Conservation of Energy and Technology Absorption

A. Conservation of energy-

Power Plant

i. The steps taken or impact on conservation of energy

The Company has installed Variable Frequency Drives in Cooling Tower Fans (3 x 110 kW) and Condensate Extraction Pump of Turbine (2 x 55 kW) to optimize the efficiency of equipment and reduction in power consumption as well as maintenance cost.

The Company has installed energy efficient pump in Jackwell, which helps to reduce power consumption.

ii. The capital investment on energy conservation equipments (Figures in ₹ Lakhs)

Details	Amount of Capital Investment
Installation of Variable Frequency Drives in Cooling Tower Fans 3 x 110 kW	8.30
Installation of Variable Frequency Drives in Condensate Extraction Pump of Turbine 2 x 55 kW	3.82
Installation of energy efficient pump in Jackwell	1.25

Sponge Iron Plant

i. The steps taken or impact on conservation of energy

Concrete flooring has been made in coal yard shade. Due to which proper de moisturization takes place and circuit running hours are reduced significantly.

Heat up cycle is modified for start up of kiln operation. Due to which we are getting production within 12 hours after light up of the kiln. Earlier the production use to take 20 hours.

B. Technology absorption-

Power Plant

i. The efforts made towards technology absorption;

- a. Modification in Drag Chain feeder: - Its drive mechanism is modified. Earlier there was Pillow block bearings in Drive and Non-drive side. These bearing blocks are replaced with Plummer block bearings.
- b. Provision of directly feeding of Jackwell water as well as Mines water to the HRSCC tank. By doing this Mines water can be taken directly to the tank instead of Reservoir because mines water hardness is very high.
- c. Fabrication & fitting of 300 NB water header and suction and discharge pipe lines to lift water directly from river during summer season when water level in river is very low.

ii. The benefits derived like product improvement, cost reduction, product development or import substitution

- a. The cost is reasonably reduced due to modification in Drag Chain feeder.
- b. The water quality of reservoir is protected from getting deteriorated by making provision for directly feeding of Jackwell water as well as Mines water to the HRSCC tank.
- c. The cost is reasonably reduced due to fabrication & fitting of 300 NB water header and suction and discharge pipe lines.

Sponge Iron Plant

i. The efforts made towards technology absorption;

New super magnet is installed in product separation system to get beneficiated char for power plant use and higher product yield in sponge iron plant.

Installation of mobile screen for iron ore screening, so that better iron ore is being feed to kiln for better product quality.

SECRETARIAL AUDIT REPORT

For the Company's Financial Year from 1st April, 2018 to
31st March, 2019

[Pursuant to section 204(1) of the Companies Act, 2013 and
Rule 9 of the Companies (Appointment and Remuneration of
Managerial Personnel) Rules, 2014]

To,
The Members,
Lloyds Metals and Energy Limited
Plot No. A 1-2, MIDC Area,
Ghugus, Dist. Chandrapur - 442 505,
Maharashtra

We have conducted the Secretarial Audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by **Lloyds Metals and Energy Limited** (hereinafter called the Company). Secretarial Audit was conducted in a manner that provided us a reasonable basis for evaluating the corporate conduct / statutory compliances and expressing our opinion thereon.

Based on our verification of **Lloyds Metals and Energy Limited's** books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, we hereby report that in our opinion, the Company has, during the audit period covering the financial year ended **31st March, 2019**, complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance mechanism in place to the extent, in the manner and subject to the reporting made hereinafter.

We have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the financial year ended on **31st March, 2019** according to the provisions of:

1. The Companies Act, 2013 (the Act) and the rules made thereunder;
2. The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the rules made thereunder;
3. Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings, were not attracted to the Company during the financial year under report.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Steel Industry Scenario

Being core sector, steel industry tracks the overall economic growth in the long term. Also, steel demand, being derived from other sectors like automobiles, consumer durables and infrastructure, its fortune is dependent on the growth of these user industries. The Indian steel sector enjoys advantages of domestic availability of raw materials and cheap labour. Iron ore is also available in abundant quantities. This provides major cost advantage to the domestic steel industry.

The January to November crude steel production statistics released by worldsteel on 20 December 2018 show that India has become the second largest steel producer in the world, overtaking Japan for the second month in a row, with a growth rate of 4.9%.

The growth in steel production is supported by fast-growing steel demand. According to worldsteel's October Short Range Outlook, it is likely that India will also become 2nd in steel use by the end of 2019 as its steel demand is expected to grow by 7.3%.

The Indian steel industry, after recovering from the twin shocks of demonetisation and the Goods and Services Tax (GST) reform, is one of the few bright spots for the world's steel industry in what is forecasted to be a lower growth era.

India's apparent steel use per capita for finished steel products stood at 66.2 kg, way below the world average of 212.3 kg in 2017, which suggests that India has a huge unrealised potential for steel demand growth.

Recently, India has been trying to unleash this through an extensive reform agenda to clear institutional bottlenecks. Also, there is an ongoing push for infrastructure development.

These factors, along with the favourable demographics, are improving the macroeconomic fundamentals, which translate into sustained growth in steel use.

