BASMATI RICE

BUSINESS OVERVIEW

BASMATI RICE

HISTORY

"Basmati" derives from the Hindi literally meaning "fragrant". Basmati rice is believed to have been cultivated in the Indian sub continent for centuries. The earliest extant work to mention basmati rice is Heer Ranjha

PRODUCTION AND CULTIVATION

India accounts for over 70% of the world's basmati rice production. A small portion of that is being grown organically. Organisations such as Kheti Virasat Mission are trying to increase the amount of basmati rice that is being grown in the Punjab in India.

IN INDIA

The areas of basmati rice production in India are in the states of Punjab, Haryana, Himachal Pradesh, Delhi, Uttarakhand, Uttar Pradesh and Bihar. India's total basmati production for the July 2011–June 2012 crop year was 5 million tonnes. In India, Haryana is the major basmati rice cultivating state, producing more than 60 percent of the total basmati rice produced in India

AROMA AND FLAVOUR

Basmati rice has a typical pandan-like (Pandanus amaryllifolius leaf) flavour caused by the aroma compound 2-acetyl-1-pyrroline. Basmati grains contain about 0.09 ppm of this aromatic chemical compound naturally, a level that is about 12 times more than non-basmati rice varieties, giving basmati its distinctive spicy fragrance and flavour. This natural aroma is also found in cheese, fruits and other cereals. It is a flavoring agent approved in the United States and Europe, and is used in bakery products for aroma."

NUTRITIONAL VALUES

Basmati rice is rich in carbohydrates, but is very low in sugar. Basmati rice is naturally low-fat, containing less than 1g per serving. Each 3/4 of a cup serving contains 3g of protein.

Basmati rice is a moderately good source of thiamine (13 percent of daily value) and niacin (8 percent of daily value). These B vitamins play a crucial role in energy metabolism.

In addition to containing important B vitamins, each serving of basmati rice contains a small amount of iron (6 percent of daily value). Iron helps transport oxygen through the blood. Remember that adding salt to the water during the cooking process or to the rice before serving will increase sodium content.

AGRICULTURE A BOON TO INDIA

INTRODUCTION

Agriculture plays a vital role in India's economy. Over 58 per cent of the rural households depend on agriculture as their principal means of livelihood. The share of primary sectors* (including agriculture, livestock, forestry and fishery) is estimated to be 20.4 per cent of the Gross Value Added (GVA) during 2016-17 at current prices. . GVA from the sector is estimated to have grown at 3 per cent in Fy18.

The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food and grocery market is the world's sixth largest, with retail contributing 70 per cent of the sales. The Indian food processing industry accounts for 32 per cent of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth. It contributes around 8.80 and 8.39 per cent of Gross Value Added (GVA) in Manufacturing and Agriculture respectively, 13 per cent of India's exports and six per cent of total industrial investment.

MARKET SIZE

During 2017-18 crop year, food grain production is expected to reach a record 277.49 million tonnes. During 2016-17, it was 275.68 million tonnes.

Agricultural export constitutes 10 per cent of the country's exports and is the fourth-largest exported principal commodity. Agricultural exports from India reached US\$ 28.09 billion during April 2017-January 2018 with exports of basmati, reaching US\$ 6.19 billion

India is the largest producer, consumer and exporter of spices and spice products. Spice exports from India grew by 6 per cent year-on-year between April-September 2017 to US\$ 1.37 billion.

ROAD AHEAD

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price.

The government of India targets to increase the average income of a farmer household at current prices to Rs 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16.

NUTRITION FACTS

BUSINESS OVERVIEW

NUTRITION FACTS IN MISHTANN BASMATI RICE

CARBOHYDRATES

Carbohydrates, the most important fuel for exercising muscles, make up 85% of the rice kernel. Most of the carbohydrate is starchy and found in the white endosperm, which forms the main part of the rice.

According to scientific research by the World Health Organization and the Food & Agriculture Organization, complex carbohydrates are essential to good health and a high carbohydrate intake can reduce the risk of obesity.

Rice is a low-fat complex carbohydrate that is quickly digested and rapidly made available to the muscles and other body systems and is therefore a perfect source of energy. As a complex carbohydrate, rice powers the body. Our muscles store complex carbohydrates to be released as energy when needed.

FAT

Rice can play an important part in helping to achieve a healthy diet as it contains practically no fat and no cholesterol. Most of the fat is found in the germ and therefore Brown rice contains slightly more fat than white rice.

PROTEIN

Rice is normally classified as a carbohydrate. Whilst this is true, rice protein – when compared to that of other grains – is considered one of the highest quality proteins. It has all eight of the essential amino acids, the necessary building blocks for strong muscles.

NATURALLY GLUTEN-FREE

Rice is one of the few cereals that is free from gluten and rarely causes unpleasant reactions or digestive difficulties. It is therefore ideal for people with gluten intolerance and this is why it is suitable for babies, the elderly, sick and those who find eating difficult. Although rice is often called glutinous, this refers to its stickiness and not its gluten content.

