(a) The changes in 3M's defined-benefit pension and postretirement plans' funded status as of December 31, 2011 (primarily due to a decrease in discount rates) significantly impacted several balance sheet lines. These changes increased long-term liabilities by approximately $\$ 2.4$ billion and decreased stockholders' equity by approximately $\$ 1.6$ billion, with the other major impact primarily related to increased deferred taxes within other assets. Other pension and postretirement changes during the year, such as contributions and amortization, also impacted these balance sheet captions.
