At Maral, things have changed

Our joys after the turnaround were short-lived. Because we realised that we were only at the start of a meteoric rise

We knew we had it in us to go the distance

We decided to train our sights on major growth

Our period of flying appears to have ended... our journey to soar into a higher orbit has only just taken shape

In FY22, we reported healthy numbers

We posted this stellar performance...

...because we were able to ride the opportunity wave arising out of the China-Plus-One trend.

...because we anticipated the post second wave yarn scenario and prepared for it.

...because we successfully increased the flow of business for our fabric unit to make it profitable.

...because we added new global customers who ensured that our entire capacity (existing & new) operated at optimum levels.

...because we expanded our global footprint to widen our opportunity funnel.

We are very happy
But not completely satisfied
Because we have set our minds on soaring higher

For which we have planned a capex in excess of ₹225 Crore to be invested in our business over the next 24 months

We are investing in our yarn business

₹ **37** Crore

We plan to replace our preparatory machines and some ring frames

It will enhance our machine productivity and product quality.

₹ **123** Crore

We are setting up a 19,000 spindle mélangé yarn unit which will be operational in FY24.

This investment gives us a value-added product diversification where we can sell dyed yarn and mélangé yarn to our customers even as we utilise about 25% of the output for value-addition in-house. It will open a new revenue vertical for the Company.

Investing in our fabric business

₹ **34** Crore

We are building capabilities in our fabric dyeing space.

We will install a continuous bleaching machine with an OBA attachment (optical brightener attachment) which will increase our fabric dyeing capacity by 150 tonnes per month; cost saving would be an important outcome too.

₹ **6** Crore

We are investing in 13 sophisticated knitting machines as a replacement for legacy infrastructure.

The improved productivity will allow us to eliminate our outsourcing of knitted fabric.

Investing in our garment business

₹ **10** Crore

We are investing in a sophisticated garmenting unit. This will be our third garmenting unit. This unit commenced operations in FY22.

₹ **3** Crore

We acquired our fourth garment unit located in Faridabad on lease. This unit commenced operations in FY22.

₹ **15** Crore

We have taken the Board's approval for setting up our fifth garment unit in Noida. This unit should be operational in FY23.

Wovens

We are creating a dedicated unit for women's dresses. It's a small start with the potential of becoming large.

These investments should take our topline past the **₹1,500 Crore** mark in the next 24 months

About the Company

Maral Overseas Limited

A part of the LNJ Bhilwara Group, Maral Overseas Limited (Maral) is one of India's largest vertically integrated textile companies.

Headquartered in Noida (UP), India, the Company has earned respect from leading textile majors in India and across the world for its impeccable product quality and its commitment to service its customers effectively.

Set up in 1991 at Maral Sarovar, the Company has five ultra-modern units that manufacture 1,700 tonnes of grey yarn, 75 tonnes of dyed yarn, 600 tonnes of knitted fabric and 500,000 pieces of garments every month even as the team works untiringly to develop new products that align with the requirement of its global customers.

The Maral Sarovar plant, backed up by its captive power units, is located in Central India's cotton heartland, 500 km from Mumbai and 90 km from Indore. Its garment factories are in Noida and Faridabad.

Key performance indicators

Soaring higher with each year

Maral has remained steadfast on its journey across key performance matrices despite the prevailing economic, sectoral and geographic volatility during the year under review.

Statement from
the Chairman's Desk

Dear shareholders.

Financial year 2022 has been an outstanding year for the Company as we cumulated all our capabilities and intellectual capital to create value and make a meaningful impact for our clients.

We continued to build deeper relationships with existing clients and engaged with new global textile brands operating in India, which accelerated our growth momentum from where we left off in the previous year. In doing so, we registered a perfectly inverted growth triangle where our revenue grew by about 71% but our profit after tax grew about 5x.

Our yarn business, the flagship vertical, was the key contributor to the topline and bottomline growth. This was primarily owing to the surge in demand for yarn from domestic and international buyers. Our vision of foreseeing this spike and proactively preparing for it helped us in maximising value from this opportunity.

Our fabric and garment verticals also registered a healthy performance. Volumes for garments, especially lounge wear, increased significantly as the work-from-home culture became the accepted trend among office goers and professionals. Our product quality coupled with our teams' efforts in showcasing our capabilities helped in onboarding reputed global MNCs to our client list. To cater to growing volumes, we augmented our garmenting capabilities which should contribute to our performance in the current year.

Having upped our performance benchmark, the lingering thought would be on our ability to sustain our growth momentum going forward. Our growth is dovetailed to the sectoral prospects which appear promising as I pen this statement.

The Indian Textile industry has come under the global spotlight as leading global textile and apparel brands are seeking to broad base their sourcing partners as a de-risking strategy from an overdependence on any particular

Our investment philosophy is prudently balanced between cost optimisation and value maximisation. Most of these initiatives should make a reasonable contribution to our FY24 performance.

geography. This has gained topmost priority, especially in the wake of the pandemic which resulted in a major disruption in the global supply chain across sectors.

A part of this demand has transcended to the Indian shores. Since this transition appears to be permanent, there is a flurry of activity across the textile value chain. Moreover, the sourcing from India is projected to grow, if India can sustain its product quality and delivery commitments.

Additionally, the demand for yarn, fabric and garments from domestic brands grew considerably owing to increasing apparel purchases by Indians facilitated by e-commerce platforms.

We have drawn a riveting blueprint for the current year which, I am confident, will allow us to capitalise effectively on emerging opportunities. We are investing more than ₹225 Crore in creating relevant infrastructure in all our business verticals. Our investment philosophy is prudently balanced between cost optimisation and value maximisation. Most of these initiatives should make a reasonable contribution to our FY24 performance.

Further, our woven segment which we have piloted is gaining acceptance. Our products are getting decent traction. I am hopeful of growing this product vertical in the current year.

While I remain reasonably optimistic about our progress, I am also cognizant of the inflationary pressures, the rising interest rates, the deepening crisis emerging out of the European conflict and the continuing prevalence of Covid-19 in some nations including India. These could create headwinds in our journey ahead. We, as a team, will continue to remain vigilant and agile to evolve our approach with the changing dynamics.

Nonetheless, I remain optimistic about our performance in the current year.

In closing, I would like to thank my colleagues on the Board for their invaluable guidance in detailing the Company's strategy roadmap, the leadership team for their passionate efforts in formulating and executing the business plans to the last detail.

I thank the team for their untiring efforts in delivering a surreal performance. I also thank our shareholders and other stakeholders for believing in us and supporting us in our journey this far.

With sufficient tailwinds backing our ambition, it's time to soar higher.

Warm regards

Shekhar Agarwal

Chairman, Managing Director & CEO

Our business verticals

A formidable player in the domestic textile space, Maral is a vertically integrated textile player with a strong presence across the textile value chain – yarn, fabric and garments. While yarn is the mainstay of the Company, it is currently growing its presence in the value-added fabric and garments segments.

Yarn vertical

79,776	22,760	20,023.94	733.06	58.10%	55.62%
Spindles	Yarn capacity (tonnes)	Production (tonnes)	Revenue (₹ Crore)	Y-o-Y growth	Proportion of total revenue

The yarn division is the flagship vertical for the Company accounting for the lion's share of its topline. The Company spins a huge array of yarns bucketed under three categories namely regular yarns (Cotton and blended), special yarns (machine- and fibre-based) and sustainable yarns. The Company's product range also includes yarn from Organic, Fairtrade, Long Staple, and contamination-free cotton.

These yarns are used for diverse applications such as knitted wear, denim, towels, carpets & rugs, home furnishings, and industrial applications, among others.

To stay at the cutting edge of technology, the Company regularly invests its resources in modernising its facilities and equipment for improving shop floor efficiency and productivity. It allows the Company to seamlessly meet the exacting quality standards of discerning customers in leading global textile hubs.

FY22 in retrospect

The yarn business was significantly erratic in FY21. Owing to the pandemic and the consequent supply chain disruption, the yarn pipeline had dried. Hence coming out of the pandemic led to a sudden spike in demand. Moreover, all year round, demand for yarn remained robust. This was primarily owing to the China-plus-One trend playing out across the global textile sector.

India, the Indian textile players and Maral benefited from this ecosystem which resulted in healthy infrastructure utilisation and strong operating margins.

Modernisation is a continuing initiative at Maral. The sophisticated machines deployed in the recent past achieved their desired output in FY22 and helped in increasing production. During the year,

the Company established its presence in new geographies namely Turkey, Vietnam, Indonesia etc.

FY23 in perspective

The Company will endeavour to build on its achievements of the previous year in terms of geographic spread and improved profitability.

In keeping with this strategy, the team will focus on moving up the value chain for product, customer and geography. The team is working on adding a new mélange unit which should commence operations in FY24.

Fabric capacity (Lakh metre)	Production (Lakh metre)	Revenue (₹ Crore)	Y-o-Y growth	Proportion of total revenue

Leveraging its in-house spinning versatility, the Company has established a strong presence in diverse range of knitted fabrics - the product range includes fabrics like Single Jerseys, Ribs, Interlocks, Piques, Honey Combs, Fleece, Plaited & Variegated Structured fabrics, Feeder & Engineered stripe, etc. in 100% cotton and various blends. The Company's knit fabrics are used for both innerwear and outerwear.

Its penchant for quality is showcased in its fleet of equipment (manufacturing and quality control) sourced from global textile machinery manufacturers.

The Company enjoys a presence in diverse global markets which include Vietnam, Indonesia, Turkey, etc. Its customers comprise domestic and international

garmenters and textile brands with whom it enjoys healthy business relations.

FY22 in retrospect

The tectonic shifts transpiring in the global textile sector had a positive rub-off on the Company's fabric division. It was able to utilise its assets better and reported a positive bottomline despite the sharp hike in yarn prices. Exports increased appreciably owing to higher demand from international destinations.

The division introduced value-added products which were well accepted in the market. It installed new equipment which allowed it to impart a special finish to the fabric which was widely accepted by textile brands.

The Company made interesting breakthroughs with global brands operating in India. Moreover, it was able to double sales volumes with a leading global sports brand operating in India. These relations should bloom into growing volumes over the coming years.

FY23 in perspective

The focus will be on increasing sales output and consequently production volumes. The Company will focus on leveraging its additional dyeing capacity to generate healthy returns.

Garment vertical

1,420	747,000	55.38
Machines	Capacity (pcs/month)	Production (Lakh pcs)
210.75	85.26%	15.99%
Revenue (₹ Crore)	Y-o-Y growth	Proportion of total revenue

Being at the top of the textile value chain, this vertical is the value generator for the Company – driving business profitability.

