BUSINESS PERFORMANCE

The financial year 2017-18 was yet another challenging year for the economy. While the domestic economy was looking for improvement post demonetization led slow-down in growth, the same was delayed caused by the further disruptions followed by implementation of Goods and Service Tax (GST). While GST in long term is beneficial for domestic economy, the implementation of the same delayed due to initial teething troubles, the process of industrial recovery by couple of months.

The robust domestic demand, focused cost reduction drive and value added special product portfolio helped the Company deliver strong profitable performance and consequently the Company's profitability improved during F.Y. 2017-18.

Revenue from operations for the F.Y. 2017-18 stood at Rs 22442.04 Lacs against the Rs 23676.33 Lacs of previous year. However Net Profit after tax for the F.Y. 2017-18 was Rs 335.47 Lacs, an increase of 50.10% over the previous year of Rs 223.51 Lacs. EBIDTA for the F.Y. 2017-18 Rs 2735.70 Lacs as compared to previous year Rs 2281.55 Lacs, an increase of 19.91%.

ECONOMY OVERVIEW

GLOBAL ECONOMY

According to the International Monetary Fund (IMF), the global economy is on the road to recovery and grew by 3.8% in CY17, a 0.6 percentage point increase over CY16. This is the highest rate of global GDP growth after CY11. The growth happened owing to an increase in manufacturing activity, private consumption, investments and global trade.

The growth was broad based, with growth increasing in more than half of the world's economies aided by benign global financing conditions, revival in investment sentiment, accommodative monetary policies and higher commodity prices. The growth was higher as compared to the initial estimates with upside surprises in the second half of 2017 in advanced as well as emerging and developing countries. Two-thirds of countries accounting for about three-fourths of global output experienced faster growth in 2017 vis-à-vis previous year.

INDIAN ECONOMY

During FY 2017-18, India's economy was marked by various structural reform initiatives aimed at strengthening the country's macro-economic scenario for sustainable future developments. Despite a tepid performance in the first half of FY 2017-18, owing to disruptions like the implementation of Goods and Services Tax (GST), India maintained its stability to record a growth of 6.7%. India has also emerged as a major global investment economy, gaining the top 5th spot as an international investment destination. Moreover, Moody's Investors Service upgraded India's sovereign rating to Baa2 with stable economic conditions. According to the World Bank report, India has improved its ranking by

30 spots in terms of 'Ease of Doing Business' and is ranked at 100 out of the 190 countries.

OUTLOOK

GLOBAL

The global economic growth should remain strong in 2018, as both advanced and emerging economies enjoy a harmonized upturn. According to the IMF, global growth will inch up from 3.8% in 2017 to 3.9% in 2018 and 2019. Corporate capital expenditure should become a more prominent growth driver, inflation is unlikely to rise much, and central banks will reduce liquidity and raise interest rates in response to better growth. Faster growth in the US, Japan, and China would largely drive global growth during 2019. An encouraging trade and investment environment, along with easing financial conditions, would also impact the global economic conditions.

INDIA

The outlook for India remains largely positive, reinforced by robust private consumption and public investment, as well as the ongoing structural reforms. Global demand has been improving, which should encourage exports and fresh investments.

India's GDP is expected to reach US\$ 6 trillion by FY 2027 owing to consistent reforms, digitisation, globalisation and favourable demographic conditions. Over the next 10-15 years, India is expected to be among the top three economic powers, backed by its strong democracy and partnerships. Government initiatives for infrastructure development, emphasis on creation of smart cities and focus on affordable housing programme is likely to bolster India's industrial development. The GDP growth of the country is estimated to rise to 7.4% in FY 2018-19.

INDUSTRY STRUCTURE & DEVELOPMENT

India's steel production grew 4.5% to its highest ever level of 102 million tonnes in FY18. The Government of India has been proactive in addressing the issues faced by domestic steel makers. It has taken major steps to stop unfair trade and to safeguard the interests of domestic players.

India was the world's third-largest steel producer in 2017. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

India's finished steel consumption grew at a CAGR of 5.69 per cent during FY08-FY18 to reach 90.70 MT.

India's crude steel and finished steel production increased to 102.30 MT and 104.98 MT in 2017-18, respectively.

In 2017-18, the country's finished steel exports increased 17 per cent year-on-year to 9.62 million tonnes (MT), as compared to 8.24 MT in 2016-17.

POLICY SUPPORT AIDING GROWTH IN THE STEEL SECTOR

New National Steel Policy

New National Steel Policy has been formulated by the Ministry of Steel in 2016, which will retain the objectives included in National Steel Policy (NSP) 2005. It aims at covering broader aspects of steel sector across the country including environment and facilitation of new steel projects, growth of steel demand in India and raw materials.

