive toward restoring growth and strengthening our business performance in the quarters ahead."

Q1 Performance Highlights - Consolidated

The income from subsidiaries GCSL and GSPL amounts to Rs 74 Mn, with an incurred loss of Rs 12 Mn. However, as these businesses scale and mature, we expect them to contribute meaningfully to the bottom line

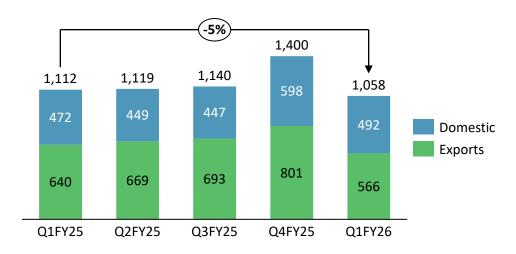

Segment Wise Quarterly Performance Trend - Standalone

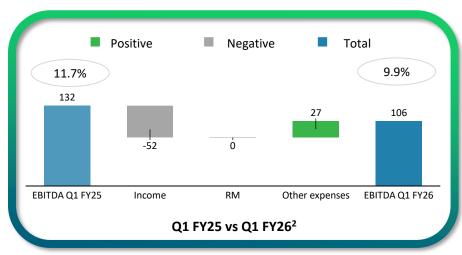

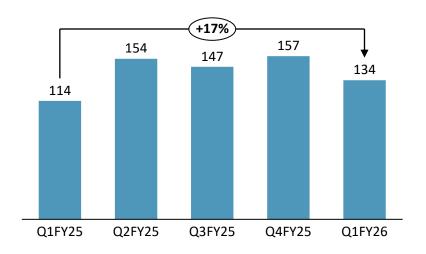

(in Rs. Mn)

