Chairman's Letter

Dear Shareholder,

Last year, or 2015-16 (FY2016), India had achieved a growth in real GDP of 7.9%. This year, or FY2017, it is expected to be lower at 7.1% according to the second advance estimate released by the Central Statistics Office (CSO). There are several reasons for this lower growth. Among them, I need to emphasise a few.

The first is insufficient investments, not for a single year but across the last five years. Consequently, the share of gross fixed capital formation to GDP has steadily fallen from 31.7% in FY2015 to 31.1% in FY2016, and now to a low of 29.2% in FY2017. Unless investments pick up in FY2018 and the years ahead, I can't see how we as a country can attain sustained real GDP growth of 7.5% over the next decade.

The second is the burden of bad loans or non-performing assets (NPAs) in the banking system. At the end of December 2016, the gross NPAs of India's 27 public sector banks stood at ₹ 647,759 crore. This was a 140% increase over two years. And such NPAs accounted for 12% of these banks' total loans and advances. It is possible that the proportion may be higher still. The fact is that with such severe stress, these banks have no appetite for advancing loans for longer term investments. It is as if a key financial intermediary in the growth process has chosen to stay out.

It would be all too easy to say that the third cause was demonetisation, which was unleashed on 8 November 2016, involving over four-fifths of the currency in circulation. There is no doubt that the process caused hardship and pain to citizens as well as business. Yet, strange as it may sound, the latest national income estimates do not point to any severe compression in GDP growth in the third quarter of FY2017. If the CSO's data are accurate — and I have no basis to believe otherwise — it would appear that the negative effect of demonetisation on GDP growth may have been less than what we tend to surmise.

Even so, FY2017 was a difficult year, with lower growth than what we had all expected. In such a milieu, I am proud to share with you the excellent achievements of your Company, Bajaj Finance Ltd. (BFL). Here are some key facts:

- New loans booked exceeded 10 million in numbers, which is a first for the Company.
- Assets under management increased by 36% to ₹ 60,194 crore.
- Receivables under financing rose by 33% to ₹ 56,832 crore.
- Total income grew by 36% to ₹ 10,003 crore.
- Profit before tax increased by 43% to ₹ 2,818 crore.
- Profit after tax increased by 44% to ₹ 1,837 crore.
- Loan losses and provisions were ₹ 818 crore. BFL's net NPA stood at 0.44%, and was among the lowest in the NBFC industry.
- Capital adequacy as on 31 March 2017 was 20.30%, which is not only higher than the previous year but also well above the RBI norms. Tier I capital adequacy was 14.56%.

To achieve results such as these in a relatively tough year is extremely commendable. And to keep on generating such superior performance year after year clearly demonstrates the execution strengths and capabilities of your Company's Management team. On your behalf, allow me designations to congratulate everyone in BFL, led by Rajeev Jain, Managing Director, Sanjiv Bajaj and Nanoo Pamnani, both Vice-Chairman of the Company, for such outstanding results. Here is a Company that we should be justifiably proud of.

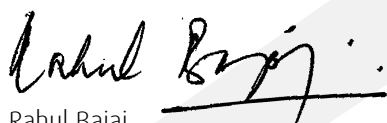

As was the case last year, your Company has done well across each of its product suites spanning six major business verticals: Consumer Lending, SME Lending, Commercial Lending, Rural Lending, Deposits, and Partnerships and Services. I leave it to you to read the chapter on Management Discussion and Analysis in this Annual Report to appreciate how well BFL has done in each activity.

All of this has been backed by excellent internal controls, cost and risk management systems and perhaps the best-in-class analytics among all banks and NBFCs in India, to not only understand how to optimally garner the right kind of customers but also to know when and how to quickly recalibrate operations according to altering risk profiles.

Let me repeat a sentiment that I shared with you last year. Given the systems that have been put into Bajaj Finance and the depth and width of managerial DNA across the organisation, I have no doubts that your Company will perform at least as well in FY2018 as it has in FY2017.

Once again, my thanks to the entire BFL team. And to you for your support.

Yours sincerely,

Rahul Bajaj
Chairman

Management Discussion and Analysis

A macroeconomic overview

Financial year 2016-17 (FY2017) began on a positive note. India had closed FY2016 with growth in real GDP of 7.9% and a growth in gross value added (GVA) of 7.8%. Despite two disconcerting facts — namely, the high level and proportion of the banking sector's non-performing assets coupled with a muted growth in bank credit — there were expectations of India achieving a GDP growth rate somewhere between 7.5% and 8% in FY2017.

Unfortunately, that has not occurred. The second advance estimates of national income forecast by the Central Statistics Office released on 28 February 2017 suggest a real GDP growth of 7.1% for FY2017; and a real gross value added (GVA) growth of 6.7%. Both estimates are significantly lower than what the economy achieved in the previous year. Table 1 gives the data over the last four financial years.

