Your Company delivered another year of strong financial performance with compare to financial year 2013-14. Your Company earned profit after tax of **₹12.069 lacs** during financial year 2014-15.

The Company was doing well in Financial Year 2014-15 comparable financial year 2013-14, But future we sure that Company will grow fastly. Now, we should be able to post even better results next year as we are all set to strongly focus on taking our business to higher levels of operational excellence and growth. This gives me the confidence to say that with God's blessings, team's hard work and your support; we shall be able to report stellar results for the next year.

Outlook

India's Textiles and Garments industry, which accounts for 14% of India's total industrial production and 4% of India's GDP, is considered as one of the significant contributor to the national economy. After witnessing challenges during the year 2013 and for most part of 2014 given unfavorable economic conditions, the Indian textiles and garments sector has seen reversal of trends in second half of 2014. With domestic and global economic conditions gradually improving along with the focused efforts made by Ministry of Textiles, Indian textiles and garments sector is set for growth, buoyed by revival in domestic consumption and export demand.

Improved demand from the US market, rising cost of labour in China would provide boost to the India textile exports

In dollar terms, the total value of textile products exported from India touched US \$35.4 bn in FY14, which was 12% higher compared to FY13. The US has been the primary market for Indian textile exporters and accounts for the major share of India's textile and garments exports. As per the US Dept. of Commerce's Office of Textiles and Apparel (OTEXA), Indian textile and apparel exports to the US have risen nearly 7% during Jan – Oct 2014 as compared to the previous corresponding period. During the same period, textile/apparel exports of China to the US increased by 1.5%

Corporate Social Responsibility

Your Company's approach to social responsibility extends well beyond business and financial considerations. The Company has been set up to create economic and social opportunities for those at the bottom of the pyramid and particularly aims to create awareness among women and children about health, sanitation and education.

Human Resources & Industrial Relations

The dedication and commitment of our people has been a key strength. We continue to focus on enhancing the knowledge base through Learning & Development initiatives and are working on strengthening the management bandwidth. I am also pleased to inform you that industrial relations at all units were cordial during the year under review and, on behalf of your Directors; I acknowledge the co-operation and contribution of the entire workforce.

Acknowledgements

Textile Industry Outlook & Opportunities

Textile industry contributes to nearly 12% of India's forex earnings. But, the branding of India's prowess especially pertaining to the exports has been about technology. It's a pity that textile industry, despite being on the export forefront, has never been given its due despite its heavy potential irrespective of the weather in the market.

India has always been self-sufficient with textiles and is not dependant on imports. This is the only industry which has been posting growth graph year after year. However, textile industry is expected to grow well into the future, with improved bilateral relationships with countries that have been the biggest clients of India.

'Needed' items

Budget 2015 has surely raised the expectations of textile industry to put forth its list of 'needed' items. Some of the textile honchos feel government should take steps to cap the interest rates for exporters at 7% which would then encourage them to make further investments.

World share

Though India is self sufficient in textile industry, country's share in the world market is a mere 4% compared to 35% of China. India needs to focus on scaling operations if this scenario has to change.

High expectations

MSMEs are hoping that they would be able to make some headway into the otherwise highly competitive markets, which are dominated by corporate houses.

Investment on exclusive technology

There are varied opinions on this front where technology plays a role in bringing down the manufacturing and operative costs. While one section would always argue that money saved is money earned, by way of adapting new technology; there is another section that believes technology alone cannot save textile industry without appropriate measure being taken in its favour.

Corporate Social Responsibility

As per the requirement of sub section 135 of the Companies Act 2013, the Company was required to spend at least two percent of its average net profits for the three immediately preceding financial years, in pursuant of its Corporate Social Responsibility (CSR) Policy. Management Discussion and Analysis Report

Industry Structure and Development

We are currently engaged in the business of trading of fabrics. We are a multi-product fabric trading and our range includes fabrics for bedding, windows dressing, decorative, pillows and accents, table linen, kitchen linen and other home furnishing fabrics. We have a diverse product portfolio. We also participate in auctions carried by authorized agents of customs and ports to buy the textile materials confiscated by them. We are able to get these textile materials at a cheaper rate from these auctions.

Our Business Process is buying regular lots through mills & traders and buying odd lots in the auction by authorised agents of customs & ports, then after direct sale or get some process done from the outside and then sale.

We are currently serving the corporate and other clients from various spheres of textile industry. Our customers during FY 2014-2015 include Alps Industries Limited, Argon Denims Limited, BBD Traders Private Limited, Faishons Flasher India Private Limited, and Nagar Handloom Private Limited amongst others.