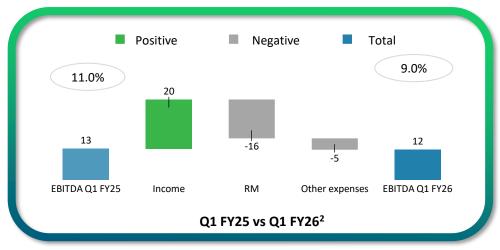

Reclaim Rubber Revenue Trend¹

Non- Reclaim Revenue Trend¹

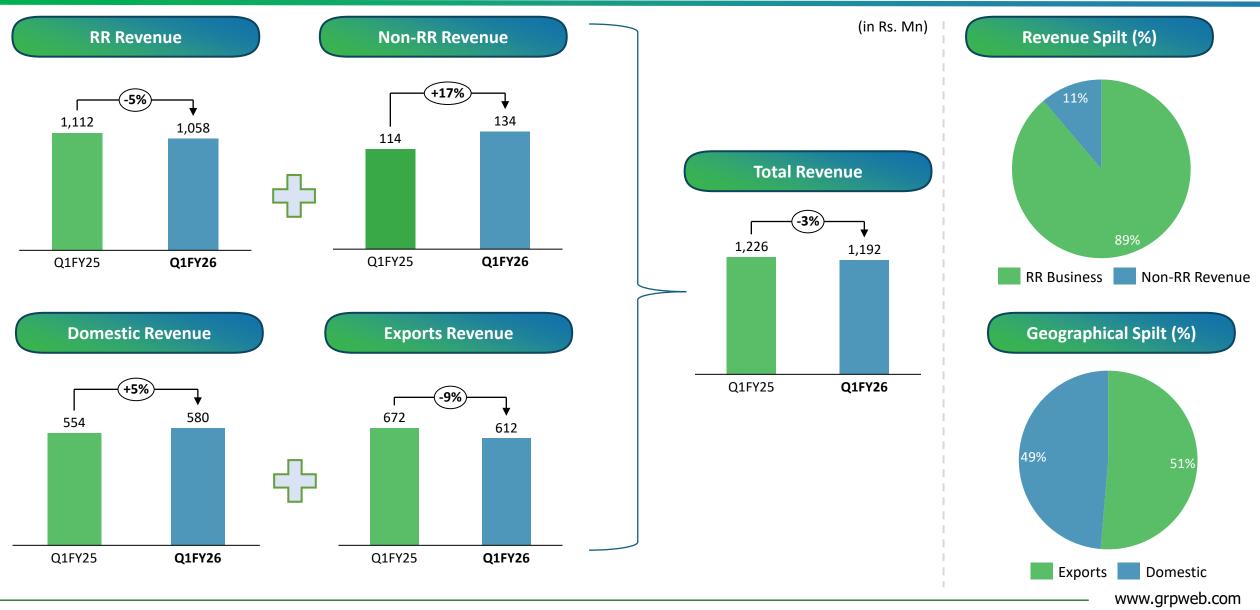

Segment Wise Revenue Split – Standalone

Key Highlights

Within the reclaim business, nearly 5% of potential export volume was lost due to tariffs and global uncertainties. An additional 8% of potential volume was lost by a temporary operational pause for maintenance, the line is now operational

Income for the quarter includes an accrued EPR income of Rs. 4.56cr

Gross margins for the year declined due to continued inflation in raw material costs for specific rubber grades and an unfavorable shift in product and geographic mix. On average, the cost of this grade rose by nearly 37% compared to the previous year

Employee costs declined from 12.6% to 12% of income year-on-year, despite lower revenues, reflecting the benefits of our automation efforts

Renewable power and biofuel initiatives, now an integral part of our operations, drove a 72% increase in savings this quarter compared to Q1 FY25, supporting continued reduction in GHG emissions

Strategic CAPEX Announcement: Investing in Future Growth and Operational Excellence

KEY TAKEAWAYS

- The total funding requirement for these projects will be met through a combination of internal accruals and debt, as deemed appropriate
- The planned expansion for the proposed projects shall be done at the company's existing sites
- Phase 1 of this investment will entail a capital expenditure of up to Rs. 150 crores, to be deployed until December 2025

Capex upto Rs 250 Crores - This investment will be executed in two phases over a period of three years

Phase 1 - Rs 150 Crores to be deployed until December 2025

Phase 2 – Remaining amount to be utilized

Capex will focus on the following projects...

- Deployment of new technology to produce reclaim rubber with lower CO₂ emissions
- Expansion of our capabilities in crumb rubber and other categories identified under Tyre EPR
- Expansion of the plastic recycling business

Company has so far incurred Rs. 61 crore towards project to manufacture Crumb rubber, Tyre Pyrolysis Oil and Recovered Carbon Black, the crumb unit of this integrated facility has commenced operations in Q4 FY25

CAPEX Funding Plans

- Company will be availing term loan by way of External Commercial Borrowings (ECB) upto Euros 15 million from Société de Promotion et de Participation pour la Coopération Economique S.A. France (PROPARCO) for partial funding of projects.
- Projects will be partly funded by raising of funds by way of issuance of equity shares or other eligible securities for an aggregate amount not exceeding Rs. 150 crore (Rupees One hundred and Fifty crore) by way of qualified institutions placement ("QIP") or other permissible mode in accordance with applicable laws, subject to the receipt of the necessary approvals as may be required.

Profit & Loss Statement - Consolidated

GRP Is A Marquee Scalable Integrated Polymer Recycling Company

*Includes capacity of Crumb capacity added in Q4 FY25

With Clear Vision And Values...

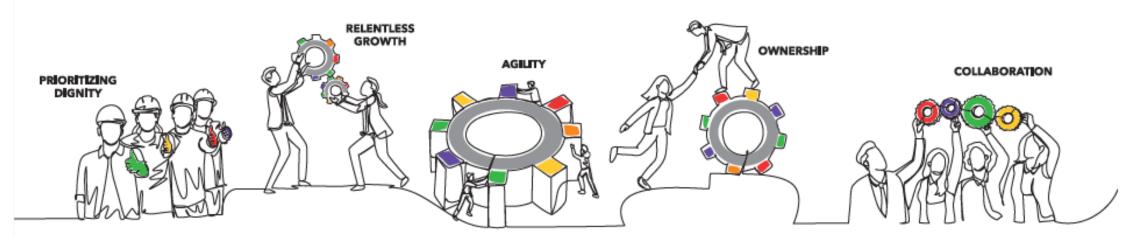

Company

GRP is a sustainable materials producer that helps brand owners fulfil obligations for responsible use of end-of-life waste