Table 1: Growth in Real GDP and GVA, India

	FY2014	FY2015	FY2016	FY2017 (E)
Real GDP growth	6.9%	7.3%	7.9%	7.1%
Real GVA growth	6.6%	7.2%	7.8%	6.7%

Source: Government of India, Central Statistics Office (CSO). (E) denotes estimate.

On 8 November 2016, the Government announced demonetisation of ₹ 500 and ₹ 1,000 banknotes, which represented 86% of the currency in circulation. Contemporary evidence suggested significant disruption arising out of unprecedented cash constraints throughout the economy. For lending institutions in particular, the impact of lower collection efficiencies was quite severe, and resulted in poorer credit growth.

However, the national income data published by the CSO does not suggest any significant reduction in GDP or GVA growth in the third quarter of FY2017 which could have been correlated with the demonetisation drive. The third quarter traditionally tends to be muted. In FY2016, the growth rate of real GVA in Q2 was 8.4%; and in Q3 it was 7%, or a sequential drop of 1.4 percentage points. In FY2017, GVA growth in Q2 was 6.7%, and in Q3 it was 6.6%. In other words, despite the effects of demonetisation for over 60% of Q3 FY2017, the negative effect — as reported by the CSO — has been only 10 basis points. We need harder evidence to clearly quantify the impact of demonetisation on real GDP or GVA growth. What the data so far suggests is that it was more moderate than the naysayers claimed it would be. And that the effects would be transitory.

If demonetisation was not the prime cause for the lower estimate of GDP and GVA growth in FY2017, then what were the other determinants? There are two.

The first is insufficient investments, especially over the last five years. Gross fixed capital formation (GFCF) for FY2017 is estimated to be only 0.6% higher than what it was in FY2016. The share of GFCF to GDP has steadily fallen from 31.7% in FY2015 to 31.1% in FY2016 to a low of 29.2% in FY2017. Unless investments rapidly pick up in FY2018 and the following year, it is difficult to envisage how India can achieve a sustained real GDP growth of 7.5%, leave aside an aspirational target of 8%.

The second is also related to investments and linked to the state of our banks, especially many of those under Government ownership. Data for the quarter ended 31 December 2016 shows that for the 27 public sector banks which account for the vast majority of the nation's loans and advances, gross NPAs were estimated at ₹ 647,759 crore, a 140% increase over what it was two years earlier. Today, such NPAs constituted 12% of total loans and advances. The proportion may indeed be higher still. In any event, with these banks being so badly stressed, there is no appetite for advancing term loans without which, it is impossible to envisage the investment spends required to transit to a higher growth path.

Consequently, it is not surprising that several sectors of the economy have seen a reduction in growth. Real GVA in mining and quarrying is estimated to grow by only 1.3% in FY2017 versus 12.3% in the previous year. Manufacturing growth for FY2017 is pegged at 7.7%, which will be 290 basis points lower than what it was a year ago. GVA from trade, hotels, transport, communications and broadcasting services are expected to grow by 7.3% compared to 10.7% in FY2016. And GVA from financial, real estate and professional services is estimated to grow at 6.5% in FY2017 versus 10.8% a year before.

Having said this, it needs to be emphasised that 7.1% real GDP (or 6.7% real GVA) growth happens to be among the highest in the developed world and across all major emerging markets, including China. From a cross-country perspective, therefore, we seem to be doing well enough. The issue is internal to India: Is such growth sufficient to significantly increase incomes and employment and reduce poverty in the country? And the answer is straightforward: we need to do much more.

What about inflation? The Consumer Price Index (CPI) inflation varied month-to-month between 3.2% and 6.1% during FY2017. Excluding food and fuel, however, core CPI inflation has remained at around 4.9% since September 2016, which is somewhat higher than what the Reserve Bank of India (RBI) is comfortable with. Thus, in February 2017, the RBI changed its monetary policy stance from accommodative to neutral. With core inflation remaining firm in the neighbourhood of 5%, the RBI in its first monetary policy statement for 2017-18 (FY2018) has justified maintaining a hawkish stance.

Growth in bank credit continued to be subdued. Thanks to the overhang of NPAs, it grew only by 5.2% in FY2017 versus 10.2% in the previous year. On the liability side, demonetisation led to an unnatural growth in bank deposits, which increased by 11.9% in FY2017 compared to 9.1% in FY2016. Awash with post-demonetisation liquidity, the banks significantly reduced their incremental marginal cost based lending rates in January 2017. This, we believe, has created a potentially alarming situation in the banking sector, especially for the public sector banks. On the one hand, these institutions remain saddled with high levels of NPAs from which they earn little or no returns and need quarterly provisioning to the detriment of their profits. On the other hand, extra liquidity has forced a reduction in lending rates which, in turn, reduced the net income margin from new lending. Without exaggeration, it is fair to say that the state of most banks continue to be alarming.

