Seya at a Glance

Seya is an emerging leader in benzene-based Specialty Chemical manufacturer and always thrive to create value for all its stakeholders through integration. We are completely backward and forward integrated across the benzene value chain at a single location. We are also one of the low-cost producers. The integrated business model has helped tap potential values across every product manufactured during the process. Our continuous focus on Research & Development towards new product development and its application has allowed us to establish a strong presence across the benzene value-added chain.

FROM CHAIRMAN'S DESK

“We must accept-finite disappointment, but never lose infinite hope. Miracles start to happen when you give as much energy to your dreams as you do to your fears.”

- *Martin Luther King Jr*

Dear Shareholders,

My warm greetings to all of you!

I hope that you and your loved ones are safe and coping adequately with the tremendous upheaval in your lives in the wake of the global pandemic caused by COVID-19. The world woke up to this threat in Q4 of FY 2019-20 and the rapid rise of infections and related deaths worldwide has led to disruption on an unprecedented scale and dimension. While the world is racing to contain the spread, treat the infected, and find a vaccine; the social, psychological and economic fallout of this pandemic is expected to be felt long and wide. What is driving us through these trying times is hope. It is the hope that things will get better, safer and as near normal as possible.

We are indeed living through very unusual times and your Company has faced the challenge of Covid-19. At this point of time, all our plants are operational. I take this opportunity to extend my deepest gratitude to each and every member of the Seya family for their resilience and agility in ensuring we keep our operations running and doing all that we can to respond effectively to the COVID-19 pandemic. We are determined to work as a team across the industry to harness our know-how, experience and expertise to combat this evolving crisis and emerge stronger as we come out of this challenge. Our approach to the pandemic was centred around four key actions of:

1. Safety of our employees, communities, partners and assets
2. Rapid pivot to digital to ensure business continuity
3. Conservation of cash through cost control, working capital and capex reduction
4. Ensuring continuous support to our customers and supply chain partners.

Economic Environment

FY 2019-20 was an extremely challenging year for the global economy and was marked by multiple upheavals. Trade conflicts, political uncertainties, heightened volatility in commodity prices with some never before seen developments with respect to crude oil, protectionism etc. Towards the end of the fiscal, unprecedented impact was witnessed from the global spread of the COVID-19, which caused turmoil across markets worldwide. The pandemic has unfolded with alarming magnitude and the severity of the health and economic crisis is incomparable to any event in recent

memory. Government enforced border controls and lockdowns of varied durations across multiple countries have impacted economic operations around the world. However, even as Governments around the world deploy fiscal and monetary stimulus in order to successfully resuscitate demand, it is believed that the second and third order effects of the pandemic may limit the pace of recovery.

In Fiscal 2019-20, the Indian Economy was benefiting from lower interest rates, witnessed benign inflation, improved liquidity and was on course to witness improved tax collections. Towards the second half of the fiscal, India began to witness early signs of an uptick in business activities signalling return of momentum to Asia's third-largest economy in consonance with the global economy. India was on a relative growth trajectory, with the strengthening of the agrarian space, corporate and income tax rate cuts, narrowing trade deficit and increasing foreign investments. The positive outcome of this was expected to translate into increased consumer demand and private investments, which had been slacking for a while. However, those were short lived as the pandemic has derailed the prospects for higher economic growth in the short term. The pace of recovery is currently uncertain as the country is yet unwinding from the lockdown and the medium to long term outlook is opaque at every level.

The chemical industry in India has been actively gaining global market share in recent years and has been a beacon of hope. Leading players have demonstrated intent to scale up, diversify offerings and plough earnings back into the business by pursuing

innovation and sophistication. Looking towards an optimistic future, India's chemical industry is set for sustained growth receiving impetus with capital investment and affirmative Government policies.

