Significant Accounting Policies**A Basis of preparation of accounts**

The financial statements have been prepared to comply in all material respects with the Accounting Standards notified by the Companies Accounting Standards Rules, 2006 and the relevant provisions of the Companies Act, 2013. The financial statements have been prepared under the historical cost convention on an accrual basis. The accounting policies applied by the Company are consistent with those used in the previous year.

B Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

C Fixed assets**Tangible assets**

Fixed assets are stated at cost of acquisition inclusive of duties (net of CENVAT and other credits, wherever applicable), taxes, incidental expenses, erection / commissioning expenses and borrowing costs etc. up to the date the assets are ready for their intended use.

D Depreciation

Depreciation on Fixed Assets is provided on written down value method at the rates prescribed in Schedule II of the Companies Act, 2013 or at rates determined based on the useful life of the assets, whichever is higher.

E Impairment of assets

The carrying amount of assets is reviewed at each balance sheet date to determine if there is any indication of impairment thereof based on external / internal factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount, which represents the greater of the net selling price of assets and their 'value in use'. The estimated future cash flows are discounted to their present value at appropriate rate arrived at after considering the prevailing interest rates and weighted average cost of capital.

F Inventories

Items of inventories are valued at lower of cost and net realizable value.

G Investments

Investments that are readily realisable and intended to be non current held for not more than a year are classified as current investments. All other investments are classified as long-term and non-current. Current investments are carried at lower of cost and fair value determined on an individual investment basis. Long-term and non-current investments are carried at cost, but provision for diminution in value is made to recognise a decline other than temporary in the value of such investments.

H Revenue recognition

Revenue (income) is recognised when no significant uncertainty as to determination/realisation exists.

Sale of Goods

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer.

Interest

Revenue is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

Commission

Revenue is recognised as per terms of contract.

I Taxation

Tax expense comprises of current tax.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961.

Deferred tax is recognized on a prudent basis for timing differences, being difference between taxable and accounting income/expenditure that originate in one period and are capable of reversal in one or more subsequent period(s). Deferred tax asset is recognised on carry forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such asset can be realised against future taxable income. Unrecognised deferred tax asset of earlier years are re-assessed and recognised to the extent that it has become reasonably certain that future taxable income will be available against which such deferred tax assets can be realised.

J Earning per share

Earning per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders, by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earning per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of share outstanding during the period are adjusted for the effects of all diluted potential equity shares.

K Cash and Cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.

L Provisions

A provision is recognised when the company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance date and adjusted to reflect the current best estimates.