Under the policy, the central government stated that all the government tenders will give preference to domestically manufactured steel and iron products. Moreover, Indian steel makers importing intermediate products or raw

materials can claim benefits of domestic procurement provision by adding minimum of 15 per cent value to the product.

The New steel policy, 2017 aspires to achieve 300MT of steel making capacity by 2030. This would translate into additional investment of Rs 10 lakh Crore (US\$ 156.08 billion) by 2030-31.

New Steel Policy seeks to increase per capita steel consumption to the level of 160 kgs by 2030 from existing level of around 60 kg.

R & D and Innovation

The scheme for the promotion of R&D in the iron and steel sector' has been continued under the 14th Finance Commission (2019-20). Under the scheme, 26 projects have been approved with financial assistance of Rs 161 crore (US\$ 24.98 million) from Ministry of Steel.

The Ministry of Steel is also actively participating in the Impacting Research Innovation & Technology (IMPRINT) & Uchchar Avishkar Yojana (UAY) Schemes launched by Ministry of Human Resource Development. IMPRINT scheme aims to solve major engineering and technology challenges and UAY is promoting industry sponsored, outcome-oriented research projects.

Ministry of Steel is setting up an industry driven institutional mechanism - Steel Research & Technology Mission of India (SRTMI) – with an initial corpus of US\$ 30.89 million. The institute will facilitate joint collaborative research projects in the sector.

OPPORTUNITIES & THREATS

Automotive

The automotive industry is forecasted to grow in size by US\$ 74 billion in 2015 to US\$ 260-300 billion by 2026. With increasing capacity addition in the automotive industry, demand for steel from the sector is expected to be robust. In 2017, India overtook Germany to become the fourth largest automobiles market globally.

Capital Goods

The capital goods sector accounts for 11 per cent of steel consumption and expected to increase 14/15 per cent by 2025-26 and has the potential to increase in tonnage and market share . Corporate India's capex is expected to grow and generate greater demand for steel.

Infrastructure

The infrastructure sector accounts for 9 per cent of steel consumption and expected to increase 11 per cent by 2025-26. Due to such a huge investment in infrastructure the demand for long steel products would increase in the years ahead.

Airport

More and more modern and private airports are expected to be set up. In FY18, passenger traffic at Indian airports stood at 308.75 million and number of operational airports stood at 94 in July 2017. Development of Tier-II city airports would sustain consumption growth. Estimated steel consumption in airport building is likely to grow more than 20 per cent over next few years.

Railways

The Dedicated Rail Freight Corridor (DRFC) network expansion would be enhanced in future .Gauge conversion, setting up of new lines and electrification would drive steel demand . PPP Investments in railways are expected to grow from Rs 24,000 crore (US\$ 3.72 billion) in 2017-18 (RE) to Rs 27,000 crore (US\$ 4.19 billion) in 2018-19.

Oil and Gas

Oil and gas amongst major end-user segment accounted for 34.4 per cent of primary energy consumption in FY16. This would lead to an increase in demand of steel tubes and pipes, providing a lucrative opportunity to the steel industry.

Power

The government targets capacity addition of 100 GW under the 13th Five-Year Plan (2017–22) .Both generation and transmission capacities would be enhanced, thereby raising steel demand from the sector .Power capacity addition of 17,200 MW achieved in 2017-18.

Annexure - B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Simplex Castings Limited** ("the Company") as of 31 March 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

**Inherent Limitations of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2018

1. CORPORATE INFORMATION

Simplex Castings Limited (the company) is a public company domiciled in India and incorporated under the provisions of the Companies Act. Its shares are listed on one stock exchanges in India. The company is mainly engaged in Manufacturing of SG Iron, Steel, Special Alloy Castings, C.I. Castings and Equipments.

The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION AND PRESENTATION

- i) The financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2016 and guidelines issued by the Securities and Exchange Board of India (SEBI).
- ii) For all periods upto and including the year ended 31st March 2017, the company prepared its financial statements in accordance with accounting standards notified as Companies (Accounting Standards) Rules, 2006 and considered as "Previous GAAP".
- iii) These financial statements for the year ended 31st March, 2018 are the Company's first Ind AS standalone financial statements.
- iv) The standalone financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:
 - Certain financial assets and liabilities and
 - Defined benefit plans - plan assets
- v) Company's financial statements are presented in Indian Rupees (₹ in lakhs), which is also its functional currency.

2.2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Current versus non-current classification

The company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is classified as current when it is:

- expected to be realised or intended to be sold or consumed in normal operating cycle;
- held primarily for the purpose of trading;
- expected to be realised within twelve months after the reporting period; or
- cash or a cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other assets are classified as non-current.