A worldsteel study of India, conducted in collaboration with the Indian Steel Association and the support of Indian member companies, identifies the construction sector as a pan-India steel demand driver on the back of strong infrastructure development and housing demand, especially affordable housing.

Projects like industrial corridors (connecting existing industrial cities and develop manufacturing sectors) and Sagarmala (connecting states through waterways) will increase India's connectivity, reducing logistical costs of transportation across Indian states.

The Smart Cities initiatives will further boost urban infrastructure investment. There are currently 99 smart cities planned across India.

The outlook for India's manufacturing sector, which has been lagging behind the service sector as a growth driver, should improve.

Firstly, the Make in India initiative, which aims to transform India into a global design and manufacturing hub, will support the further development of steel using sectors along the industrial and freight corridors.

Secondly, many states are expected to develop automotive and ancillary industries, to be a global auto hub for small cars with a focus on exports. Lastly, some states are also expected to strengthen their mechanical machinery sector.

All these factors point to a high potential for steel demand growth in India, but how fast the potential can be realised will depend upon whether India can successfully implement both its reform agenda and infrastructure plans.

Government Initiatives

Some of the other recent government initiatives in this sector are as follows:

- Government of India's focus on infrastructure and restarting road projects is aiding the boost in demand for steel. Also, further likely acceleration in rural economy and infrastructure is expected to lead to growth in demand for steel.
- The Union Cabinet, Government of India has approved the National Steel Policy (NSP) 2017, as it seeks to create a globally competitive steel industry in India. NSP 2017 envisages 300 million tonnes (MT) steel-making capacity and 160 kgs per capita steel consumption by 2030-31.
- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of ₹ 200 crore (US\$ 30 million).
- The Government of India raised import duty on most steel items twice, each time by 2.5 per cent and imposed measures including anti-dumping and safeguard duties on iron and steel items.

Sponge Iron Industry Scenario

A supportive policy environment and improved performance in the steel industry, Indian sponge iron industry has got a big boost. As, sponge iron contributes to 23% of India's total crude steel production of 97MT.

There are over 400 sponge iron units in India. Indian sponge iron industry is highly fragmented. Top 20 producers contribute about 60-65% of total production whereas rest contributes 35-40% of the production.

The domestic sponge iron production has increased from 21.08 MT in the FY 2016-17 to 23.92 MT during the FY2017-18.

This has become possible mainly due to increased availability of iron ore at competitive prices; iron ore pellet supplies have also eased out and have supported sponge iron industry.

Globally too, due to positive sentiments in the steel market, sponge iron production has increased during 2018 to 73 MT from 72.76 MT during 2017. A significant development on the DRI scenario, is the rapid strides Iran has made in recent years. With an output of 20.5 MT (a rise of 6 %) in the calendar year 2017, it stood second to India that produced 25.8 MT (a drop of 8 %), according to WSI. With the new DRI plants coming up that uses the PERED (joint Iranian – German) technology, Iran is billed to become the top producer of DRI in the world soon. India needs to come up with DRI production that must be competitive by global standard and is environmentally friendly.

Power Industry Scenario

Power is one of the most critical components of infrastructure crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

In May 2018, India ranked 4th in the Asia Pacific region out of 25 nations on an index that measures their overall power.

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower).

Total installed capacity of power stations in India stood at 350.16 Gigawatt (GW) as of February 2019.

Government Initiatives

The Government of India has identified power sector as a key sector of focus so as to promote sustained industrial growth. Some initiatives by the Government of India to boost the Indian power sector:

- As of September 2018, a draft amendment to Electricity Act, 2003 has been introduced. It discusses separation of content & carriage, direct benefit transfer of subsidy, 24*7 Power supply is an obligation, penalisation on violation of PPA, setting up Smart Meter and Prepaid Meters along with regulations related to the same.
- Ujwal Discoms Assurance Yojana (UDAY) was launched by the Government of India to encourage operational and financial turnaround of State-owned Power Distribution Companies (DISCOMS), with an aim to reduce Aggregate Technical & Commercial (AT&C) losses to 15 per cent by FY19.

- As of August 2018, the Ministry of New and Renewable Energy set solar power tariff caps at ₹ 2.50 (US\$ 0.04) and ₹ 2.68 (US\$ 0.04) unit for developers using domestic and imported solar cells and modules, respectively.
- The Government of India approved National Policy on Biofuels – 2018, the expected benefits of this policy are health benefits, cleaner environment, employment generation, reduced import dependency, boost to infrastructural investment in rural areas and additional income to farmers.

Industry Structure and Developments

Sponge iron is an intermediate product; a source of metallic's for the secondary steel making through EAF or EOF/IF route. Other sources of metallics are either steel scrap or hot metal produced in the blast furnace. Steel scrap becomes a direct substitute of sponge iron; since both of them are tradable commodities, unlike hot metal. Further, sponge iron industry is also classified into two categories (i) gas based and (ii) coal based using coal as reductant. Lloyds Metals and Energy Limited is a coal based sponge iron producer. The core business of the Company is manufacturing of Sponge Iron and generation / distribution of Power

Opportunities and Threats

Opportunities abound in growing economies and opening of economy in India has created opportunities for Indian enterprise to move beyond national boundaries as well to create productive assets. Presently, the Company is consolidating its gains out of creating additional production capabilities.