Our Vision

The trusted global partner offering innovative sustainability solutions, committed to responsible value creation for all stakeholders

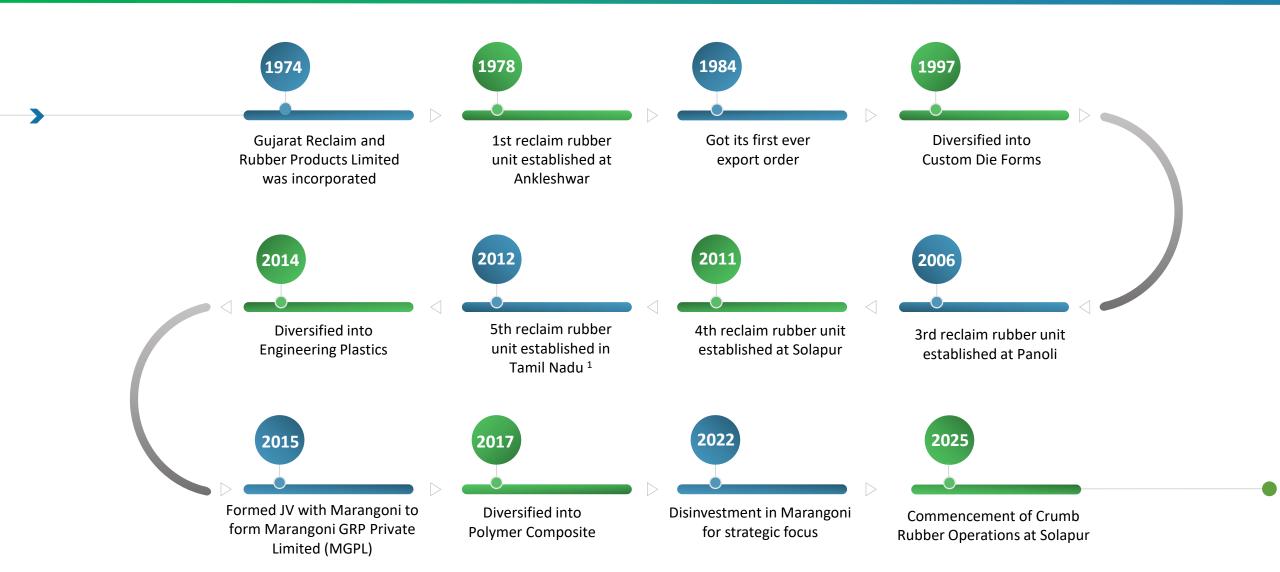

OUR VALUES

5 Decades Of Journey Towards An Integrated Recycling Platform

Pioneering The Value Chain With 5 Business Verticals And Diverse Customer Segments...

