---	---

Dear Sir(s),

Sub: Regulation 30 of SEBI (LODR) Regulations, 2015

Ref: Presentation on Unaudited financial results for the Quarter/ half year ended September 30, 2025.

We are pleased to enclose herewith our investor presentation on Unaudited financial results for the Quarter/ half year ended September 30, 2025.

A copy of this presentation is also being posted on Company's Website i.e. www.polyplex.com.

Thanking you,

Yours faithfully,
For Polyplex Corporation Limited

Ashok Kumar Gurnani
Company Secretary

Email: akgurnani@polyplex.com

Company Overview

Polyplex at a Glance

- Integrated and diversified manufacturer of plastic film substrates including BOPET (thin & thick), BOPP, CPP and Blown PP / PE
- Wide offering of specialty, innovative and differentiated products across a variety of packaging, electrical & electronic and other industrial applications
- Unique value proposition of on-shoring, off-shoring and near-shoring for a global customer base, while maintaining cost leadership
- Superior sales & distribution network and strong technical support in key demand centers driving deep customer relationships

Unique Global Business Model...

...With a Diverse Product Profile...

Product Breakdown (H1 FY26 Revenues)

■ Thin PET ■ Downstream ■ BOPP ■ Thick PET
■ PET Resin* ■ CPP/Blown ■ Other

...Across a Wide Range of Applications

Packaging

- Food & Beverage
- Textile Bags
- Beauty, Personal & Home Care
- Healthcare & Pharma

Industrials

- Electrical & Electronic
- Building & Construction
- Film for Liners, Labels, PV and LiB for EV
- Digital

Polyplex Journey so far: Ability to identify & capitalize on opportunities

Trend-Setter With Many 'Firsts' in the Industry

Pioneer in Sustainable Products and Processes in the Industry

Strong Commitment Towards Sustainability Focused Innovative Solutions

- Spearheading post-consumer and post-industrial waste (PIW) recycling in the industry towards achieving the goal of circular economy
- Has taken various initiatives to recycle waste, save energy and use clean technology to assert environmental commitment

1

Ecoblue, a subsidiary of Polyplex is a pioneer in **mechanical recycling** and is amongst the **leading recycling companies in the region**

2

Optimized “**chemical recycling**” process for manufacturing Sarafil rPET film with **Post-Consumer Recycled (PCR) content up to 100%** and increased product applications in both packaging and industrial end uses

3

Investments in **renewable energy projects like Solar power**. Implemented at Thailand, Turkey, Indonesia, Bazpur & Khatima

4

Increasing presence in high potential **sustainability related applications** (Solar PV, Lithium-Ion Batteries, Transfer Metallized film/paper)

5

Developed **monomeric PET structures for circularity**; Promotes use of **bio-based raw materials and renewable energy sources**

6

Follows **best practices** relating to the **environment and health & safety** of its employees and the community

Partnering with Leading Brands to Develop Sustainable Products

Active Participation in Several Industry Groups

Quarter under review

Market Positioning

Q2 FY 25-26 Performance Snapshot

	QoQ Growth (Q2 FY 25-26 v/s Q1 FY 25-26)	YoY Growth (Q2 FY 25-26 v/s Q2 FY 24-25)
Sales Volume (All Films) 93,997 MT	3% ↑	12% ↑
Sales Revenue 1,791 INR Crores (\$ 205 million)	3% ↑	3% ↑
Normalized EBITDA 138 INR Crores (\$ 16 million)	26% ↓	28% ↓
PAT (Before Minority) 34 INR Crores (\$ 4 million)	INR 93 cr ↑	INR 131 cr ↓
EPS 7.87 INR/Share	INR 14.02 ↑	INR 20.10 ↓

Factors impacting the quarterly performance:

- Higher revenue is driven by increased volumes, partly offset by lower sales realization due to tepid demand and an oversupply situation. Compared to the corresponding quarter, sales volume is significantly higher owing to the startup of a new line in the USA
- Lower contribution is primarily due to unfavorable market conditions, coupled with uncertainty arising from reciprocal tariffs
- In Q2 FY25–26, there is an unrealized FX loss of INR 12.67 crores (USD 1.45 million) as against a FX loss of INR 156.42 crores (USD 18.28 million) in Q1 FY25–26 and FX gain of INR 100.81 crores (USD 12.04 million) in Q2 FY24–25, on account of the restatement of foreign currency long-term loans, a large portion of which relates to inter-company loans.