Resilience in Adversity

FY 2019-20, saw a challenging business environment with lower GDP growth and slowdown in consumption. Our business was impacted by global economic weakness in few end-user segments, weakening consumer sentiment, slow demand in some large usage verticals, sharp volatility in the prices of key raw materials and currencies and finally, the COVID-19 pandemic. The novel coronavirus has affected not just human health but severely impacted businesses and the society at large. However, I am pleased to inform you that despite such exceptional business conditions, your Company has delivered competitive and profitable performance. We recorded a Sales Turnover of ₹ 258.19 Cr and PAT of ₹ 47.01 Cr despite declining revenues resulting from weakened raw material prices, benefits of which are passed on to the Customers, shortage of Nitric acid, effluent disposal and water scarcity which impacted our operations and performance. We implemented our Business Continuity Plan aimed at ensuring health and protection to all our employees while adhering to the guidelines provided by the Government authorities. Manufacturing activities commenced from mid - May 2020 in a phased manner, based on approvals from local authorities. Well-being of our employees and safety of our manufacturing sites were given paramount importance. Given the developments with regard to the COVID-19 pandemic and its fallout, the Board prudently decided to conserve cash for the quarters ahead.

Opportunities

China, which accounts for about 20% of global speciality chemicals revenues, has tightened environmental standards, resulting in the closure or shifting of capacities in about 50 chemical manufacturing clusters. The increased labour costs and the COVID-19 pandemic have aggravated the situation further as companies seek to reduce their dependence on China and source alternative suppliers. The continuation of US-China trade war and a resultant increase in tariffs could have negative implications for its trade and subsequently the domestic capacity and production in China. All these factors are pushing the Capex and Opex costs upwards, making Chinese chemical companies less competitive in the export market. Such situation in China is expected to favor Indian producers. Seya, with its integrated value chain and diversified product mix, strong technical capabilities, robust track record and cost-efficient operations, forms an ideal fit for entities looking for alternate supplier independent of China. Our teams are working with various existing and prospective Indian and global players on multiple such opportunities.

Responsible Care

As a signatory of Responsible Care to the current paradigm change, we remain ardent to our duties and responsibilities. These include creating a safe working environment, adhering to the best management practices and embedding sustainability into our facilities. We have dedicated our Strategic Business Units to ensure sustainable manufacturing and adhering to all the safety norms and standards. The Company is committed towards responsible chemistry while conserving environment, safeguarding our employees & customers and taking care of the welfare of the community. We shall be investing into further reducing environmental impact with a focus on 'value from waste'. Either directly, or indirectly, we continue to support society around us. Our approach to environmental preservation evolves with advancements in science, technology and best practices. We continue our efforts to reduce our carbon and water footprint, and waste, and innovate to address the challenges posed by climate change.

I would like to take this opportunity to reiterate that your Company stands united with the nation during this challenging phase of COVID-19. As a responsible corporate citizen, we adhered to the Government guidelines that were issued during different phases of the Covid-19 induced lockdown to contain the spread of the virus. With the slow and gradual upliftment of regulations, the reopening of plants in different sectors, is likely to lead to a gradual recovery.

The Company's fundamentals are intact to support the strong growth prospects. Your Company believes that committed and qualified teams are the key to contribute towards a sustainable future. Rooted in Values is our Integrity, Understanding, Unity, and Responsibility. I must take this opportunity to congratulate and express my appreciation to the human assets of Seya. My dear shareholders your support gave SEYA Incredible strength which can't be explained in words. Your belief and confidence in the company and its management helped SEYA to achieve what it has achieved today. We resolute to remain committed to significantly keep enhancing value of our stakeholders.

My fellow board members, customers, vendors and other stakeholders without your support and encouragement SEYA's growth story is incomplete. In conclusion, I will reiterate the words of Martin Luther King Jr. who said, "We must accept finite disappointment, but never lose infinite hope. Miracles start to happen when you give as much energy to your dreams as you do to your fears."

There is enough reason to hope for the better, and that is backed by a focused strategy and a plan of action.

We will overcome! Best Wishes!

