Chairman's Speech

My Dear Family of Shareholders,

It gives me great pleasure to welcome you today to be a part of history in the making at the 32nd AGM of our company, Orbit Exports Ltd.

The Company accounts for the year ended March 31, 2015 along with the Directors and Auditors report, a letter to the Shareholders and Management Discussion and Analysis, have been already circulated to all of you.

With your permission, I would like to take them as read.

I look back at the decade that was and look forward to the decade that will be with a great sense of satisfaction and an even greater sense of anticipation.

When we took over a little over a decade ago we had major ambitions and strong convictions on not just our goals but also in the ethical manner in which to achieve them. I am proud to say that we have been able to exceed our expectations till date whilst maintaining our integrity and following the most ethical business practices whilst focusing on quality and compliances. Our commitment in this regard is absolute.

It is with great pride that i would like to share with you that your company has been recognised by Forbes as “best under a billion” in Asia.

There were just 11 companies from india that made this list of 200 companies and Orbit was one of them.

Two years ago we established a wholly owned subsidiary in Los Angeles, USA. The purpose was to have a presence in North America to be able to penetrate and service potential markets in Central and South America. Whilst our initial thrust was to Guatemala, Mexico and El Salvador, we have now been able to establish a presence in Chile, Peru and Venezuela as well. There appear to be very bright prospects for a further thrust in this region. Last year, after one year of beginning our LA operations, we broke even. In this, our second year, we will be able to turn a tidy profit.

With an aim to grow our Ribbon and made ups business we have moved into a new facility at Kalyan.

This facility has been audited and is compliant with major chains of the US and Europe.

It has also cleared the most stringent C-TPAT (Customs-Trade Partnership Against Terrorism) Audit conducted by the US customs. This gives our company genuine credibility as a proponent of ethical business practices in overseas markets.

As our order book grows, we need to continuously expand our manufacturing base, which we are doing with expansions in Kosamba, Gujarat by incorporating state of the art technology which gives us a competitive edge in international markets.

The implementation of the ERP this year will enable us to grow at a much faster pace with timely MIS and better inventory management.

Our performance has been excellent with an all-time high turnover of 157.40 crores as compared to 137.02 crores in the previous year which is an increase of 14.87%. We have an all time high PAT of 26.70 crores as compared to 20 crores in the previous year showing an increase of 33.5%. Many investors are showing an interest in our company and our family of shareholders has grown to 7019 as compared to 3934 in the previous year. Further the whizkids of the financial world are now discovering what you always knew..that your company is a great investment opportunity.

This year we have declared a dividend of 45%. Our Credit Rating has been upgraded for Long Term Rating to ICRA A (Stable) and for Short Term to ICRA A1.

We are currently in the midst of a unique and very profitable journey for all our shareholders and supporters. In the past we have been able to withstand adverse market conditions to keep on with our objectives of growth. We see a very bright future for the products of our company. Whilst we are expanding in our existing markets, we are also penetrating new markets with huge potential for us. We have recently added one of the world's largest retailers to our ever expanding customer base and expect very good orders from them in the coming year.

Chairman

MANAGEMENT DISCUSSION AND ANALYSIS

The Management of **ORBIT EXPORTS LIMITED** presents its Analysis report covering performance and outlook of the Company. The Report has been prepared in compliance with the requirements of Corporate Governance as laid down in the Listing Agreement. The Management accepts responsibility for the integrity and objectivity of the financial statements. However, investors and readers are cautioned that this discussion contains certain forward looking Statements that involve risk and uncertainties.

Global Economy

The global economy is still under stress for gaining momentum as many high-income countries continue to grapple with the past impacts of the global financial crisis. Emerging economies continue to remain as less vibrant than in the past. After rising slightly in 2014, to 2.6 percent, world GDP will grow by an estimated 3.0 percent in 2015 and 3.3 percent in 2016, supported by gradual recovery in high-income countries, low oil prices, and receding domestic headwinds in developing countries. Developing economies are projected to see a raise in growth from 4.4 percent in 2014 to 4.8 percent and 5.3 percent in 2015 and 2016 respectively.

The global average reflects a combination of upsides and downsides. Downward revision are primarily due to a major GDP decline in Russia (from +0.8 to -3.5 percent) and moderate declines in the Euro Area (1.6 to 1.4 percent), Japan (1.1 to 0.6 percent), and Brazil (1.5 to 0.5 percent). Upward revisions include the United States (2.6 to 2.9 percent), Mexico (2.8 to 3.5 percent), and India (5.5 to 5.9 percent). The adjustments to India, however, do not reflect the recent substantial statistical upward revisions in India's GDP growth measures, the reliability of which is still debated.

Indian Economy

After years of diminutive growth the reform momentum has picked up in India.