Business Verticals

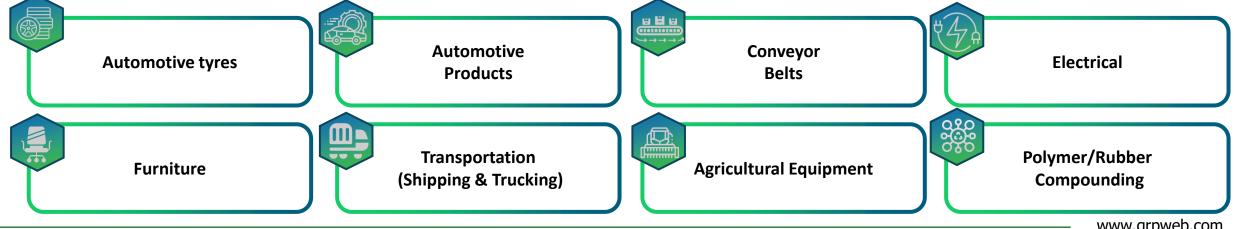

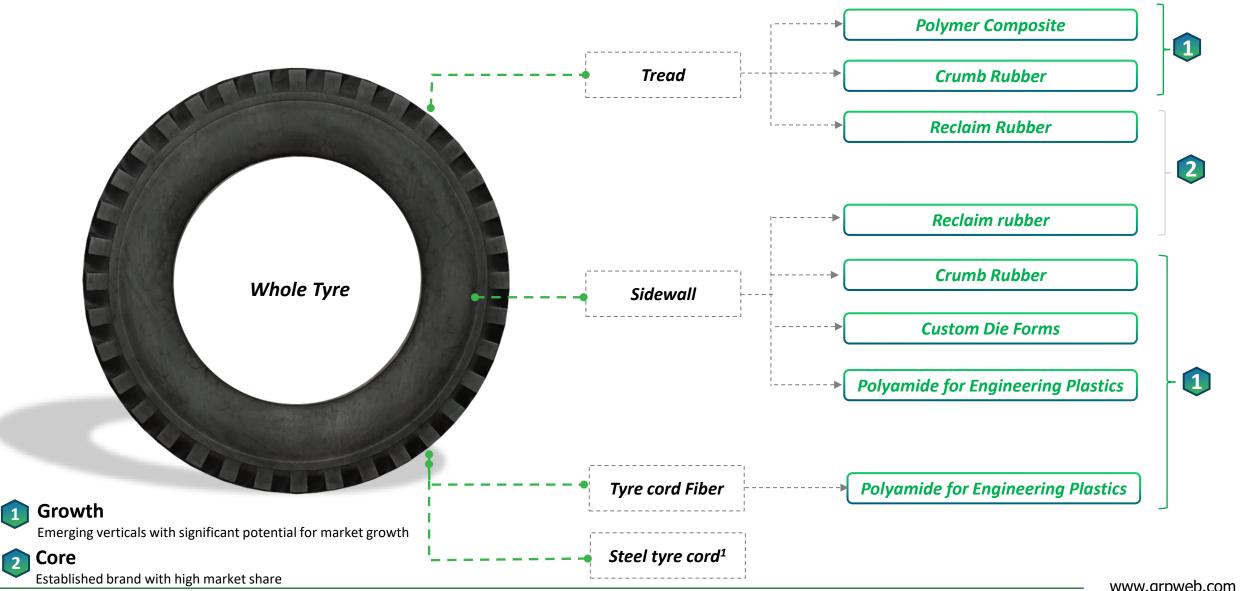

Key Customer segments

Maximizing the Use of End-of-Life Tyres Across Verticals

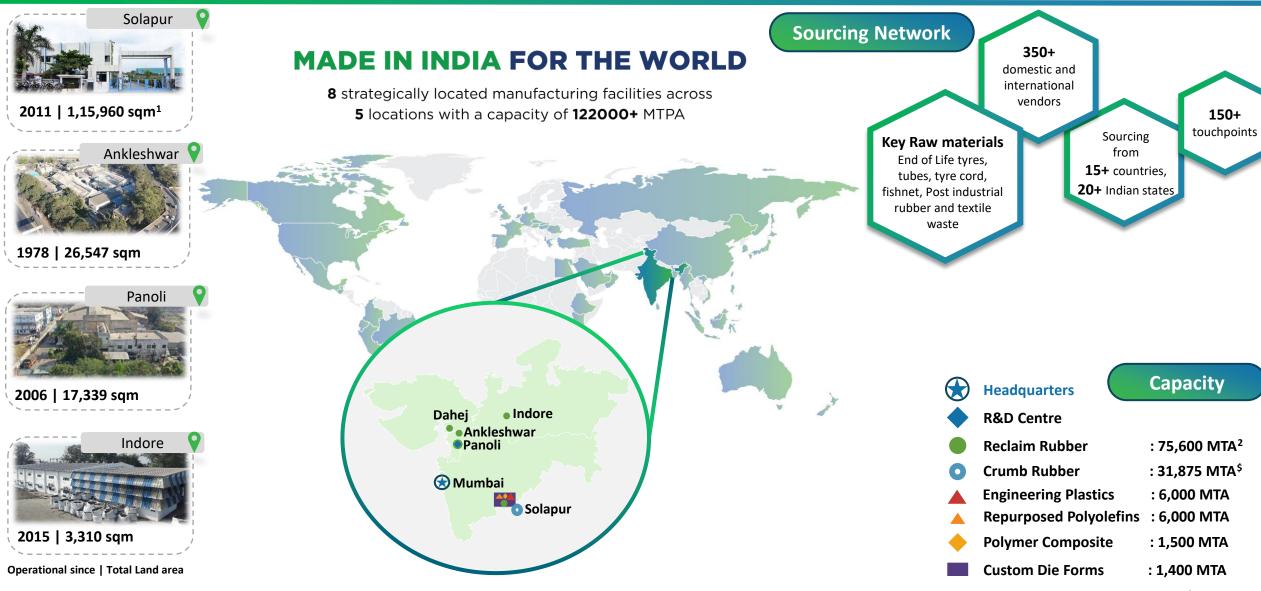

1 Sold to local steel rolling mills

Made In India For The World With Well-diversified Procurement Network

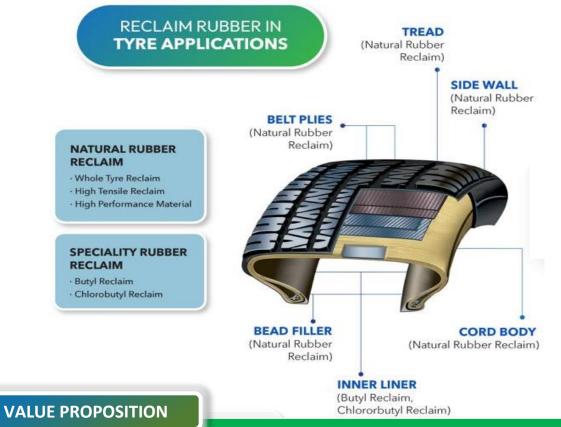

Wide Range of Applications for Reclaim Rubber

RECLAIM RUBBER IN NON-TYRE APPLICATIONS CONVEYOR **TUBES** ROOFING SYNTHETIC RUBBER RECLAIM EPDM Reclaim TREAD RUBBER SPECIALITY RUBBER RECLAIM · NBR Polycoat MATTING WEATHER **STRIPS** AUTOMOTIVE COMPONENTS Gaskets Bushes Profiles

ECONOMIC

- Cost-saving by replacing virgin rubber & Carbon Black
- Reduced processing costs

PROCESSING

- Faster mixing cycle & Improved extrusion rate
- Reduced splicing defects
- Controlled die swell

ENVIRONMENTAL

- Provides alternative to hazardous, landfills
- Substitutes natural rubber & crude based synthetic rubbers saving scarce natural resources
- Reduces carbon emissions by 3-5MT per ton

Advanced solutions for Engineering Plastics and Repurposed Polyolefins

ENGINEERING PLASTICS

POLYAMIDE 6

- High quality engineering plastic, used in applications requiring superior mechanical properties
- Appropriate for customers seeking weight savings, function integration and design freedom

Engine Cover

MCB Cover

Chair Star Base

REPURPOSED POLYOLEFFINS

