Commenting on the performance and developments, Mr. V Shankar, Managing Director and CEO, Rallis India said, "I am pleased to report better market performance over last year driven by volume growth in both Domestic and International Businesses. Northeast monsoon which was forecasted to be normal ended at below 11% departure. Overall the Rabi cropping acreages were down by 1% while paddy and pulses improved, wheat acreages were down over last year. Our suite of solutions has enabled us to help farmers in multiple crops and notably in paddy which has registered significant growth.

Rallis Samrudh Krishi ® (RSK) our solution based approach to create value for farmers by enhancing productivity through end-to-end Agri solutions has been scaled up to touch 9lakh farmers during the year. We have recorded good improvement in farm yields along with farmer income enhancement driven by improvement in quality and optimization of cost through customized package of practices. This has been an important driver for our revenue growth during the quarter despite market challenges, increased raw material prices and pricing pressure.

Our new launches Odis, Cenator and Pulito have registered good growth in 2017-18 and will be key drivers of growth going forward.

The forecast for a normal monsoon augurs well for the coming Kharif season. Our performance in the International business continues to be better than last year due to improving situation in key markets such as Brazil and strong demand for herbicides".

Rallis Samrudh Krishi ® (RSK) intends to create value to farmers through close field level working disseminating the right growing practices, products and information. This leads to a better quality crop along with optimized cost and delivering improved yields.

The use of e-interventions – Drishti, Samadhan & Sampark will be the key in the execution. Drishti will provide the Predictive advisory services - accurate pest forecast (critical pest only, where support is a delight factor), Samadhan app will give the access to farmers for Customized and dynamic PoP, weather forecast, latest update on crop output prices, flash news on agriculture, can connect with our expert for problem solving etc. Sampark app will give the access to our Crop Advisors on complete PoP besides full details on our basket of products.