A liability is current when it is:

- expected to be settled in normal operating cycle;
- held primarily for the purpose of trading;
- due to be settled within twelve months after the reporting period; or
- there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. The company has identified twelve months as its operating cycle.

b) Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Normally at initial recognition, the transaction price is the best evidence of fair value.

However, when the Company determines that transaction price does not represent the fair value, it uses inter-alia valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All financial assets and financial liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy. This categorisation is based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

Financial assets and financial liabilities that are recognised at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation at the end of each reporting period.

c) Property, Plant and Equipment (PPE)

- i) The company has elected to avail the exemption granted by Ind AS 101 'First Time Adoption of the Indian Accounting Standards' to continue with the carrying value for all of its Property, Plant and Equipment as recognised in the financial statements as at the date of transition to Ind ASs, measured as per the previous GAAP and use that as its deemed cost as at the date of transition (i.e. as on April 1, 2016).
- ii) An item of PPE is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.
- iii) The cost of an item of property, plant and equipment is measured at :
 - its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
 - any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
 - the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation which is to be incurred either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.
- iv) Expenditure incurred on renovation and modernization of PPE on completion of the originally estimated useful life resulting in increased life and/or efficiency of an existing asset, is added to the cost of the related asset. In the carrying amount of an item of PPE, the cost of replacing the part of such an item is recognized when that cost is incurred if the recognition criteria are met. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition principles.
- v) After initial recognition, PPE is carried at cost less accumulated depreciation/amortization and accumulated impairment losses, if any.
- vi) Spare parts procured along with the Plant & Machinery or subsequently which meet the recognition criteria are capitalized and added in the carrying amount of such item. The carrying amount of those spare parts that are replaced is derecognized when no future economic benefits are expected from their use or upon disposal. Other machinery spares are treated as "stores & spares" forming part of the inventory.
- vii) If the cost of the replaced part or earlier inspection is not available, the estimated cost of similar new parts/ inspection is used as an indication of what the cost of the existing part/ inspection component was when the item was acquired or inspection carried out.
- viii) An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognized.

d) Capital Work in Progress

- i) Expenditure incurred on assets under construction (including a project) is carried at cost under Capital Work in Progress. Such costs comprises purchase price of asset including import duties and non-refundable taxes

after deducting trade discounts and rebates and costs that are directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

- ii) Cost directly attributable to projects under construction include costs of employee benefits, expenditure in relation to survey and investigation activities of the projects, cost of site preparation, initial delivery and handling charges, installation and assembly costs, professional fees, expenditure on maintenance and up-gradation etc. of common public facilities, depreciation on assets used in construction of project, interest during construction and other costs if attributable to construction of projects. Such costs are accumulated under "Capital works in progress" and subsequently allocated on systematic basis over major assets, other than land and infrastructure facilities, on commissioning of projects.
- iii) Capital Expenditure incurred for creation of facilities, over which the Company does not have control but the creation of which is essential principally for construction of the project is capitalized and carried under "Capital work in progress" and subsequently allocated on systematic basis over major assets, other than land and infrastructure facilities, on commissioning of projects, keeping in view the "attributability" and the "Unit of Measure" concepts in Ind AS 16- "Property, Plant & Equipment". Expenditure of such nature incurred after completion of the project, is charged to Statement of Profit and Loss.

e) Intangible Assets

- i) The company has elected to avail the exemption granted by Ind AS 101 'First Time Adoption of the Indian Accounting Standards' to continue with the carrying value for all of its Intangible Assets as recognised in the financial statements as at the date of transition to Ind ASs, measured as per the previous GAAP and use that as its deemed cost as at the date of transition (i.e. as on April 1, 2016).
- ii) Intangible assets acquired separately are measured on initial recognition at cost. After initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.
- iii) Software (not being an integral part of the related hardware) acquired for internal use, is stated at cost of acquisition less accumulated amortisation and impairment losses, if any.
- iv) An item of Intangible asset is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

f) Leases

Leases are classified as finance leases whenever the terms of the lease, transfers substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

- Leased assets

Assets held under finance leases are initially recognised as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalized. Contingent rentals are recognised as expenses in the periods in which they are incurred.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term except where another systematic basis is more representative of time pattern in which economic benefits from the leased assets are consumed.

g) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Based on the Educational Material on Ind AS 18 issued by the ICAI, the company has considered that recovery of excise duty flows to the company on its own account. Therefore it is a liability of the manufacturer and forms part of the cost of production, irrespective of whether the goods are sold or not. Since the recovery of excise duty flows to the company on its own account, revenue includes excise duty.