H1 FY 25-26 Performance Snapshot

YoY Growth
(H1 FY 25-26 v/s H1 FY 24-25)

Sales Volume (All Films) 184,997 MT	10% ↑
Sales Revenue 3,527 INR Crores (\$ 408 million)	3% ↑
Normalized EBITDA 324 INR Crores (\$ 37 million)	18% ↓
PAT (Before Minority) -26 INR Crores (\$ -3 million)	INR 288 cr ↓
EPS 1.72 INR/Share	INR 43.30 ↓

Factors impacting YoY:

- Higher sales revenue was primarily driven by increased sales volumes following the startup of the new production line in the USA. However, this was significantly offset by lower sales realization, reflecting a soft pricing environment.
- The market remained highly competitive, characterized by excess capacity that continued to exert pressure on EBITDA margins.
- Fixed costs remained elevated due to the expanded scale of operations associated with the new capacity
- In YTD 25-26, there is an unrealized FX loss of INR 169.09 crores (\$ 19.56 million) as against unrealized FX gain of INR 86.50 crores (\$ 10.35 million) in YTD 24-25 on account of restatement of foreign currency long term loans

EBITDA Evolution

Normalized EBITDA Bridge (Q2 25-26 vs Q1 25-26)

Normalized EBITDA is significantly impacted in Q2 FY25 due to:

- A challenging market environment driven by overcapacity, uncertainty arising from reciprocal tariffs, and a general slowdown in the market, all of which adversely affected margins
- High fixed costs resulting from inflationary pressures and higher overheads

The Company believes that its strong DPAC product portfolio and global manufacturing base will enable it to overcome the prevailing cyclicity and market uncertainty in the next few quarters.

Shareholders' Return

Total Resin Capacity 495,200 in MTPA

Total Base Films Capacity (incl. upcoming capacities):
491,837 in MTPA

 Upcoming capacity

1 Integrated Manufacturing Has Broadened Product Portfolio

Base Film Lines with Upstream PET Resin Plants and Downstream Capabilities

- The only global player with resin plants at all manufacturing locations
- Forward integration provides ability to undertake one or more downstream processes on the Base film, leading to higher innovation and value addition, while ensuring cost effectiveness and reduced volatility
- Backward integration is vital to developing resins required for specialty products, apart from enhancing cost competitiveness and ensuring supply security
- In-house mechanical and chemical recycling furthers Polyplex's sustainability goals, by replacing virgin PET resins (made from PTA and MEG) with Post consumer PET bales / flakes

Integrated Manufacturing Across Geographies

Ensures Supply Chain Efficiency, Cost Optimization & Lower Time to Access and Market New Products and Applications

Backward integration into captive PET resin production at all film manufacturing locations is **unique to Polyplex in this industry**

Assured and consistent availability of quality raw material

Reduced costs with adequate and secured return on incremental investment

Protects proprietary composition and helps in film product development, especially for D-PAC portfolio

Significant premium saved in buy v/s make for specialty resin

Direct Melt Casting (DMC) ensures better quality and energy management, while being cost competitive

Chemical recycling of post consumer & post-industrial waste

Opens merchandizing opportunities

Forward integration to downstream capabilities results in superior market positioning and higher returns

Wider product and application range

Diversified customer base

Increase customer and market penetration

Increased ability to provide customized and more technical products

Increasing proportion of value-added films with corresponding reduction in standard film sales

Substantial savings including freight, packing costs, wastage, fixed costs and technical development

Provides platform for future growth

Polyplex – A Respected Plastic Film Manufacturer

In addition to Sarafil range of standard and specialty base films, Polyplex has diversified into several value-added downstream products under Saracote, Saralam and Saraprint brands over the last 10-15 years

Sarafil®

Sarafil Base Films are suitable for a range of applications with their inherent properties of being clear, transparent, flexible, sealable, chemical inertness, high barrier, superior mechanical properties and high heat resistance

Saracote®

The Saracote range of silicone coated films (PET/PP) is designed to provide an excellent carrier to pressure sensitive material. The typical applications are in labels, tapes, roofing shingles and “peel & stick” underlayment

Saralam

The Saralam range of extrusion coated film products cater to a variety of end uses such as thermal lamination products including documents, identity cards, carton lamination and wide format commercial films

Saraprint® Coloring Digitally with Innovation

Saraprint is an innovative non-tearable polyester film designed for digital print media segment for photo album, general printing, promotional & customized digital printing, mini-offset printing and labels

Focus on Highly Differentiated Specialty Film Sales

Differentiated Product, Application or Customer (D-PAC): Drives Polyplex's Right to Win in a Competitive Industry

Unique value proposition of differentiated products, applications and customers has led to a healthy growth in specialty portfolio

2 Increasing Contribution of D-PAC Sales

Continued Increase in D-PAC Volumes...