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS ENVIRONMENT

Global

The year in retrospect was a challenging year for the global economy, recording its lowest growth of the decade at 2.4%, as an outcome of protracted trade disputes, reverse globalisation and a slowdown in the domestic investments. The widespread weakness in global trade and investments affected advanced markets such as the European markets as well as the emerging markets and developing economies. Manufacturing activities across the globe slowed down significantly and just as there were signs of stabilization of manufacturing output at lower levels, at the turn of the decade, the outbreak of COVID-19 led to economic disruption on an unprecedented scale.

USA-China bilateral negotiations had helped to de-escalate trade tensions to an extent, UK continued to struggle with Brexit related challenges while other major economies like the European region, Japan and China faced intermittent deceleration, adding to the slowdown in the pace of global growth. Even as nations were coming to terms with slowing growth, a new threat emerged with the spread of the coronavirus pandemic, which is expected to cost the global economy \$ 2.7 trillion and is likely to push the global economy into a recession while undoing a large proportion of economic gains achieved over the last decade.

One of the most dramatic developments in the last 30 years has been the soaring consumption in Asia and its integration into global trade, capital, talent and innovation. The Emerging Asia's GDP growth is expected to significantly weaken from 5.5% in 2019 to 1.0% in 2020 in-line with the global weakness mainly caused due to COVID-19 pandemic. Yet, the long term structural drivers remain intact. Asia is making significant economic progress and rapid strides in human development in terms of life span, literacy and even internet usage and lifestyle standards.

As a silver lining, Governments of all countries have taken strong and bold measures to brace their economies from the expected impact of the Corona Virus. USA started off by rate cuts and infusing more than USD 1.5 Trillion into the financial system in an effort to calm the market turmoil after Wall Street suffered its worst day since the 1987 market crash.

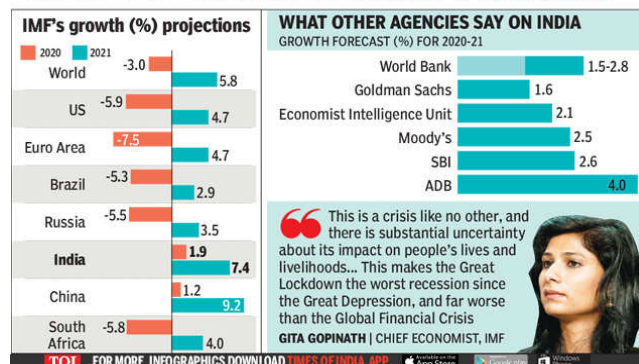

As the pandemic situation continues to unfold, with containment measures resulting in significant loss in output. An estimated 170 countries will witness a negative per capita income, with many facing overlapping crises, including healthcare issues, a weakened economy, low external demand, capital outflows and commodity market declines. That being said, risks to forecasts remain on the downside and any recovery will depend on the pace at which the pandemic subsides and economic activities normalise.

Domestic

India's long-term growth potential remains intact. The government announced an economic stimulus package of ₹ 20 lakh crores, or 10% of GDP, in May 2020 to stabilize and revive the economy. Further, various other steps are being taken by the government to boost the economy. Prior to this slowdown, India's GDP had been growing at a five-year average of 7.5%. Several key macroeconomic indicators, including fiscal deficit, current account deficit and inflation, had reached very comfortable levels. India's ranking on the Ease of Doing Business improved to 63 in 2019 from 77 in 2018 and 142 in 2014, a record jump for any major global economy. Several structural reforms, a vibrant business environment and a relatively stable currency attracted foreign investors. Weak performance by the manufacturing and construction sectors and slower credit growth and continued asset quality stress in the financial sector are largely responsible for the slowdown. Sluggish economic growth and tighter credit conditions in the non-banking sector have led to a substantial weakening of domestic demand.