However, Sales Tax/Value Added Tax (VAT) and Goods & Service Tax are not received by the company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

The specific recognition criteria described below must also be met before revenue is recognised.

i) Sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

ii) Interest income

Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

iii) Dividends

Revenue is recognised when the company's right to receive payment is established, which is generally when shareholders approve the dividend.

iv) Rendering of services

Revenue from the services is recognised by reference to the stage of completion. Stage of completion is measured by reference to labour hours incurred to date as a percentage of total estimated labour hours for each contract. When the contract outcome cannot be measured reliably, revenue is recognised only to the extent that the expenses incurred are eligible to be recovered.

h) Depreciation on Property, Plant & Equipment and Amortization of Intangible Assets

i) Depreciation on Property, Plant & Equipment is provided on Straight Line Method based on estimated useful life of the assets which is same as envisaged in schedule II of the Companies Act, 2013 with the exception of the following:

- spares classified as plant and equipment are depreciated over 2 to 15 years based on the technical evaluation of useful life done by the management.
- assets costing Rs. 5,000 or less are fully depreciated in the year of purchase.

ii) Depreciation on additions to /deductions from Property, Plant & Equipment during the year is charged on pro-rata basis from / up to the date on which the asset is available for use / disposal.

iii) The residual values, useful lives and method of depreciation of property, plant and equipment is reviewed at each financial year end and adjusted prospectively, if appropriate.

iv) Where the life and / or efficiency of an asset is increased due to renovation and modernization, the expenditure thereon along with its unamortized depreciable amount is charged prospectively over the revised / remaining useful life determined by technical assessment.

v) Spares parts procured along with the Plant & Machinery or subsequently which are capitalized and added in the carrying amount of such item are depreciated over the residual useful life of the related plant and machinery or their useful life whichever is lower.

vi) Leasehold land is amortised annually on the basis of tenure of lease period. Freehold land is not depreciated.

vii) Other Intangible assets are amortized over technically useful life of the assets.

i) Inventories :

i) Inventories are valued at lower of cost and net realizable value, after providing for obsolesces, if any.

ii) Cost of Raw Materials, Stores & Spares, Work in Progress, Finished Goods and Stock-in-Trade are computed on Moving Average basis.

iii) Cost of Work in Progress and Finished Goods includes direct materials, labour, conversion and proportion of manufacturing overheads incurred in bringing the inventories to their present location and condition.

- iv) The cost is determined using moving average cost formula and net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

j) Borrowing Cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that the company incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

k) Income Taxes

Income tax expense represents the sum of current and deferred tax. Tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income. In which case the tax is also recognised directly in equity or in other comprehensive income.

i) Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

ii) Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

l) Foreign Currency Transactions

- i) Transactions in foreign currency are initially recorded at exchange rate prevailing on the date of transaction. At each Balance Sheet date, monetary items denominated in foreign currency are translated at the exchange rates prevailing on that date.
- ii) Exchange differences arising on translation or settlement of monetary items are recognised as income or expenses in the period in which they arise in the Statement of Profit and loss.

m) Employee Benefits Expense

Short Term Employee Benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

Post-Employment Benefits

Defined Contribution Plans

A defined contribution plan is a post-employment benefit plan under which the Company pays specified contributions to a separate entity. The Company makes specified monthly contributions towards Provident Fund and Contributory Pension Fund. The Company's contribution is recognised as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service.

Defined Benefits Plans

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The company has recognized the gratuity payable to the employees as per the Payment of Gratuity Act, 1972 and Leave Encashment Benefits as defined benefit plans. The liability in respect of these benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services.

Re-measurement of defined benefit plans in respect of post-employment are charged to the Other Comprehensive Income.

n) Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised when the Company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Such provisions are determined based on management estimate of the amount required to settle the obligation at the balance sheet date. When the Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a standalone asset only when the reimbursement is virtually certain.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities are disclosed on the basis of judgment of management. These are reviewed at each balance sheet date and are adjusted to reflect the current management estimate.

Contingent assets are not recognized but are disclosed in the financial statements when inflow of economic benefits is probable.

o) Impairment of non-financial assets - property, plant and equipment and intangible assets

The Company assesses at each reporting date as to whether there is any indication that any property, plant and equipment and intangible assets or group of assets, called cash generating units (CGU) may be impaired. If any such indication exists the recoverable amount of an asset or CGU is estimated to determine the extent of impairment, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the CGU to which the asset belongs.