Maral manufactures garments for various categories like Activewear, Casual wear, and Sleepwear for Men's and Ladies in Conventional and Organic, Fair Trade garments and soft toys for infants, and kids, besides producing a whole range of home accessories handmade by underprivileged ladies.

The sophisticated equipment housed at its manufacturing units allows the Company to provide different textures and finishes to the fabric – customised to customer requirements.

The Company has a proficient and talented in-house design department capable of effectively executing specific styling and sampling needs. The team comprising Fashion Designers, experienced Pattern Makers and Stitching Masters, provides customers with various design support such as - trends and mood

boards, and also concept development for future seasons.

FY22 in retrospect

This has been a seminal year for the garment business as the Company intensified its efforts in strengthening its presence in the top segment of the textile value chain.

Two units were commissioned in the year under review which takes the total number of operating units to four. The Company invested in a cutting solution in a centralised unit. This solution significantly reduced the cutting cost and improved fabric utilisation.

To improve product quality, the Company invested in a sophisticated digital monitoring quality system. This solution allowed divisional heads to get shopfloor information in real-time. It allowed for faster decision-making and immediate course correction when required. As a

result, the defects per 100 units dropped considerably.

In addition to growing business with existing global brands, the Company added large and respected global brands operating in India. The business development team is working on forging newer alliances, some of which should materialise in the current fiscal year.

FY23 in perspective

The Company is setting up its fifth garmenting unit which should commence operations in FY23. It is also planning to install a screen printing solution which will allow it to eliminate the need to outsource this function. The division would focus on adding to its client list to fill in the new capacities which have been commissioned and those which will see the light of day in FY23.

Management Discussion & Analysis

1) An economic overview

Global economy: After a negative growth of 3.1% in GDP in 2020, the world economy rebounded handsomely to an estimated growth of about 6.1% in 2021. The recovery was driven by household spending and uptake in investment as the Covid-19 outbreak had brought economic activities to a standstill in 2020 owing to lockdown measures worldwide.

The growth momentum in the last quarter of 2021 especially in the United States, the European Union and China decelerated

as the effects of fiscal and monetary measures began to evaporate and supply-side challenges emerged towards the end of the year.

The start to 2022... quite unprecedented: Two years into the pandemic, COVID-19 took a rather surprising turn, disrupting the global economy through multiple channels. Even as nations were getting back to normal working from the Delta variant, the Omicron variant emerged, sending global Covid-19 infection rates to new highs.

Almost suddenly, the positivity gave way to fear as economies focused on adapting

to the new, highly contagious variant. Omicron, despite being considerably milder than earlier variants, significantly dampened supply and demand in most-affected regions, delaying resolution of market imbalances.

Even as the world came to terms with the Omicron variant, it was faced with a devastating invasion of Ukraine by Russia. While the war is expected to ruin Ukraine completely, the stringent sanctions on Russian by majority of the world, especially the developed economies, is expected to shackle Russia's progress considerably.

In the aftermath of the ongoing war, it is expected that the Russian and Ukrainian economies will plunge into a sharp recession. Global policymakers and business heads will need to study the debilitating impacts of the war on the global economy. The deleterious effects will come from not just higher gasoline prices, but higher prices for food, metals, and intermediate inputs to manufacturing, and weaker GDP growth as consumers pull back spending.

Estimates for 2022: After expanding by 6.1% in 2021, it is expected that global economic growth will slow down to a more normal 3.6% in 2022.

A complete economic recovery calculated in terms of GDP per capita shall remain elusive for developing countries in the near term. In 2022, the per capita output of developing economies is projected to be more than 2% below the level expected before the pandemic.

The GDP per capita of developed economies are anticipated to almost fully recover by 2023 relative to pre-pandemic projections. The unequal momentum of recovery between developed and

developing countries might widen income inequality across countries and make it difficult to reduce global inequality by 2030, as targeted in the global Sustainable Development Goals.

Indian economy: The Indian economy showcased immense resilience as it rebounded smartly from a negative 6.6% (according to the National Statistical Office (NSO), in its first revised estimates) to a positive of 8.7% for the fiscal ending 31st March 2022.

All macro indicators showcased an upsurge in the nation's economic performance helped by pick-up in farm and industrial output growth, despite the two waves of the Covid-19 pandemic.

The economic growth was supported by widespread vaccine coverage, gains from supply-side reforms and easing of regulations, robust export growth and availability of fiscal space to ramp up capital spending.

As per the Economic Survey, the uptick in the economy was led by 11.2% growth in industrial sector and 8.2% growth in services sector. The agriculture sector growth is seen at 3.9% in FY22.

Going forward, the Indian economy is set to grow at 7-7.5% in FY23. This estimate is subject to the geo-political turmoil

prevailing across the globe, which could escalate further. In that tragic event, all estimates would undergo review and repositioning.

The Reserve Bank of India has pegged the economic growth rate for FY23 at 7% in view of uncertainties on account of the pandemic and elevated global commodity prices.

Positives for FY22

- India's gross tax collections soared to a record high of ₹27.07 lakh Crore in the fiscal year ended March 31, 2022 led by an impressive growth in corporate tax and customs, taking the tax-to-GDP ratio to an over two-decade high of 11.7%
- Estimates suggest that India's per capita income increased to ₹1.50 lakh in FY22 from ₹1.29 lakh in FY21.
- Ratings agency Moody's has changed India's sovereign rating outlook to 'Stable' from 'Negative' and affirmed the country's rating at 'Baa3'

Gross domestic product (GDP) in dollar terms has already crossed US\$3 trillion

2) The business space

Global Textile Market: The global textile market size is estimated to reach US\$ 1412.5 billion by 2028. The market is expected to expand at a CAGR of 4.4% from 2021 to 2028. Rising consumer awareness coupled with fast pace changing trends in the fashion industry is projected to drive the market.

The rise in e-commerce platforms is expected to drive demand. In addition, stringent government regulations to ensure labour safety is compelling the demand for personal protective clothing that requires wool or treated cotton as raw material, which is fuelling market growth.

Increasing demand for medical textiles in the healthcare industry due to the rise in awareness towards health and hygiene is adding growth prospects to the industry. Moreover, increased concern towards the environment is propelling the demand for sustainable and natural-fibres such as cotton, hemp, linen, silk, and others, which, in turn, is adding growth prospects to the market.

The market is expected to strengthen in the light of the increasing demand for technical textiles due to the industrial sector's growth, technological advancements, and increased innovations by key industry players.

The rising adoption of technological components in fabrics to monitor external stimuli and translate them into data is propelling the growth of smart textiles. These products have a wide range of applications in fashion, entertainment, transportation, medical, and other industries, which are expected to open

new technological avenues required in the production of textile products over the forecast period.

According to Fitch Solutions, Asia, primarily, Vietnam, Bangladesh and Cambodia will remain dominant players in textile manufacturing. The positive outlook is supported by a large young population and low labour costs, with further benefits to be gained from the supply chain shift from China.

Indian textile and garment industry: The Textile Sector in India ranks next to Agriculture. Textile is one of India's oldest industries that has witnessed numerous developments over the years. Currently, it has a formidable presence in the national economy.

This can be attributed to the abundant availability of raw materials used for manufacturing apparel such as cotton, silk, wool, etc. The Government is also making investments under the Scheme for Integrated Textile Parks and the Technology Upgradation Fund Scheme for training workforce and to encourage private investment in the Indian textile and apparel industry.

2021, a landmark year: The year 2021 was a momentous year for the Indian textile industry. During the course of the year, the industry across the value chain recovered remarkably post the pandemic-related challenges.

The US ban on textiles and other products from China's Xinjiang region recently as also the China Plus One sourcing strategy by importing countries, added to this buoyancy for Indian manufacturers of textiles.

The Covid-19 pandemic triggered the redistribution of global trade shares and a recalibration of sourcing patterns (China Plus One sourcing), providing a golden opportunity for Indian textiles to stage a turnaround and regain a leadership position as a leading exporting economy.

Increasing resistance of buyers to deal

with China, the continued difficulty of travelling to China, and the coming to an end of the LDC status of Bangladesh worked in favour of Indian exporters.

The Indian textile and apparel market reached a value of US\$ 151.2 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 344.1 Billion by 2027, exhibiting a CAGR of 14.8% during 2022-2027. But these estimates are subject to new waves of the pandemic and the geo-political tensions prevailing around the globe.

Spinning sector: Spun yarn spinning industry is one of the few industries in India which has gained global eminence for many factors which include scale, productivity and quality standards, share in global yarn trade, dependable supplier of quality products, etc.

The Indian spinning industry possesses a unique capability of offering the entire range of yarns right from the coarsest count to the finest count, both for domestic as well as export markets.

But other nations such as Bangladesh and Indonesia are fast catching up, in terms of capability, capacity and credibility.

FY22 was a watershed: Indian cotton spinners have been facing challenges in the market with demand receding and yarn realisation not keeping pace with substantial increase in raw material prices, especially cotton fibre prices. Besides recovery in domestic demand, robust growth in export demand is expected to pick up during the latter part of the current fiscal.

Fibre consumption is anticipated to reach approximately 140 million tonnes by 2030 with man-made fibres accounting for 108 million tonnes.

Garment sector: The garment sector is symbolic of India's scattered and fragmented textile supply chain, which increases shipping costs and adds to manufacturing lead times. As a result, this business segment continues to struggle to compete with Bangladesh, Cambodia and Vietnam – these nations trail only China in textile exports, with India occupying the fifth spot, as per the World Trade Organisation's latest statistics review.

The American Apparel & Footwear Association (AAFA) has stated that India's ongoing and planned investments had resulted in more global companies looking at India as a potential source of growth over the coming years.

FY22 was hearteningly different: The Indian garment sector finally witnessed better days. After being outpaced by Bangladesh and Vietnam and hammered by the Covid-19 pandemic, India's garment factories buzzed with energy. They have been successful in overcoming challenges faced by the textile industry such as rising cotton prices and labour shortages. Lately, the effect of rising raw material prices has been weighing heavily on its margins and also the volume of business. It has registered very credible growth in FY22 on all accounts.

To sustain the success of the garment industry, the Government is committed to make the Prime Minister Mega Integrated Textile Region and Apparel (PM MITRA) scheme, along with the PLI scheme a success with the objective of creating world class infrastructure and a thriving industry

LOSING OUT Export of readymade garments is declining sharply in India, while the sector is picking up pace in Bangladesh

Source: DGCI&S, Bangladesh Garment Manufacturers and Exporters Association

Cotton season: Cotton production during crop year 2020-21, stood at 353 lakh bales. Cotton supply from October 2021 to September 2022 is estimated at 335.00 lakh bales. It consisted of arrival of 262.68 lakh bales, imports of 6 lakh bales and an opening stock estimated at 75 lakh bales at the beginning of the season. The Cotton Association of India estimated cotton consumption from October 2021 to March 2022 at 175 lakh bales while export shipments up to March 31, 2022 are estimated at 35 lakh bales. It has further estimated that cotton supply till end of the season 2021-22 at 425.00 lakh bales – about 8 lakh bales less compared to 433.00 lakh bales projected earlier.