KMT (films)

...Resulting in Growth of Incremental¹ D-PAC EBITDA

Incremental EBITDA for D-PAC (\$ / kg)

EBITDA (\$ million)

Polyplex's Unique Strategy

Constant addition of new products to the differentiated portfolio, effectively “replacing” older and standard products

Sustained investments in projects in Turkey, US, India and Thailand expected to drive growth in D-PAC sales

Strong relationships and continued engagement with anchor customers for an iterative product development process

¹ The contribution from D-PAC sales to the overall EBITDA represents “incremental” margin over and above standard products net of additional costs (raw materials, differential productivity, wastages and conversion costs). As an illustration, if standard film price is 100, D-PAC product price is 200 and additional cost is 30, then the resulting incremental margin would be 70;

Constantly Innovating to Ensure Sustained Differentiation

Dedicated R&D Ecosystem in India

Demonstrated ability to partner with customers for joint product development and co-innovation due to strong technical capabilities, thereby deepening customer relationships

A separate R&D department registered with the Department of Scientific and Industrial Research (DSIR), Ministry of Science and Technology (India)

12 dedicated personnel in corporate R&D supplemented by local technical service and R&D team with significant experience in chemicals, coatings, resin, converting process and other relevant fields

Growing IPR* portfolio (32 patents and 14 trademarks granted, 6 patents applied for)

Focus on innovation and collaborative application development to become a **preferred supplier/partner of several large multinational customers**

Better technical services and new products are being facilitated by leveraging in-house R&D capabilities and experience

Collaborative research with government labs and educational institutions to **drive innovation and new sustainable products**

Enhanced cross-learning and sharing best practices/benchmarking across various units to **increase efficiency and synergy**

Global and Well-Diversified Customer Base

Deep-Rooted Relationships with Key Customers Spanning Over 15+ Years

- Tier I supplier to leading global and regional converters who cater to global CPGs / OEMs
- Strong manufacturing and distribution capabilities helps capitalize on the increasing preference of customers to source locally

Access to Global Customer Base...

Geographic Business Mix (H1 FY26 Revenue)

■ Americas ■ Other Asia ■ Europe ■ India ■ RoW

...Given Capability of Catering to Customers' Preference for Local Sourcing

- ✓ Domestic availability helps in improving supply chain reliability and optimizing inventory
- ✓ Changing needs of CPGs/ OEMs requiring quick turnaround
- ✓ Flexibility in small order deliveries and responding to unplanned requirements
- ✓ Domestic purchase reduces risk from pricing and foreign exchange movements
- ✓ Limited financial capability of small customers

~2,735 customers in ~86 countries across Europe, Asia (ex-India), India, the Americas and RoW

Packaging and Industrial applications (64% and 36% of H1 FY26 turnover respectively)

Diversified end-use across several industries

Low customer concentration risk with top 10 film customers accounting for 27% of total FY25 turnover

Continued Focus on Operational Efficiencies and Costs

■ Business process continuous improvement and excellence programs

- Undertaking several initiatives to improve business processes and optimize costs through continuous improvement in the areas of productivity, wastage, freight, packing, energy conservation, inventory management and other processes
- Benefits from these programs have been accruing over the last several years and incremental benefits are expected in the future as well

■ Structure new investments to build on leadership in delivered cost

- Near-shore and on-shore manufacturing strategy
- Benefit from logistics and trade duty differentials

■ Capacity utilization

- Ensuring high CUF across all manufacturing plants even in the context of global over-capacity
- Swift ramp up in capacity utilization of BOPET, BOPP and other downstream assets
- Debottlenecking existing assets
- Continuous improvement in plant reliability and throughput

■ Asset configuration

- Cost efficiency through large contemporary assets being used for standard products
- Continue to repurpose older lines for producing specialty films efficiently
- Economies of scale through minimum asset base of two base film lines, resin plant and downstream capabilities at each manufacturing location

Superior Utilization Relative to Industry

Polyplex has consistently improved capacity utilization through debottlenecking and outperformed the industry

(Thin BOPET Film utilization)

*Reduction in Polyplex Capacity utilization in H1FY26 is due to the start up of new film line in USA – under ramp up