An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

p) Share capital and share premium

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Par value of the equity share is recorded as share capital and the amount received in excess of the par value is classified as share premium.

q) Financial Instruments

i) Financial Assets

A. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

B. Subsequent measurement

Financial assets carried at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

C. Equity Investments

All equity investments are measured at fair value through Other Comprehensive Income with value changes recognised therein.

D. Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through OCI.

Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

ii) Financial Liabilities

A. Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

iii) Derivative financial instruments

The Company uses derivative financial instruments such as interest rate swaps and forward contracts to mitigate the risk of changes in interest rates and exchange rates. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are also subsequently measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to Statement of Profit and Loss, except for the effective portion of cash flow hedges which is recognised in Other Comprehensive Income and later to Statement of Profit and Loss when the hedged item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial assets or non-financial liability.

Hedges that meet the criteria for hedge accounting are accounted for as follows:

A. Cash flow hedge

The Company designates derivative contracts or non derivative financial assets / liabilities as hedging instruments to mitigate the risk of movement in interest rates and foreign exchange rates for foreign exchange exposure on highly probable future cash flows attributable to a recognised asset or liability or forecast cash transactions. When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in the cash flow hedging reserve being part of other comprehensive income. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, then hedge accounting is discontinued prospectively. If the hedging instrument expires or is sold, terminated or exercised, the cumulative gain or loss on the hedging instrument recognized in cash flow hedging reserve till the period the hedge was effective remains in cash flow hedging reserve until the underlying transaction occurs. The cumulative gain or loss previously recognized in the cash flow hedging reserve is transferred to the Statement of Profit and Loss upon the occurrence of the underlying transaction. If the forecasted transaction is no longer expected to occur, then the amount accumulated in cash flow hedging reserve is reclassified in the Statement of Profit and Loss.

B. Fair Value Hedge

The Company designates derivative contracts or non derivative financial assets / liabilities as hedging instruments to mitigate the risk of change in fair value of hedged item due to movement in interest rates and foreign exchange rates.

Changes in the fair value of hedging instruments and hedged items that are designated and qualify as fair value hedges are recorded in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to Statement of Profit and Loss over the period of maturity.

iv) **Derecognition of financial instruments**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires..

r) **Earnings Per Share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period are adjusted for events of bonus issue; bonus element in a right issue to existing shareholders.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

s) **Dividend Distribution**

Dividend distribution to the Company's shareholders is recognised as a liability in the company's financial statements in the period in which the dividends are approved by the Company's shareholders.

t) **Statement of Cash Flows**

i) **Cash and Cash equivalents**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. However for Balance Sheet presentation, Bank overdrafts are classified within borrowings in current liabilities.

ii) **Statement of Cash Flows is prepared in accordance with the Indirect Method prescribed in the relevant Accounting Standard.**

u) **Warranty provisions**

Provisions for warranty-related costs are recognised when the product is sold or service provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

2.3 **KEY ACCOUNTING ESTIMATES AND JUDGEMENTS**

The preparation of the Company's financial statements requires management to make judgement, estimates and assumptions that affect the reported amount of revenue, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

a) **Depreciation / amortisation and useful lives of property plant and equipment / intangible assets**

Property, plant and equipment / intangible assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. The estimated useful lives and residual values of the assets are reviewed annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes and other related matters. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

b) Recoverability of trade receivable

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the period of overdues, the amount and timing of anticipated future payments and the probability of default.

c) Provisions

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of resources resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

d) Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or a groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

e) Measurement of defined benefit obligations

The measurement of defined benefit and other post-employment benefits obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

2.4 First Time adoption of Ind AS

The Company has adopted Ind AS with effect from 1st April 2016 with comparatives being restated. Accordingly the impact of transition has been provided in the Opening Reserves as at 1st April 2016. The figures for the previous period have been restated, regrouped and reclassified wherever required to comply with the requirement of Ind AS and Schedule III.

a) Exemptions from retrospective application

- i) Deemed cost for property, plant and equipment and intangible assets

The Company has elected to measure all its property, plant and equipment and intangible assets at the Previous GAAP carrying amount as its deemed cost on the date of transition to Ind AS.

- ii) Deemed cost for investment properties

The Company has elected to measure all its investment properties at the Previous GAAP carrying amount as its deemed cost on the date of transition to Ind AS.

b) Transition to Ind AS - Reconciliations

The following reconciliations provide the explanations and quantification of the differences arising from the transition from Previous GAAP to Ind AS in accordance with Ind AS 101:

- i) Reconciliation of Equity as at 1st April, 2016 and 31st March, 2017. Refer Note-3.1.
 ii) Reconciliation of Statement of Profit and Loss for the year ended 31st March, 2017. Refer Note-3.2.

