## **MANAGEMENT DISCUSSION AND ANALYSIS REPORT**

### **A. INDUSTRY STRUCTURE AND DEVELOPMENTS**

#### **Global Growth:**

- The world economy grew at an estimated 2.6% in FY 2024–25, according to the latest World Bank and IMF projections.
- Advanced economies registered subdued expansion of about 1.5%, while emerging market and developing economies grew by 4% on average.
- China’s growth moderated yet remained solid, while the U.S. and Eurozone were slow, reflecting persistent global headwinds and elevated interest rates.
- Global trade volumes remained weak, and cross-border investment decelerated amid ongoing trade tensions and policy uncertainties.

#### **Inflation:**

- Global inflation continued its declining trend, falling to about 5.9% in 2024, though still above pre-pandemic averages. Advanced economies saw faster declines in inflation, approaching central bank targets sooner than emerging and developing economies.
- Tight monetary policy and unwinding of supply bottlenecks contributed to lower inflation readings in major economies, but core inflation, especially in the service sector, eased only gradually.

#### **Risks & Policy Backdrop:**

- Resuming geopolitical pressures, high interest rates, and frequent policy shifts contributed to global economic fragility and moderated growth momentum.
- The World Bank described the 2024–25 global environment as a “precarious moment,” though resilience persisted with no systemic financial crisis.
- Governments in advanced and large developing economies remained focused on price stability and prudent fiscal management through late FY 2024–25.

### **B. INDIAN ECONOMY OVERVIEW (FY 2024–25)**

- India retained its position as the fastest-growing major economy in the world.
  - GDP growth for FY 2024–25 was estimated between 6.4% and 7.0%.
  - The IMF and official estimates placed growth at the upper end, revising earlier forecasts upward as domestic demand outperformed expectations.
  - Growth was bolstered by strong public investment in infrastructure, rebounding rural consumption, robust services exports, and a pickup in private spending.
  - Inflation fell sharply, reaching 2.8% in May 2025 (lowest since 2019), well within the RBI’s comfort zone.
  - Exports hit a record \$824.9 billion in FY 2024–25, despite a subdued global environment.
  - The fourth quarter (Jan–Mar 2025) saw an acceleration to 7.4% annual growth, even as the full-year rate moderated compared to the post-pandemic rebound.
  - The country’s expansion was broad-based, led by construction (up 10.8% in Q4), public administration, and a strong winter harvest.
  - Weakness persisted in manufacturing and private investment, but rising government expenditure and rural demand helped offset softness in urban consumption.

**C. EXTERNAL ENVIRONMENT & RISKS (FY 2024–25)**

- Global conditions remained fragile: trade tensions, higher energy prices, policy uncertainty, and slowdowns in major advanced economies weighed on sentiment and cross-border investment.
- India stood out as an outperformer due to its resilient domestic demand, proactive reform agenda, and export competitiveness, even as many countries experienced the slowest growth since the pandemic.
- Risks for the year ahead include US and EU monetary tightening, supply shocks to food and energy, and continued volatility in global commodity markets.

**Key Table: FY 2024–25 Economic Summary**

<b>Economy/Region</b>	<b>FY 2024–25 GDP Growth (%)</b>	<b>Inflation (%)</b>

According to an article by the Financial Express, digital media now represents 44% of total advertising spending.

The current trend not only mirrors the changing behaviours of consumers but also highlights how digital marketing is reshaping economic growth and fostering better connections, across different sectors of Indian society. Digital marketing in India goes beyond a short-term trend; it signals a significant change that is reshaping the way businesses and communities interact.

### **Current landscape of Digital Marketing in India**

### **Critical trends in India's Digital Marketing landscape**

Businesses are leveraging individuals with a significant social media following to advertise their products and services. According to a report by EY, the influencer marketing industry is set to grow to approximately US\$ 400 million in 2026. In India, this trend is on a meteoric rise with influencers playing a key role in shaping consumer behavior.

#### **Omnichannel Marketing**

Omnichannel marketing is ensuring a seamless and consistent interaction between customers and businesses across channels. A Harvard Business Review survey revealed that 73% of shoppers use multiple channels during their shopping journey. This strategy is crucial in the Indian market where consumers are spread across various digital platforms.

#### **Artificial Intelligence (AI)**

The advent of AI in digital marketing is revolutionizing the way businesses understand and cater to their customers' needs. AI and Machine Learning (ML) are helping businesses automate processes and gain a competitive edge. According to a PWC report, 77% of Indian businesses recorded tangible improvements in customer satisfaction after implementing AI.

#### **Video Marketing**

The growth of digital marketing in India has been marvellous. This is driven by the increase in internet users and the wide-spread usage of smartphones. On this basis, the digital marketing industry grew from US\$ 2.39 billion in FY20 to US\$ 6.46 billion in FY24 at a CAGR of approximately 28.5%. This rapid expansion underlines how much consumer behaviour has changed over the years and emphasizes the importance of online channels for businesses.

### Key statistics and trends

India's digital advertising industry has demonstrated resilience and flexibility despite a slowdown in growth rates. As per a report from Pitch Madison, the digital advertising expenditure increased by 15% in 2023 totalling Rs. 39,714 crores (US\$ 4.76 billion). Looking ahead to 2024, this growth rate is tipped to level out at 17%. A change of pace, influenced by increased scrutiny around data privacy and a knock-on effect from Google's plans for a cookie-less future. Despite these challenges, the portion of digital advertising in total advertising is predicted to increase from 40% in 2023 to 42% in 2024. Already, this uptrend exemplifies the gauge for social media platforms in reaching and engaging consumers.