How FY2018 plays out depends upon two factors: the investment appetite of the country and a perennial annual variable called the monsoons. Regarding the former, there is still no sign of even a modest upsurge in private investments as firms continue to leverage efficiency improvements and squeeze the best out of existing capacities. As far as the latter is concerned, the India Meteorological Department has come out with an initial forecast of a normal monsoon. That remains to be seen. It will only be after August 2017 that we know how ample the south west monsoon was.

On the positive side, the roll out of the nation-wide Goods and Service Tax (GST) in FY2018 ought to aid growth. To be sure, a task as monumental as the GST will have teething troubles in the first two quarters. We believe that it is only in FY2019 that the country will begin to see the overall benefits of this key economic reform. Equally, the Insolvency and Bankruptcy code ought to finally create a market for stressed assets; and, all other things being equal, reduced bank lending rates should make borrowing more attractive than before.

Despite these positives, it is difficult to see a quantum jump in GDP growth in FY2018. From our perspective, if we see India's real GDP growing at around 7.4% to 7.5% in the coming year, it will be a creditable achievement. Anything higher will be a bonus.

Non-Banking Finance Companies (NBFCs) continued to grow their share in the financial services industry. As per data published by RBI in its Financial Stability Report of December 2016, NBFCs have outperformed Scheduled Commercial Banks (SCBs) on growth in advances and in asset quality. Table 2 gives the data.

Table 2: Comparison of growth in advances and asset quality of NBFCs and SCBs

	31 March 2016		30 September 2016	
	NBFCs	SCBs	NBFCs	SCBs
Growth in Advances	16.6%	8.8%	10.5%	7.8%
Gross Non-Performing Assets	4.6%	7.8%	4.9%	9.1%

Source: Reserve Bank of India, Financial Stability Report, 29 December 2016 and 28 June 2016.

We believe that the growth momentum of NBFCs will result in their share in the financial services sector increasing in the near future.

The Company

Bajaj Finance Ltd. ('Bajaj Finance', 'BFL' or 'the Company') enjoyed yet another strong year of performance aided by a diversified product mix, robust volume growth, prudent operating cost and effective risk management. With assets under management of ₹ 60,194 crore, BFL has emerged as one of the leading diversified NBFCs in the country today. Given below are some highlights of the results for FY2017.

Bajaj Finance: Performance highlights, FY2017

- New loans booked exceeded 10 million in numbers, which is a first for the Company.
- Assets under management: up 36% to ₹ 60,194 crore.
- Receivables under financing: up 33% to ₹ 56,832 crore.
- Total income: up 36% to ₹ 10,003 crore.
- Total operating cost: up 35% to ₹ 2,564 crore.
- Loan losses and provisions: ₹ 818 crore. Even so, BFL's net NPA at 0.44% was among the lowest in the NBFC industry.
- Profit before tax: up 43% to ₹ 2,818 crore.
- Profit after tax: up 44% to ₹ 1,837 crore.
- Capital adequacy as on 31 March 2017 was 20.30%, which is well above the RBI norms.

BFL focuses on six business verticals: (i) Consumer Lending, (ii) SME Lending, (iii) Commercial Lending, (iv) Rural Lending, (v) Deposits, and (vi) Partnerships and Services.

During FY2017, the authorised share capital of the Company was increased from ₹ 75 crore (consisting of 75,000,000 equity shares of face value of ₹ 10 each) to ₹ 150 crore (consisting of 750,000,000 equity shares of face value of ₹ 2 each). Accordingly, 53,872,190 equity shares of face value of ₹ 10 each as on the record date, i.e., 10 September 2016 (end of the day), were sub-divided into 269,360,950 equity shares of face value of ₹ 2 each. Further, on 14 September 2016, the Allotment Committee of the Board of Directors allotted 269,360,950 equity shares of face value of ₹ 2 each as bonus shares in the proportion of one bonus equity share for every one equity share of face value of ₹ 2 held as on the record date, by capitalising an amount of ₹ 538,721,900 from the securities premium account.

In FY2017, Bajaj Finserv Ltd. (the 'Promoter') exercised the option to convert 9,250,000 warrants, issued on preferential basis, upon payment of ₹ 306.08 crore — being the balance 75% amount of the issue consideration. Accordingly, 9,250,000 equity shares of the face value of ₹ 2 each were allotted to Bajaj Finserv Ltd. on 23 November 2016 at a premium of ₹ 439.20 per equity share. Hence, the revised shareholding of Bajaj Finserv Ltd. in BFL stood at 57.80% as at the end of the reporting year versus 57.28% earlier.

The Company's capital adequacy stood at a healthy 20.30%. Its tier I capital adequacy was 14.56%.