3.1 RECONCILIATIONS

The following reconciliations provides the effect of transition to Ind AS from IGAAP in accordance with Ind AS 101

1. Equity as at April 1, 2016 and March 31, 2017
2. Net profit for the year ended March 31, 2017

Explanations for reconciliation of Balance Sheet as previously reported under IGAAP to INDAS

A) Property, Plant and Equipment (PPE)

As per Ind AS 16, PPE are defined as tangible items that are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and are expected to be used during more than one period. Certain spare parts now meets the definition of PPE and are accordingly classified as PPE.

Under previous GAAP, investment properties were presented as a part of property, plant and equipment. Based on Ind AS 40, the company has reclassified freehold land held for undetermined future use to Investment Property.

B) Investment

Under Ind AS, financial assets representing investments in equity shares have been fair valued. The company has designated such investments as FVTOCI investments. At the date of transition to Ind AS, difference between the instruments fair value and Indian GAAP carrying amount has been recognised as a separate component of equity, in the FVTOCI reserve, net of related deferred taxes for investments measured at FVTOCI.

The company was having investment of Rs.0.52 lac in wholly owned subsidiary 'Simplex Mash LLP at Kazakhstan' as on the date of transition. As the company is not having any transaction and activity since 2013 and did not have any control since then, the investment amount of LLP has been considered as impaired as on the date of transition and has been eliminated against retained earnings.

C) Other Non-Current Assets

Recognition of deposit on leasehold land which was included alongwith leasehold land.

D) Inventory

Recognition of inventory on account of deferral of sales due to continuing managerial involvement and Stores and spare parts in the nature of property, plant and equipment has been reclassified.

E) Trade receivables

Under Indian GAAP, the company is to create provision for impairment of receivables consists only in respect of specific amount for incurred losses. Under Ind AS, impairment allowance has been determined based on Expected Loss model (ECL). Due to ECL model, the company impaired its trade receivable by INR 264.92 lacs on 1 April 2016 which has been eliminated against retained earnings. The impact of INR 18.85 lacs for year ended on 31 March 2017 has been recognized in the statement of profit and loss.

F) Other Current assets

Under Indian GAAP, amount receivable against funded defined benefit plans has been netted off with total liability of defined benefit which has now shown separately.

G) Other equity

- Adjustments to retained earnings and other comprehensive income has been made in accordance with Ind AS, for the above mentioned line items.
- In addition, as per Ind-AS 19, actuarial gains and losses are recognized in other comprehensive income as compared to being recognized in the statement of profit and loss under IGAAP.

H) Borrowings

Under Indian GAAP, transaction costs incurred in connection with borrowings are amortised upfront and charged to profit or loss for the period. Under Ind AS, transaction costs are included in the initial recognition amount of financial liability and charged to profit or loss using the effective interest method. The unamortized transaction cost is further classified in to non current and current.

I) Provisions

Adjustments that reflect unamortised negative past service cost arising on gratuity and leave encashment in an earlier period. Ind AS 19 requires such gains and losses to be adjusted to retained earnings.

Under the previous GAAP, dividends proposed by the Board of Directors after the Balance Sheet date but before the approval of the financial statements were considered as adjusting events. Accordingly, provision for proposed dividend was recognised as liability. Under Ind AS, such dividends are recognised when the same is approved by the shareholders in the general meeting. Accordingly, the liability for proposed dividend and tax thereon, included under provisions has been reversed with corresponding adjustment to retained earnings.

I) Deferred Tax liabilities

Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences land which was not required under Indian GAAP.

In addition, the various transitional adjustments lead to temporary differences. According to the accounting policies, the company has to account for such differences. Deferred tax adjustments are recognised in correlation to the underlying transaction either in retained earnings or a separate component of equity.

Explanations for reconciliation of Statement of Profit and loss as previously reported under IGAAP to Ind AS

A. Revenue

Under Indian GAAP, sale of goods was presented as net of excise duty. However, under Ind AS, sale of goods includes excise duty. Excise duty on sale of goods is separately presented on the face of statement of profit and loss. Thus sale of goods under Ind AS has increased by INR 1557.11 lacs with a corresponding increase in other expense.

Further, under Ind AS the timing of risk and reward varies to the extent that revenue can be recognized when there is no continuing control over or the managerial involvement over the goods. This has resulted in increment of revenue to the extent of INR 1460.48 lacs with a consequential impact on inventory and due increase in Excise Duty on sales.

B. Employee benefit expenses

As per Ind-AS 19- Employee Benefits, actuarial gains and losses are recognized in other comprehensive income and not reclassified to profit and loss in a subsequent period.