Key Drivers for Strong Capacity Utilization

Deep customer access and higher market penetration in key demand centers due to multi location manufacturing

Higher and increasing proportion of specialty films

Extensive sales and distribution network with local warehousing

Ability to move material between different regions depending on local market conditions

Diversification across packaging and industrial segment and in-house downstream businesses with varying market conditions

Consistent improvement in productivity and cost competitiveness

Commitment Towards Sustainable Environment

- Strive to work on **sustainable products and processes**
- Continue to make multiple and substantial investments in recycling operations to provide **solutions** for post industrial as well as post-consumer plastic waste

B

Meaningful Social Impact

- Focused on the **health and safety** of employees
- Makes **monetary contributions** to NGOs, hospitals and Government relief funds and helped support the infrastructure in hospitals
- Has undertaken **various initiatives** to help communities in areas adjoining its plants

C

Strong Governance And Accountability

- Promoting fundamental values of **honesty, integrity, and ethical conduct** among all stakeholders
- Ensuring **strict adherence to laws and regulations** across all jurisdictions where it functions
- Operates with a **strong governance and accountability framework**

Continued Focus and Thrust on Sustainability

Recent Initiatives Undertaken by Polyplex (1/2)

Sustainable Products That Have Already Been Delivered

Polyplex has successfully executed several sustainability initiatives till date

Post-Consumer
Recycled PET Film -
30% - 100% PCR

Mono PET structures

Foil Replacement
(High Barrier
Metallized films)

Eco Friendly BOPET
Film (Heavy Metal
Free)

Transfer Metallized
Films, Paper, Board
(Plastic Free Cartons)

PVC Replacement
(Formable, Dead
Fold, Twist
Properties)

Digital Printable –
Solvent Free

PVDC Replacement
(Transparent Barrier
Chlorine Free)

Source Reduction –
Down Gauging,
Internal Recycling

Recent Initiatives Undertaken by Polyplex (2/2)

Sustainable Products That Have Already Been Delivered

Polyplex RPET solutions - Sarafil rPET Films

Available with **30, 70, 90 & 100% PCR** in Transparent, Metalized and White

rPET grades available in Metalized and White

Superior recycling process – Glycolysis (Chemical recycling)

Availability across the globe – **manufacturing in India, Thailand, Turkey & USA.**

Compliances – for all the relevant **US FDA, EU food safety & recycling** as well as other regulations

Verification criteria for PCR RPET contents as per : ISO14021:2016

Sarafil RPET Film have the same properties as Virgin PET

Ecoblue is helping brands meet their sustainability goals

About Ecoblue

- Starting operations in 2013, Ecoblue provides **sustainable solutions** for film-based process waste as well as post-consumer plastic waste for varied applications
- Only recycler in the region to develop **food grade products across different polymers** including rPET, rHDPE and rPP spanning several applications
- Has been working with **different post-consumer and industrial wastes** (both PET and Polyolefin based) over the years
- Focused on **developing and producing high quality recycled materials** which can replace virgin resin in high end applications such as Bottles, BOPET Film and Filament Yarn
- First in Thailand to **produce food grade rPET resin** for bottle application
- Recycling of Ocean-bound plastics
 - Working with Ocean-bound plastics marketplace platforms
 - Ocean bound plastics certified

Key Products

rPET resin
rPP resin
rHDPE resin

Certifications

US FDA, EFSA & Thai FDA approvals and GRS certification for rPET, rPP, rPE

Current Capacity

rPET – 49,200 TPA
Polyolefin –10,500 TPA
Manufacturing in Thailand

Promoting Sustainability Through Ecoblue

Engaged in Adopting Innovative Recycling Solutions

Ecoblue is a specialist in recycling a wide spectrum of materials

Recycling “Unrecyclable Materials”

**Ecoblue Strap2Strap

Filaments**

Meaningful Social Impact

Conscientious Approach to Contribute to the Community

Safety & Security

- Ensures **safety and security of staff members**
 - A robust health monitoring mechanism has been in place including handling of emergency situations
 - Proactive communication and prevention has been the hallmark of these initiatives
- **Monetary contributions** to NGOs, hospitals and Government relief funds across all its locations
 - **Donates** medical equipment, supplies and protective gear for healthcare workers
 - **Supports** various NGOs by **providing necessary food supplies** to the communities around Polyplex's locations
 - Provides **infrastructure facilities** to Government hospitals at the plant locations in India

Job Creation

- Committed to **hiring and promoting local talent** in each of the geographies
- **Equal opportunity employer** across geographies

