The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

2.2. Use of Estimates:-

Although these estimate are based upon the management's best knowledge of current events and actions. Actual results may differ from the estimates used in preparing the accompanying financial statements. Any changes in estimates are recognized prospectively.

The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day

repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Depreciation on additions/disposals of fixed assets during the year is provided on pro rate basis according to the period during which assets are put to use.

d. Impairment of Assets:

At each balance sheet date, the management reviews the carrying amounts of its assets to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. An impairment loss is recognized for the amount for which the asset's carrying amount exceeds its recoverable amount being the higher of the assets net selling price and its value in use. Impairment loss is recognized in the Statement of Profit and Loss. Recoverable amount is the higher of value in use and realizable value. In assessing value in use, the estimated future cash flows expected from the continuing use

of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset.

If, at the balance sheet date, there is indication that if previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount.