Adjustments reflect unamortised negative past service cost arising on modification of the gratuity plan in an earlier period. Ind AS 19 requires such gains and losses to be adjusted to retained earnings.

C. Finance costs

Under Indian GAAP, transaction costs incurred in connection with borrowings are amortised upfront and charged to profit or loss for the period. Under Ind AS, transaction costs are included in the initial recognition amount of financial liability and charged to profit or loss using the effective interest method. The unamortized transaction cost is further classified in to non current and current.

D. Depreciation

Recognition of additional PPE from spare parts has resulted in additional depreciation charge for the year ended 31 March 2017.

E. Other expenses

Under Indian GAAP, the company is to create provision for impairment of receivables consists only in respect of specific amount for incurred losses. Under Ind AS, impairment allowance has been determined based on Expected Loss model (ECL).

F. Current Tax

Tax related to earlier year has been considered as prior period adjustment and shown as appropriation with the balances in the Statement of Profit or Loss in Indian GAAP. Under Ind AS 12, the tax related to earlier year is the part of current tax and the reconciliation of the same should be separately disclosed.

G. Deferred Tax

Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP.

H. Other comprehensive income

Under Ind AS, all items of income and expense recognised in a period should be included in the Statement of Profit and Loss for the period, unless a standard requires or permits otherwise. Items of income and expense that are not recognised in profit or loss but are shown in the Statement of Profit and Loss as 'other comprehensive income' includes remeasurements of defined benefit plans and fair valuation of investments. The concept of other comprehensive income did not exist under previous GAAP.

33. FINANCIAL RISK MANAGEMENT OBJECTIVE AND POLICIES

The Company’s principal financial liabilities comprise of loans and borrowings, trade payables and other financial liabilities. The main purpose of these financial liabilities is to finance the Company’s operations. The Company’s principal financial assets include investments, other financial assets, trade and other receivables, and cash and short-term deposits that derive directly from its operations.

The Company is exposed to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Interest rate risk
- Currency risk
- Price risk

The Company’s board of directors has overall responsibility for the establishment and oversight of the Company’s risk management framework. This note presents information about the risks associated with its financial instruments, the Company’s objectives, policies and processes for measuring and managing risk, and the Company’s management of capital.

Credit Risk

The Company is exposed to credit risk as a result of the risk of counterparties non performance or default on their obligations. The Company’s exposure to credit risk primarily relates to investments, accounts receivable and cash and cash equivalents. The Company monitors and limits its exposure to credit risk on a continuous basis. The Company’s credit risk associated with accounts receivable is primarily related to party not able to settle their obligation as agreed. To manage this the Company periodically reviews the financial reliability of its customers, taking into account the financial condition, current economic trends and analysis of historical bad debts and ageing of accounts receivables.

Trade receivables

Trade receivables represent the most significant exposure to credit risk and are stated after an allowance for impairment and expected credit loss.

Bank, Cash and cash equivalents

Bank, Cash and cash equivalents comprise cash in hand and deposits which are readily convertible to cash. These are subject to insignificant risk of change in value or credit risk.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

(₹ in lakhs)

	31-Mar-18	31-Mar-17	01-Apr-16
Trade receivables	6,059.93	6,489.33	4,964.95

More than 6 months	736.59	812.30
	6,059.93	6,489.33

No significant changes in estimation techniques or assumptions were made during the reporting period

Liquidity risk

The Company is exposed to liquidity risk related to its ability to fund its obligations as they become due. The Company monitors and manages its liquidity risk to ensure access to sufficient funds to meet operational and financial requirements. The Company has access to credit facilities and debt capital markets and monitors cash balances daily. In relation to the Company's liquidity risk, the Company's policy is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions as they fall due while minimizing finance costs, without incurring unacceptable losses or risking damage to the Company's reputation.

Financing arrangements

The Company has access to following undrawn borrowing facilities at the end of the reporting period: (₹ in lakhs)

	31-Mar-18	31-Mar-17	01-Apr-16
Term Loan	150.00	445.00	800.00
Cash Credit facilities	237.41	176.39	17.92

Maturities of financial liabilities

The contractual undiscounted cash flows of financial liabilities are as follows:

As at 31 March 2018	Less than 1 year	1-5 years	More than 5 years	Total
Borrowings	6,001.82	2,901.68	-	8,903.50
Trade payables	8,195.76	-	-	8,195.76
Other financial liabilities	519.00	-	-	519.00
	14,716.59	2,901.68	-	17,618.27

As at 31 March 2017	Less than 1 year	1-5 years	More than 5 years	Total
Borrowings	5,372.03	3,119.63	-	8,491.66
Trade payables	4,196.47	-	-	4,196.47
Other financial liabilities	1,327.47	-	-	1,327.47
	10,895.96	3,119.63	-	14,015.59

Interest rate risk

Interest rate risk is the risk that an upward movement in the interest rate would adversely effect the borrowing cost of the company. The Company is exposed to long term and short-term borrowings, Commercial Paper Program. The Company manages interest rate risk by monitoring its mix of fixed and floating rate instruments, and taking action as necessary to maintain an appropriate balance.