MISHTANN
limitless happiness...☺

NUTRITION FACTS

FIBRE

Rice is a source of insoluble fibre, which helps to prevent diseases of the large intestine and is necessary for protection against bowel and colon cancer and for lowering cholesterol, which is a risk factor for coronary heart disease.

LOW TO MEDIUM GI

Whereas standard long grain rice raises your blood sugar levels very fast (followed by just as abrupt a fall), the unique structure of the Pure Basmati rice grain means it is more slowly digested and causes only relatively gentle rises and falls in your blood sugar. It is therefore described as having a low to medium glycaemic index, or GI.

Scientists now believe that these slower releasing carbohydrates are better at suppressing appetite because they avoid fluctuating blood sugar levels which can stimulate appetite. Studies also show that lower GI carbohydrates produce lower average insulin levels over the day, which allows greater use of fat as the source of fuel. Diabetics can also control their blood glucose much better by consuming low to medium GI carbohydrates like Pure Basmati and consuming them may even reduce the chance of developing diabetes, too.

Eating lower GI foods has another secret plus point. By ironing out highs and lows in blood sugar it also keeps hunger under control, helping to control our weight.

SALT

The Food Standards Agency recommends that we should eat no more than 6g of salt a day as part of a balanced diet. Mishtann Pure Basmati contains no salt. The salt content in Mishtann Steamed Basmati ranges from 0.3g to 1.1g per serving. This range is equivalent to between 5% and 18.3% of an adult's daily allowance.

FOOD ADDITIVES

All Mishtann products are free from artificial colours, flavouring and preservatives.

VEGETARIAN

All Mishtann products are suitable for vegetarians.

BASMATI RICE

MISHTANN A LIMITLESS HAPPINESS.....

“Happiness is not something ready made. It comes from your own actions.”

Our people continue to drive Mishtann Rice's goal become the world's favourite rice food company Mishtann Bring happiness by serving of its best product, Mishtann offers an extensive portfolio of brands that have been carefully developed to appeal to local markets around the world. Customer tastes and expectations have been finely segmented to deliver authentic flavors that go well with a variety of popular cuisines. Consumer palettes across the market segments have been well researched and adapted to suit the requirements of various trade channels.

All of Mishtann branded rice products are made with rice that is grown in the areas of India that area specially dedicated to basmati rice production. The rice is aged for up to a year before being processed, then prepared at a state-of-the-art treatment plant that preserves all its purity in perfect hygiene.

Why Mishtann Basmati Rice?

Mishtann Basmati Rice is gluten-free and low in fat. It contains all eight essential amino acids, folic acid, and is very low in sodium and has no cholesterol.

Basmati has a low to medium glycaemic index, meaning that energy is released at a slower, steadier rate leading to a more balanced level of energy.

Mishtann Basmati tastes like no other rice on earth. Unlike ordinary long grain rice the light, fluffy texture of Basmati's long, slender grains offers the palate a totally different experience in terms of mouth-feel and taste – distinctive, unique and slightly 'nutty'.

That's because we carefully mill our grains, rejecting broken grains that would otherwise release starch and cause the rice to become sticky. Uniquely, the Basmati grain expands more than twice its dry length during cooking. Unlike other types of rice the grains only expand lengthways resulting in the grains retaining their long slender characteristic when cooked.

For over years, we have been committed to preserving this legendary rice. Today the farmers still grow Basmati using the methods of nurturing this precious grain that have been passed down from generation to generation. Our experienced buyers have only one brief – to buy the best Basmati, regardless of price. It's as valuable to those who grow it, as it is for those who cook with it.

We consider ourselves 'Guardians' of Basmati and from the very beginning have worked tirelessly to ensure that the legend of Pure Basmati continues to flourish. We adopt a 'fair play' policy, working with the farming communities of the Basmati growing region. It is a unique relationship. We support traditional farming with free growing advice via FACE our Farmers Advisory Cell and we provide Basmati seed to farmers at no profit.

Cooking with Mishtann Basmati means light, delicate and separate grains.

The agricultural sector plays a critical role in India's economy. Over 58% of rural households depend on agriculture as their principal means of livelihood. India holds the 2nd largest agricultural land in the world with 157.35 million hectares under cultivation. In FY 2016-17, total food grain production in India was recorded at 273.83 million tonnes, which increased from 253.16 million tonnes in FY 2015-16. India is the largest producer of cotton, spices, pulses, milk, tea, cashew and jute; and the 2nd largest producer of wheat, rice, sugarcane, oilseeds, fruits and vegetables.

BASMATI INDUSTRY SCENARIO

Rice is the staple diet for almost half the global population. Over 90% of the global rice output and consumption is centered in Asia, with China and India both the world's largest producers and biggest consumers. India accounts for over 70% of the world's basmati rice output, which is a small portion of the total rice produced in India. Rice production in India was expected at 103.36 million tonnes in 2015-16.