Looking at FY 2020-21, the initial momentum appears tapered owing to lockdown imposed by the Government to inhibit the spread of novel coronavirus (COVID-19). Before the lockdown, IMF and Moody's reduced the growth forecasts for India to 4.8% and 5.3% respectively, from 6.1% and 5.4% projected earlier. While this could be further reduced since the lockdown included full closure of all nonessential services, industries like manufacturing, transport, retail, leisure and recreation, which constitute a substantial component of India's GDP will be halted for a while. For several decades, consumption has been the bedrock of India's growth story. With it expected to be significantly impacted due to the pandemic, it will undoubtedly have a multiplier effect across the Indian Economy. Once the effects of the pandemic wanes, the Indian economy is anticipated to return to its growth trajectory relying on significant policy reforms

HOW TOP ECONOMIES MAY PERFORM

CHEMICAL INDUSTRY OVERVIEW AND OUTLOOK

Global

The chemical industry has been an integral part of the global economic landscape for many centuries. The industry has evolved to become a bastion of productivity that permeates through nearly every goods-producing sector. Today, the chemical industry plays a crucial role in regional economies in every corner of the world and in most sectors of those economies. The industry experienced a slowdown in CY 2019, primarily due to escalating global trade tensions and a weakening economy impacting the chemical demand. The trade war led to a fluctuation in price across the global chemical market. Additionally, the industry was also affected by the weakening automotive markets and the uncertainty caused by Brexit. Despite worsening economic conditions and political tensions, sustainability has been a priority for the chemicals industry in CY 2019. The demand for eco-friendly and sustainable chemical continued to increase with companies across

sectors adopting measures to reduce their environmental footprint and ensuring supply and manufacturing of eco-friendly products. The outbreak of Covid-19 led to production stoppage and slowed consumer demand significantly, resulting in a negative impact on the industry. However, as the effect of the pandemic fades and businesses resume, pickup in consumer confidence and demand is expected to improve sentiments in the near future.

Domestic

Over the past ten years, the Indian chemical industry has clocked a CAGR of over 10%. This growth is the testimony of structural advantage, diversified industry, promising export potential and high domestic consumption. Slowly and gradually, India is emerging as a preferred choice for chemical products, as domestic players are addressing environmental issues through adoption of best global practices and by staying committed towards sustainability programs. These augur well for the country as it already enjoys the advantage of cheap labour and easy availability of raw material. Going forward, in the near term, the Covid-19 landscape is bound to bring some volatility in the market. But, in longer term, the industry is expected to register a growth of 13-14% over the next 5 years owing to growth of strong intellectual property regime and infrastructure development.

The sector has been witnessing tailwinds with India emerging as an alternative supplier to China, for key raw materials and components. Indian manufacturers have been capitalizing on these opportunities and have set up additional capacities to cater to rising demand. The upcoming Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIRs) and Plastic parks will provide state-of-the-art infrastructure for Chemicals and Petrochemicals sector in India. The chemical industry in India is positioned to capitalize on near term opportunities.

The focus on petrochemicals in India might increase due to the interest of global oil and gas majors on downstream chemical opportunities. This would also lead to higher investment in the sector, which could ease feedstock challenges and boost self-sufficiency. China's chemical industry is facing challenges due to stricter environmental norms, leading to structural changes in the industry. These shifts would cause uncertainty for international players that source chemicals from China and could create opportunities for the Indian chemical industry. There have been shifts in global supply chains due to trade conflicts around the world, especially among China, the United States and Western Europe. This has affected bilateral trade between China and the U.S., with possible repercussions for other economies. In this scenario, large chemical markets that remain accessible, could present opportunities for the chemical industry in India. Many companies, worldwide, are embracing digital technology and enhancing their production techniques. Digital technology has established itself as a lever to enhance efficiency and productivity. Indian companies could also tap into this opportunity to expand their profit margins.

The shift in production and consumption pattern towards Asian and South East Asian countries in all sectors is leading to increasing demand for Chemicals and Petrochemicals. The combination of domestic consumption and export growth has made it viable to locate manufacturing operations in India thereby enhancing India's contribution to the Global chemical industry. The uncertainty in global trade caused by the US-China trade conflict and the changing structure of China's chemical industry are expected to open

doors for the Indian chemical industry. Despite industry-specific challenges, rising domestic demand in chemical end-use sectors such as agriculture, consumer and retail, infrastructure, auto and electronics and healthcare is increasing the attractiveness of India as a manufacturing destination and India's steadily improving 'Ease of Doing Business' ranking could further elevate its position as the epicenter of chemical manufacturing in Asia, in the long run.

