ABOUT THE INDUSTRY:

The future outlook for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth. India's exports to its largest single market, US has reported strong growth based on statistics reported by US Department of Commerce's Office of Textiles and Apparel (OTEXA)

The total imports in US for the year ending September 2014 is \$107bn, of which Made Ups constituted 17% of the total i.e. \$18bn. China, India, Pakistan, Turkey and Vietnam are amongst the top 5 players exporting Made Ups to US aggregating 85% of the total exports.

Total Imports - \$ 106 bn

Made Ups Imports - \$ 18 bn

The Centre's 'Make in India' campaign is expected to push India's exports of Textile and Apparel into US market which is largest single market. Along with surge in US Textile and apparel market, increased in raw material supplies also helped India. Macro conditions are also in favour of India like - demand in America is picking up as the economy is recovering and there has been an increase in consumer spending. Moreover challenges in competing countries like, decline in Chinese exports to US, currency appreciation

in Indonesia, labour unrest in Asian competitor Cambodia and safety concerns after a major factory fire in Bangladesh last year turned out to be advantage for India.

Based on US Department of Commerce's Office of Textiles and Apparel (OTEXA) data, the imports of Made Ups into US grew by 3% in the year ended September 2014. India exports \$2.8 bn worth of Made Ups to US and is showing a record growth of 11%.

World (\$ bn)

Top 5 Made Ups Exporting Countries to US account for 85% of the Market (\$ bn)