ICPP

Used across various applications in the automotive and industrial sectors

Paint Pail

Lubricant Pail

Automotive **Battery Cover**

PBT

- Used primarily in electrical/electronics applications
- Highly heat-resistant up to 150 degree C (or 200 degree C, if reinforced)
- Has low moisture absorption and high dimensional stability

Connectors

Bulb Housing

Consumer **Appliances**

TPE - PP BASED ELASTOMERS

- Blend of EOL PP and EPDM reclaim rubber from EoL tires
- Improved flexibility, impact resistance and low temperature performance

Basket

Gear Knob

Castor Wheels

POLYAMIDE 66

- Offers higher toughness with high hydrolytic stability
- PA66 is well-known for flowability and quick crystallization
- Used in highly stressed technical parts and electrically insulating parts

Automotive Fasteners

Wiper Motor Cover

Cable Ties

PP GLASS FILLED AND TALC FILLED **COMPOUNDS**

 Used across various applications in the household, automotive and electrical sectors

Consumer **Appliances**

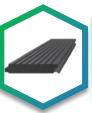

Dashboard Components

Polymer Composite and Custom Die Forms For Diverse Industries

POLYMER COMPOSIT

BOARDS

- Highly customizable boards include tongue and groove, lug boards, planks etc.
- Trailer decking application as an alternative to steel and wood leads to a 25% -28% reduction in carbon footprint coupled with a reduction of 1 MT of solid waste generated