Indian technical textiles exports are expected to grow at 14-16% CAGR from 2021 to 2026

3) Business and its performance

About Maral: Maral Overseas Limited (Maral) is a vertically integrated textile player that manufactures and markets a wide range of products namely yarns, fabric and garments at its five manufacturing facilities. The yarn business is the flagship business vertical driving the company forward. The garment division is the key focus area going forward owing to the value-addition and product acceptance by quality-respecting global brands.

Business Performance: A year which started with the highly contagious and increasingly lethal second wave of the pandemic was expected to be subdued. But it was everything but muted. Supply chain disruptions across the world forced textile majors to strengthen their supply chain with alternate and more dependable vendors. The 'China+1' practice adopted by textile majors across the world created unprecedented opportunities for the Indian textile sector, across the value-chain.

Maral made the most of these opportunities in all its business divisions. The Company went all out to add new clients, domestic and international, with considerable success. At the shopfloor, the operations team focused their energies on enhancing productivity without compromising the quality.

SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> • Integrated facility that houses best-in-class equipment, resulting in a wide product portfolio • High-quality standards endorsed by global certifications • Sharp focus on developing customised products for building customer relations • Continued investments in business to align with dynamic sectoral realities and customer requirements 	<ul style="list-style-type: none"> • Fragmented and unorganised industry

<ul style="list-style-type: none"> • India is a huge consuming hub • Increasing trend of Work from Home to increase the demand for lounge wear and casual wear • E-commerce is booming • Export opportunities abound owing to the China+1 practice adopted by the Western World 	<ul style="list-style-type: none"> • Volatility in raw material prices • Disturbed supply-chain owing to geopolitical tensions prevailing across the globe

Strategic initiatives: During the year under review, the Management team took important strategic decisions which have the potential of lifting the Company higher in the domestic textile sector's pecking order.

- It has taken the Board's approval for expanding its melange yarn capacity by adding 18,864 spindles to its existing capacity
- It augmented its garment manufacturing capacity by leasing one unit; it also took the Board's approval for further addition to its garment manufacturing capability.

- It is planning to increase the proportion of woven garment within its garment business; for this the Company is entering the women dresses segment to capitalise on the surge in lounge wear across the globe (women dresses feature in the lounge wear basket)

While some of these projects should contribute to the Company's performance in FY23, others will be commissioned only in FY24.

Significant changes i.e., change of 25% or more in the key financial ratios.

In accordance with the Regulation 34 of the SEBI (Listing Obligation and Disclosure Requirement) Regulation, 2015 the details of significant changes i.e., change of 25 % or more in key financial ratios as compared to the immediately previous financial year, along with detailed explanations are reported hereunder

Disclosure of Accounting Treatment

The Company has followed the same accounting treatment as prescribed in the relevant Accounting Standards while preparing the Financial Statements.

Financial Performance: FY22 was a surreal fiscal for the Company as it registered its best performance in its corporate journey. The Company continued to accelerate its growth momentum aided by sectoral tailwinds. Every business division reporting strong growth numbers in year.

The Company achieved a Turnover at ₹1,082.44 Crore for the year ended 31st March 2022 against ₹632.02 Crore for the year ended 31st March 2021 – a jump of 71.27 %. This growth was driven by a significant increase in volumes across all verticals and healthy price increase – primarily owing to the increase in price of raw cotton which also rubbed off on the prices of other fibres.

Despite the surge in business opportunities, the operations team continued to maintain a hawk eye on costs with the objective of optimising resource and utility consumption.

The Company achieved an operational profit of ₹139.63 Crore against ₹61.42 Crore in FY21. This would have been higher had it not been for the sudden spike in raw cotton prices in the fourth quarter of FY22. Because the entire price hike could not be passed on to the customer. Some had to be absorbed by the Company, which impacted operating margins.

The Company closed the year with a record Net profit of ₹66.98 Crore against ₹12.53 Crore in the financial year 2021.

Change in Return on Net Worth in comparison to the previous year: The Management utilised business liquidity for investing in strategic decisions that promise to sustain growth over the medium term. Owing to a healthy growth in Net Profit, the Company Net worth increased from ₹97.64 Crore as on 31st March 2021 to ₹165.60 Crore as on 31st

Internal Controls and their adequacy: The Company's internal controls commensurate with its size and the nature of its operations. They have been designed to provide reasonable assurance with regard to recording and providing reliable financial and operational information, complying with applicable statutes, safeguarding assets from unauthorised use and ensuring compliance with corporate policies. The all-encompassing control framework covers all key business functions in addition to governance, compliance, audit, control and reporting.

The Company's state-of-the-art ERP system coupled with stringent procedures ensure high accuracy in recording and providing reliable financial & operational information, meeting statutory compliances.

Internal Audit reports are periodically reviewed by the management and the Audit Committee of the Board and necessary improvements are undertaken, if required.

These findings provide input for risk identification and assessment. Timely and adequate measures are undertaken to ensure uninterrupted functioning of the business. The Company has engaged independent Chartered Accountant firms

with vast experience and knowledge to monitor internal controls. The Company's robust and comprehensive internal control systems and processes are reviewed periodically in line with the evolving business ecosystems.

Human resource: Maral continues to invest in its people – building their capability, sharpening their expertise and nurturing the spirit of leadership, which makes it a learning and delivering institution. Their unwavering passion and disciplined perseverance have fuelled the Company's growth aspiration to challenge the status quo and go beyond perceived boundaries.

The human resources (HR) wing focused on purposeful involvement of each team member to make a positive impact on the dual goal of commercial success and social impact. The department fosters a conducive environment to develop ownership, accountability and positive energy in individuals.

As the Company expanded its operating capabilities, it continued to strengthen its workforce despite the challenges posed by the pandemic. There were 3,442 permanent employees on the rolls of the Company as on the 31st March, 2022. The new recruits went through the intensive on-boarding program which included

quarantine protocols and orientation sessions before joining the Company's operations.

The HR department continued to foster a conducive environment to develop ownership, accountability and positive energy in individuals. Town hall meets and periodic interaction with the leadership teams, built morale of the team. The sustained team building efforts worked wonders as the Company posted its best financial performance despite the occurrence of two waves of the Covid-19 pandemic.

Risk management: At Maral Overseas, our risk strategy is determined by a risk appetite defined for a series of risk criteria. The criteria are based on sectoral circumstances, liquidity available and our earnings target within accepted volatility limits. These criteria provide a reference for our operating divisions.

The Company's risk management framework encompasses strategy and operations and seeks to proactively identify, address and mitigate existing and emerging risks with a goal of making the business model emerge stronger and ensuring that profitable business growth becomes sustainable.

During the year under review, the Company's exports (FOB value) were to the tune of ₹516.48 Crore (₹269.65 Crores) and accounted for 47.72 % (42.66 %) of the Company's turnover. The yarn business accounted for 50.07 % (50.85 %) while knitted fabric and garment business accounted for 31.30 % (31.58 %) and 18.63 % (17.57%) respectively.

Your Directors are hopeful that with continued performance by the Company during the current fiscal year under review, your Company shall be able to meet its obligations.

Modernization, Expansion and Diversification

Your Directors in their previous report had informed the members about a modernization of ₹11.00 Crore comprising of spinning, yarn dyeing, fabric processing, engineering and IT at its Sarovar Plant and an automated cutting machine, with other stitching machines etc. for the new Garment project at the Noida Plant of the Company. Your Directors also informed the members about modernization programme of ₹39.00 Crore comprising of Spinning, Knitting, Processing and Engineering etc. at its Sarovar Plant of the Company.

Your Directors are feel pleasure to inform the members that modernization programme of ₹11.00 Crore would be completed during the first quarter of the current fiscal year under review.

Further the Capital expenditure for modernization programme of ₹39.00 Crore is also expected to be completed in the current financial year. Your Company would be able to reap the full benefits after completion of aforesaid modernization programme of ₹50.00 Crore during the current financial year.

Your Directors take pleasure in informing the members that during the year under review, your Company had undertaken further modernization programme comprising of Spinning, Processing, Knitting and Engineering at a capital outlay of ₹22.18 Crore at Sarovar unit of the Company. It is expected that the said modernization programme would be completed during the current financial year. This will result in improving the efficiency of production and quality of the products and better utilization of installed capacity leading to higher profitability.

Your Directors, in order to reduce the cost of power have approved a project for a 132 KVA Dedicated Feeder line for the supply of power directly from the Grid which would involve a total cost of ₹11.50 Crore at the Sarovar Plant of the Company. It is expected that the same would be completed during the financial year 2022-23 under review.

Your Directors had also reported in previous report about the setting up a new garment manufacturing unit at Noida by setting up 300 Sewing Machine at a Capital outlay of ₹7.68 Crore. Your Directors feel pleasure in informing the members that the commercial production of the unit commenced during the year under review and your Company has started getting full benefits of value addition as well offering a wider range of products.

Your Directors are glad to inform the members that your Company has initiated the following program for enhancement in the capacity of garment manufacturing: -

- Setting up a new garment manufacturing unit at Faridabad at a capital outlay of ₹3.19 Crore approx. which started in the month of December, 2021.

(B) Technology Absorption:

- (i) The efforts made towards technology absorption:

Sarovar Unit:

1. **Replacement of three old normal Ring frame with LMW compact Ring frame in Unit- 4:** With replacement of old Ring frames with Compact Ring frame, compact yarn capacity increased and it has yielded additional contribution also.
2. **Installation of Suessen compact attachment on LMW Four Ring frames:** By doing this, compact yarn capacity increased and also improvement in contribution on compact spun yarn.

3. **Installation of second hand 500 Kg Thies Yarn dyeing machine & new SSM Soft winding machine:** Installed second hand 500 kg yarn dyeing machine (Thies) and Soft winding (SSM) machine of 45 spindles. Overall production capacity increased by 40 tons per month.

- (ii) The benefits derived like product improvement, cost reduction, product development or import substitution:

Yarn:

1. **100 % Bamboo compact Yarn (Ne 2/72 ETS):** Bamboo is ultra-soft fabric feels like it lightly floats on skin. Its clothing is breathable due to microscopic holes in the fibre. The thermoregulatory properties of bamboo fabric keep cool when the weather gets hot and warmer in winter season. The fabric made from it having moisture wicking and anti-bacterial properties so its fabric is perfect for sports clothing, more intimate clothing as its fibre helps fight odour. Bamboo fabric offers natural protection from the sun's harmful rays, suitable for sensitive skin, prevents wrinkles even after frequent washing.
2. **Sorona + cotton blended yarn:** Sorona is an alternate for Spandex yarn which provides exceptional stretch and recovery even after repeated stretches and washes. Sorona fiber is a comfort stretch knitwear material with soft, flexible, and stain resistant properties. The fibers are produced in an environmentally friendly production process as well as biodegradable. When combined with Sorona® fabrics have long-lasting softness, natural movement, and dimensional stability. It is sustainable polyester fiber having more elastic properties. Sorona® continues to perform because its stretch is durable and not impacted by day-to-day use. Sorona® fibers provide strength and resiliency of nylon with the softness of polyester. This blended yarn used for Laggings and inner wear.