Competition in Steel industry is escalating and technological changes will spur or drag the forward march of individual units in steel industry. Supply side could also be an issue in next few years because of increase in production capacity by steel industry in India and expression of interest by foreign companies to set up new steel making units. However, coming years are also going to witness substantial additions particularly in the Asian regions. The Company's thrust on improving productivity and reducing cost of production will, in such a scenario, help in forging ahead in globally competitive environment.

Sponge Iron is no longer considered as an alternative to scrap rather considered as a raw material for steel making in electric furnaces. It is being used as a principle raw material and is charged at 40-80% of the charge mix in furnaces.

As per the National steel policy crafted during FY 2017-18, the crude steel production target for India is set at 300 MT by 2030. Share of sponge iron in steel making will be 80MT, which will create huge opportunity for sponge iron industry.

Iron ore and non-coking coal are main raw materials used to produce sponge iron. The non- availability of non-coking coal and the rising prices of Iron Ore might pose significant challenge in the future.

LLOYDS METALS AND ENERGY LIMITED

Segment-Wise Performance

The Company has two separate business segments -- manufacturing of sponge iron, and generation of power. These are reportable segments in accordance with the Ind AS 108 issued by the Companies (Indian Accounting Standards), Rules, 2015. The Segment wise results are given at Note No. 36 of significant accounting policies and notes to the financial statements.

Sponge Iron Division

The production of Sponge Iron Division during the year under review was 1,89,277 MT against 1,71,320 MT in the previous year showing increase of 10.48%. The total income of the division was ₹ 446.64 Crores as against ₹ 384.12 Crores during the previous year, showing increase of 16.28% due to realization of high price of sponge iron.

Power Division

The production of the division was 23.28 MWH during the year under review as compared to 24.59 MWH for the previous year. The total income of the division was ₹ 66.30 Crores during the year under review as against ₹ 63.83 Crores during the previous year showing an increase of 3.87%.

Outlook

The basic aim of the Company is to be able to produce Sponge Iron as per market requirements and be able to manage market trends to its advantage. "Opportunities abound in growing economies and opening of economy in India has created opportunities for Indian enterprise to move beyond national boundaries as well to create productive assets".

The Company is currently engaged in sponge iron and is looking for new avenues of business in various areas like infrastructure and trading. Since Infrastructure has linkages to other industries like cement, brick and steel through backward and forward linkages. The outlook for the industry looks reasonable, since India has good iron ore deposits, skilled manpower and growing demand for steel. The improved demand is expected to continue in the current fiscal as well on the back of ongoing government funded infrastructure projects. In spite of a downturn in the Global Steel demand, Indian steel demand could survive showing an upward trend, setting a road ahead for the growth of the domestic steel industry in the long run. The upward trend is expected to be continued on account of fiscal measures taken by the Government such as infusion of funds for development of infrastructure sector, introduction of stimulus packages for revival of industry besides factors like increase in consumption and production of steel, upcoming infrastructure and Greenfield projects, stabilization of prices etc. The National Steel Policy has a target for taking Indian Steel production upto 110 MT by 2019-20.

Risk and concerns

Global economic uncertainties have affected India's economy, Key risks synonymous to industry include the global recessionary trend, economic slowdown, increase in financial charges, non-availability (or undue increase in cost) of raw

materials, such as , iron ore, coal and labour etc., coupled with market fluctuations. The Company does not apprehend any inherent risk in the long run, with the exception of certain primary concerns that have afflicted the progress of our industry in general, like:

- Shortage of Labour
- Rising manpower and material costs
- Approvals and procedural difficulties
- Lack of adequate sources of finance.

Apart from this, Industry is highly labour intensive and is subject to stringent labour laws

Mitigation of Risk /Risk Management

The Board identifies and categorizes risks in the areas of operations, finance, marketing, regulatory compliances and corporate matter. The Company annually re-views the 'List of Risk Area' to identify potential business threats and takes suitable corrective actions. Confirmations of compliance with appropriate statutory requirements are obtained from the respective units/divisions. The Internal Auditor expresses his opinion on the level of risks during the audit of a particular area and reports to the Audit Committee.

The Company is also taking necessary short term and long term steps like exploring Open Access Market for sale of power, expanding customer base, forward integration and energy management etc. The Company has already taken effective steps for raw material security in the long term.