Inflation has declined by over 6 percentage points since late 2013, and the current account deficit has shrunk from a peak of 6.7 percent of GDP (in Q3, 2012-13) to an estimated 1.0 percent in the coming fiscal year

Going ahead it is widely expected that a further momentum to growth will be provided by declining oil prices and increasing monetary easing facilitated by ongoing moderation in inflation. Simulating the effects of tax cuts, declining oil prices will add spending power to households, thereby boosting consumption and growth. Oil is also a significant input in production and declining prices will shore up profit margins and hence balance sheets of the corporate sector.

Indian Exports

Due to fragile global economic situations the India exports were also impacted. India's exports dipped deeper in the negative zone recording a decline of 21% in March 2015, the biggest fall in the last six years, pulling down the total shipment for 2014-15 to US \$310.5 billion, missing the annual target.

Exports have been on downward spiral since December last year. The previous biggest decline in export was in July 2009, when it dipped by 28.4%. Falling exports and an increase in gold imports have widened the trade deficit to four-month high of US \$11.79 billion in March.

The trade deficit for April-March, 2014-15 was estimated at US \$ 137014.46 million, which was higher than the deficit of US \$ 135797.90 million during April-March, 2013-14.

Opportunities and Challenges

- Availability of greater investment and FDI opportunities.

- Emerging retail industry and malls provide significant opportunities for the apparel, handicraft and other segments of the industry as the market is gradually shifting towards branded readymade garments.
- Cheaper oil is boosting real incomes and consumer sentiment, and there is continued support from accommodative monetary policy, despite the projected gradual rise in interest rates.

Challenges:

- Entry of multinational in domestic markets.
- Stiff competition from other countries (The performance of global competitor's in fabrics and garments indicates that there are at least 4 countries ie, China, Indonesia, Thailand and Pakistan).
- Adoption to fast changing fashion demands.
- The major challenge that the textile and apparel industry is facing is rising production costs, arising out of rising wages, power and interest costs, restrictive labour laws and intensified competition from other low cost countries like Bangladesh. Such issues need to be addressed to result in unlocking maximum industry growth potential.

SIGNIFICANT ACCOUNTING POLICIES

1. Accounting Convention:

The financial statements are prepared under the historical cost convention, on the accrual basis of accounting, in accordance with the generally accepted accounting principles in India, the Accounting Standards issued by the Institute of Chartered Accountants of India and the relevant provisions of the Companies Act, 2013.

2. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the management to make estimates and assumptions that affect the reported balances of assets and liabilities as of the date of the financial statements and reported amounts of income and expenses during the period. Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Actual results could differ from the estimates.

3. Revenue Recognition:

- a) Sales are accounted on mercantile basis when the sale of goods is completed and are recorded net of returns, trade discounts, rebates, sales taxes.
- b) Export incentives are accounted on accrual basis and include the estimated value of export incentives receivable under the Duty Draw Back Scheme and other applicable schemes.
- c) Dividend income is recognized when the right to receive the same is established.
- d) Interest income is recognized on a time proportion basis.
- e) Revenue in respect of insurance/other claims, interest etc. is recognized only when it is reasonably certain that the ultimate collection will be made.

4. Fixed Assets:

Fixed assets are stated at cost less accumulated depreciation, amortization and accumulated impairment losses. Cost comprises the purchase price and any cost attributable for bringing the asset to its working condition for its intended use. Fixed assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

An asset's recoverable amount is the higher of an asset's net selling price and its value in use. If such assets are considered to be impaired, the impairment is recognized by debiting the Statement of Profit & Loss Account and is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets.

5. Investments:

Investments are classified into long-term and current investments. Long-term investments are carried at cost. Provision for diminution, if any, in the value of each long-term investment is made to recognize a decline, other than of a temporary nature. The fair value of a long term investment is ascertained with reference to its market value, the investee's assets and results and the expected cash flows from the investment. Current investments are stated at lower of cost and fair Value.

6. Inventories:

Inventories are valued at lower of cost and net realizable value. Raw Material is valued at cost on weightage average basis. Finished goods and work in progress include cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Provision is made for the cost of obsolescence and other anticipated losses, wherever considered necessary.

7. Impairment of Assets:-

At the end of each year, the company determines whether a provision should be made for impairment loss on fixed assets by considering the indications that an impairment loss may have occurred in accordance with Accounting Standard 28 (AS-28) "Impairment of Assets". An impairment loss is charged to the Statement of Profit & Loss in the year in which, an asset is identified as impaired, when the carrying value of the asset exceeds its recoverable value. The impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of recoverable amount.

8. Provisions & Contingent Liabilities:-

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources i.e. Contingent liabilities arising from Claim, litigation, Assessments, fines, penalties etc. are provided for when it is probable that a liability may be incurred and the amount can be reasonably estimated.