WHEEL CHOCKS

Used by commercial vehicles and planes to prevent accidental movement

DUNNAGES

- Largely used to secure and support the cargo
- Used for storage and distribution of steel as coil rest
- Used to protect corner cracks in glass applications

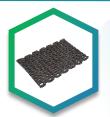

PALLETS

- Combat offload pallets are used in military for Container Delivery Systems, and Aerial Drop Training, as it sustains heavy weight and heavy impact.
- Rigid material used to load and secure in transportation and warehousing

BUMPERS

 Used by commercial vehicles to withstand impacts and protect the front and rear from damage during collisions

LINK MATS

 Installed for workplace safety to provide impact absorption and grip at industrial sites

VIBRATION PADS

 Assisting in noise reduction, employee safety, and machinery & equipment protection

FORMS

CUSTOM DIE

DOCK FENDERS

 Installed to provide protection to trailers, vehicles, loading dock equipment, etc.

HARVESTOR BLADES

Used in agriculture harvesting machines

SNOW MOVING BLADES

Rubber pads used to plow snow in snow moving equipment

Note: Applications presented are not exhaustive

In-house R&D - Driving Innovation In Product, Process, and Application

GRP has developed an in-house R&D for Product, Process and Application Research

Department of Scientific & Industrial Research Recognized

Product:

Continuous development of new products and categories

Process:

Development / improvement of sustainable processes

Key Principles

Application:

Products designed to adhere to customer needs

Product:

- The R&D team develops new grades in response to market demand
- These grades enable customers to substitute virgin compounds more effectively

Process:

- Focused efforts on reducing CO₂ emissions through process innovations that minimize the use of coal, oil, and natural gas in manufacturing
- Developed proprietary mechanical devulcanization processes, replacing the previously used thermal methods

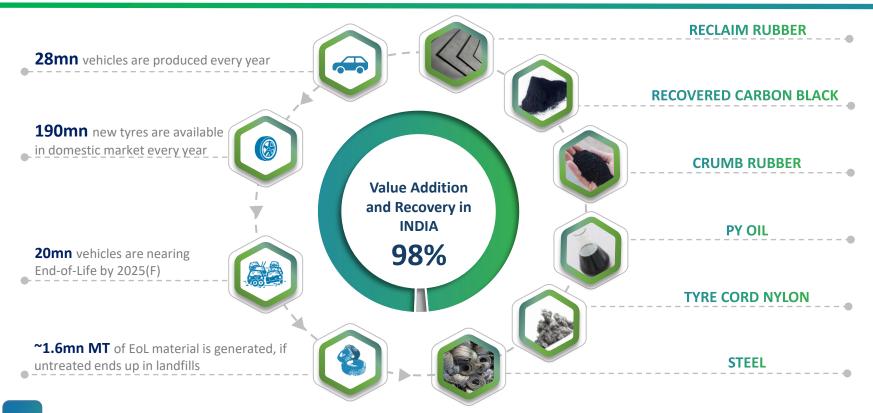

Application:

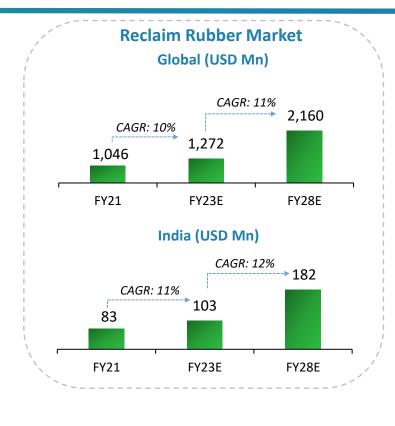

- Joint R&D to help customers utilize higher content of recycled materials as substitutes
- Concentrated efforts on reclaiming materials from non-tyre sources for broader use in the rubber industry

Limitless Possibilities In Waste To Wealth With Growing Market Globally

Drivers Growth

Rising focus on sustainability by governments across the globe as the need for circular economy and environment friendly products / process gain steam