Internal Control Systems and their Adequacy

The Company believes in systematic working and placing of proper checks. The Company has proper and adequate system of internal controls commensurate with its size and nature of operations to provide reasonable assurance that all assets are safeguarded, transactions are authorised, recorded and reported properly. The internal auditors of the company conducts audit of various department and areas. The Internal Audit Department reports its findings and observations to the Audit Committee which meets to review the audit issues and to follow up implementation of corrective actions. LLOYDS METALS AND ENERGY LIMITED

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF M/S. LLOYDS METALS AND ENERGY LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Lloyds Metals and Energy Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2019, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, and a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2019, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

1. Accuracy of recognition, measurement, presentation and disclosures of revenues and other related balances in view of adoption of Ind AS 115 "Revenue from Contracts with Customers" (new revenue accounting standard)

The application of the new revenue accounting standard involves certain key judgments relating to identification of distinct performance obligations, determination of transaction price of the identified performance obligations, the appropriateness of the basis used to measure revenue recognized over a period. Additionally, new revenue accounting standard contains disclosures which involves collation of information in respect of disaggregated revenue and periods over which the remaining performance obligations will be satisfied subsequent to the balance sheet date.

Refer to Note 2 (d) to the Financial Statements

Auditors Response : We assessed the entities process to identify the impact of adoption of the new revenue accounting standard. Our audit approach consisted testing of the design and operating effectiveness of the internal controls and substantive testing as follows :

- Evaluated the design of internal controls relating to implementation of the new revenue accounting standard.
- Selected a sample of continuing and new contracts, and tested the operating effectiveness of the internal control, relating to identification of the distinct performance obligations and determination of transaction price. We carried out a combination of procedures involving enquiry and observation, performance and inspection of evidence in respect of operation of these controls.
- Tested the relevant information technology systems' access and change management controls relating to contracts and related information used in recording and disclosing revenue in accordance with the new revenue accounting standard.
- Selected a sample of continuing and new contracts and performed the following procedures :
 - Read, analyzed and identified the distinct performance obligations in these contracts.
 - Compared these performance obligations with that identified and recorded by the Group.
 - Samples in respect of revenue recorded for time and material contracts were tested using a combination of approved time sheets including customer acceptances, subsequent invoicing and historical trend of collections and disputes.
 - In respect of samples relating to fixed-price contracts, progress towards satisfaction of performance obligation used to compute recorded revenue was verified with actual and estimated efforts from the time recording and budgeting systems. We also tested the access and change management controls relating to these systems.
 - Sample of revenues disaggregated by type and service offerings was tested with the performance obligations specified in the underlying contracts.

- Performed analytical procedures for reasonableness of revenues disclosed by type and service offerings.
- We reviewed the collation of information and the logic of the report generated from the budgeting system used to prepare the disclosure relating to the periods over which the remaining performance obligations will be satisfied subsequent to the balance sheet date.

2. Evaluation of Contingent Liabilities.

Claims against the company not acknowledged as debts is disclosed in the financial statements. The existence of the payments against these claims requires management judgment to ensure disclosure of most appropriate values of contingent liabilities.

Refer Notes 33 to the Financial Statements

Auditors Response : Our audit procedures include, among others, assessing the appropriateness of the management's judgment in estimating the value of claims against the company not acknowledged as debts as given in the note 33.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexure to Board's Report, Corporate Governance Report but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies;

making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast

LLOYDS METALS AND ENERGY LIMITED

significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by section 143(3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
 - b) In our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
 - c) The Company has no branch office and hence the company is not required to conduct audit under section 143 (8) of the Act;
 - d) The Balance Sheet, the Statement of Profit and Loss, the Cash flow statement dealt with by this Report are in agreement with the books of account;
 - e) In our opinion, the aforesaid Ind AS financial statements comply with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (As amended);

- f) On the basis of the written representations received from the directors as on 31 March 2019 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2019 from being appointed as a director in terms of Section 164 (2) of the Act;
- g) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's Internal Financial Controls over financial Reporting; and
- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us (As amended):
 - i. The Company has disclosed the impact of pending litigations on its financial position in Note 33 of the financial statements.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. During the year, no amounts were required to be transferred to the Investor Education and Protection Fund by the Company. So, the question of delay in transferring such sums does not arise.
 - iv. The disclosure in the financial statements regarding holding as well as dealing in specified bank notes during the period from 8th November 2016 to 30th December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31st March 2019.

2. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act 2013, we give in the 'Annexure B', a statement on the matters specified in paragraphs 3 and 4 of the Order.

Annexure – A to the Independent Auditors' Report**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of M/s Lloyds Metals and Energy Limited ("the Company") as of 31 March 2019 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records reflecting in the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

a) Basis of preparation

- i) These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS), under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 ("the Act") (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and relevant amendment rules issued thereafter. Accounting policies have been consistently applied except where a newly-issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use. As the quarter and year figures are taken from the source and rounded to the nearest digits, the figures reported for the previous quarters might not always add up to the year-end figures reported in this statement.
- ii) Historical cost convention the financial statements have been prepared on a historical cost basis, except for the following:
 - Certain financial assets and liabilities that are measured at fair value;
 - Defined benefit plans – plan assets measured at fair value;

b) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The Company has identified Managing Director and Chief Financial Officer as chief operating decision maker. Refer Note 36 for segment information presented.

c) Foreign currency transactions

- i) Functional and presentation currency: Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian

National rupee (₹), which is the Company's functional and presentation currency.

