MANAGEMENT DISCUSSION AND ANALYSIS:

INDUSTRY STRUCTURE & DEVELOPMENT:

Your Company offers a wide range of products such as Artist Materials, Hobby Colours, Scholastic Colours, Scholastic Stationery Products, Office Products and Writing Instruments under the Camel and Camlin brands and caters to a vast consumer segment for their Fine Art, Scholastic and Office Stationery needs.

Indian art material market is divided into sub-segments like Paints, Mediums and Accessories. Similarly it can be categorized as per the user profile where on the top of the pyramid there is serious and high quality artist material patronised by professionals. The hobby material comes in the middle of the pyramid, which includes a very wide range of products and is used by a wide spectrum of people of all ages, regardless of the gender or education. The base is built up of the scholastic art material, including products like crayons, pastels and other economically priced products patronised by a huge population of schools and students. The market for art material in India is growing at a very healthy rate. The phenomenal rise

in the recognition and appreciation of Indian art at home and abroad, has given impetus to the fine art material market. The artists are now in position and mood to use better and more expensive inputs to create the work of global standards. However when it comes to hobby range due to change in demographics and more women working and time constraints in our daily life the profile of hobby usership is changing and as such impacting hobby as we know it today. The school colour segment is quite dynamic and growing. However here too there is a need for the society to grow colour product usage and consumption across as a medium to enhance creativity and spur the minds of tomorrow's Indians. Your company is doing its bit by continuing to focus on activities like All India Camel Colour Contest which is now in its 39th year to spread the usage of color products amongst school kids.

Whereas Indian Stationery market, can be divided into School Stationery, Office Stationery, Paper products, and Computer Stationery. The growth of this Market is driven by increased spend on Educational Sector by Government, Education Standard getting improved and opening new categories of Education for specialisation and concentration on overall development of students. The office supplies segment is growing rapidly. Opening of new commercial offices having multi locational presence has helped the organized players with scalability to serve across locations and offer diverse range of products.

The Company has taken certain initiatives to improve its value creation potential. Some of these initiatives are:

- Develop new Products which are fast moving and non seasonal in nature. One of the key highlight is the launch of Zebra Pens which Camlin is the sole distributor and marketer in India.
- Continued focus on Office Products with focused consumer contact program and aggressive dealer loyalty programs catering to this segment.
- One of the most important and a long term initiative taken by your Company is to set up a dedicated School promotion team that will promote Camlin products. While this has meant adding a significant number of people of the payrolls and hence cost increase, we believe that this will in the long run prove extremely beneficial.

- Alliance with Kokuyo S&T Co., Ltd. (Kokuyo) shall add significantly to the product portfolio of Camlin and shall also open vast opportunities for Camlin's products in the International market.

However in 2010-11 there has been a significant increase in the material costs. The inflation in the economy which earlier was just in foods has now fully got into manufacturing impacting the margins in a very significant manner. The increase in interest cost, wages due to inflation and also for initiatives mentioned above has had an impact on profitability.

Competition in last few quarters have been severe. With now many players both Indian and International vying for a share in this market, the consumer has a great choice but is overall reducing the pricing power.

OUTLOOK, OPPORTUNITIES AND THREATS, RISKS AND CONCERNS:

The Indian stationery and color products industry does not foresee any significant impact on its growth prospects. Growth will be driven by the growing and young population, rising middle class incomes, changing lifestyles and aspirations. Increased Budgetary allocations for Education in the Government Budget and increase in spending on Education by public at large are also the major growth driving factors which will result in strong demand for your products.

Company is consistently innovating and enhancing its capabilities and operations to strengthen its competitive position. Series of strategic initiatives such as the alliance with Kokuyo will henceforth help your Company in mitigating the risks of squeeze on margins and paucity of funds for business development. With the strength of our brand, diversified product range, distinctly superior quality of our products, strong distribution network and wide customer base we are confident of growing our financial performance for the coming year.

Macro economic factors like economic and political developments; natural calamities may affect the Company and industry at large. Nevertheless rise in Prices of Raw Materials, Packing materials have continued to make an adverse impact on the margins of the some of the products, but the Company expects to increase selling prices of these products over a period of time thereby maintaining the margins. What

is of concern is the continued Competitive pressure that could affect your company's competitiveness. However new product introductions, aggressive promotions, increasing marketing effort is planned to mitigate this.

Every business faces risks either from internal operations or from external environment. The base of any business is a healthy appetite for risk. This is why one of the greatest and most important challenges for an organisation is to define the optimal risk level for its business to ensure that its activities produce risk adjusted returns. Company is continuously identifying, prioritizing and mitigating Strategic, Operational, and Financial & Compliance risks and evolved a risk organizational structure with risk policies and procedures. Company has put in place a Risk Management Document which has the objective to create an awareness about various risks associated with the business of the Company and which defines the risk policies, lays out the risk strategies and methodology to decide on the risk taking ability of the Company. The framework so designed will ensure adherence to the rules, regulations and internal policies of the Company.