Focused efforts by leading tire manufacturers globally who have set sustainability targets to achieve c. 40% sustainable sourcing by 2030 and c. 100% carbon neutrality / sustainable sourcing by 2050

Introduction of EPR guidelines shall further lead to increased usage of sustainable materials manufacturers and add a revenue stream for recyclers without additional capital expenditure

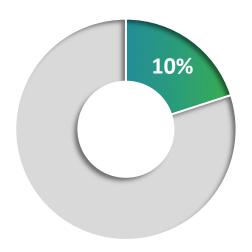

India is one of the fastest growing automotive markets globally across both passenger and commercial vehicles, and has emerged as the 3rd largest market by volume in 2022

Significant Growth Opportunities in the Plastic Market

Plastic waste generation

Globally, around 400mn MTA of plastic waste is generated, 10% of this is recycled

Rest is either incinerated or dumped into landfills or leaked into the environment.

Key Growth Drivers and Synergies

Nylon

Access to in-house raw material:

 Nylon extracted from end-of-life tyres provides raw material for the plastics vertical, thus increased tyre processing enhances access to secondary Nylon

Growing end-use applications:

 Significant growth driven by rising demand across various end-use applications like automotive, electrical, building and construction, etc.

Sustainability focus:

 Increased focus on use of sustainable materials across the value chain by leading manufacturers globally

Polypropylene

Rising demand for recycled polypropylene:

 Robust growth in demand due to rapid increase in usage of recycled polypropylene in packaging and allied sectors

Demand supply gap of Virgin Polypropylene:

 Shortfall in supply against growing demand is increasing imports and reducing exports of Virgin polypropylene

Introduction of sustainability guidelines:

Introduction of EPR coupled with increasing sustainability targets of brand owners, has further accelerated the demand for recycled material

Well Entrenched Customer Relationships With Reputed Tyre And Non-tyre Customers

40+ percent

Customers have been associated with GRP for >10 years in reclaim rubber

Celebrating Excellence: Awards and Accolades Recognizing Our Achievements

Recent inclusion to our achievements

Crisil Rating

Target of 30% women participation in workforce by 2030

HIGHLIGHTS

Zero Liquid
Discharge
Operations

Green Tech
Investments
Products
with LCA results

37%¹

Energy needs harnessed using renewable sources – up from 11% last year

59%¹

Reduction in Scope 1 emissions and **18%**¹ reduction in combined Scope 1&2 emissions per rupee turnover

Sustainable Development Goals (Adopted By GRP)

GRP believes in 'giving back to the society and the planet', it has shown a high level of engagement across following six out of the seventeen SDGs adopted by all UN member states to build a better world for people and planet

Wellness initiatives

Health checkups, Stress management, Holistic wellness, Yoga, Dance sessions, Power nap at HO, Birthday celebrations

Healthcare support

Outdoor workforce safety, Fire safety

Substance abuse awareness

Community contribution

Educational donations at Orphanage homes, Visually impaired and special needs children school

Mobile Education Vans

Internship opportunities for students

Encouraging employees in pursuit of higher education

Signatory of the UN WEP

Support for women entrepreneurs

Creating appropriate infrastructure and environment for women workers

POSH awareness sessions

Celebration of men's and women's day

Drinking water stations and toilets for girls

Water coolers at plants

Zero Liquid Discharge Operations

Installation of Effluent Treatment Plants and Multiple Effect Evaporator systems to enhance wastewater treatment

Target to harness 50% of energy needs through renewables by 2025

Way ahead with solar energy as a sustainable solution

Investments in wind solutions

Greener technologies and energy sources such as Biofuel systems to reduce carbon emissions

Recycling, reusing and reducing EoL tyres, plastics and converting into sustainable materials through multiple verticals

Responsible packaging -Reduction in Wooden pallet consumption

Replaced diesel forklifts with electric forklifts

CSR - Leading Positive Initiatives For A Better Future

At GRP, CSR contributes in shaping the 'How' and the 'Why' of almost every activity we undertake. Over the years, we are happy to have played a role in giving back to the community through our products as well as our CSR activities. We are grateful to have witnessed the positive impact of our efforts; in making a long-lasting difference to the people of India and the world at large

