MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. Industry Structure and Development

Domestic

Indian Economy grew by 5% during 2012-13 as against the growth of 6.2% recorded the previous year. This is believed to be the lowest growth rate in the last decade. Economic Survey of India has painted an optimistic picture of Indian economy for the year 2013-14 stating that the 'down-turn' is more or less over and projected a GDP Growth of 6.1% to 6.7%.

DIRECTORS' REPORT (Contd.)

Global

Growth in Global economy has almost dropped to 3% during 2012-13. During the year 2013-14 also, uncertainty across the regions - from the post-election 'fiscal debacle' question in the United States to the Chinese leadership transition and reforms in the Euro area - will continue to have global impacts in sluggish trade. Across the advanced economies, the outlook predicts 1.2% growth in 2013 as against 1.1% in 2012. This slight upsurge is due to Europe which is expected to return to a very slow growth of 0.3% after the -0.2% contraction during 2012. The growth in United States market is expected to fall from 2.2% in 2012 to 1.6% in 2013.

2. Business outlook and overview

Original Equipment Manufacturers (OEMs)

The overall outlook for the year is not upbeat and is at 4% for the year 2013-14. Your Company with its presence in Honda Motorcycle & Scooter India Pvt. Ltd., is confident of a growth higher than the industry growth. The growth is expected to be around 18% in the year 2013-14.

DIRECTORS' REPORT (Contd.)

After Market

The year is likely to be highly competitive and your Company is geared up to meet the challenges through launch of numerous new products during the first half of 2013-14. This will help us to achieve the growth of minimum 10% over the previous year.

3. Opportunities & Threats

Replacement Tyre market in India is expected to touch Rs.30,500 Crore by 2013-14 and all the tyre companies are ramping up their capacity to meet this demand. The replacement market, which constitutes more than 50% of the industry and a key focus area for the tyre manufacturers due to higher margins, would continue to grow faster owing to the high growth in vehicle sales seen over the last few years.

There are no major threats for the Indian Tyre industry other than rising imports from countries like China and South Korea.

4. Risks and concerns

Economy

Biggest risk facing the Indian economy is the high current account deficit which is well above the sustainable level of 2.5% of GDP. Financing a large Current Account Deficit exposes the economy to the risk of sudden stop and reversal of capital flows.

Investment sentiment remains inhibited owing to subdued business confidence and dented business profitability. Borrowers have become risk averse because of governance concerns, delays in approvals. For lenders, risk aversion stems from the erosion of asset quality.

Effectiveness of monetary policy could be undermined by supply constraints in the economy. Food price pressures, upward revisions in the minimum support prices and rapid wage increases are leading to a wage-price spiral.

Industry specific

Performance of Indian Tyre industry is directly linked to the performance of automotive sector. In view of the increased concentration on OEM business, any slowdown in the automobile sector will immediately affect the Indian Tyre industry.

Continuing economic uncertainty, lower growth in automobile sector affecting the demand from OE segment, global slowdown affecting the exports from India, non-availability of skilled manpower, creation of excess capacity by the players in the market are the major concerns for Indian Tyre industry.

Sourcing

Volatility in raw material prices has been a concern for any tyre Company in India. In order to bring in competition, your Company is trying to come out of single vendor system and is developing new vendors. In addition to the above, Company is initiating cost reduction measures in all fronts which includes procurement of raw materials, without affecting quality or any other parameters.

DIRECTORS' REPORT (Contd.)

Forex

Your company may get affected by global currency fluctuations or Exchange fluctuation may result in unfavourable conditions. Your Company is taking appropriate cover to protect the volatility in exchange rate fluctuation to the maximum extent possible.

Contractual

High quality products are demanded by contractual terms by almost all the Original Equipment Manufacturers. Every effort is being made to ensure quality but at the same time, defects may lead to rework or product recall with the resultant expenditure. Your Company has taken appropriate product recall and liability insurance in line with standard industry practice to mitigate these risks.

Capacity utilization

Your Company has got sufficient capacity to take care of its requirements for the year 2013-14. Product mix change may be a risk to be managed appropriately by the Company. Your Company is developing flexibility to handle such product mix changes in short notice so that the over all production does not get affected. New capacities are being built to cater to the technological changes happening in the market, such as, tubeless tyres, radial tyres, etc.

5. Internal Control System and their adequacy

The Company has effective and adequate internal control systems covering all areas of operations. The internal control system provides for well documented policies / guidelines, authorizations and approval procedures. The internal control system stipulates a reasonable assurance with regard to maintaining of proper accounting controls, protecting assets from unapproved use and compliance of statutes.

The Company, through its own Internal Audit Department, carries out periodic audits at all locations and functions based on the plan approved by the Audit Committee. The observations, arising out of audit, are periodically reviewed and compliance ensured. The summary of the Internal Audit observations and the status on implementation of corrective actions are reported to the Audit Committee of the Board of Directors for their review.

9. Community development and social responsibility

10. Financial / operational performance

	Rs. in Crore
Net Sales & Other Income	1519.89
Net profit	35.68

The operations of the Company relate to the manufacture and sale of rubber products such as tyres, tubes and flaps.

The volatile price of natural rubber, our major raw material, has impacted the performance of the Company. This has forced your Company to effect price corrections in the market.

Despite this, the Company has achieved the sales turnover of Rs. 1519 Crore, which is a landmark achievement. This reflects a sales growth of 8%.