- ii) Transactions and balances: Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Exchange differences arising from foreign currency fluctuations are dealt with on the date of payment/receipt. Assets and Liabilities related to foreign currency transactions remaining unsettled at the end of the period/year are translated at the period/ year end rate. The exchange difference is credited / charged to Profit & Loss Account in case of revenue items and capital items.

Forward exchange contracts entered into, to hedge foreign currency risk of an existing asset/ liability. The premium or discount arising at the inception of forward exchange contract is amortized and recognized as an expense/ income over the life of the contract. Exchange differences on such contracts, except the contracts which are long-term foreign currency monetary items, are recognized in the statement of profit and loss in the period in which the exchange rates change. Any profit or loss arising on cancellation or renewal of such forward exchange contract is also recognized as income or as expense for the period.

d) Revenue Recognition

The company recognizes revenue in accordance with Ind- AS 115. Revenue is recognized when a customer obtains control of goods or services and thus has the ability to direct the use and obtained the benefits of the goods or services. Any advance received against supply of the goods and services is recognized under the head current liabilities, sub head trade and other payable.

Ind -AS 115 was issued on March 28, 2018 and establishes a five step model to account for revenue arising from contracts with customers. Under Ind AS 115, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The new revenue standard will supersede all current revenue recognition requirements under Ind AS.

e) Government grants

Grants from the government are recognized at fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants relating to income are deferred and recognized in the profit or loss over the period necessary to match them with the costs they are intended to compensate and presented within other income.

LLOYDS METALS AND ENERGY LIMITED

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit and loss on a straight line basis over the expected lives of the related assets and presented within other income.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

f) Income tax

Income tax expenses comprise current tax expense and the net changes in the deferred tax asset or liability during the year. Current & deferred taxes are recognized in the statement of Profit & Loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current & deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

1) Current income tax

Income tax expense is the aggregate amount of Current tax. Current tax is the amount of income tax determined to be payable in respect of taxable income for an accounting period or computed on the basis of the provisions of Section 115JB of Income Tax Act, 1961 by way of minimum alternate tax at the prescribed percentage on the adjusted book profits of a year, when Income Tax Liability under the normal method of tax payable basis works out either a lower amount or nil amount compared to the tax liability u/s 115JA.

2) Deferred Tax

Deferred tax liabilities are recognized for all taxable temporary differences in accordance with Ind-AS 12. Deferred tax assets are recognized to the extent it is probable that taxable profit will be available, against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized. The carrying amount of deferred tax asset is reviewed at each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rate that are expected to apply in the year when the assets are realized or the liability is settled based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities. Refer Note 37.

g) Leases

The Leases of property, plant and equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate.

Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases are charged to Statement of profit and loss on a straight line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

h) Impairment of assets

Property plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverable amount of assets to be held and used is the higher of fair value less cost of disposal or value in use as envisaged in Ind-AS 36. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the recoverable value of the asset. Impairment loss is recognized in the statement of profit and loss except for properties previously revalued with revaluation taken to other comprehensive income. For such properties impairment loss is recognized in other comprehensive income up to the amount of any previous revaluation.

i) Inventories

The general practice adopted by the company for valuation of inventory is as under:-

i) Raw Materials	*At lower of cost and net realizable value.
ii) Stores and spares	At cost
iii) Work-in-process/ semi-finished goods	At material cost plus labour and other appropriate portion of production and administrative overheads and depreciation
iv) Finished Goods/ Traded Goods	At lower of cost and market value.

v) Finished Goods at the end of trial run	At net realizable value.
vi) Scrap material	At net realizable value.
vii) Tools and equipments	At lower of cost and disposable value.

***Material and other supplies held for use in the production of the inventories are not written down below cost if the finished goods in which they will be incorporated are expected to be sold at or above cost.**

j) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

k) Trade receivables

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using effective interest method, less provision for impairment.

l) Investments and other financial assets

i. Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in Statement of profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for equity investment at fair value through other comprehensive income.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

ii. Measurement

At initial recognition, the company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly

attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments:

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in profit and loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/(losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. A gain or loss on debt investment that is subsequently measured at fair value through profit or loss is recognized in profit or loss and presented net in the statement of profit and loss in the period in which it arises. Interest income from these financial assets is included in other income.

Equity instruments:

The Company subsequently measures all equity investments at fair value. Where the company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent

LLOYDS METALS AND ENERGY LIMITED

reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognized in profit or loss as other income when the Company's right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognized in the other income. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

iii. Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortized cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Note 33 details how the Company determines whether there has been a significant increase in credit risk.

For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognized from initial recognition of the receivables.

iv. De-recognition of financial assets

Financial asset is derecognized only when:

- The Company has transferred the rights to receive cash flow from the financial asset or
- retains the contractual rights to receive the cash flows of the financial assets, but assumes a contractual obligation to pay cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognized. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset is not derecognized.