Fabric:

1. **Modacrylic Fabric's --** Modacrylic is a functional fiber that possess characteristics of high flame retardancy (FR), as well as acrylic fiber's attributes of softness and dyeability.

It is an inherently self-extinguishing FR fiber that impart excellent flame-retardancy to fabrics and synthetic fibers. There is no deterioration in flame retardancy after repeated washing or normal use over time.

We are producing yarn to finish fabric in this category with all due cares and precautions without affecting its performance.

2. **Sanforize (Mechanical) with Liquid finish --** The cloth is continually fed into the sanforizing machine and therein moistened with steam. It is an attachment at Compaction machine where the fabric is passes to the rotating cylinder & presses a rubber sleeve against another, heated, rotating cylinder, thereby the sleeve briefly gets compressed and laterally expanded, afterwards relaxing to its normal thickness. We applied softener on dry on wet method, which improvise the ultimate shine on to the surface with amazing drape and real smooth touch hand feel.
3. **Hexarel finish --** We have developed knits fabrics treated with new revolutionary finish of HEXAREL by RIL for multiple performance benefits. This is a Graphene based Technology and has been developed by RIL for fabric treatment which leads to unparalleled functional properties.

The fabric treated with HEXAREL would have below functional properties:

- | | | |
|-----------------|---------------------------------|---------------------------------|
| - Antimicrobial | - Antistatic | - Help in better light fastness |
| - Anti-fungal | - Wicking & Moisture management | - Q Max Cool |
| - Antiviral | - UV Resistance (UPF) | - X-Temp 2.0 |

4. **Water saving in Yarn Dyeing**

Achieved saving of water 6 Ltr per Kg by the following process:

In yarn dyeing, after bleaching of yarn, water used in bleaching is normally sent to effluent plant, but we have started collecting the bleaching water in a separate tank and then it is used for scouring of yarn. In this way we are saving about 6 Ltr. Water per Kg. of dyed yarn in medium, dark, heavy dark & black shades.

(ii) The steps taken by the company for utilizing alternate sources of energy.
We are in planning to install solar power plant of 3 MW, besides the 1.0 MW already in operation.

(iii) The capital investment on energy conservation equipment;

CORPORATE GOVERNANCE REPORT

Good corporate governance is about creating sustained competitive differentiation in the market to maximize shareholder value ethically and on a sustainable basis while ensuring fairness, transparency and accountability to every stakeholder of a Company – customers, employees, investors, vendor-partners, the government of the land and the community at large. Governance is a reflection of the culture and values of a company's Board and management. Good governance in a company enhances the confidence, trust and enthusiasm of its stakeholders. The Management of the Company believes that good companies are built on the foundation of ethical governance practices and core values built over the years. The concept of Corporate Governance primarily hinges on complete transparency, integrity and accountability of the management, with an increasingly greater focus on investor protection and public interest. Good corporate governance is an essential part of well-managed, successful business enterprise that delivers value to shareholders. The Board of Directors of the Company plays a pivotal role in good corporate governance by building up strong principles, systems and values on which the Company operates. For ensuring sound corporate governance practices, the Government of India has put in place a framework based on the stipulations contained under the Companies Act, Securities and Exchange Board of India (SEBI) Regulations, Accounting Standards, Secretarial Standards, etc. Today's market-oriented economy and globalization drive the demand for a high quality of governance practices. Corporate governance has been under scrutiny and is an issue that has gained widespread importance.

In compliance with Corporate Governance requirements as prescribed in Regulation 34(3) read with Part C of Schedule V by SEBI (Listing Obligations and Disclosure Requirement) Regulation, 2015 as amended, the Company's Report on Corporate Governance for the year ended 31st March, 2022 is set out below for information of the stakeholders and investors of the Company.

1. Company's Philosophy on Corporate Governance.

The corporate governance philosophy of your Company is based on the tenets of integrity, accountability, transparency, value and ethics. As a part of the LNJ Bhilwara Group your Company has a strong legacy of fair, transparent and ethical governance. The Company believes that corporate governance is not limited to merely creating checks and

balances but it goes beyond the practices enshrined in the law and encompasses the basic business ethics and values that need to be adhered. Corporate governance aligns the interests of individuals, organisation and society and integrates all the participants involved in the process. The Company works towards leveraging its resources to translate opportunities into reality and inculcate dynamism and entrepreneurship at all levels. The Company recognizes the rights of its stakeholders and encourages co-operation between the Company and the stakeholders and ensures timely and accurate disclosure on all material matters including the financial situation, performance, ownership and governance of the Company.

The Company firmly believes that an effective framework of corporate governance is the foundation for sustainable growth. As a testament to its robust corporate governance practices and ethical conduct of business, Codes of Conduct have been adopted by the Company for Directors, Senior Management Personnel and Independent Directors and hosted on the website of the Company. Our corporate governance is a reflection of our philosophy for long term value creation. Through effective corporate governance, your Board seeks to imbibe and sustain a culture that will enable the Company to achieve its long-term strategic objectives.

Your Company has complied with all the requirements stipulated under the provisions of SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015 as amended ("Listing Regulations") and the Companies Act, 2013 ("Act"), as applicable.

i. Share Transfer System:

As per stipulations of Regulation 40 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended from time to time the shares of the Company can only be transferred in dematerialized mode w.e.f. 1st April, 2019 except in cases where the claims are lodged for transmission/transposition of shares for where the transfer deed(s) lodged prior to the 1st April, 2019 and were returned due to deficiency in the documents and re-lodged. However, SEBI vide its circular No. SEBI/HO/MIRSD/RTAMB/CIR/P/2020/236 dated December 02, 2020 stipulated 31st March, 2021 as the cut-off date for re-lodgment of transfer requests and also stipulated that such transferred shares shall be issued only in demat mode. Therefore, the Company did not acknowledge such requests after 31st March, 2021. As per the recent amendments of SEBI, that the transmission or transposition of securities held in physical or dematerialised form shall be effected only in dematerialised form.

Matters related to share transfer and transmission etc. were attended by the delegated authorities on fortnightly basis. Share transfers are registered and returned within 15 days from the date of receipt, if the documents are in order in all respects. As per the requirement of Regulation 40(9) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended, the Company has obtained yearly certificates from Practicing Company Secretary for due compliance of share transfer formalities. However, SEBI vide its circular No. SEBI/HO/MIRSD/RTAMB/CIR/P/2020/236 dated December 02, 2020 stipulated 31st March, 2021 as the cut-off date for re-lodgment of transfer requests and also stipulated that such transferred shares shall be issued only in demat mode. Therefore, the Company did not acknowledge such requests after 31st March, 2021.

Pursuant to Regulation 40(9) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, a certificate at the end of financial year submitted to the Stock Exchanges have been issued by a practicing Company Secretary for due compliance of share transfer formalities by the Company.

Pursuant to Regulation 7(3) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, a certificate at the end of financial year submitted to the Stock Exchanges duly signed by the compliance officer and the authorized representative of the share transfer agent certifying that all activities in relation to both physical and electronic share transfer facility are maintained with the Registrar and Share Transfer Agent.

Further, SEBI has come out with a circular No. SEBI/HO/MIRSD_RTAMB/P/CIR//2021/655 dated November 03, 2021 and 14th December, 2021 prescribing common and simplified norms for processing investors' service requests by RTA and norms for furnishing PAN, KYC details and nomination effective from 1st January, 2022 for all the shareholders holding shares in physical form. The following norms were made applicable keeping in view the ease of doing business for investors in the securities market:

1. Common and simplified norms for processing any service request from the holder; thereby prescribing standard request letter for investor service pertaining to the captioned items, by the RTAs.
2. Electronic interface for processing investor's queries, complaints and service request.
3. Mandatory furnishing of PAN, KYC details and Nomination by holders of physical securities.
4. Freezing of folios without valid PAN, KYC details and Nomination.
5. Compulsory linking of PAN and Aadhaar by all holders of physical securities.

The Company had sent intimation to all shareholders holding shares in physical form by Registered Post on 16.12.2021 requesting them to update PAN, KYC details and nomination details (including declaration to opt out). All shareholders are requested to update their KYC details and nomination details in the prescribed forms to enable the Company to make effective communication to them and prompt service. The relevant Forms for registering/changing KYC details and Nomination viz., Forms ISR-1, ISR-2, ISR-3, SH-13,

SH-14 are available on the website of the Company and RTA. Members may request to submit their PAN/KYC/Nomination/Bank in the prescribed Form(s) duly filled in to MCS Share Transfer Agent Limited, F-65, Okhla Industrial Area, Phase I, New Delhi-110020 E-mail: admin@mcsregistrars.com.

INDEPENDENT AUDITORS REPORT

To the Members of Maral Overseas Limited Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of **Maral Overseas Limited** ("the Company"), which comprise the Balance Sheet as at 31st March, 2022, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information (herein after referred to as "financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the company as at 31st March, 2022, and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statement.

Key Audit Matters

Key Audit Matters (KAM) are those matters that, in our professional judgement were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined that there are no key audit matters to communicate in our report.

Information Other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and analysis, Director's Report including annexures to Director's Report, Report on corporate Governance and Shareholder information's, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. Based on the records, information and explanation provided, we have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other

comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, (Ind AS”).

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatements, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to

provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonable knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters, communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Companies Act, 2013, we give in "Annexure-A" a statement on the matters specified in paragraphs 3 and 4 of the Order.

As required by section 143(3) of the Act, we report that:

- We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
- The Balance Sheet, the Statement of Profit and Loss including other comprehensive income, Statement of Cash Flow and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;
- In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act;
- On the basis of the written representations received from the Directors as on 31st March, 2022, and taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2022, from being appointed as a director in terms of Section 164(2) of the Act;

f. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure-B". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the company's internal financial controls over financial reporting.

g. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

As per the information and explanation given to us and on the basis of our examination of the records, managerial remuneration has been paid or provided as specified by the provisions of Section 197 read with Schedule V to the Act.

h. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:

- The Company has disclosed the impact of pending litigations on its financial position in the financial statements - Refer Note 37 to the financial statements;
- The Company did not have long term contracts including derivative contracts for which there were any material foreseeable losses;
- There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
- A) The Management has represented that, to the best of its knowledge and belief, no funds (which are material either individually or in the aggregate) have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

B) The Management has represented, that, to the best of its knowledge and belief, no funds (which are material either individually or in the aggregate) have been received by the Company from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

“ANNEXURE – B” TO THE INDEPENDENT AUDITOR’S REPORT TO THE MEMBERS OF MARAL OVERSEAS LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”) as referred to in paragraph 2(f) of ‘Report on Other Legal and Regulatory Requirements’ section

We have audited the internal financial controls over financial reporting of Maral Overseas Limited (“the Company”) as of 31st March, 2022 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s Management is responsible for establishing and maintaining internal financial controls based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit.

