VENKY'S ANNOUNCES Q2 FY 23 FINANCIAL RESULTS

Pune, November 9, 2022: **Venky's (India) Limited**, a well-diversified company engaged in various manufacturing activities in the poultry industry, has announced its Financial Results for the quarter and half year ended 30th September, 2022.

QUARTER ENDED 30th SEPTEMBER, 2022

Revenues from operations stood at Rs.959.03 Cr.

Loss Before Tax at Rs. 27.00 Cr.

Loss After Tax at Rs. 20.56 Cr.

EPS at Rs. (14.59)

HALF YEAR ENDED 30th SEPTEMBER, 2022

Revenues from operations higher at Rs.2,155.47 Cr.

Profit Before Tax at Rs.39.09 Cr.

Profit After Tax at Rs.28.72 Cr.

EPS at Rs. 20.39

Note:

During the quarter ended 30th September, 2022 the poultry and poultry products segment's performance has been negatively impacted due to lower realizations from the sale of day old chicks of layer and broiler grown up birds. The performance of oilseed segment has also been affected due to lower off-take from poultry farmers and substantial increase in energy prices

For more details about Venky's (India) Limited, please refer to the attached Information for Investors.

VENKY'S (INDIA) LIMITED

Information for Investors

Updated upto 30.09.2022

BUSINESS ACTIVITIES IN BRIEF

Venky's has 3 business segments :

1. Poultry and Poultry Products
2. Animal Health Products
3. Oilseed

NAME OF SEGMENT	NAME OF ACTIVITY	DESCRIPTION OF ACTIVITIES
Poultry and poultry products	Production and sale of day old broiler chicks	<p>Venky's is involved in broiler breeder operations. [<i>Broiler birds are reared for meat purpose i.e. for human consumption like chicken tandoori, kabab, tikka, chicken masala, curry etc.</i>].</p> <p>Venky's sources one- day-old broiler breeder parent chick from Venco Research and Breeding Farm Private Limited (a VH Group JV with Cobb Vantress Inc., USA). These breeder parent chicks are grown in poultry farms and females are artificially inseminated to obtain the hatching eggs which are hatched in incubators.</p> <p>Chicks coming out of the eggs are called "commercial chicks" which are sold by Venky's to various commercial poultry farmers and integrators who grow them in their own/contract farms and when the commercial chicks are grown to an age of 40 to 45 days they are sold in open market as "grown up broiler birds" for meat purpose (for human consumption).</p>
-do-	Production and sale of day old layer chicks	<p>Layer activities are similar to broiler activities above. [<i>Layer birds are reared for table egg purpose i.e. for human consumption like egg omlets, egg curry etc.</i>]. Parent chicks are bought from Venkateshwara</p>

		Research And Breeding Farm Private Limited (a VH Group JV with ISA Breeders Inc., USA). Venky's sells commercial layer chicks to various poultry farmers who, in turn, grow them for obtaining "table eggs" - (meant for human consumption).
-do-	Processing of broiler birds	The chicken processing plant of Venky's is located at Kamshet, near Pune. Broiler grown up birds are slaughtered here for production of whole chicken, portions in fresh and frozen form and sold in retail and institutional markets under "Venky's" brand. The products are also sold to institutional buyers, major hotels and leading Quick Service Restaurant chains like KFC, Pizza Hut, Dominos, Vista Foods who supply to McDonalds, etc.
Poultry and poultry products	Venky's Xprs [Company owned]	Venky's is also in further processing, value added Chicken-In-Minutes products like freezer to fryer, completely cooked, ready-to-eat products sold under "Venky's" brand. Venky's chicken products are sold through distributors and retail outlets and are available in all leading super markets / food malls. Hygienically cooked, quick and lip smacking chicken treat, take away joint. Sale of various delicacies like garlic & pepper roast chicken, tender grilled chicken, Tandoori chicken roast, grilled chicken burger, chicken hot dog, Kathi roll, etc.
	Chicken Xperience [Franchisee outlets]	Chicken Xperience by Venky's are franchisee outlets on the similar business model of Venky's XPRS. Chicken Xperience outlets serve variety of cooked, ready to eat and chicken in minutes products in all the major cities of India.

-do-

Production of Specific Pathogen Free (SPF) Eggs

SPF Eggs: Specified Pathogen Free (SPF) Technology is a science of developing and maintaining a species of animals free of infection by Specified Pathogenic micro-organisms. Development of SPF Poultry breeding stock is an outcome of series of test conducted on selected layer breeders for 3 generations to confirm that the flock derived is free from vertically transmissible disease agents as indicated in European and Indian pharmacopeia.

Venky's India Ltd (SPF Eggs. Div.) is one of the few producers in this high-tech area and the 4th largest producer of SPF eggs in the world. The eggs derived from such flock are free from almost over 42 antigens or antibodies which are exclusively used for production of live vaccines for humans, animal & poultry and for research purpose.

Animal Health Products Manufacture of medicines & Poultry feed Supplements

It has more than 35 unique products ensuring better health and better performance in breeders as well as commercial broilers and layers. AHPs are manufactured in powder as well as liquid forms in the manufacturing plant located near Pune.

Oilseed Processing of Soya

Venky's has 3 soya processing plants. All the 3 plants are located in the State of Maharashtra (Solapur, Nanded and Srirampur). Edible oil obtained from the processing activity is sold in bulk to traders while the de-oiled cake is used in poultry feed – for captive consumption as well as sale to poultry feed manufacturers. Total capacity of all the 3 plants is 5,40,000 MT per annum.

How Venky's has successfully reduced volatility in its business portfolio

This was possible through diversification into non-volatile manufacturing activities like :

- a) Soya processing
- b) Hi-tech research based production of SPF eggs [SPF eggs are supplied to various vaccine manufacturers - both animal vaccines and human vaccines]
- c) Animal Health Products
- d) Processed chicken products
- e) Poultry Feed

For the financial year ended 31st March, 2022, the combined sales turnover of :

- a) Non-volatile or less volatile manufacturing activities was approx Rs. 3,158 cr. i.e. 71 % of the total sales turnover of the Company.
- b) The remaining 29 % of sales i.e. Rs. 1,242 cr. came from sale of broiler day old chicks, layer day old chicks, broiler hatching eggs and grown up broiler birds.

What is bird flu? Whether bird flu outbreak can happen in future and how Venky's is planning to handle such situation ?

What is the effect of bird flu outbreak on the financial performance of Venky's?

Bird flu or avian influenza is the disease of birds. In India, it is generally transmitted through migratory birds. Occurrence of bird flu in poultry is a common phenomena throughout the world.

As far as India is concerned, the organized poultry farming (including Venky's) consists of rearing of birds by providing proper housing conditions, where disinfection and cleaning of the sheds take place regularly at high standards. The birds are always reared, with very high standard practices like bio-security norms of men and material movements, high quality feed along with preventive vaccination programs to prevent viral outbreak. This clearly demarcates organized poultry sector from backyard and unorganized farming.

According to the Department of Animal Husbandry, Government of India, bird flu occurs almost every year in some parts of the country through migratory birds, which bring the infection to India from across the world. The outbreaks usually happen in winter months and subsides by February.

As far as Venky's is concerned, since its poultry operations are very well diversified i.e. spread over 11 States in India, the effect of bird flu on its operations will be minimum and any disturbance in movement of poultry products or the downward price movement will be temporary in nature, as was witnessed in the last 20 years or so. Poultry operations include various sub-segments, like layer chicks, broiler chicks, broiler hatching eggs and grown up broiler birds – collectively they contributed approx. 29 % of sales turnover for the year ended 31st March, 2022.