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognized if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognized to the extent of continuing involvement in the financial asset.

m) Income recognition

Interest income

Interest income from debt instruments is recognized using effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount

of a financial asset. When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instruments but does not consider the expected credit losses.

n) Cost recognition

Costs and expenses are recognized when incurred and have been classified according to their nature. The costs of the Company are broadly categorized in to material consumption, cost of trading goods, employee benefit expenses, depreciation and amortization, other operating expenses and finance cost. Employee benefit expenses include employee compensation, gratuity, leave encashment, contribution to various funds and staff welfare expenses. Other expenses broadly comprise manufacturing expenses, administrative expenses and selling and distribution expenses.

o) Derivatives

The derivative contracts to hedge risks which are not designated as hedges are accounted at fair value through profit or loss and are included in profit and loss account.

p) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

q) Property, plant and equipment

Property, plant and equipment are carried at cost less accumulated depreciation and impairment loss, if any in accordance with Ind-AS 16. The Company reviews the fair value with sufficient frequency to ensure that the carrying amount does not differ materially from its fair value.

Cost excludes CENVAT credit, sales tax, service tax credit, Input credit under GST and such other levies / taxes. Depreciation on assets is claimed on such 'reduced' cost. All items of repairs and maintenance are recognized in the statement of profit and loss, except those meet the recognition principle as defined in Ind-AS 16 Any revaluation of an asset is recognized in other comprehensive income and shown as revaluation reserves in other equity.

Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of all its property, plant and equipment recognized as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Depreciation/Amortisation methods, estimated useful lives and residual value

Depreciation is calculated using the straight-line basis at the rates arrived at based on the useful lives prescribed in Schedule II of the Companies Act, 2013. The company follows the policy of charging depreciation on pro-rata basis on the assets acquired or disposed off during the year. Leasehold assets are amortized over the period of lease.

The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains or losses on disposal are determined by comparing proceeds with carrying amount.

r) Intangible assets**i) Recognition**

Intangible assets are recognized only when future economic benefits arising out of the assets flow to the enterprise and are amortized over their useful life. Intangible assets purchased are measured at cost or fair value as of the date of acquisition, as applicable, less accumulated amortization and accumulated impairment, if any.

ii) Amortization methods and periods

The Company amortizes intangible assets on a straight line method over their estimated useful life not exceeding 5 years. Software is amortized over a period of three years.

iii) Transition to Ind AS

On transition to Ind AS, the company has elected to continue with the carrying value of all of intangible assets recognized as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

s) Trade and other payables

These amounts represent liabilities for goods and services provided to the company prior to the end of financial year which are unpaid. The amounts are unsecured and are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

t) Borrowings

Borrowings are initially recognized at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is

probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

Where the terms of a financial liability are renegotiated and the entity issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognized in profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instrument issued.

u) Borrowing costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as defined in Ind-AS 23 are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing cost eligible for capitalization. Any related foreign currency fluctuations on account of qualifying asset under construction is capitalized and added to the cost of asset concerned. Other borrowing costs are expensed as incurred.

v) Employee benefits**i) Short-term obligations**

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

ii) Other long-term employee benefit obligations

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore

LLOYDS METALS AND ENERGY LIMITED

measured at the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligations.

Remeasurements as a result of the experience adjustments and changes in actuarial assumptions are recognized in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

iii) Post-employment obligations

The Company operates the following post-employment schemes:

- (a) Defined benefit plans such as gratuity; and
- (b) Defined contribution plans such as provident fund and superannuation fund.

Gratuity obligations

The liability or assets recognized in the balance sheet in respect of gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss.

Defined contribution plans

The company pays provident fund contributions to publicly administered funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined

contribution plans and the contributions are recognized as employee benefit expense when they are due.

iv) Equity settled share-based payments

Equity-settled share based payments to employee are measured at the fair value (i.e. excess of fair value over the exercise price of the option) of the Employee Stock Options Plan at the grant date. The fair value of option at the grant date is calculated by Black- Scholes model. In case the options are granted to employees of the company, the fair value determined at the grant date is expensed on a straight line basis over the vesting period, based on the Company's estimate of options that will eventually vest, with a corresponding increase in equity.

v) Bonus plans

The Company recognizes a liability and an expense for bonuses. The Company recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

w) Contributed equity

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

x) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorized and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

y) Earnings per share

i) **Basic earnings per share:** Basic earnings per share are calculated by dividing:

- The profit attributable to owners of the company.
- By the weighted average number of equity shares outstanding during the financial year.

ii) **Diluted earnings per share:** diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account:

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

z) Custom duty and its benefits

Customs Duty payable on imported raw materials, components and stores and spares is recognized to the extent assessed by the customs department.

Customs duty entitlement eligible under pass book scheme / DEPB is accounted on accrual basis.

Accordingly, import duty benefits against exports effected during the year are accounted on estimate basis as incentive till the end of the year in respect of duty free imports of raw material yet to be made.

(aa) The Treatment of expenditure during construction period

All expenditure and interest cost during the project construction period, are accumulated and shown as Capital Work-in- Progress until the project/assets commences commercial production. Assets under construction are not depreciated. Expenditure/Income arising out of trial run is part of pre-operative expenses included in Capital Work-in-Progress.