Education and Culture

- Has been **running a school** at its Khatima plant for the past three decades
 - The school provides over 2,100 students with best-in-class educational facilities
 - Under a PPP model at Bazpur and Khatima, Polyplex has adopted two local schools and provides them with the necessary infrastructure
- Contributes to the **Rekhta Foundation**, which is a non-profit organization established to promote and disseminate literature and culture
- Offers a **slew of sports and educational sponsorships** as well as full scholarships to the school-going children of deceased employees
- Regular **contributions to various other schools/educational institutes** in order to promote education and help contributing to a better society

Focus on SCORE

Core Values Binding the Employees

Seamlessness

- We leverage synergies across hierarchies, functions and locations

Care

- We value our people and are committed to their development
- We are sensitive to and respect diversity
- We take a long-term approach to all our relationships

Ownership and Responsibility

- We display ownership and feel responsible for the organization's performance
- We trust in the capabilities of our people and believe in delegation while adopting a hands-on approach

Excellence

- We exhibit a passion to excel and strive to continuously improve the way we work
- We constantly pursue newer and better ideas, processes, products and practices

Creating Impact Through Strong Governance

Continuously Strives to Follow Best Practices

- ✓ Committed to **promoting fundamental values of honesty, integrity, and ethical conduct** among all stakeholders

- ✓ **Strong compliance orientation**

- Adheres to all applicable laws, regulations and guidelines across all jurisdictions
- Undertakes a wide variety of steps to keep employees informed about current and proposed laws, regulations, and guidelines

- ✓ **Strong governance and accountability framework**

- Accomplished and experienced **Board of Directors in India and Thailand**
- Board of Directors have **constituted various committees in India**
 - Audit Committee, Nomination and Remuneration Committee, Stakeholder's Relationship Committee, Corporate Social Responsibility Committee and Risk Management Committee

- ✓ **Unwavering commitment towards occupational health and safety performance**

- Best practices relating to the health and safety standards by continuously improving working conditions, minimizing workplace hazards and raising awareness through involvement, participation and continuous training of the shop floor workforce
 - Focus is on ensuring that the health and safety standards are adhered to as per the local legislations and standards
 - The approach is reflected in the Environmental, Health and Safety (EHS) policy that emphasizes continuous improvement
- All the manufacturing facilities are certified on occupational health and safety management system

Recipient of Prestigious Awards and Accolades Globally

Polyplex has been a recipient of some of the most prestigious awards in the industry, demonstrating its commitment towards becoming a global leader in the industry

Best Public Company of 2020 – Industrial Group at Money & Banking Awards

Green Innovation Award 2021 at ACES

Prime Minister's Award for Innovation 2021 – Chemical Recycling in Thailand

Best Public Company of 2021 – Industrial Group at Money & Banking Awards

Prime Minister's Industry Award 2022 for Quality Management

Corporate Social Responsibility Award - 2023 from Department of Industrial work

Zero Accident Award & Safety Committee Award from Ministry of Manpower, Indonesia - April 2025

Environmental Management Awards (PROPER) with Category Blue Rating from Ministry of Environment, Indonesia – June 2025

Stability in Earnings

Key Attributes of the Business Model Creates a Natural Hedge Against Industry Volatility

Polyplex Has Consistently Generated Superior and Stable Gross Margins Relative to the Industry

VA Stability

- Raw Material (PTA/MEG melt cost) tracks crude oil
- Raw material movements tend to be 'pass through' in film prices
- Value Addition (VA/material margin) is dependent on industry CUF

- The gap between Polyplex and Chinese players' gross margin increases significantly during the trough of industry cycle
- Chinese players achieved a higher margin for a short period in second half of 2021 owing to supply constraints resulting from logistic disruption / energy crisis

Industry Outlook

Thin BOPET Demand

Thin BOPET Film Demand Expected to Stay Resilient and Accounts for 80% of Global BOPET Film Demand

Thin BOPET Films Expected to Be the Fastest Growing Segment in the Global BOPET Films Market

Global Thin BOPET Film Demand (KMT)

Key Trends - Demand

Global thin film demand has remained resilient, with **growth expected at over 5% annually**. **Asia, particularly India, continues to drive demand**, supported by expanding end-use applications and strong domestic consumption. In contrast, demand in the Western markets has been relatively muted, impacted by reciprocal tariff uncertainties and broader geopolitical risks