Among the varieties mentioned, basmati would be the most superior in terms of product characteristics, which makes it the most premium variety of rice. In volume terms, basmati rice accounts for less than 2% of the global rice industry, the size of which is pegged at around 475 million metric tonnes (MMT) (milled basis). There are only two producers of basmati rice in the world: India, which accounts for more than 70% of world's basmati rice production, and Pakistan, which accounts for the rest. For India, even though basmati rice represents a small part of the total agro commodity basket, it offers high product visibility in the global market. The Indian rice industry consists of both basmati rice and non-basmati rice; however this note covers only the basmati rice industry in India.

risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Holding Company's and its subsidiary companies incorporated in India, internal financial control system with reference to financial statements.

MEANING OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that;

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Holding Company and its subsidiary companies incorporated in India, have in all material respects, an adequate internal financial control system with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at 31 March 2018, based on the internal controls with reference to financial statements criteria established by the Holding Company and its subsidiary companies, considering the essential components of internal controls stated in the Guidance Note issued by the ICAI.

Notes forming part of the Financial Statements

Significant Accounting Policies

Property, Plant and Equipment:

Property, plant and equipment is stated at acquisition cost net of accumulated depreciation and accumulated impairment losses, if any. Property, plant and equipment acquired in a business combination are recognised at fair value at the acquisition date. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance cost are charged to the Statement of Profit and Loss during the period in which they are incurred.

Gains or losses arising on retirement or disposal of property, plant and equipment are recognised in the Statement of Profit and Loss.

Property, plant and equipment which are not ready for intended use as on the date of Balance Sheet are disclosed as "Capital work-in-progress".

Depreciation is provided on a pro-rata basis on the straight line method based on estimated useful life prescribed under Schedule II to the Companies Act, 2013 with the exception of the following:

- plant and equipment is depreciated over 3 to 21 years based on the technical evaluation of useful life done by the management.
- assets costing Rs. 5,000 or less are fully depreciated in the year of purchase.

Freehold land is not depreciated.

The residual values, useful lives and method of depreciation of property, plant and equipment is reviewed at each financial year end and adjusted prospectively, if appropriate.

Inventories:

Inventories are valued at the lower of cost and net realisable value. Cost is computed on a weighted average basis. Cost of finished goods and work-in-progress include all costs of purchases, conversion costs and other costs incurred in bringing the inventories to their present location and condition. The net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and estimated costs necessary to make the sale.

Cash and Cash Equivalents:

Cash and cash equivalents are short-term (three months or less from the date of acquisition), highly liquid investments that are readily convertible into cash and which are subject to an insignificant risk of changes in value.

Provisions and Contingent Liabilities:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date.

If the effect of the time value of money is material, provisions are discounted to reflect its present value using a current pre-tax rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

Revenue Recognition:

Revenue from sale of goods is recognised when all the significant risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract, there is no continuing managerial involvement with the goods and the amount of revenue can be measured reliably. The Company retains no effective control of the goods transferred to a degree usually associated with ownership and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods. Revenue is measured at fair value of the consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government which are levied on sales such as sales tax, value added tax, goods and services tax, etc. Income from export incentives such as duty drawback and premium on sale of import licenses and lease license fee are recognised on accrual basis.

Income from services rendered is recognised based on agreements/arrangements with the customers as the service is performed in proportion to the stage of completion of the transaction at the reporting date and the amount of revenue can be measured reliably. Interest income is recognized using the effective interest rate (EIR) method.

Dividend income on investments is recognised when the right to receive dividend is established.

Expenditure:

Expenses are accounted on accrual basis.

Segment Reporting

The Business of the Company has been classified into segments based on the basis of the revenue from sales to External Customers and from transactions with other segments exceeds 10% of Total Revenues (external and internal) of all segments. During the year, even if segment reporting as per accounting standard -17 is not applicable. Management of the company has decided (Ref: Respective resolution passed in Board Meeting) to disclose segment product-wise/division wise based on turnover of the respected product/division only in unaudited quarterly results published by the company.

Income Taxes:

Income tax expense for the year comprises of current tax and deferred tax. It is recognised in the Statement of Profit and Loss except to the extent it relates to a business combination or to an item which is recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable/receivable on the taxable income/loss for the year using applicable tax rates at the Balance Sheet date, and any adjustment to taxes in respect of previous years. Interest expenses and penalties, if any, related to income tax are included in finance cost and other expenses respectively. Interest Income, if any, related to Income tax is included in current tax expense.

Deferred tax is recognised in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes.

A deferred tax liability is recognised based on the expected manner of realisation or settlement of the carrying amount of assets and

liabilities, using tax rates enacted, or substantively enacted, by the end of the reporting period. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities; and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

Earnings Per Share:

Basic earnings per share is computed by dividing the net profit for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.