(ab) Fair value measurement

The Company reviews the fair value of Land with sufficient frequency to ensure that the carrying amount does not differ materially from its fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company uses valuation techniques that are appropriate in circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant absorbable inputs and minimizing the use of un-absorbable inputs. External valuers are appointed for valuing land. The selection criteria for these valuers include market knowledge, reputation, independence and whether professional standards are maintained.

(ac) Amortization of expenses

Equity Issue expenses: Expenditure incurred in equity issue is being treated as Deferred and Revenue Expenditure to be amortized over a period of 10 years;

Debenture Issue Expenses: Debenture Issue expenditure is amortized over the period of 10 years.

Deferred Revenue Expenses: Deferred Revenue expenses are amortized over a period of 5 years.

(ad) Research and development expenses

Research and Development costs (other than cost of fixed assets acquired) are expensed in the year in which they are incurred.

(ae) Investment in Associates:

Investments in associates are recognized at cost. The company provides for any permanent diminution, if any, in value of such investment.

(af) Accounting for Provisions, Contingent Liabilities & Contingent Assets

In conformity with Ind-AS 37, 'Provisions, Contingent Liabilities and Contingent Assets', issued by the ICAI. A provision is recognized when the Company has a present obligation as a result of past event and it is probable than an

outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements. A contingent asset is neither recognized nor disclosed in financial statements.

(ag) Provision for doubtful debts

The management reviews on a periodical basis the outstanding debtors with a view to determine as to whether the debtors are good, bad or doubtful after taking into consideration all the relevant aspects. On the basis of such review and in pursuance of other prudent financial considerations the management determines the extent of provision to be made in the accounts.

(ah) Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

3. Critical estimates and Judgments

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and future periods are affected. Key sources of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of investments, useful lives of property, plant and equipment, valuation of deferred tax assets, provisions and contingent liabilities.

Impairment of Investments

The Company reviews its carrying value of investments carried at amortized cost annually, or more frequently when there is indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

27. Disclosure as required by the Ind AS -19 “Employees Benefit” is given below:

Defined benefit plan: The Company operates one defined benefit plan, viz., gratuity benefit, for its employees. The Gratuity plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days basic salary payable for each completed year of service. The company does not have any fund for gratuity liability and the same is accounted for as provision.

Under the other long term employee benefit plan, the company extends benefit of compensated absences to the employees, whereby they are eligible to carry forward their entitlement of earned leave for encashment upon retirement / separation or during tenure of service. The Plan is not funded by the company.

The details of defined benefit obligations are as under:

(₹ in Lakhs)

Sr. No.	Particulars	Gratuity	
		31 st March, 2019	31 st March, 2018
1.	Obligation as at beginning of the year	404.22	332.75

Sr. No.	Particulars	Gratuity	
		31 st March, 2019	31 st March, 2018
1.	Current service cost	43.09	40.62
2.	Interest cost	31.12	24.96
	Total	74.21	65.58

Amount recognized in other comprehensive income:

(₹ in Lakhs)

Sr. No.	Particulars	Gratuity	
		31 st March, 2019	31 st March, 2018
1.	Remeasurements	(25.70)	22.36
	Total	(25.70)	22.36

Due to its defined benefit plans, the Company is exposed to the following significant risks:

Changes in bond yields - A decrease in bond yields will increase plan liability.

Salary risk - The present value of the defined benefit plans liability is calculated by reference to the future salaries of the plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Existing assumptions:

Sr. No.	Particulars	Gratuity	
		31 st March, 2019	31 st March, 2018
1.	Discount rate	7.70%	7.75%
2.	Rate of salary increase	8.50%	8.00%
3.	Withdrawal rate	1.00%	1.00%
4.	Mortality rate	Indian Assured Lives (2006-08)	Indian Assured Lives (2006-08)
5.	Retirement age	62 years	62 years

Note: The Company regularly assesses these assumptions with the projected long-term plans and prevalent industry standards.

The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

(₹ in Lakhs)

Particulars	Change in assumption	Gratuity	
		31 st March, 2019	31 st March, 2018
Discount Rate	+1%	391.87	355.48
	-1%	490.30	462.41
Salary Growth Rate	+1%	489.36	461.39
	-1%	391.80	355.37

The above sensitivity analysis is determined based on a method that extrapolates the impact on the net defined benefit obligations, as a result of reasonable possible changes in the significant actuarial assumptions. Further, the above sensitivity analysis is based on a reasonably possible change in a particular under-lying actuarial assumption, while assuming all other assumptions to be constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

The table below summarizes the maturity profile and duration of the gratuity liability:

(₹ in Lakhs)

Particulars	Gratuity	
	31 st March, 2019	31 st March, 2018
Within one year	19.60	15.00
Within one-three years	32.43	14.26
Within three-five years	29.41	28.89
Above five years	355.73	346.07
Weighted average duration (in years)	13.34 years	5 years

28. Financial instrument and risk management

Fair values

- The carrying amounts of trade payables, other financial liabilities (current), borrowings (current), trade receivables, cash and cash equivalents, other bank balances and loans are considered to be the same as fair value due to their short term nature.
- Borrowings (non-current) consists of loans from banks and government authorities, other financial liabilities (non-current) consists of interest accrued but not due on deposits other financial assets consists of employee advances where the fair value is considered based on the discounted cash flow.
- The fair value of forward foreign exchange contracts is calculated as the present value determined using forward exchange rates, currency basis spreads between the respective currencies and interest rate curves.