SPECIALTY CHEMICAL INDUSTRY

Global

Chemical industry constitutes of 80% of specialty chemicals and 20% of other chemicals. Specialty chemicals are low volume and high value products that are sold on the basis of their quality and utility. Speciality Chemicals are known for end-use performance enhancing applications rather than their composition. They are recognised for "what they do" rather than "what they are" as in the case of basic chemicals. They provide solutions to customer applications, are knowledge-based and are known to deliver more financial returns as compared to basic chemicals. They are a blend of base chemicals and sold on the basis of their quality or utility, rather than product composition or brand. They are relatively high value, but low volume chemicals as compared with basic chemicals or commodity chemicals. In the specialty chemical sector, the focus is on value-addition to end product and technical specifications of the chemical. Since speciality chemicals are mainly used to add value to the finished product, they are primarily sold on a B2B (Business to Business) basis. Speciality chemicals can be further divided into various sub-segments on the basis of end-use applications. The major sub-segments are 1) Agro-chemicals, 2) Colourants, 3) Construction chemicals, 4) Flavours & Fragrances, 5) Paints & Coatings, 6) Personal care, 7) Polymer & additives, 8) Surfactants, 9) Textile chemicals, and 10) Water treatment chemicals.

Driven by innovation and expanding usage in several emerging areas, production and consumption of speciality chemicals were initially concentrated in developed regions like North America, Western Europe and Japan. With trade liberalisation, technology transfer and rapid economic growth, the industry began proliferating in developing economies. China emerged as a leading producer of speciality chemicals, aided by easy availability of raw materials/feedstock, cheap labour and capital, sizable end-use market and government support. However, with increasing focus on safety, health and environment stipulations worldwide, stricter enforcement led to disruptions in the supply chain that was substantially dependent on China. Further, the relative strength of the Chinese currency, rising labour costs and reduction of government subsidies eroded the comparative advantage. The Chinese government is also promoting consolidation in the industry to shift away from high-polluting, lower-end segments.

Domestic

With supply chain disruption and uncertainty in China, global players are looking at diversifying their sourcing and India offers a strong alternative with comparable scale, technology, raw materials and supportive government policies. Ever since China's chemical plant shutdown, owing to violation of environmental norms, Indian speciality companies have seen their fortune turn. Domestic companies have spent vital amount of money to comply with regulatory norms which has helped them gain market share. This increased their utilisation level, economies of scale and improved margins. Further, to meet the rising demand, the Indian Speciality Chemical industry also spent a decent Capex to build a world-class facility and move up the value chain at a rapid pace. This capital spending is likely to decrease the nation's chemical import bill. Indian speciality market looks promising, as the Chinese counterparts lose the power of better pricing due to rising environmental cost factor. This pace is expected to spur as Indians consume more food, wear more clothes and buy plastic.

The industry serves both the local market and the global market. The critical success factors for most of the speciality chemical segments

include understanding of customer needs and product/application development to meet the same at a favourable price-performance ratio. Global firms are gradually facing the heat of compliance, cost and capacity issues in other markets, especially China, and are thus looking to outsource their manufacturing processes to India. The structural shift towards Indian speciality chemical players is ably supported by the Government in the form of a robust patent framework, the presence of appropriate regulations to protect intellectual capital, improvement in infrastructure and thrusts to promote investments in R&D, as well as green technologies and a rich pool of knowledge workers.