BFL's loan book continued to remain strong due to its robust risk management practices. The Company's net NPA at 0.44% is among the lowest in the NBFC industry. This was despite portfolio quality pressures on account of demonetisation in Q3 FY2017. There was also a marginal deterioration in portfolio quality of the mortgage businesses owing to the stressed real estate market and elevated competition in the segment.

It is worth noting that the strength of BFL's financials and robust risk management enabled it to not opt for the 90 day relaxation extended by RBI to NBFCs for recognition of loan accounts as NPA post-demonetisation.

Prudent asset liability management (ALM) and a judicious mix of borrowings among banks, money markets and deposits helped BFL drop its cost of borrowings by around 47 bps in FY2017. As of 31 March 2017, BFL's total borrowings stood at ₹ 49,250 crore.

Business update

Consumer Lending

BFL continued to be the largest consumer durables lender in India in FY2017.

- With presence in 318 cities across India and approximately 14,100 dealer counters across the country, it financed 5.9 million purchases in FY2017 versus 4.7 million in FY2016, a growth of about 28%.
- Its unique Existing Member Identification (EMI) card, with cards in force of over 6.9 million, enables customers to avail instant finance after the first purchase. It financed 2.5 million purchases in FY2017 through EMI card versus 1.5 million in FY2016, a growth of about 67%. Wide geographic presence coupled with a loyal EMI card base provides BFL with an inherent growth platform.

BFL was the largest financier of Bajaj motorcycles and three-wheelers in FY2017.

- It operates at the premises of approximately 3,661 Bajaj dealers and sub-dealers across the country.
- Gross deployments in FY2017 were ₹ 4,519 crore — a growth of 36% over FY2016.
- Approximately 36% of Bajaj Auto's domestic sales of motorcycles and 23% of three-wheelers were financed by BFL in FY2017 — up from 32% and 16% respectively in FY2016.
- Having said so, auto-finance was one of the few businesses which was impacted due to demonetisation.

In April 2016, BFL expanded its EMI card financing propositions for its customers in new retail categories like fashion, travel, insurance and small appliances. The business is operational in 35 locations with a footprint of approximately 10,000 partner stores across India in the first year of operations alone.

Over the years, BFL has expanded its EMI financing business to digital products and lifestyle products. It has tie-ups with leading digital product manufacturers for its digital products financing. The Company operates through more than 9,750 dealers in India for its digital products financing. It financed approximately 1.3 million digital product purchases in FY2017 versus 561,000 in FY2016, representing a growth of 132%.

In FY2017, the lifestyle products finance business financed approximately 237,000 purchases, which represented a growth of 47% from FY2016. It has a distribution footprint of over 7,500 counters across all categories. The business has also expanded its EMI finance offerings in the healthcare segment. Covering certain elective procedures through 2,500 clinics in tie-ups with leading industry players, BFL financed some 30,000 elective procedures in FY2017.

E-commerce finance was launched in April 2016 to address the EMI financing needs of BFL customers shopping online with major e-commerce giants. It financed approximately 167,000 purchases on e-commerce platforms in the course of FY2017.

Personal Loans Cross-sell and Salaried Personal Loans deployments grew, respectively, by 56% and 25% over FY2016; and their AUMs by 62% and 35%. Enhanced product proposition through salaried personal loans flexi-offering, growing distribution and customer franchise, investment in advanced analytical capabilities, increased focus in expanding business in emerging cities coupled with robust risk management have enabled this strong growth.

The Salaried Home Loans business deployment and AUM grew by approximately 137% and 107% respectively. Growing customer franchise, significant development in analytical capabilities and increased focus on providing better product proposition have enabled this strong growth. The business launched its 'Property Search Model' to help customers buy their chosen home and get it financed by BFL.

SME Lending

SME lending offers secured and unsecured loans to its customers.

- Secured lending is done through three product offerings: Loan Against Property, Lease Rental Discounting and Home Loan. Secured SME lending continued to be in a hyper-competitive state throughout FY2017 as it was a year earlier, with loan sourcing being dominated by various cost-cutting intermediaries.
- The Company has now fully transitioned its retail mortgage business to cut out intermediaries in favour of a 100% 'Direct to Customer' model, which delivers lower costs and creates a sustainable return on equity.
- Unsecured lending is done through two product offerings: Business Loans and Professional Loans. BFL has enhanced the product proposition for its SME unsecured customers through the introduction of a flexi loan facility. This has been received well by customers and now contributes significantly to incremental deployments.
- The Relationship Management business focuses on multiproduct distribution, across lending, insurance and deposits to its SME customers.

Table 4 gives the summary of assets under management of SME businesses.