The fair value of financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial instruments:

29. Financial risk and capital risk management

1) Financial Risk

The business activities of the Company expose it to a variety of financial risks, namely market risks (that is, foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Company's risk management strategies focus on the un-predictability of these elements and seek to minimize the potential adverse effects on its financial performance.

The financial risk management for the Company is driven by the Company's senior management and internal/ external experts subject to necessary supervision.

The Company does not undertake any speculative transactions either through derivatives or otherwise. The senior management is accountable to the Board of Directors and Audit Committee. They ensure that the Company's financial risk-taking activities are governed by appropriate financial risk governance frame work, policies and procedures. The Board of Directors periodically reviews the exposures to financial risks, and the measures taken for risk mitigation and the results thereof.

2) Foreign currency Risk

Foreign exchange risk arises on all recognised monetary assets and liabilities and on highly probable forecasted transactions which are denominated in a currency other than the functional currency of the Company. The Company does not have any foreign currency trade payables and receivables.

The foreign exchange risk management policy of the Company requires it to manage the foreign exchange risk by transacting as far as possible in the functional currency.

No Forward contracts were entered into by the company either during the year or previous years since the company has very minimum exposure to foreign currency risk.

i. Price risk

The company uses surplus fund in operations and for further growth of the company. Hence, there is no price risk associated with such activity.

ii. Credit risk

Credit risk refers to the risk of default on its obligation by the counter-party the risk of deterioration of creditworthiness of the counter-party as well as concentration risks of financial assets, and thereby exposing the Company to potential financial losses. The Company is exposed to credit risk mainly with respect to trade receivables.

Trade receivables

The Trade receivables of the Company are typically non interest bearing un-secured. As there is no independent credit rating of the customers available with the Company, the

management reviews the credit-worthiness of its customers based on their financial position, past experience and other factors. The credit risk related to the trade receivables is managed / mitigated by concerned team based on the Company's established policy and procedures and by setting appropriate payment terms and credit period. The credit period provided by the Company to its customers depend upon the contractual terms with the customers.

The ageing analysis of trade receivables as at the reporting date is as follows:

(₹ in Lakhs)

Particulars	Less than six months	More than six months
Trade Receivables as at March 31, 2019	2,185.95	124.02
Trade Receivables as at March 31, 2018	1,504.41	49.42

The Company performs on-going credit evaluations of its customers' financial condition and monitors the credit-worthiness of its customers to which it grants credit in its ordinary course of business. The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amount due or there are some disputes which in the opinion of the management is not in the Company's favour. Where the financial asset has been written-off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit and loss.

iii. Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. Accordingly, as a prudent liquidity risk management measure, the Company closely monitors its liquidity position and deploys a robust cash management system.

Based on past performance and current expectations, the Company believes that the Cash and cash equivalents and cash generated from operations will satisfy its working capital needs, capital expenditure, investment requirements, commitments and other liquidity requirements associated with its existing operations, through at least the next twelve months.

3) Capital Risk

The Company's objective while managing capital is to safeguard its ability to continue as a going concern (so that it is enabled to provide returns and create value for its shareholders, and benefits for other stakeholders), support business stability and growth, ensure adherence to the covenants and restrictions imposed by lenders and/ or relevant laws and regulations, and maintain an optimal and efficient capital structure so as to reduce the cost of capital. However, the key objective of the Company's capital management is to, ensure that it maintains a stable capital structure with the focus on total equity, uphold investor; creditor and customer confidence, and ensure future development of its business activities. In order to maintain or adjust the capital structure, the Company may issue new shares, declare dividends, return capital to shareholders, etc.

The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions or its business requirements.

30. Capital Management

Capital management and Gearing Ratio

For the purpose of the Company's capital management, capital includes issued equity capital, share premium and all other equity reserves attributable to the equity holders. The primary objective of the company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. The Company monitors capital using a gearing ratio, which is debt divided by total capital. The Company includes within debt, interest bearing loans and borrowings.

Notes:

- This form of proxy in order to be effective should be duly completed and deposited at the Registered Office of the Company, not less than 48 hours before the commencement of the Meeting.**
- A Proxy need not be a member of the Company.**
- A person can act as a proxy on behalf of members not exceeding fifty and holding in the aggregate not more than 10% of the total share capital of the Company carrying voting rights. A member holding more than 10% of the total share capital of the Company carrying voting rights may appoint a single person as proxy and such person shall not act as a proxy for any other person or shareholder.**
- ** This is only optional. Please put a '✓' in the appropriate column against the resolutions indicated in the Box. If you leave the 'For' or 'Against' column blank against any or all the resolutions, your Proxy will be entitled to vote in the manner as he/she thinks appropriate.**
- Appointing a proxy does not prevent a member from attending the meeting in person if he so wishes.**
- In the case of joint holders, the signature of any one holder will be sufficient, but names of all the joint holders should be stated.**