We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by Institute of Chartered Accountants of India (ICAI) and the Standards on Auditing prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls

over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become

inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls over financial

reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2022, based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India”.

Notes Forming Part of the Financial Statements

1. Corporate Information

Maral Overseas Limited (the Company) is a limited company incorporated and domiciled in India having its registered office at Maral Sarovar, V&P.O. Khalbujurg Tehsil Kasrawad, District Khargone, Madhya Pradesh, India. The Company has its primary listing on the BSE Limited and National Stock Exchange India Limited in India.

The Company is one of India's largest vertically integrated textile companies, having multiple facilities to produce Grey Yarn, Dyed Yarn, Knitted Fabric and Garments. The manufacturing plants of the Company are located in India.

2. Significant Accounting Policies

2.1. Statement of Compliance

The financial statements are the individual financial statement which are prepared in accordance with Indian Accounting Standards (Ind AS), as prescribed under section 133 of the Companies Act, 2013 ('the Act') (to the extent notified) read with the Rule 3 of the Companies (Indian Accounting Standard) Rules 2015 and relevant amendment rules issued thereafter. These Ind AS had been adopted w.e.f. 1st April, 2017 as notified by Ministry of Corporate Affairs under the Companies (Indian Accounting Standards) Rules, 2015

2.2. Basis of preparation and presentation

The Financial Statements have been prepared on historical cost basis except for following that are measured at fair value:

- Defined benefit plan-plan assets measured at fair value,
- Certain financial assets and liabilities (including derivative instruments).

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

2.2.1. Functional and Presentation Currency

The financial statements are presented in Indian Rupees, which is the functional currency of the Company and the currency of the primary economic environment in which the Company operates. All values are rounded to the nearest Lakhs (INR 00,000) except when otherwise indicated.

2.2.2. Classification of Assets and Liabilities as Current and Non-Current

Assets are classified as current when any of following criteria are satisfied:

- it expects to realise the asset, or intends to sell or consume it, in its normal operating cycle;
- it holds the asset primarily for the purpose of trading;
- it expects to realise the asset within twelve months after the reporting period;
- the asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current

Liabilities are classified as current when any of following criteria are satisfied:

- expects to settle the liability in its normal operating cycle;
- it holds the liability primarily for the purpose of trading;
- the liability is due to be settled within twelve months after the reporting period; or
- it does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

2.3. Revenue recognition

Revenue from contracts with customers for sale of goods or services is recognised when the Company satisfies performance obligation by transferring promised goods or services to the customer at an amount that reflects the consideration which the Company is expected to be entitled to in exchange for those goods or services.

Sale of goods

Sale of goods: Revenue from sale of products is recognized when the control on the goods have been transferred to the customer. The performance obligation in case of sale of product is satisfied at a point in time i.e., when the material is shipped to the customer or on delivery to the customer, as may be specified in the contract.

Revenue from the sale of goods is measured at the transaction price, which is adjusted for, net of returns and allowances, trade discounts and volume rebates/claims etc. Sales exclude Value Added Tax/Sales tax / Service Tax / Goods & Service Tax

Other Operating Income

Incentives on exports and other Government incentives related to operations are recognised in books after due consideration of

Notes Forming Part of the Financial Statements

certainty of utilization/receipt of such incentives. For Government grant refer Para 2.4.

Interest income

Interest income from a financial asset is recognised using effective interest rate (EIR) method.

EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the statement of profit and loss.

Dividend Income

Dividend income is recognised when the Company's right to receive the payment has been established, which is generally when shareholders approve the dividend.

2.4. Government Grant & Government Assistance

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received.

Government grant are recognised in the statement of profit and loss on a systematic basis over the periods in which the Company recognise as expenses the related costs for which the grants are intended to compensate.

The Capital Subsidy under Technology Up-gradation Fund Scheme (TUFS) Government on specified machinery and Duty saved under EPCG is recognized on a systematic and rational basis by adopting Deferred Income Approach. Such allocation to income is done prospectively over the remaining useful life of the respective assets and is adjusted against the depreciation in the Statement of Profit and Loss. Pending the utilization of the grant received, the same is presented as 'Deferred Income'.

2.5. Inventories

Inventories including goods-in-transit are measured at lower of cost and estimated net realisable value. However, Raw materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

Raw materials, embellishment, stores & spares and packing material:

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

Finished goods and work in progress:

Cost includes cost of direct materials (net of realizable value of waste / by product) and labour and a proportion of manufacturing overheads based on the normal operating capacity but excluding borrowing costs and selling expenses.

Traded goods:

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

Waste:

Valued at Net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.6. Property, Plant and Equipment (PPE)

Recognition and measurement

Property, Plant and Equipment (PPE) are carried at cost less accumulated depreciation and accumulated impairment losses, if any.

The cost of Property, plant and equipment (PPE) comprises its purchase price including any import duties and non-refundable taxes and net of any trade discounts and rebates. It also includes any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses, present value of decommissioning costs (where there is a legal or constructive obligation to decommission) and interest on borrowings attributable to acquisition of qualifying assets up to the date the asset is ready for its intended use.

The company identifies and determines the cost of each component/ part of the asset separately, if the component / part has a cost which is significant to the total cost of asset and has useful life, that is materially different from that of remaining assets.

Items of stores and spares that meet the definition of property, plant & equipment are capitalised at cost and depreciated over the useful life of asset. Otherwise such items are classified as inventories.

Notes Forming Part of the Financial Statements

Capital work-in-progress

Projects under which property, plant and equipment are not yet ready for their intended use are carried at cost less any recognised impairment loss. Cost comprises direct cost, related incidental expenses and borrowing cost. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Depreciation

Depreciation is recognised for Property, Plant and Equipment (PPE) so as to write-off the cost less residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis taking into account commercial and technological obsolescence as well as normal wear and tear.

Depreciation on tangible assets is provided on straight line method over the useful life of the assets.

For following class of assets, based on internal assessment and technical evaluation, the management has reassessed the useful lives as different from the useful lives prescribed under Part C of Schedule II of the Companies Act 2013. Management believes that the useful lives as given below, best represent the period over which these assets are expected to be used.

Asset Class	Useful Life
Building	5 to 60 years
Plant and Machinery (General) (Triple shift operation)	9 years 2 months
Plant and Machinery (Textile Made-ups) (Single shift operation)	9 years
Plant and Machinery (Power)	18 years
Furniture & Fixtures	10 years
Office Equipment	5 years
Computers & Software	3 – 6 years
Vehicles	5 years

Residual value in respect of vehicles, furniture's, computers, provided under the company employee benefit scheme is considered in accordance with the said scheme and is higher than 5% of the original cost of the assets.

Depreciation commences when the assets are available for intended use and is being calculated on monthly basis instead of number of days put to use.

Free hold land is not depreciated.

Leasehold improvements are amortised over the primary period of lease.

Impairment

Property, Plant and Equipment (PPE) are tested for impairment whenever events or changes in circumstances indicate that an asset may be impaired. If an impairment loss is determined, the remaining useful life of the asset is also subject to adjustment.

An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

Derecognition of PPE

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the Property, Plant and Equipment) is included in the income statement when the Property, Plant and Equipment is derecognised.

2.7. Biological Assets

Biological assets comprise of livestock.

Biological assets are measured at fair value less cost to sell. Changes in fair value of biological assets is recognised in the statement of profit and loss account

2.8. Intangible assets

Recognition and measurement

An Intangible Assets is recognised when it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and the cost of the asset can be measured reliably. All other expenditure is expensed as incurred.

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses.

Notes Forming Part of the Financial Statements

The cost of a separately acquired intangible asset comprises of its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; and any directly attributable cost of preparing the asset for its intended use.

Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Goodwill acquired and/or arising upon business combinations initially recognized at cost and at subsequent period at cost less accumulated impairment loss, if any.

Amortisation

The useful lives of intangible assets are assessed as either finite or indefinite. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates.

Impairment

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level.

Asset Class	Useful Life
Software	3 – 6 years

Derecognition of Intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised in Statement of profit and loss when the asset is derecognised.

2.9. Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgement. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the noncancelable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancelable period of a lease.

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

(i) The Company as a lessee

The Company's lease asset classes primarily consist of leases for land and buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- (i) the contract involves the use of an identified asset
- (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and
- (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets

Notes Forming Part of the Financial Statements

and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

(ii) The Company as a lessor

Leases for which the Company is a lessor is classified as a finance or operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sublease separately. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease.

For operating leases, rental income is recognized on a straight line basis over the term of the relevant lease.

The practical expedient in paragraph 46A applies only to rent

concessions occurring as a direct consequence of the covid-19 pandemic and only if all of the following conditions are met:- (a) the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change; (b) any reduction in lease payments affects only payments originally due on or before the 30th June, 2021 (for example, a rent concession would meet this condition if it results in reduced lease payments on or before the 30th June, 2021 and increased lease payments that extend beyond the 30th June, 2021); and (c) there is no substantive change to other terms and conditions of the lease.

2.10. Foreign currencies

The Company's financial statements are presented in INR.

Transactions and balances

In preparing the financial statements, transactions in foreign currencies are recognised at the rates of exchange prevailing at the dates of the transactions. Exchange differences arising on foreign exchange transactions settled during the period are recognised in the Statement of profit and loss of the period.

At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates prevailing at that date. Exchange differences on translation of monetary items are recognised in profit or loss in the period in which they arise with the exception of the following:

Monetary items that are designated as part of cash flow hedge instrument are recognised in OCI.

Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Derivative Financial Instruments and Hedge Accounting

The Company uses derivative instruments i.e. Forward contracts to hedge its foreign currency risks. The Company designated these forward contracts as cash flow hedges to mitigate the risk of foreign exchange exposure on highly probable forecast cash transactions. The Company has designated forward instruments on spot to spot basis. The Company recognises the forward points in the statement of profit and loss.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged

Notes Forming Part of the Financial Statements

item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Fair value hedges

Changes in fair value of the designated portion of derivatives that qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the designated portion of hedging instrument and the change in the hedged item attributable to the hedged risk are recognised in profit or loss in the line item relating to hedged item.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivatives recognised in other comprehensive income and accumulated in the cash flow hedging reserve. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in the statement of profit or loss. If the hedging instrument no longer meets the criteria for hedge accounting, then hedge accounting is discontinued prospectively. If the hedging instrument expires or is sold, terminated or exercised, the cumulative gain or loss on the hedging instrument recognised in cash flow hedging reserve till the period hedge was effective remains in cash flow hedging reserve until the forecasted transaction occurs. The cumulative gain or loss previously recognised in the cash flow hedging reserve is transferred to the statement of profit and loss upon the occurrence of related forecasted transaction. If the forecasted transaction no longer expected to occur, then the amount accumulated in cash flow hedging reserve is reclassified to net profit in the statement of profit and loss.

2.11. Employee benefits

Short-term employee benefits

Short-term employee benefits obligation is measured on undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be

paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Defined Contribution Plan:

The Company makes defined contribution to employee's provident fund organization, pension fund, superannuation fund and Employees state insurance (ESI), which are accounted on accrual basis as expenses in the statement of Profit and Loss in the period during which the related services are rendered by employees.

Prepaid contribution are recognized as an assets to the extent that a cash refund or reduction in future payments is available.

Defined Benefit Plan:

The Group provides for gratuity, a defined benefit retirement plan ('the Gratuity Plan') covering eligible employees of company. The Gratuity Plan provides a lumpsum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with the company.

Liabilities with regard to the Gratuity Plan are determined by actuarial valuation, performed by an independent actuary, at each balance sheet date using the projected unit credit method.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Re-measurement gain and loss arising from experience adjustments and change actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of change in equity and in the balance sheet.

Changes in the present value of defined benefit obligation resulting from plan amendments and curtailments are recognised immediately in profit and loss as service cost.

Other long-term employee benefits

The Company's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value and fair value of any related assets is deducted. The liability for other long-term employee benefits are provided based on actuarial valuation as at the Balance Sheet date, based on Projected Unit Credit

Notes Forming Part of the Financial Statements

Method, carried out by an independent actuary. Re-measurements are recognised in profit or loss in the period in which they arise.

If the benefits are not expected to be settled wholly within twelve months of the reporting date, then they are discounted to present value.

Termination benefits

Termination benefits are recognized as an expense in the period in which they are incurred. The Company recognises a liability and expense for termination benefits at the earlier of the following dates:

- When the entity can no longer withdraw the offer of those benefits; and
- When the entity recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of termination benefits.

If the benefits are not expected to be settled wholly within twelve months of the reporting date, then they are discounted to present value.

2.12. Taxation

Income tax expense represents the sum of tax currently payable and deferred tax.

Income Tax – Current & Deferred

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax assets is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation

authority. Current tax assets and tax liabilities are off set where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively

Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period. Income tax expense represents the sum of the tax currently payable and deferred tax.

2.13. Provisions, Contingent Liabilities & Contingent Assets

Provisions are recognised for present obligation (legal or constructive) of certain timing or amount arising as a result of past event where a reliable estimate can be made and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation.

When it is not probable that an outflow of resources embodying economic benefits will be required or the amount cannot be estimated reliably the obligation is disclosed as a contingent liability unless the possibility of outflow of resources embodying economic benefit is remote.

Possible obligations, whose existence will only be confirmed by the occurrence or nonoccurrence of one or more uncertain future events, not wholly with in the control of entity are also disclosed as contingent liabilities.

Contingent liabilities are not recognized but are disclosed in notes.

Contingent assets are not recognised. However, when the realization of income is virtually certain, then the related asset is no longer a contingent asset, but it is recognised as an asset.

2.14. Segment reporting

The Company's operating segments are established on the basis of those components of the company that are evaluated regularly by the Board of Directors (the 'Chief Operating Decision Maker' as defined in Ind AS 108 - 'Operating Segments'), in deciding how

Notes Forming Part of the Financial Statements

to allocate resources and in assessing performance. Segment performance is evaluated based on profit or loss and is measured consistently with the profit or loss in the financial statements.

The Operating Segments have been identified on the basis of the nature of products/services.

- Segment revenue includes sales and other income directly identifiable with/allocable to the segment including inter segment revenue.
- Expenses that are directly identifiable with/allocable to segments are considered for determining the segment results. Expenses which relate to the Company as a whole and not allocable to segments are included under unallocable expenditure.
- Income which relates to the Company as a whole and not allocable to segments are included under unallocable income.
- Segment result includes margin on inter segment sales which are reduced in arriving at the profit before tax of the Company.
- Segment assets & liabilities include those directly identifiable with the respective segments. Unallocable assets & liabilities represent the assets and liabilities that relate to the Company as a whole and not allocable to any segment.

Inter-Segment transfer pricing

Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price agreed between the segments. Such transfer prices are either determined to yield a desired margin or agreed on a negotiated basis and are on an arm's length basis in a manner similar to transactions with third parties.

2.15. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus issue, bonus element in a rights issue and shares split that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating Diluted Earnings per share, the net profit or loss for the period attributable to the equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

2.16. Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the year is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated. The Company considers all highly liquid investments that are readily convertible to known amounts of cash to be cash equivalents.

2.17. Borrowing

Borrowings are initially recognised at net of transaction costs incurred and measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Statement of Profit and Loss over the period of the borrowings using the effective interest method.

Preference shares, which are mandatorily redeemable on a specific date are classified as liabilities. The dividend on these preference shares is recognised in Statement of Profit and Loss as finance costs.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of the assets, until such time as the assets are substantially ready for their intended use or sale. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

All other borrowing costs are recognised in Statement of profit and loss in the period in which they are incurred.

2.18. Fair Value Measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in most advantageous market for the asset or liability and the Company has access to the principal or the most advantageous market.

Notes Forming Part of the Financial Statements

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets & liabilities on the basis of the nature, characteristics and the risks of the asset or liability and the level of the fair value hierarchy as explained above. This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

2.19. Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

For the purposes of the presentation of cash flow statement, cash and cash equivalents include cash on hand, in banks and demand deposits with banks, net of outstanding bank overdrafts that are repayable on demand, book overdraft as they being considered as integral part of the Company's cash management system.

2.20. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

A. Financial assets

Initial recognition and measurement

All financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not classified as subsequently measured at fair value through profit or loss, are adjusted to the fair value on initial measurement.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

a) Financial assets carried at amortised cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income for these financial assets is included in other income using the effective interest rate method.

c) Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

Notes Forming Part of the Financial Statements

B. Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Where the company decided to make an irrevocable election to present the fair value gain and loss (excluding dividend) on non-current equity investments in other comprehensive income, there is no subsequent reclassification of fair value gain and loss to profit and loss even on sale of investments. However, the group may transfer the cumulative gain or loss within equity. The group makes such election on an instrument-by-instrument basis.

The company elected to measure the investment in subsidiary, associate and joint venture at cost.

C. Impairment of financial assets

The company assesses on a forward- looking basis the expected credit losses associated with the assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. If credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month Expected Credit Loss (ECL) Note No.41.6 details how the group determines whether there has been significant increase in credit risk.

For trade receivables, the company applies the simplified approach permitted by Ind AS 109 "Financial Instruments" which requires expected life time losses to be recognised from initial recognition of receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

D. Financial liabilities

Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

E. Derecognition of financial instruments:

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognised from the Company's Balance Sheet when the obligation specified in the contract is discharged or canceled or expires.

F. Reclassification of financial assets

The company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The company's senior management determines change in the business model as a result of external or internal changes which are significant to the company's operations. Such changes are evident to external parties. A change in the business model occurs when the company either begins or ceases to perform an activity that is significant to its operations. If the company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

G. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.21. Use of estimates

The preparation of the financial statement in conformity with Ind AS requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialize.

Notes Forming Part of the Financial Statements

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and current and / or future periods are affected.

Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. (Refer note 2.10)

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. (Refer note 2.17)

2.22. Critical accounting judgements and key sources of estimation uncertainty

The Preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities.

2.22.1. Critical accounting judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations that the Management have made in the process of applying the Company's accounting policies and that have most significant effect on the amounts recognised in the consolidated financial statements.

Valuation of Deferred tax assets

Deferred tax assets are recognised only to the extent it is considered probable that those assets will be recoverable. This involves an assessment of when those deferred tax assets are likely to reverse and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. The Company reviews the carrying amount of deferred tax assets at the end of each reporting period. Any change in the estimates of future taxable income may impact the recoverability of deferred tax assets (Refer note 2.11.).

Key Source of estimation uncertainty

Key source of estimation uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of investments, provisions and contingent liabilities.

The areas involving critical estimates are:

Useful lives and residual values of property, plant and equipment

Useful life and residual value of property, plant and equipment are based on management's estimate of the expected life and residual value of those assets. These estimates are reviewed at the end of each reporting period. Any reassessment of these may result in change in depreciation expense for future years (Refer note no 2.6).

Impairment of Property Plant and Equipment

The recoverable amount of the assets has been determined on the basis of their value in use. For estimating the value in use it is necessary to project the future cash flow of assets over its estimated useful life. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for in statement of profit or loss. (Refer note no 2.6).

Provisions and contingencies

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

Notes:

(i) Rights, preferences and restriction attached to preference shares

Company has only one class of cumulative redeemable preference shares (CRPS) having a par value of ₹100/-. There are two series of CRPS, carrying differential dividend coupon rates

First series of preference shares carrying a dividend coupon rate of 8%, allotted to the various banks and financial institutions, pursuant to the Corporate Debt Restructuring ('CDR') Package, were redeemed in four equal annual instalments from 2016 to 2019.

Second series of preference shares carrying a dividend coupon rate of 3%, allotted to promoters, against infusion of funds by them, pursuant to the Corporate Debt Restructuring ('CDR') Package was redeemable on March 2019. The company has taken necessary approval from the board and shareholders for repayment of aforesaid preference shares in two equal annual installments from 2019 to 2020. First installment of ₹600 Lakh has been redeemed on March 2019 and for second installment which was due in March 2020, approval for further extension of one (1) year has been taken, from the board on 08th August 2019 and shareholders in the annual general meeting held on 19th September 2019 and this be due on March 2021. The maturity period of redemption of second installment of aforesaid CRPS was further extended for a period of one year i.e. 31st March 2022 by the board of directors in their meeting held on 07th of August of 2020 and approval of shareholders in the annual general meeting was obtained on dated 29th September 2020. In the current financial year, the second installment of ₹600.00 Lakh paid during the year.