9. Depreciation Accounting:-

Till the year ended 31st March 2014, depreciation rates prescribed under Schedule – XIV were treated as minimum rates and the company was not allowed to charge depreciation at lower rates even if such lower rates were justified by the estimated useful life of the asset. Schedule – II to the Companies Act, 2013 prescribes useful lives for fixed assets which, in many cases, are different from lives prescribed under the erstwhile Schedule XIV. Considering the applicability of Schedule – II, the management has re-estimated useful lives and residual values of all its fixed assets. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of fixed assets. Depreciation on fixed assets is provided on straight-line method, over estimated useful lives, as determined by the management.

Assets costing less than ₹ 5,000/- are fully depreciated in the year of purchase.

For assets purchased/ sold during the year, depreciation is being provided on pro rata basis by the Company.

10. Foreign Currency Transactions:

Monetary foreign currency assets and liabilities are translated at the balance sheet date at rates notified by the Foreign Exchange Dealers' Association of India ("FEDAI").

Foreign exchange contracts are stated at net present value using LIBOR/SWAP curves of the respective currencies.

The resulting profits or losses are recognized in the profit and loss account. Premia/discounts on foreign exchange swaps, that are used to hedge risks arising from foreign currency assets and liabilities, are amortized over the life of the swap.

Income and expenditure in foreign currency are accounted for at exchange rates prevalent on the date of the transaction.

In accordance with AS – 11 "The Effects of changes in Foreign Exchange Rates", contingent liabilities in respect of outstanding foreign exchange forward contracts, derivatives, guarantees, endorsements and other obligations are stated at the exchange rates notified by FEDAI corresponding to the balance sheet date.

11. Government Grants:-

Grants, in the nature of interest subsidy under the Technology Up-gradation Fund (TUF) Scheme, are accounted for when it is reasonably certain that ultimate collection will be made. Government grants not specifically related to fixed assets are recognized in the Statement of Profit and Loss in the year of accrual / receipt.

Government grants in the nature of Promoters' funds have been recognized in the nature of shareholders' funds by way of contribution towards its total capital outlay.

12. Employee Benefits:

i. Defined contribution plans:

The Company contribution to provident fund and ESIC are charged to the Statement of Profit and Loss.

The plan provides for lump sum payments to vested employees at retirement or upon death while in employment or on termination of employment for an amount equivalent to 15 days' eligible salary payable for each completed year of service if the service is more than 5 years. The Company accounts for the liability for future gratuity benefits using the projected unit cost method based on annual actuarial valuation. The Company recognizes the actuarial gains and losses during the year in which the same are incurred.

Provident fund

In accordance with law, all employees of the Company are entitled to receive benefits under the provident fund, a defined contribution plan in which both the employee and the Bank contribute monthly at a pre determined rate. All other borrowing costs are charged to revenue in the year in which they are incurred.

14. Segment Reporting:-

Since the windmill power generation segment is not significant as defined in AS-17, the Company is considered to be a single segment company – engaged in the manufacture of textiles. Consequently, the Company has in its primary segment only one reportable business segment.

15. Taxes on Income:-

Tax expense comprises current and deferred tax. Current tax comprises of the amount of tax for the period determined in accordance with the Income Tax Act, 1961 and the rules framed there under. Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax assets and liabilities are recognized for the future tax consequences of timing differences between the carrying values of assets and liabilities and their respective tax bases and operating loss carry forwards. Deferred tax assets and liabilities are measured using the enacted or substantively enacted tax rates at the balance sheet date.

Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future. In case of unabsorbed depreciation or carried forward loss under taxation laws, all deferred tax assets are recognized only if there is virtual certainty of realization of such assets supported by convincing evidence. Deferred tax assets are reviewed at each balance sheet date and appropriately adjusted to reflect the amount that is reasonably/virtually certain to be realized.

16. Intangible Assets:-

Intangible assets are recognized only if it is probable that the future economic benefits that are attributable to the assets will flow to the enterprise and the cost of the assets can be measured reliably. The intangible assets are recorded at cost and are carried at cost less accumulated amortization and accumulated impairment losses, if any.

17. Earning Per Share:-

The Company reports basic and diluted earnings per equity share in accordance with Accounting Standard (AS) 20, "Earnings per Share" notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules 2014. Basic earnings per equity share have been computed by dividing net profit after tax for the year by the weighted average number of equity shares outstanding for the period. Diluted earnings per equity share have been computed using the weighted average number of equity shares and dilutive potential equity shares outstanding during the period except where the results are anti dilutive.

18. Employee Stock Compensation Cost

Measurement of the employee share-based payment plans is done in accordance with the Guidance Note on Accounting for Employee Share-based Payments issued by Institute of Chartered Accountants of India (ICAI) and SEBI (Share Based Employee Benefits) Regulations, 2014. The Company measures compensation cost relating to employee stock options using the intrinsic value method. Compensation cost is measured by the excess, if any, of the fair market price of the underlying stock (i.e. the last closing price on the stock exchange on the day preceding the date of grant of stock options) over the exercise price. The exercise price of the Company's stock option is the last closing price on the stock exchange on the day preceding the date of grant of stock options and accordingly there is no compensation cost under the intrinsic value method.