- Mobile vans for elementary education
- Vocational training for adult education
- Merit based scholarship to support University Education
- Strengthen / support existing institutes engaged in providing primary, secondary and higher level education

SUSTAINABLE LIVELIHOOD

- Vocational training aimed at employability
- Supporting initiatives around Yoga, meditation and self-help
- Awareness programs for clean living/housing facilities
- Awareness programs on hygiene, safe water
- Encouraging plantation of trees through self help groups of women

HEALTHCARE

- Primary healthcare centres
- Mobile healthcare projects
- Healthcare through awareness programs
- Blood donation camps
- Sponsorship for Dialysis center

WOMEN EMPOWERMENT

- Girl child education upto University
- Supporting groups for women empowerment
- Building toilets for better women hygiene
- Rewards to women leaders who created positive change in villages

Key Rights to Win: Strategic Advantages for Market Leadership

GRP has built a reputable recycling brand which is trusted by leading brand owners globally

Future Growth Pillars For The Business Across The Value Chain To Drive Profitability

GRP has established a reputable and scalable platform which can be leveraged to achieve the next level of growth

Consistent growth in existing business

Demand for sustainability

 Leading companies globally have committed to achieve high sustainability targets in the near future, which shall significantly drive need for sustainable materials

Government focus on sustainability

 Governments globally and in India have introduced various regulations in order to achieve sustainability, placing high emphasis on supplier selection

R&D Capability

- Ability to partner with leading global peers to further enhance technology and maintain leadership profile
- Set to launch a new low cost and high margin reclaim product developed in-house

2

EPR guidelines in India

- Additional revenue stream for companies like GRP without further investment
- Since GRP mainly sources domestically through its extensive supplier network, liability to buy credits for imported EOL tires is minimal

Strong growth in existing business with deeper market penetration

At the right inflection point to scale up through additional capital adjacencies

- Opportunities in value chain
- In process of setting up a greenfield project for Crumb and downstream solutions, adjacent to the reclaim rubber unit
- Significant revenue potential coupled with inter-unit synergy benefits
- Identification/development of technologies for value chain opportunity
- Technology led expansion
- Prudent capital expansion through new technologies for developing enhanced reclaim rubber solutions
- Successful track record of setting up and operationalizing greenfield facilities

Potential incremental growth

- 5
 Potential adjacencies
- Well positioned to capitalize on extensive customer relationships and experience across the reclaim rubber value chain

Capitalizing on EPR Guidelines: Opportunities for Leading Tire Recycling Companies like GRP

Recent government guidelines for implementation of EPR in the domestic market shall further boost the need for rubber recycling in India and open up a new revenue stream for players like GRP

- Tire manufacturers and importers are required to recycle 100% of the quantity of new manufactured or imported tires after 2025
- Alternatively, they need to acquire EPR certificates of equivalent quantity of tires manufactured or imported
- These certificates shall be generated on portal set-up by the CPCB
- EPR certificates shall be earned by recyclers based on the quantity recycled

EPR In Plastic Packaging Overview: Producer (Category - 1 Only)

The Government guidelines which mandate rigid plastic packaging producers to recycle and incorporate recycled content in their products shall drive the demand for recycled polypropylene

FY29 FY22 FY23 FY24 FY25 FY26 FY27 FY28 onwards 25% 70% 100% Quantity eligible for EPR target is calculated as Q1 = A + B - C **EPR Target** 50% 70% **Minimum** ■ Calculated as a % of EPR target • Producers shall ensure minimum level of recycling (excl. EOL Recycling disposal) of plastic packaging waste collected under EPR **Obligation Producer** 30% 40% 50% Calculated as a % of plastic manufactured for the year Recycled Producers shall ensure use of recycled plastic content in their products **Plastic** • If producers are unable do so, CPCB will grant them an exemption to purchase certificates from other producers, brand-owners and importers Usage **Quantity Eligible for EPR** Q1 = Annual quantity supplied to entities such Average quantity of pre-consumer Average weight of plastic packaging as brand owners including plastic packaging waste in the last 2 material sold in the last 2 financial years supermarkets, MSMEs, online platforms, financial years etc.