Table 4: Assets Under Management of SME businesses

(₹ In Crore)

Mortgage Loans	14,438	13,016	11
Business Loans	5,909	4,562	30
Professional Loans	1,735	1,114	56
Total	22,082	18,692	18

Rural Lending

In FY2017, BFL expanded its rural footprint by setting up branches in two new states and penetrating deeper in existing states. At the end of FY2017, it had presence in 538 locations across seven states in India. This business caters to the needs of consumer and MSME customers in rural markets. It had an AUM of ₹ 3,072 crore compared to ₹ 1,339 crore in FY2016, representing a growth of 129%.

The Rural MSME business offers unsecured and secured loans to self-employed clients in rural markets. Unsecured loans are offered through Business Loans and Doctor Loans while secured loans are offered as Loans Against Property (LAP).

Commercial Lending

The Commercial Lending business closed FY2017 with an AUM of ₹7,881 crore. This was a growth of 51% over FY2016. IPO Financing was started in FY2017 to add another product offering in the Loan Against Securities business. Three new industry verticals, viz. Corporate Finance, Financial Institutions Group (FIG) lending business and Light Engineering, which were launched in FY2016, have delivered an AUM of ₹1,639 crore as on 31 March 2017.

Deposits

As at the end of FY2017, BFL had a deposit book of ₹4,128 crore, representing a growth of 84% over the end of FY2016. The deposit book's contribution to BFL's overall borrowing was 8%.

Partnerships and Services

In FY2017, BFL partnered with one more general insurance company for distribution of insurance products. It currently has insurance distribution partnerships with six insurance companies.

BFL launched a co-branded credit card distribution business with RBL Bank. It has many customer-friendly features including no-cost EMI options at point of sale, accelerated rewards for high savings and a feature of no interest on cash withdrawals up to 50 days. The card, branded as 'SuperCard', is offered to existing customers of BFL.

Risk management and portfolio quality

As an NBFC, BFL is exposed to credit, liquidity and interest rate risk. The Company has invested in people, processes and technology to mitigate risks posed by external environment and by its borrowers. It has in place a strong risk management team and an effective credit operations structure. Its risk management policies continue to segregate the functions of a chief risk officer and a chief credit officer to focus on portfolio management and underwriting respectively. Sustained efforts to strengthen the risk framework and portfolio quality have yielded significant results over the last few years.

BFL's conservative approach to portfolio management coupled with a rigorous portfolio review mechanism has enabled it to get early stress signals in the infrastructure sector and take corrective action in its infrastructure and construction equipment business.

As mentioned before, BFL ended the year with a net NPA of 0.44%. The Company continues to have a conservative provisioning policy, which is more stringent than RBI norms.

Operational risk management

BFL has also commenced the identification of various operational risks inherent in its business model. The operational risks are risk of a loss resulting from inadequate or failed internal process, people and systems, or from external events. It has dedicated a new pillar — the 'Operational Risk Management Framework' — within its risk management framework to effectively identify, measure, report, monitor and control such operational risks.

Analytics

BFL continues to evolve on a journey where analytics and technology are integral to business strategy. It uses analytics capabilities for making appropriate product offerings to customers, marketing campaign management, risk management and customer experience. It has built a comprehensive range of predictive models including propensity to purchase, application scorecards, behavioural scorecards, collection scorecards and fraud scorecards.

The Company has, and will continue to, actively invest in analytics to create customised cross-sell propositions for its customer franchise, deliver attractive yet suitably differentiated propositions and enhance productivity, efficiency, as well as profits.

In FY2017, BFL developed a real-time machine learning based fraud analytics model. This has replaced the traditional score based model and uses machine learning algorithms to detect frauds.

Asset liability management

BFL had a total borrowing of ₹ 49,250 crore as on 31 March 2017. The Company's Asset-Liability Committee (ALCO), set up in line with the guidelines issued by the RBI, monitors asset-liability mismatches to ensure that there are no imbalances or excessive concentrations on either side of the Balance Sheet. BFL continued to raise longer tenor borrowings in FY2017 as well, which included ₹ 3,338 crore of Tier-II subordinated debt as on 31 March 2017.

Till date, BFL has assigned ₹ 7,065 crore of its receivables including ₹ 3,054 crore assigned in FY2017. The net receivables due as on 31 March 2017 amounted to ₹ 3,362 crore. The Company continues to closely monitor liquidity in the market; and as a part of its ALCO strategy maintains a liquidity management desk to reduce its liquidity risk. The Company maintained a liquidity management buffer of ₹ 3,123 crore as on 31 March 2017.

Prudent asset liability management (ALM) and a judicious mix of borrowings between banks, money markets and deposits helped BFL drop its cost of borrowings by around 47 bps in FY2017.

Technology

BFL has been a leader in technology adoption among NBFCs. It continues to leverage technology across businesses to launch new products, enhance customer acquisition and servicing processes along with simplifying the back-office.