The exposure of the Company's borrowings to interest rate changes at the end of the reporting period are as follows:

a) Interest rate risk exposure

	31-Mar-18	31-Mar-17	01-Apr-16
Variable rate borrowings	6,752.29	6,506.66	5,963.07
Fixed rate borrowings	2,151.22	1,985.00	1,354.79

b) Sensitivity analysis

Profit or loss estimate to higher/lower interest rate expense from borrowings as a result of changes in interest rates.

	Impact on profit after tax	
	31-Mar-18	31-Mar-17
Interest rates - increase by 70 basis points	47.27	45.55
Interest rates - decrease by 70 basis points	(47.27)	(45.55)

FOREX EXPOSURE RISK

The Company operates internationally and is exposed to foreign exchange risk arising from foreign currency transactions. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the company's functional currency (INR). The risk is measured through a forecast of highly foreign currency cash flows.

The company does not have any long term borrowings in foreign currency. However, short term borrowings have been hedged by the company including interest.

The Company evaluates exchange rate exposure arising from foreign currency transactions and the Company follows established risk management policies, including the hedge most of its currency exposure.

(₹ in lakhs)

PARTICULARS	Currency	Currency in Lacs	
		2017-18	2016-17
Borrowings	USD	65.25	30.00
Trade Receivables	USD	1.96	1.48
Trade Receivables	EURO	0.57	0.54

Profit or loss estimate to higher/lower as a result of changes in foreign exchange rates-

	Impact on profit after tax	
	2017-18	2016-17
Foreign exchange rates - increase by 1%	1.21	0.94
Foreign exchange rates - decrease by 1%	(1.21)	(0.94)

PRICE RISK:

The entity is exposed to equity price risk, which arised out from FVTOCI quoted equity shares and mutual funds. The management monitors the proportion of equity securities in its investment portfolio based on market indices. Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the management. The primary goal of the entity's investment strategy is to maximize investments returns.

Sensitivity Analysis for Price Risk:

Equity Investments carried at FVTOCI are listed on the stock exchange and in case of mutual funds NAV is available. For equity investments and mutual funds classified as at FVTOCI, the impact of a 2 % in the index at the reporting date on profit & loss would have been an increase of ₹ 0.34 lacs (2016-17: ₹ 0.36 lacs); an equal change in the opposite direction would have decreased profit and loss.

34. CAPITAL MANAGEMENT

The Company's main objectives when managing capital are to:

- ensure sufficient liquidity is available (either through cash and cash equivalents, investments or committed credit facilities) to meet the needs of the business;
- ensure compliance with covenants related to its credit facilities; and
- minimize finance costs while taking into consideration current and future industry, market and economic risks and conditions.
- safeguard its ability to continue as a going concern

The Board of Directors has the primary responsibility to maintain a strong capital base and reduce the cost of capital through prudent management of deployed funds and leveraging opportunities in domestic and international financial markets so as to maintain investor, creditor and market confidence and to sustain future development of the business.

For the purpose of Company's capital management, capital includes issued capital and all other equity reserves. The Company manages its capital structure in light of changes in the economic and regulatory environment and the requirements of the financial covenants.

The Company manages its capital on the basis of net debt to equity ratio which is net debt (total borrowings net of bank, cash and cash equivalents) divided by total equity.

	31 March 2018	31 March 2017
Total liabilities (long term debt)	3,640.91	3,668.05
Less : Bank, Cash and cash equivalent	287.91	171.61
Net debt	3,353.00	3,496.44
Total equity	8,082.78	7,886.40
Net debt to equity ratio	0.41	0.44

The company has complied with the covenants of the terms of the major borrowing facilities through out the reporting period.

35. FINANCIAL INSTRUMENTS - ACCOUNTING CLASSIFICATIONS AND FAIR VALUE MEASUREMENTS

The following methods and assumptions were used to estimate the fair values:

1. Fair value of cash and short-term deposits, trade and other short term receivables, trade payables, other current liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to the short-term maturities of these instruments.
2. Financial instruments with fixed and variable interest rates are evaluated by the Company based on parameters such as interest rates and individual credit worthiness of the counter party. Based on this evaluation, allowances are taken to account for the expected losses of these receivables.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1 : quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2 : other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3 : techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data