Ageing population, evolving retail formats and penetration of e-commerce, together with **focus on safety and hygiene** has led to rise in per capita packaging material consumption. There is a **continued shift from rigid to flexible packaging**, and from loose to **packaged products**

Growth drivers include **population growth, increasing urbanization, changing demographics, trend towards nuclear families and increase in purchasing power** in developing countries

Demand driven by **higher disposable income**. Technological developments are leading to accelerated demand in **electrical, electronics and other industrial applications**, along with **new applications** which is expected to further increase demand

The demand may be accelerated with growth in energy transition end-uses, such as solar panel backsheet, battery, electric vehicle and MLCC applications. The drive for sustainable packaging and evolving regulatory mandates may create additional opportunities as well as raise concerns on usage of certain substrates of plastics in flexible packaging

Thin BOPET Industry Outlook

Upcoming Capacity Additions

- The majority of new capacity additions scheduled for commissioning are concentrated in China. However, prevailing market conditions and existing overcapacity could lead to delays or cancellations of several planned projects.
- Based on the latest information, many of the recently announced Chinese lines are expected to cater to non-packaging applications, such as optical films, release liners, and other specialty segments.
- The impact of new capacity additions is anticipated to be largely confined to China, with limited influence on Southeast Asian (SEA) markets. Chinese producers primarily serve domestic demand and select export destinations with standard-grade products, while factors such as trade barriers, established supplier relationships, and quality perceptions among regional buyers further limit their penetration in SEA markets.
- Excluding China, global capacity utilization rates (CUF) remain stable, with lower volatility between peaks and troughs.
- The expected rationalization and underutilization of older, less efficient lines—driven by shifting cost structures—should support an improvement in overall utilization rates in the medium term.
- Broader trends of deglobalization, protectionism, and a growing preference for local and regional sourcing are expected to further influence capacity deployment and trade flows across the industry.

Expected Capacity - Thin PET Film

Capacity CAGR (Global) – 8.06%
Capacity CAGR (Ex-China) – 4.86%

Polyplex Strengths

- Players with global footprint can better withstand the regional imbalances, industry volatility and trade barriers (recent reciprocal tariffs in the US)
- With its manufacturing presence across key demand centers, Polyplex is able to cater to all major geographies, consistently maintaining high capacity utilization (CUF) levels and a superior margin profile over the years
- Focus on speciality and high value-added products thus making earnings more predictable
- Competitive cost structure (on DDP basis) helps sustain competitive advantage
- Pricing is a function of demand/supply - effect of crude is limited as RM prices are passed through to customers with a varying lag
- Supply chain disruptions mainly caused by Red Sea crisis and container shortages are generally positive due to our business model of distributed manufacturing and sales
- Tax efficient structure
- Recent and ongoing capex on various line upgrades to enable optimal utilization of assets

Growth Capex

Investment Under Implementation

Key Investment Rationale

Projects	Location	Capital Cost (In USD million)	Likely Start Up
New BOPET Film Line	India	58.31	H2 FY 26-27
Coater and Laminator	India	4.44	Laminator - Started in Oct'25 Coater - Q3 FY 2025-26
Metallizers	India	7.44	H2 FY 26-27
Blown Film Line	Thailand	5.02	Q3 FY 25-26
Coater	Turkey	10.27	Q4 FY 25-26
Total		85.47	

Investment rationale:

BOPET Film Line – India:

- PET Film Demand expected to grow at 10%+, making it the fastest-growing market in the world
- Cost Structure Optimization

Other Projects:

- Expansion of product portfolio
- Increasing the share of speciality films
- Growing focus on industrial applications

Guidance

Third Quarter 25-26 Guidance

Normalized EBITDA (USD million)

Short to Medium term outlook

- Normalized demand/growth in both Industrial and Packaging segments though western markets remain sluggish
- Impact of reciprocal tariffs significant and expected to stabilize in the next one to two quarters
- Additional volumes from US ramp up and continued efforts on portfolio expansion, increase in DPAC sales will help support gradual improvement in profitability

The forward-looking statements reflect Polyplex's expectations of its next quarter earnings. These are based on certain assumptions as on date and are subject to significant risks and uncertainties, as they could be substantially influenced by several factors which are beyond Company's control including, but not limited to, fluctuations in foreign exchange rates, changes in key raw material prices, changes in market dynamics, impact of consolidation of subsidiaries and any unexpected production down times due to machinery breakdown, unforeseen delays in project start up etc. The Company does not make any representation, warranty or prediction that the results anticipated by such forward-looking statements will actually be achieved.

Annexures