The Company declares and pays dividends in Indian rupees. The dividend proposed by the Board of Directors is subject to the approval of the shareholders in the ensuing Annual General Meeting. Each holder of preference shares is entitled to one vote per share only on resolutions placed before the company which directly affect the rights attached to preference shares. The holders of preference shares are entitled to a preferential right of repayment of capital on winding up vis-à-vis the holders of equity shares. The distribution will be in proportion to the number of shares held by the shareholders.

Each holder of preference shares is entitled to one vote per share only on resolutions placed before the company which directly affect the rights attached to preference shares. Further, they shall have the right to vote on all resolutions placed before the Company if the dividend on such preference shares remain unpaid over a period of two years or more.

The Board of Directors of the Company during the year under review in their Board meeting held on 28th October, 2021, had approved the accumulated preference dividend on Cumulative Redeemable Preference Shares amounting to ₹377.08 Lacs and ₹185.21 Lacs aggregating to ₹562.29 Lacs to the bankers and promoters & their associates respectively after setting off the accumulated losses of the previous year. The payment of the aforesaid preference dividend had been made to the respective preference shareholders within the stipulated time.

Note 35: Segment Reporting

The Company is currently organized into three business operating segments: Yarn, Fabric and Textile Made-ups. The Company's business segments offer different products and require different technology and marketing strategies.

Identification of Segments

The Board of Directors of the Company has been identified as Chief Operation Decision Maker who monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements. Accounting policy in respect of segments is in conformity with accounting policy of the company as a whole.

Inter segment Transfer

Segment revenue resulting from transactions with other business segments is accounted for on basis of transfer price agreed between the segments. Transfer prices between operating segments are on arm's length basis in a manner similar to transactions with third parties.

Segment Revenue & Results

The Revenue and Expenditures in relation to the respective segments have been identified and allocated to the extent possible. Other revenue and expenditures non allocable to specific segments are disclosed separately as unallocated and adjusted directly against total income of the Company.

Segment Assets & Liabilities

Segment Assets includes all operating assets used by the operating segment and mainly consisting property, plant & equipment, trade receivables, cash and cash equivalents and inventory etc. Segment Liabilities primarily include trade payables and other liabilities. Common assets & liabilities which can not be allocated to specific segments are shown as a part of unallocable assets/liabilities.

These plans typically expose the Company to actuarial risks such as Investment risk, salary risk, discount rate risk, mortality risk, withdrawals risk.

Salary risk	Actual salary increases will increase the Plan's liability. Increase in salary increase rate assumption in future valuations will also increase the liability.
Investment risk	If Plan is funded then assets liabilities mismatch & actual investment return on assets lower than the discount rate assumed at the last valuation date can impact the liability.
Discount rate risk	Reduction in discount rate in subsequent valuations can increase the plan's liability.
Mortality & disability risk	Actual deaths & disability cases proving lower or higher than assumed in the valuation can impact the liabilities.
Withdrawals	Actual withdrawals proving higher or lower than assumed withdrawals and change of withdrawal rates at subsequent valuations can impact Plan's liability.

B.3. Defined Benefit plans- Leave Obligations (Compensated Expenses)

The leave obligations cover the Company's liability for sick and earned leave.

The amount of the provision ₹5.80 Lakhs (31st March, 2021 ₹1.70 Lakhs) is presented as current, since the Company does not have an unconditional right to defer settlement for any of these obligations.

Note 41: Financial Instruments

41.1 Capital Management

The primary objective of the Company's Capital Management is to maximize the shareholder value and also maintain an optimal capital structure to reduce cost of capital. In order to manage the capital structure, the Company may adjust the amount of dividend paid to shareholders, return on capital to shareholders, issue new shares or sell assets to reduce debts.

The Company monitors capital on the basis of following gearing ratio, which is net debt divided by total capital plus debt.

41.1.1 Gearing ratio

The gearing ratio at the end of the reporting period was as follows:

Particulars	As at	
	31 st March, 2022	31 st March, 2021
Debt (See note 'i' below) (Refer Note no. 18 & 19)	21,723.78	20,926.14
Cash and bank balances (Refer Note no. 13 & 14)	(668.99)	(334.39)
Net debt	21,054.79	20,591.75
Total equity (Refer Note no. 16 & 17)	16,560.31	9,764.35
Total equity and Net Debt	37,615.10	30,356.10
Gearing Ratio	55.97%	67.83%

Note:

- Debt is defined as long and short-term borrowings (excluding derivative, financial guarantee contracts), as described in notes 18 and 19.
- In order to achieve this overall objective, the Group's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to call loans and borrowings or charge some penal interest. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the current years and previous year.

41.3 Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value and measured at amortised cost and for which fair values are disclosed in financial statements. To provide an indication about the reliability of inputs used in determining fair values, the group has classified its financial instruments into three levels prescribed under the accounting standards.

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Note 41.3.2 Valuation techniques used to determine Fair value

The Company maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available. The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- 1) Fair value of cash and deposits, trade receivables, trade payables, and other current financial assets and liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of other non-current financial assets and liabilities (security deposit taken/given and advance to employees) carried at amortized cost is approximately equal to fair value. Hence carrying value and fair value is taken same.

Notes Forming Part of the Financial Statements

- 2) Long-term fixed-rate and variable-rate receivables / borrowings are evaluated by the Company based on parameters such as interest rates, specific country risk factors, credit risk and other risk characteristics. Fair value of variable interest rate borrowings approximates their carrying values. For fixed interest rate borrowing fair value is determined by using the discounted cash flow (DCF) method using discount rate that reflects the issuer's borrowings rate. Risk of non-performance for the company is considered to be insignificant in valuation.
- 3) The fair values of derivatives are estimated by using pricing models, where the inputs to those models are based on readily observable market parameters basis contractual terms, period to maturity, and market parameters such as interest rates, foreign exchange rates, and volatility. These models do not contain a high level of subjectivity as the valuation techniques used do not require significant judgement, and inputs thereto are readily observable from actively quoted market prices. Management has evaluated the credit and non-performance risks associated with its derivative counterparties and believe them to be insignificant and not warranting a credit adjustment.

Note 41.3.3 Fair Value Measurement Hierarchy

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following provides the fair value measurement hierarchy of Company's asset and liabilities, grouped into Level 1 to Level 3 as described below:

Level 1: Quoted prices (unadjusted) in the active markets for identical assets or liabilities.

Level 2: Other techniques for which all the inputs which have a significant effect on the recorded fair values are observable, either directly or indirectly.

Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

41.4 Financial risk management

The Company's activities expose it to a variety of financial risks which includes market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Company's focus is to ensure liquidity which is sufficient to meet the Company's operational requirements. The Company monitors and manages key financial risks so as to minimise potential adverse effects on its financial performance. The Company has a risk management policy which covers the risks associated with the financial assets and liabilities. The details for managing each of these risks are summarised ahead.

41.5 Market risk

"Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: currency rate risk, interest rate risk and other price risks, such as equity price risk and commodity price risk. Financial instruments affected by market risk include loans and borrowings, deposits, investments, and derivative financial instruments. The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks."

41.5.1 Foreign currency risk

Foreign exchange risk is the risk that the fair value of future cash flows of financial instruments will fluctuate because of changes in foreign exchange rate.

The Company derives significant portion of its revenue in foreign currency, exposing it to fluctuations in currency movements. The Company has laid down a foreign exchange risk policy as per which senior management team reviews and manages the foreign

Notes Forming Part of the Financial Statements

exchange risks in a systematic manner, including regular monitoring of exposures, proper advice from market experts, hedging of exposures, etc.

The Company uses derivative financial instruments, such as foreign exchange forward contracts, to mitigate foreign exchange related risk exposures. Derivative financial instruments relating to a firm commitment or a highly probable forecast transaction, are marked to market at every reporting date.

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

Details in respect of the outstanding hedge accounting relationships relating to a firm commitment given below:

41.5.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. In order to optimize the Company's position with regard to interest income and interest expenses and to manage the interest rate risk, treasury performs a comprehensive corporate interest rate risk management by balancing the proportion of the fixed rate and floating rate financial instruments in its total portfolio .

(i) The exposure of company borrowings to interest rate changes at the end of reporting period are as follows:

(₹ in Lakhs)

Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

41.5.3 Price risks

The company's exposure to price risk arises from the investment held by the company . To manage its price risk arising from investments in marketable securities, the company has very limited exposure and is done in accordance with the company policy. The company's major investments are actively traded in markets and are held for short period of time. Therefore no sensitivity is provided for the same.

41.6 Credit Risk

Credit risk arises from the possibility that the counterparty will default on its contractual obligations resulting in financial loss to the company. To manage this, the Company periodically assesses the financial reliability of customers, taking into account the financial conditions, current economic trends, and analysis of historical bad debts and ageing of accounts receivable.

The Company considers the probability of default upon initial recognition of assets and whether there has been a significant increase in credit risk on an ongoing basis through each reporting period. To assess whether there is significant increase in credit risk, it considers reasonable and supportive forward looking information such as:

- Actual or expected significant adverse changes in business.
- Actual or expected significant changes in the operating results of the counterparty.
- Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligation
- Significant increase in credit risk and other financial instruments of the same counterparty
- Significant changes in the value of collateral supporting the obligation or in the quality of third party guarantees or credit enhancements

The company's major exposure is from trade receivables, which are unsecured and derived from external customer Credit risk on cash and cash equivalents is limited as we generally invest in deposits with banks and financial institutions with high credit ratings assigned by international and domestic credit rating agencies. Investments primarily include investment in liquid mutual fund units, quoted securities and certificates of deposit which are funds deposited at a bank for a specified time period. Other loans are majorly provided to the subsidiaries and employee which have very minimal risk of loss.

Expected credit loss for trade receivable on simplified approach :

The ageing analysis of the trade receivables (gross of provision) has been considered from the date the invoice falls due:

(₹ in Lakhs)

Age Bracket	As at 31 st March 2022	As at 31 st March 2021
0-90	10,573.95	9,046.53

Trade Receivables - Credit Impaired	997.64	416.63
Closing Balance	10,928.61	9,773.43

Credit risk is managed through credit approvals, establishing credit limits, continuous monitoring of creditworthiness of customers to which the company grants credit terms in the normal course of business. The Company also assesses the financial reliability of customers taking into account the financial condition, current economic trends and historical bad debts and ageing of accounts receivables.

41.7 Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the company's short, medium, and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following tables detail the company's remaining contractual maturity for its financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the company can be required to pay.

41.9 Derivative financial instruments

The Company holds derivative financial instruments such as foreign currency forward contracts to mitigate the risk of changes in exchange rates on foreign currency exposures. The objective of hedges is to minimize the volatility of INR cash flows of highly probable forecast transaction. The Company's risk management policy is to hedge around 70% to 90% of net exposure with forward exchange contract, having a maturity upto 12 months.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument, including whether the hedging instrument is expected to offset changes in cash flows of hedged items.