In order to strengthen its IT security, BFL has developed and implemented a security governance framework to tackle growing cyber security risks. It has also established a Security Operations Centre to monitor security threats and minimise their impact on the Company and its operations. It has implemented various security initiatives like regular vulnerability assessment and penetration testing of core applications, continuous monitoring of cyber-attacks, carrying out employee awareness programmes and subscription to anti-phishing services to shut down phishing sites as and when noticed. BFL has fully functional Disaster Recovery (DR) data centres to ensure business continuity for customer acquisition, loan processing and servicing.

Customer service

BFL continues to remain customer centric in its policies and practices. It places the customer at the centre of its product, policy and processes. The Company monitors customer interactions and provides mechanisms to customers to have a superior experience through the design of its product, process and service mechanisms. It has a customer life-cycle mapping to define the proactive communication needs of customers to drive engagements and provide a superior experience. It provides its customers multi-channel engagement options across call centre, IVR, bi-directional SMS, email, online portal, mobile applications and branch.

In FY2017, the Company has refined its customer experience assessment from its earlier customer experience surveys to Net Promoter Score (NPS) to gauge its customer efforts. The NPS is a more robust methodology to measure customer loyalty.

Human resources

BFL continues to lay emphasis on people, its most valuable resource. In an increasingly competitive market for human resources, it seriously focuses on attracting and retaining the right talent. It provides equal opportunity to employees to deliver results. During FY2017, BFL added 3,602 employees, taking the total employee strength to 11,479.

It evaluates the adequacy of all internal controls and processes, and ensures strict adherence to clearly laid down processes and procedures as well as to the prescribed regulatory and legal framework. The Company has further strengthened its internal audit function by investing in domain specialists to increase the effectiveness of controls. The Audit Committee of the Board of Directors reviews the internal audit reports and the adequacy and effectiveness of internal controls.

As will be seen, the Company's corporate governance practices and disclosures have gone well beyond complying with the statutory and regulatory requirements in accordance with the provisions of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the Listing Regulations).

Philosophy

The commitment of the Bajaj Group to the highest standards of good corporate governance practices predates SEBI and clause 49 of the erstwhile Listing Agreement. Ethical dealings, transparency, fairness, disclosure and accountability are the main thrust of the working of the Bajaj Group. Bajaj Finance Ltd. ('the Company') maintains the same tradition and commitment.

Board of Directors

In keeping with the commitment to the Management for the principle of integrity and transparency in business operations for good corporate governance, the Company's policy is to have an appropriate blend of independent and non-independent directors to maintain the independence of the Board and to separate the Board functions of governance and management.

Composition

In compliance with the provisions of the Listing Regulations, the Company has a combination of executive and non-executive directors with one woman director. The Company has a non-executive chairman. Non-executive directors' compensation

A sitting fee of ₹ 50,000 per meeting is paid to non-executive directors, including independent directors, for every meeting of the Board or Committee of the Board attended by them.

Members of the Company, vide a special resolution passed at the annual general meeting held on 17 July 2012, have by way of an enabling provision approved the payment of a sum not exceeding one percent of the net profits of the Company, calculated in accordance with the provisions of sections 198, 349 and 350 of the Companies Act, 1956, to one or more or all non-executive directors as may be decided by the Board of Directors at its discretion from time to time for a period of five years commencing from 1 April 2012.

In view of the additional duties and responsibilities cast upon the directors by the Companies Act, 2013, and the Listing Regulations and considering the substantial growth in the business of the Company in the last few years, the Board of Directors, at its meeting held on 23 March 2015, has

approved payment of commission to non-executive directors (independent and non-independent) at the rate of ₹100,000 per meeting of the Board and/or Committee attended by them w.e.f. 1 April 2015, subject to the aggregate being within the overall ceiling of one percent of the net profits. - Based on the said criteria, rating sheets were filled by each of the directors towards the end of the year with regard to evaluation of performance of the Board, its Committees and directors (except for the director being evaluated) for FY2017.

Annexure A to Independent Auditors' Report (Contd.)

Inherent limitations of internal financial controls over financial reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper Management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

The financial statements have been prepared in conformity with generally accepted accounting principles to comply in all material respects with the notified Accounting Standards ('AS') under section 133 of the Companies Act, 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 and the guidelines issued by the Reserve Bank of India ('RBI') as applicable to a Non-Banking Finance Company ('NBFC'). The financial statements have been prepared under the historical cost convention on an accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous year except for the change in accounting policies explained below. The complete financial statements have been prepared along with all disclosures.

All assets and liabilities have been classified as current or non-current as per the criteria set out in Schedule III to the Companies Act, 2013. Based on the nature of the products and services and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current/non-current classification of its assets and liabilities.

A) System of Accounting

- (iii) The preparation of financial statements in conformity with generally accepted accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses and disclosure of contingent liabilities as on the date of financial statements. However, deferred tax asset arising on account of unabsorbed depreciation and business losses are recognised only if there is virtual certainty supported by convincing evidence that there would be adequate future taxable income against which the same can be realised/set off.