Industry Overview:

India's Textiles and Garments industry, which accounts for 14% of India's total industrial production and 4% of India's GDP, is considered as one of the significant contributor to the national economy. After witnessing challenges during the year 2013 and for most part of 2014 given unfavourable economic conditions, the Indian textiles and garments sector has seen reversal of trends in second half of 2014. With domestic and global economic conditions gradually improving along with the focused efforts made by Ministry of Textiles, Indian textiles and garments sector is set for growth, buoyed by revival in domestic consumption and export demand.

Improved demand from the US market, rising cost of labour in China would provide boost to the Indian textile exports

In dollar terms, the total value of textile products exported from India touched US \$35.4 bn in FY14, which was 12% higher compared to FY13. The US has been the primary market for Indian textile exporters and accounts for the major share of India's textile and garments exports. As per the US Dept. of Commerce's Office of Textiles and Apparel (OTEXA), Indian textile and apparel exports to the US have risen nearly 7% during Jan – Oct 2014 as compared to the previous corresponding period. During the same period, textile/apparel exports of China to the US increased by 1.5%.

India's growth in textile and apparel exports can largely be attributed to the steady growth in demand from the US market. In addition to this, others factors that are contributing to India's textile growth story are:

- Continuing slowdown in the Chinese textile exports to the US due to rising labour costs and power shortages
- Non-compliance of textiles units in Bangladesh to the global safety standards
- Labour unrest in Cambodia's textile plant
- High cost of credit in Vietnam
- Appreciation of Indonesian currency during January, 2014

All these factors combined together are expected to enable India to significantly turnaround its textile industry. Also, with economic scenario in the US gradually improving, the demand for textile products is expected to improve further. This would help in the growth of India's textile exports.

a) Government Initiatives

While US and EU continue to remain primary markets for Indian textile and garment products, Indian government has taken various initiatives to reduce India's dependence on these markets. In order to encourage textile exporters to focus on new markets and reduce their reliance on US and EU, the government, under the Focus Market Scheme, introduced duty credit scrip which the textile exporters can avail on export to 26 additional countries apart from existing destinations. In addition in 2013, the Indian government signed MOUs with governments of various countries such as Mauritius, Tehran, Japan, Uzbekistan, Romania, Sri Lanka and Myanmar in order to provide boost to the Indian textile sector.

Recently the government also passed the Textile Undertakings (Nationalization) Laws (Amendment and Validation) Bill, 2014 to ensure proper and effective implementation of the revival scheme for sick textile units. In Budget FY15, a sum of Rs 5 bn was allocated for developing textile mega-cluster at Varanasi and six more at Bareilly, Lucknow, Surat, Kutch, Bhagalpur and Mysore and also allocated Rs 100 mn to set up a Trade Facilitation Centre and a Crafts Museum to develop and promote handloom products .

In addition, the 'Make in India' campaign launched by the government intends to provide a further boost to the Indian textile industry and enable it achieve 20% growth in exports and sustain 12% growth rate in domestic market till 2024-25 as suggested by report of expert committee on Vision, Strategy and Action Plan for Indian Textiles and Apparel Sector. The campaign also focused on providing investment opportunities for foreign companies and entrepreneurs across the entire value chain of synthetics, value-added and specialty fabrics, fabric processing set-ups for all kinds of natural and synthetic textiles, technical textiles, garments and retail brands.

These initiatives taken by the Indian government to provide boost to the textile industry coupled with the recent developments in the global market are expected to widen the export markets for the textile exporters and also help in driving textile growth in the domestic market.

Operational Performance

During the current period, your company has shown an increase in revenue to the extent of ₹3973.87 Lakhs during FY 2013-14 to ₹ 4206.45 Lakhs during FY 2014-15. PAT has shown an increase of from ₹ (1.90) Lakhs during FY 2013-14 to ₹ 12.06 Lakhs during FY 2014-15.

Outlook

Indian economy is adversely affected by persistent inflation over the last few years. The rising incomes propped the purchasing power of the population, driving consumption demand in sectors, where supply lagged particularly, in food-grain and non food-grain commodities, Sharp increase in international prices of fuels also contributed to inflationary pressure. The Government has been going very slow on various reforms, expected by large investors and market. Market participants were particularly concerned about subsidies fertilizer, food and fuel; falling rupee against dollar; widening current account and fiscal deficits. Net Buys by the Foreign Institutional investors have been declining during the year as compared to these of the earlier years. Economic situations in Euro Zone countries and other priced the Capital Market towards losses.
