The Report has been prepared in compliance with the requirement of Corporate Governance as laid down in the SEBI Listing Regulations. The Management accepts responsibility for the integrity and objectivity of the financial statements. However, investors and readers are cautioned that this discussion contains certain forward looking Statements that involve risk and uncertainties.

INDUSTRY STRUCTURE AND DEVELOPMENTS

The Indian Textiles Industry has an overwhelming presence in the economic life of the country. Apart from providing one of the basic necessities of life, the textiles industry also plays a vital role through its contribution to industrial output, employment generation, and the export earnings of the country.

The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020. The industry is the second largest employer after agriculture, providing employment to over 51 million people directly and 68 million people indirectly. The Indian Textile Industry contributes approximately 4 per cent to India's Gross Domestic Product (GDP), and 14 per cent to overall Index of Industrial Production (IIP).

MARKET SIZE

The Indian textile industry has the potential to reach US\$ 500 billion in size. The growth implies domestic sales to rise to US\$ 315 billion from currently US\$ 68 billion. At the same time, exports are implied to increase to US\$ 185 billion from approximately US\$ 41 billion currently.

INDIAN TEXTILE INDUSTRY: CHANGING PROFILE

The Indian textile industry has embarked on an ambitious program of modernization and technological up gradation in recent years to transform the textile sector from a state of low technology level to a producer of high technology products. Technological up gradation in India has resulted in:

- A shift from commodity based trading to high value added fashion garments.
- Vertical integration and horizontal consolidation of production process leading to lowering of manufacturing costs.
- Improved productivity gains
- Efficient supply chain management
- Development of Economies of scale

INVESTMENTS

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 2.47 billion during April, 2000 to March, 2017.

OPPORTUNITY AND THREATS

The textile industry is undergoing a major reorientation towards non-clothing applications of textiles, known as technical textiles, which are growing roughly at twice rate of textiles for clothing applications and now account for more than half of total textile production.

The present global economic scenario provides ample opportunities for strong integrated textile companies such as like your company. Over the years the Company has built up capacities of scale by installing state-of-art production facilities. By reinforcing its position across the value change and presenting customers with diversified range of products, the company has developed sustainable business model with strength and resilience to combat any down turn in demand.

Strengths:

- > Self reliant industry producing the entire supply-chain i.e., cotton and fibres.
- Highly competitive spinning sector.
- Large and growing domestic market.
- Second-largest textile producer in the world.
- Abundant Raw Material availability that helps industry to control costs and reduces the lead-time across the operation;
- Low labour cost and availability of skilled and technical labour force.
- Excellence in fabric and garment designing.
- Vast textile production capacity and efficient multi-fiber raw material manufacturing capacity.
- Availability of large varieties of cotton fiber and has a fast growing synthetic fiber industry;
- Promising export potential

Weaknesses:

- Small size and technologically outdated plants result in lack of economies scale, low productivity and week quality control.
- Cotton availability is vulnerable to erratic monsoon and low per hectare yield.
- With the exception of spinning, other sectors are fragmented. Sectors such as knitted garments still remaining as a SSI domain
- Labour laws and policies lack reforms.
- Infrastructure bottlenecks for handling large volumes.
- India lacks in trade pact memberships, which leads to restricted access to the other major markets.
- Huge unorganized and decentralized sector.

Opportunities:

- > End of quota system and full integration of the textile industry.
- Low per-capita consumption of textile indicating significant potential growth.
- Increased use of CAD to develop designing capabilities and for developing greater options.
- Shift in domestic market towards readymade garments, and domestic textile consumption increasing with growing disposable income.
- Cheaper production and marketing costs and enormous opportunities have tempted Taiwanese Companies to work on Joint Ventures with the Indian Companies specially for the manufacture of manmade fabrics.

Threats:

- Survival of the fittest-in term of quality, size delivery and cost. There is an increased global competition in the post 2005 trade regime under WTO.
- Pricing pressures.
- > Stiff competition from other Asian countries.
- Increase in regional trade could reduce share of market opened for India, China and other countries.
- High production cost with respect to other Asian competitors.

GOVERNMENT INITIATIVES

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

The key initiatives announced in the Union Budget 2017-18 to boost the textile sectors are listed below:

- Encourage new entrepreneurs to invest in sectors such as knitwear by increasing allocation of funds to Mudra Bank from ₹ 1,36,000 crore (US\$ 20.4 billion) to ₹ 2,44,000 crore (US\$ 36.6 billion)
- Upgrade labour skills by allocating ₹ 2,200 crore (US\$ 330 million).

Some of initiatives taken by the government to further promote the industry are as under:

- The Government of India plans to introduce a mega package for the powerloom sector, which will include social welfare schemes, insurance cover, cluster development, and upgradation of obsolete looms, along with tax benefits and marketing support, which is expected to improve the status of power loom weavers in the country.
- The Ministry of Textiles has signed memorandum of understanding (MoU) with 20 e-commerce companies, aimed at providing a platform to artisans and weavers in different handloom and handicraft clusters across the country for selling their products directly to the consumer.
- Memorandum of Understanding (MoU) worth ₹ 8,835 crore (US\$ 1.3 billion) in areas such as textile parks, textile processing, machinery, carpet development and others, were signed during the Vibrant Gujarat 2017 Summit.
- The Union Minister for Textiles inaugurated Meghalaya's first-ever apparel and garment making centre to create employment opportunities in the region. The Union Minister for Textiles also mentioned Meghalaya has been sanctioned ₹ 32 crore (US\$ 4.8 million) for promotion of handlooms.
- The Government of India has announced a slew of labour-friendly reforms aimed at generating around 11.1 million jobs in apparel and made-ups sectors, and increasing textile exports to US\$ 32.8 billion and investment of ₹ 80,630 crore (US\$ 12.09 billion) in the next three years.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.