J) Provisions and contingent liabilities

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a realisable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

K) Employee Stock Option Scheme

The Company operates its Employee Stock Option Scheme through a trust formed for the purpose. Equity shares are issued to the trust on the basis of the Company's expectation of the options being exercised by employees. Cost of benefit, if any, is recognised as an expense by the Company. The balance equity shares not exercised and held by the trust are disclosed as a reduction from the share capital and securities premium account with an equivalent adjustment to the subscription loan advanced to the Trust. See note no. 29.

L) Operating Leases

As a lessee: Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the Statement of Profit and Loss on a straight line basis over the period of the lease.

M) Foreign currency translation

Initial recognition:

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion:

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

Exchange differences:

All exchange differences are dealt with including differences arising on translation settlement of monetary items in the Statement of Profit and Loss.

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating the diluted earnings per share, the net profit or loss for the period attributable to the equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

Method used for accounting for share based payment plan

The Company has elected to use intrinsic value method to account for the compensation cost of stock options to employees of the Company. Intrinsic value is the amount by which the quoted market price of the underlying share exceeds the exercise price of the option.

The fair value of options used to compute pro-forma net profit and earnings per share have been estimated on the date of grant using the Black-Scholes Model. The key assumptions used in Black-Scholes Model for calculating fair value as on the date of grant are:

Grant date	Risk free interest rate	Expected life	Expected volatility	Dividend yield	Price of the underlying share in market at the time of the option grant (₹)*
12-Jan-10	6.70%	1-5 years	54.01%	0.62%	35.87
21-Jul-10	7.42%	3.5-6.5 years	55.38%	1.28%	54.20
28-Jul-11	8.27%	3.5-6.5 years	53.01%	1.42%	70.52
16-May-12	8.36%	3.5-6.5 years	49.58%	1.37%	87.61
15-May-13	7.32%	1-5 years	29.97%	1.09%	138.04
1-Nov-13	8.71%	1-5 years	32.83%	1.11%	135.31
16-Jul-14	8.66%	1-5 years	38.01%	0.73%	219.66
20-May-15	7.76%	3.5-6.5 years	34.88%	0.36%	448.16
24-May-16	7.38%	3.5-6.5 years	33.13%	0.47%	765.37

Annexure A to Independent Auditors' Report

Referred to in paragraph 8(f) of the Independent Auditors' Report of even date to the Members of Bajaj Finance Ltd. on the consolidated financial statements for the year ended 31 March 2017

Report on the internal financial controls under clause (i) of sub-section 3 of section 143 of the Act

1. In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended 31 March 2017, we have audited the internal financial controls over financial reporting of Bajaj Finance Ltd. (hereinafter referred to as 'the Holding Company') and its subsidiary companies, which are companies incorporated in India, as of that date.

Management's responsibility for internal financial controls

2. The respective Board of Directors of the Holding company, its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the 'Guidance Note') issued by the ICAI and the Standards on Auditing deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal financial control over financial reporting includes those policies and procedures that
 - i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
 - ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of Management and directors of the Company; and

Annexure A to Independent Auditors' Report (Contd.)

- iii. provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent limitations of internal financial controls over financial reporting

- 7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper Management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

- 8. In our opinion, the Holding Company, its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

2 I. Statement of significant accounting policies and practices

- (a) The financial statements of the subsidiaries used in the consolidation are drawn up to the same reporting date as that of the Parent Company, i.e. year ended 31 March.
- (b) The financial statements have been prepared in conformity with generally accepted accounting principles to comply in all material respects with the notified Accounting Standards ('AS') under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared under the historical cost convention on an accrual basis. Notes to consolidated financial statements for the year ended 31 March 2017 (Contd.)

II. Principles of consolidation

- (a) The financial statements of the Parent Company and its subsidiaries have been consolidated on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after eliminating intra-group balances, intra-group transactions and the unrealised profits.
- (b) The financial statements of the Parent Company and its subsidiaries have been consolidated using uniform accounting policies.
- (c) The excess of the cost to the Parent Company of its investments in each of the subsidiaries over its share of equity in the respective subsidiary, on the acquisition date, is recognised in the financial statements as goodwill.

III. Since the business of the subsidiary viz. Bajaj Housing Finance Ltd. is insignificant in context of the consolidated group, the consolidated financial statements largely reflect the results of the parent and hence other significant accounting policies followed by the group can be referred to in note no. 2 to the standalone financial statements of the parent, to which these consolidated financial statements are attached.

