- Granulation capacity of 5,000 TPA

Vietnam advantages

Access to raw materials

- Vietnam is one of the largest producers of Robusta coffee and hence, there is assured supply of raw materials

Tax breaks

- Initially, NCL had tax break (0 % tax) for five years and 50% applicable tax for the next 9 years. However, this is now converted to “no tax” for lifetime as NCL meets the stipulated conditions

Strategically located facilities

- Since the plant is located in Vietnam’s Daklak province which is stated as “Robusta Capital of the world” , perennial availability, low inventory requirements and lower logistics costs are enabled.

Market proximity

- Some critical markets such as China, Japan, Korea etc are in close proximity to Vietnam.

MFN status in ASEAN

- Vietnam enjoys MFN status in ASEAN countries with “NIL” or reduced duty structure.

Continental Coffee SA
(formerly Grandsaugreen SA)
Les Verriers, Canton of
Neuchatel, Switzerland.

- A Granulation and packing facility amidst Europe for proximate service.
- A Bonded warehouse for distribution to Europe without additional tax/duties. All supermarkets are being served from this facility
- A trading desk for marketing of group products.

-

Resilient Business Model

Expertise in creating right blends

- CCL has aced the process of creating blends to suit the client requirements . It can manufacture over 200 blends of Coffee

Long-standing relationships

- Over the years CCL has developed strong relationships with clients; there has been a churn in its top clients during the last several years. Brands cannot easily shift the sourcing.

Economies of scale

- Being one of the largest instant coffee producers in the world, CCL enjoys cost and efficiency advantages

Technology

- Imported technology and high level of technology absorption ensures CCL can manufacture high quality coffee even low grades of green coffee

Resilient Margins

- CCL follows the standard process of procuring raw material only after it receives order; hence, its margins (EBITDA/kg)remains stable. Predictable operations.

Risk perceptions

Commodity risk

- Avoided by having both sale and purchase contracts on a back to back basis at fixed prices.

Currency risk

- Entire coffee trade is USD denominated – hence natural hedge mechanism works.
- Have a few rupee sales for covering rupee expenditures.

Business and Receivables.

- Most of the business is repetitive and through established clientele only. There are no bad debts in the history of the company (but for a small amount once).

What differentiates us.....

Technology

- Technology absorption at highest level
- Green field projects at very optimum capex.
- Cost effective manufacturing.
- Process improvements and better efficiencies.

R&D

- Continuous development of products suitable for the geographical areas. Large data base on regional preferences and consumption patterns
- Help develop new products for the customers.
- Cost effective material substitution.
- Continuous process and product optimization.

Continental Coffee Private Limited

- A 100% subsidiary for domestic marketing and brand building activity.
- Started operations in 2016.
- Presence in B2C segment in Indian Market.
- Introduced products like Continental Xtra, Malgudi R&G, THIS premix etc.
- Fast growing coffee brand across India.

Roast and Ground Coffee

Continental Malgudi is sourced from the finest varieties of Arabica and Robusta beans and processed under strict quality standards. The product is specially packed in freshness seal packs to preserve the aroma of the coffee. It is available in 50gm, 100gm, 200gm, 500gm and 1kg packs.

Instant Coffee brands for the domestic market.

- Continental Xtra is a blend of Coffee (70%) and Chicory (30%) processed to perfection.
- Continental Speciale is a 100% pure spray dried coffee which gives an authentic taste of coffee in every sip.
- Continental Premium is 100% pure Freeze Dried Coffee exclusively made for coffee connoisseurs.

Premix brand for domestic market.

Continental THIS is a range of delicious premix products. It is available in single serve sachets for convenience. The product is best suited for on the consumption and it is easy and quick to prepare.

Premix brands with various flavours as also for health watchers.

To expand the consumer base and also to serve various sections of the society – particularly the younger generation and the health watchers etc – the Company has introduced premixes in various forms and flavours such as Hazelnut, Caramel, Mocha, Cappuccino etc . Similarly, a premix with “no added sugar” was also introduced for health watchers and such segment.

Speciality and flavoured coffees.

Correlating to the international options and preferences world wise, the premium varieties of Freeze Dried Coffees are provided with various flavours like Hazelnut, Spicy, Lemon, Coconut etc which is expected to reach out to various premium segments of the society.

PAT / EPS (consolidated)

Road ahead.....

- Speciality coffees – Niche products
- Volume increase – additional manufacturing capacities.
- Brand building in domestic market.
- Increase product profile in domestic market.
- Brand building in the feasible countries where there are no bulk volumes.
- Value addition by offering retail packing.
- Backward integration in products like NDC and other products with synergy.

THANK YOU

We promise to serve
better and better.....