Note 43: Recent Accounting Pronouncements

The Ministry of Corporate Affairs has notified Companies (Indian Accounting Standards) Amendment Rules, 2022 vide notification no. G.S.R 255(E) dated 23rd March 2022. Given below are the amendment made in brief and their possible impact on the financial statements of the company. The company will be apply the amendments from 1st April 2022 being the effective date of the amendments:

Ind AS 101 – First-time adoption of Indian Accounting Standards:

The amendment removes the conflict between the requirements of paragraph D16(a) of Ind AS 101 which provides exemptions where a subsidiary adopts Ind AS later than its parent and the exemptions on cumulative translation differences. The amendment permits the subsidiary to measure cumulative translation differences at the carrying amount included in the parent's consolidated financial statements. Similar exemption is available to associate and joint venture that uses the exemption in paragraph D16(a) of Ind AS 101. Paragraph D16(a) of Ind AS 101 provides that the subsidiary can measure its assets and liabilities at the carrying amounts in parent's consolidated financial statements. The amendment is applicable for entities adopting Ind AS from 1st April 2022. As the company has

Notes Forming Part of the Financial Statements

already adopted Ind AS, there is no impact of this amendment on the company.

Ind AS 103 – Business Combinations:

The amendments are made to enable change of reference to Conceptual Framework for Financial Reporting under Indian Accounting Standards issued by The Institute of Chartered Accountants of India and have no impact on the financial statements of the company. The amendments are applicable for business combinations having acquisition date on or after 1st April 2022.

Ind AS 109 – Financial Instruments:

The amendments clarify that only fees paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf will be included in calculating the discounted present value of the cash flow under the new terms on modification of financial liability. The amendment is applicable for modification / exchange of financial liabilities on or after 1st April 2022. The amendment has no impact on the financial statements of the company

Ind AS 16 – Property, Plant and Equipment:

The amendment creates a carve-out from IAS 16. IAS 16 requires any sale proceeds and cost of samples produced when testing whether the asset is functioning properly to be recognised in profit or loss whereas the amendment clarifies that the same shall be deducted from the cost of the property, plant and equipment. No transition provisions have been specified and therefore, this amendment shall be applicable retrospectively. The company has been following the practice as clarified by the amendment and hence no impact on the financial statements of the company.

Ind AS 37 – Provisions, Contingent Liabilities and Contingent Assets:

The paragraph clarifies what cost needs to be considered in the costs to fulfil a contract while determining whether the contract is onerous. Changes previous practice of considering only incremental costs in the costs to fulfil a contract for determination of onerous contract. Now apart from incremental costs, the costs to fulfil a contract includes an allocation of directly attributable costs. The amendments apply to unfulfilled onerous contracts as on 1st April 2022. As the company does not have any onerous contract, the said amendment has no impact on the financial statements of the company.

Ind AS 41 – Agriculture:

The amendment removes taxation cash flows from paragraph 22 indicating tax cash flows must be included in the fair value less costs to sell. The amendment is applicable to fair value measurements on or after 1st April 2022. Ind AS 41 is not applicable to the company and hence has no impact on the financial statements of the company.

Note 44 :

- In terms of the Master Restructuring Agreement under the CDR Scheme, if, in the opinion of the Lenders, the profitability and cash flows of the Company so warrant, the Lenders shall be entitled to receive recompense for the reliefs and sacrifices extended by them within the CDR Parameter. The company has provided recompense amount of ₹292.96 Lakhs in the current financial year (Previous year ₹94.00 Lakh) out of which ₹262.74 Lakh has been paid during the current financial year (Previous year Nil). Recompense payable as on 31.03.22 is ₹357.54 Lakh (as on 31.03.21 was ₹326.78 Lakh). Recompense provision has been made as per best estimate subject to final determination mutually with the Company banker. It has been included in the finance cost. Refer - Note 30

Note 45 : Dividend

The Board of Directors of the Company has recommended dividend of ₹2/- per Equity Shares of the face value of ₹10/- each for the financial year 2021-22 subject to the approval of the Shareholders of the Company at the Annual General Meeting.

Note 46 : Other Statutory Information

- The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

The Register of Members and Share Transfer Books of the Company shall remain closed from Friday, the 19th August, 2022 to Thursday, the 25th August, 2022 (both days inclusive) for annual closing and for determining the entitlement of the shareholders to the dividend for the financial year 2021-22 as recommended by the Board of Directors of the Company, if declared by the members at the AGM.
9. The SEBI has mandated the submission of the Permanent Account Number (PAN) by every participant in the securities market. Members holding shares in electronic form are, therefore, requested to submit their PAN to their depository participant(s). Members holding shares in physical form are

required to submit their PAN details to the Registrar and Share Transfer Agent i.e. MCS Share Transfer Agent Limited, F-65, Okhla Industrial Area, Phase I, New Delhi – 110 020 and/or send the documents at admin@mcsregistrars.com or helpdeskreply@mcsregistrars.com. Members are requested to mention their folio number/client ID in all communications with the Company.

10. To support the 'Green Initiative' and also to receive the copies of AGM notice in case of AGM through VC/OAVM and other communication from the Company, members who have not yet registered their email addresses are requested to register the same with their DPs in case the shares are held by them in electronic form and with the Registrar and Share Transfer Agent in case the shares are held by them in physical form.
11. Members are requested to intimate changes, if any, pertaining to their name, postal address, e-mail address, telephone/mobile numbers, Permanent Account Number (PAN), mandates, nominations, power of attorney, bank details such as, name of the bank and branch details, bank account number, MICR code, IFSC code, etc.,
 - a. For shares held in electronic form: to their Depository Participants (DPs)
 - b. For shares held in physical form: to the Company/Registrar and Share Transfer Agent.
12. Members can avail the facility of nomination in respect of shares held by them in physical form pursuant to the provisions of Section 72 of the Act. Members desiring to avail this facility may send their nomination details in the prescribed Form SH-13 duly filled in to MCS Share Transfer Agent Limited, F-65, Okhla Industrial Area, Phase I, New Delhi-110020 E-mail: admin@mcsregistrars.com. The said form can be downloaded from the Company's website. The prescribed form in this regard may also be obtained from RTA at the address mentioned above. Members holding shares in electronic form are requested to contact their Depository Participant directly for recording their nomination.
13. SEBI vide its Circular dated November 03, 2021 and 14th December, 2021 had put in place the Common and Simplified Norms for processing investor's requests by RTAs and norms for furnishing PAN, KYC details, Email address, Mobile No., Bank Account details, Specimen Signature and Nomination etc. from shareholders holding shares in physical form effective from 1st January, 2022. The RTA and Company is not processing any service requests from 1st January, 2022 received from the physical shareholder(s)/claimant(s), until the PAN, KYC and Nomination documents/details of the said shareholders are not updated in their respective folios and these shares shall also be frozen by the RTA, if such details are not updated in their respective folios by 31st March, 2023. The securities in the frozen folios shall be eligible to receive payments (including dividend) and lodge grievances only after furnishing the complete documents. A communication/intimation in this regard had been sent to all shareholders holding shares in physical form by Speed/Registered Post on 16th December, 2021 and 15th July, 2022 respectively. The relevant Forms are available on the website of the Company and RTA. Members are requested to submit their PAN/KYC/Nomination/Bank details in the prescribed Form(s) duly filled in to RTA of the Company.
14. In accordance with the provision to Regulation 40 of the Listing Regulations, 2015, effective from April 1, 2019 and SEBI notification dated January 24, 2022, transfers of securities of the Company including transmission and transposition requests shall not be processed unless the securities are held in the dematerialized form with a depository. Accordingly, shareholders holding equity shares in physical form are urged to have their shares dematerialized so as to be able to freely transfer them, eliminate all risks associated with physical holding and participate in corporate actions. Members can contact the Company or Company's Registrar and Share Transfer Agent i.e. MCS Share Transfer Agent Limited, for assistance in this regard.
15. Members may please note that SEBI vide its Circular No. SEBI/HO/MIRSD/MIRSD_RTAMB/P/CIR/2022/8 dated January 25, 2022, has mandated the listed companies to issue securities in dematerialized form only while processing service requests viz. 5. The MCA had notified provisions relating to unpaid/unclaimed dividend under sections 124 and 125 of Companies Act, 2013 and Investor Education and Protection Fund (Accounting, Audit, Transfer and Refund) Rules, 2016 ("IEPF Rules"). As per these Rules, dividends which are not encashed / claimed by the member for a period of seven consecutive years, shall be transferred to the Investor Education and Protection Fund (IEPF) Authority. The IEPF Rules mandate the companies to transfer the shares of members whose dividends remain unpaid/unclaimed for a period of seven consecutive years to the demat account of IEPF Authority. Hence, the Company urges all the members to encash / claim their respective dividend during the prescribed period.

TDS on dividend:-

Members may note that the Income Tax Act, 1961 ("**IT Act**"), as amended by the Finance Act, 2020, mandates that dividends paid or distributed by a Company after 1st April, 2020 shall be taxable in the hands of the Shareholders. The Company shall, therefore, be required to deduct Tax at Source (TDS) at the time of making payment of Dividend, if declared by the Shareholders at the AGM. The TDS rate would vary depending on the residential status of the shareholder and the documents submitted by them and accepted by the Company. In order to enable the Company to determine the appropriate TDS rate as applicable, Members are requested to submit the documents in accordance with the provisions of the Income Tax Act, 1961. Members are requested to complete and/or update their Residential Status, PAN, Category as per the IT Act with their DPs or in case shares are held in physical mode, with the Company by sending email to our RTA at admin@mcsregistrars.com or helpdeskdelhi@mcsregistrars.com.

A Resident individual shareholder with PAN and who is not liable to pay income tax, can submit a yearly declaration in Form No. 15G/15H, to avail the benefit of non-deduction of tax at source by sending an email to tds.maral22@lnjb.com latest by **16th August, 2022**.

Shareholders are requested to note that in case their PAN is not registered, the tax will be deducted at a higher rate of 20%.

Non-resident shareholders can avail beneficial rates under tax treaty between India and their country of residence, subject to providing necessary documents i.e. No Permanent Establishment and Beneficial Ownership Declaration, Tax Residency Certificate, Form 10F, any other document which may be required to avail the tax treaty benefits by sending an email to tds.maral22@lnjb.com. The aforesaid declarations and documents need to be submitted by the shareholders latest by **16th August, 2022**.

A separate email communication informing the shareholders regarding this change in the Income-Tax Act, 1961 as well as the

relevant procedure to be adopted for submission of necessary declarations / documents by them to avail the applicable tax rate has been sent by the Company to the all shareholders on 11th July, 2022 and copy of the said communication is also available on the website of the Company at the following link https://www.maraloverseas.com/pdf/TDS_Communication.pdf