### Growth of internet users and mobile penetration

A major factor driving digital marketing in India is the increase, in internet users and mobile usage. It is estimated that by 2025, the active count of internet users will exceed 900 million, making India one of the largest markets across the globe. The digital revolution is coupled with growth in smartphone adoption; it is estimated that by the same year, there will be 1.1 billion smartphone users, according to Inc42. The more Indians join the online community, the more businesses are capitalizing on the opportunity to reach out to customers with tailored marketing tactics. Social media, e-commerce, and video content have created an environment where brands can engage with their target audiences with the help of various approaches.

### Shift in advertising budgets

Digital marketing is significantly advancing in the allocation of advertising budgets. The traditional stronghold of print and TV ads is slowly being taken over by digital platforms. Notably, while print ads are expected to remain stable for the first time in 13 years, digital media has now taken the lead claiming a sizeable portion of ad budgets. In 2024, spending on print ads is predicted to increase 7% surpassing COVID levels and reaching Rs. 20,000 crore (US\$ 2.40 billion) mainly due to political campaigns leading up to the parliamentary elections. Television, which still commands a market share is projected to see single digit growth at 8% signalling a shift in consumer focus, towards content.

With the ever-changing and evolving landscape, companies are adjusting their allocations to leverage the most of their marketings capabilities. This shift, in strategy emphasizes the rising importance of social-media platforms.

Leveraging these platforms empowers businesses to boost brand recognition and actively engage with their desired customer base.

Other advantages that come with digital marketing are targeted advertisement and cost-effectiveness. Companies can always tune their campaigns to groups, ensuring that the information they convey goes to targeted human beings. For example, companies that use customized ads experience a tenfold conversion rate compared to those using traditional methods. Also, digital marketing could be less expensive, as it is reported that 61% of marketers claimed a better ROI through digital marketing compared to traditional marketing activities.

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

### **Management's Responsibility for the Standalone Financial Statements**

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation and presentation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matter related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

### **Auditor's Responsibility**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statement.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

#### **Current tax:**

Current tax is determined on taxable profits for the year chargeable to tax in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 including other applicable tax laws that have been enacted or substantively enacted.

Provisions for current income taxes are presented in the balance sheet after off-setting advance taxes paid and TDS/TCS receivables.

Minimum Alternate Tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India. MAT Credit Entitlement, is classified as unused tax credits under deferred tax by way of a credit to the statement of profit and loss.

#### **Deferred tax:**

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Deferred tax asset is recognised for the carry forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

## **B.5 Provisions, Contingent Liabilities and Contingent Assets**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursements will be received and the amount of the receivable can be measured reliably.

Contingent liability is disclosed for possible obligations which will be confirmed only by future events not within the control of the Company or present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent Assets are not recognized since this may result in the recognition of income that may never be realized.

## **B.6 Financial instruments**

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

### **Financial assets:**

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

### Classification of financial assets

The financial assets are initially measured at fair value. Transaction costs that are directly attributable to the acquisition of financial assets are added to the fair value of the financial assets on initial recognition.

After initial recognition:

(i) Financial assets (other than investments) are subsequently measured at amortised cost using the effective interest method.

Effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Investments in debt instruments that meet the following conditions are subsequently measured at amortised cost:

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments on principal and interest on the principal amount outstanding.

Income on such debt instruments is recognised in profit or loss and is included in the “Other Income”.

The Company has not designated any debt instruments as fair value through other comprehensive income.

(ii) Financial assets (i.e. investments in instruments other than equity of subsidiaries) are subsequently measured at fair value.

Such financial assets are measured at fair value at the end of each reporting period, with any gains (e.g. any dividend or interest earned on the financial asset) or losses arising on re-measurement recognised in profit or loss and included in the “Other Income”.

#### Investments in equity instruments of subsidiaries

The Company measures its investments in equity instruments of subsidiaries at cost in accordance with Ind AS 27. At transition date, the Company has elected to continue with the carrying value of such investments measured as per the previous GAAP and use such carrying value as its deemed cost.

#### Impairment of financial assets:

A financial asset is regarded as credit impaired when one or more events that may have a detrimental effect on estimated future cash flows of the asset have occurred. The Company applies the expected credit loss model for recognising impairment loss on financial assets (i.e. the shortfall between the contractual cash flows that are due and all the cash flows (discounted) that the Company expects to receive).

#### De-recognition of financial assets:

The Company de-recognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in the Statement of profit and loss.

### **Financial liabilities and equity instruments**

#### *Equity instruments*

Equity instruments issued by the Company are classified as equity in accordance with the substance and the definitions of an equity instrument. An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

#### *Financial liabilities*

All financial liabilities are subsequently measured at amortised cost using the effective interest method. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the “Finance Costs”.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

De-recognition of financial liabilities

The Company de-recognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

**B.7 Earnings per share**

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

**C. Critical Accounting judgements and key sources of estimation uncertainty**

The preparation of financial statements in conformity with Ind AS requires the Company's Management to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities recognised in the financial statements that are not readily apparent from other sources. The judgements, estimates and associated assumptions are based on historical experience and other factors including estimation of effects of uncertain future events that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates (accounted on a prospective basis) and recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods of the revision affects both current and future periods.

The following are the key estimates that have been made by the Management in the process of applying the accounting policies:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value are measured using valuation techniques. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions relating to these factors could affect the reported fair value of financial instruments.

Allowance for doubtful trade receivables

Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts.

Estimated irrecoverable amounts are derived based on a provision matrix which takes into account various factors such as customer specific risks, geographical region, product type, currency fluctuation risk, repatriation policy of the country, country specific economic risks, customer rating, and type of customer, etc.

Individual trade receivables are written off when the management deems them not to be collectable.
