(A) Management Discussion and Analysis Report

Economy And Business Environment:

The Reserve Bank had projected the real GDP growth for 2009-10 at 7.5 per cent. The advance estimates released by the Central Statistical Organisation (CSO) in early February 2010 placed the real GDP growth during 2009-10 at 7.2 per cent.

The uptrend in industrial activity continues. The index of industrial production (IIP) recorded a growth of 16.7 per cent. The recovery has also become more broad-based with 14 out of 17 industry groups recording accelerated growth during April 2009-February 2010. The sharp pickup in the growth of the capital goods sector, in double digits since September 2009, points to the revival of investment activity. After a continuous decline for eleven months, imports expanded by 66.4 by end of 2010. The acceleration in non-oil imports since November 2009 further evidences recovery in domestic demand.

REPORT OF THE BOARD OF DIRECTORS

After contracting for twelve straight months, exports have turned around reflecting revival of external demand. Various lead indicators of service sector activity also suggest increased economic activity. On the whole, the economic recovery, which began around the second quarter of 2009-10, has since shown sustained improvement

A sharp recovery of growth during 2009-10 despite the worst south-west monsoon since 1972 attests to the resilience of the Indian economy. The monetary and fiscal stimulus measures initiated in the wake of the global financial crisis played an important role, first in mitigating the adverse impact from contagion and then in ensuring that the economy recovered quickly.