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating the diluted earnings per share, the net profit or loss for the period attributable to the equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

Preface

As mandated by Securities and Exchange Board of India (SEBI), India's top 500 listed entities based on market capitalisation on the BSE and NSE are required to submit a 'Business Responsibility Report' (BRR) along with their Annual Report for FY 2016-17 (FY2017). This report is required to be in line with 'National Voluntary Guidelines on Social, Environmental and Economic Responsibilities of Business' (NVGs), as released by the Ministry of Corporate Affairs in July 2011.

Bajaj Finance Limited ('BFL', 'the Company') presents its second BRR in line with the NVGs and the BRR requirement of SEBI. This BRR provides information about the key initiatives undertaken by the Company, driven by the triple bottom line aspects. The business responsibility performance of the Company is assessed annually by BFL's Board of Directors.

Principle 1: Businesses should conduct and govern themselves with Ethics, Transparency and Accountability

BFL practices its business with utmost integrity. It considers ethics, transparency and accountability to be its most important operational priorities, and it is ingrained into its practices across the organisation. The processes and systems designed are meant to practice these core values of ethics, transparency and accountability.

BFL released its 'Code of Conduct' (CoC) in FY2013 to systematically strengthen its core values amongst its business practices and employees. The CoC is communicated to its employees through various mediums to enable understanding, adherence and implementation. The CoC is signed by each employee annually.

BFL has zero tolerance towards non-compliance of its CoC policy. The CoC broadly covers good working norms, cultural norms and integrity norms. It includes 'disciplinary action policy' and 'whistle blower policy' which allows employees to escalate grievances of any nature including, harassment and fraud/unethical behaviour/violation; this is monitored through an independent audit function which reports to the MD and Audit Committee on a regular basis. BFL's CoC also includes commitment to health, safety and the environment, eliminating waste and conserving resources.

The Company has a separate CoC that is applicable to the Company's directors and Senior Management. It states that 'Directors and Senior Managers shall observe the highest standards of ethical conduct and integrity and shall work to the best of their ability and judgment'. A declaration of the directors' and Senior Management's affirmation to the CoC is communicated to all stakeholders by the MD, through the Annual Report.

No stakeholder complaint linked to CoC adherence was received in the reporting year.

Principle 2: Businesses should provide goods and services that are safe and contribute to sustainability throughout their life cycle

As a financial services company, BFL neither has a sizable consumption of any raw material nor produces any physical goods. Its activities are limited to providing financial solutions to serve the needs of the people of this country. These include solutions for the rural population that would enhance their livelihood as well as quality of life. Some of them are given below:

1. BFL finances solar equipment through EMI schemes across its rural markets. This helps in promoting environment-friendly renewable energy sources in rural areas of the country.
2. BFL finances dairy equipment and submersible water pump sets through affordable EMI schemes across its rural markets. The Company also finances milking machines, high range freezers, domestic water pump sets, etc. These enable farmers to mechanise their daily operations, thereby enhancing their productivity.
3. BFL offers financing to registered traders of Agricultural Produce Market Committee (APMC) to expand their business through easier access to credit, thereby indirectly having a positive impact on agricultural productivity.

Principle 3: Businesses should promote the well-being of all employees

BFL believes 'happy customers start with a happy employee'. BFL is dedicated to create a thriving, safe and inclusive workplace for its employees. To achieve this, BFL drives various employee engagement initiatives. BFL has developed seven core competencies under its 'Our Way' philosophy, which forms the backbone of its culture and is propagated to attract and retain talent.

BFL is an equal opportunity employer. The Company had 11,479 fulltime employees at the end of the reporting year, of which 375 are women. In FY2017, BFL added 3,602 employees. BFL adheres to the Apprentice (Amendment) Act, 1973 and 1986, currently applicable only in western region states. The Company hired 53 apprentices during the reporting year. BFL employees are not part of any employee association. No complaint related to child labour, forced labour, involuntary labour and sexual harassment was received in the reporting year.

Pure Life, the Company's employee wellness program, was enhanced to include an employee counselling helpline and a fitness app through a leading service provider. BFL has continued with its Annual Health Check-up program for employees.

On employee learning and development, the Company has launched multiple targeted development initiatives, called schools, while continuing with organisation wide developmental programs. These cater to emerging business and functional needs e.g. building current and future collections competencies in the School of Collections, operational skills in the School of Operations and technical, project management and strategic thinking skills in Personal Advancement and Capacity Enhancer (PACE). BFL has its own 'Rural Training Centre' in Rajgurunagar, a rural market within Pune district, to equip its rural employees with the requisite functional and technical skills.

The Learning and Development (L&D) classroom focuses on leadership competency development based on the 'Our Way' philosophy. BFL trained 9,300 people in FY2017, which included a total of 12,750 days of offline training and approximately 123,553 learning hours, covering more than 60% of the workforce.

BFL's HR system 'Your Care' is an automated cloud based platform where employees can raise any kind of grievance, complaints and queries, which are automatically assigned, attended and closed through the platform.