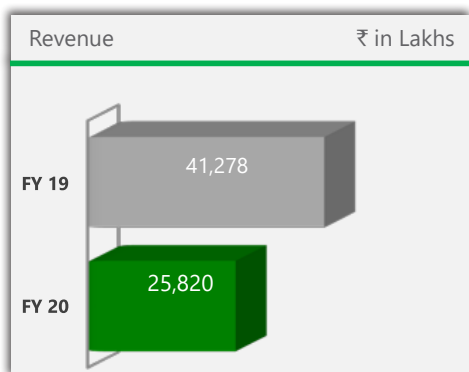

India has remained in China's shadow for a long time in the global chemical speciality market. However, gradually it is emerging out of with its own structural benefits and the spill-over effect of China's declining competitiveness. The factors driving the growth of the speciality chemicals market include large base of end-use industries, high demand from Asia-Pacific, increasing demand from automotive industry, and technological advancements. Over and above, faster end-use industry growth, low penetration of speciality chemicals in India will support growth. Exponential growth expectations led by favourable macro-economic factors in pharmaceutical, personal and home care products also presents a humungous growth opportunity for associated speciality chemicals manufacturers.

COMPANY OVERVIEW

SEYA INDUSTRIES LTD, a Company, promoted by Technocrats, is engaged in manufacturing of Specialty chemicals at its state of the art manufacturing facilities in MIDC Tarapur, Boisar a notified chemical manufacturing zone 90kms from Mumbai which have wide spectrum of applications in the manufacture of Pharmaceuticals (like Paracetamol, floxacins, etc), Personal & Health Care Products (like Hair dyes), Printing Inks & Paints (used in Laser/Ink jet Printers, for Road markings, etc), Agrochemicals (like DDT, etc) Insecticides/ Pesticides (like Quinalphos, Mortein, Baygon, etc), Rubber chemicals (for Leather protection), Textile dyes, Thermic fluids (used as heating medium), etc. The company's strength lies in its wide product offerings, ability to adapt to new markets and being environmentally friendly.

In the past few years, your company has emerged as most competitive and low-cost, Leading producer of Benzene based Specialty Chemicals with complete backward and forward integration across Benzene value chain. Your Company's established and long standing customer relationships, with multi-product and multi-industry approach, state-of-art manufacturing practices, high quality standards, timely delivery, compliance to regulations, Extensively backward and forward Integrated Gobar Scale technological driven operations, efficient utilization and re-use of its By-products, well-diversified product portfolio and continued focus in expanding business in newer horizon's has resulted significant growth in operations in last ten years.

FINANCIAL PERFORMANCE

COVID-19 Situation

The Operations of the Company have been severely impacted due to the Covid -19 pandemic. The Government of India declared a nationwide lockdown w.e.f. 24 March, 2020 and hence the manufacturing operations of the Company were halted during the quarter. Upon obtaining necessary permissions from the concerned authorities and after taking all safety measures as prescribed in the said permissions, though the Company have resumed operations in a phased-wise manner, several International and State governments continue to restrict distribution operations which impact the Company's operations. As a result, the revenues were materially impacted during this period. Subsequent to the year end, the Company has received notices of Force Majeure from certain suppliers and customers and similarly the Company has also issued notices of Force Majeure to customers and suppliers. However, based on the preliminary legal evaluation of these notices, the Management does not anticipate any material economic outflow of resources which would impact its cash position and the carrying value of its assets. The Company however continued to incur committed expenditure with respect to its Employees, Plant related expenditures and Other expenditures. This has significantly impacted the profitability. Covid-19 has also had a significant impact on its customers and their ability to meet their committed obligations. The extent and duration of COVID-19 is currently unknown and depends on future developments that are uncertain. Any resultant outcome and impact on business, due to this, is unpredictable. The Management in process of evaluating the possible effects if any that may result from COVID-19 pandemic on the carrying amounts of Trade receivables and Inventories. In developing the assumptions and estimates relating to the uncertainties as at the balance Sheet date in relation to the recoverable amounts of these assets, the management has used internal and external sources of information to the extent determined by it. The Impact of the same may differ from that estimated as at the date of approval of these financial statements due to the impact of the pandemic and the Management will continue to closely monitor the developments.

We have taken several actions to mitigate the effect of Covid-19 on our business. We have taken steps to reduce our unit costs and increase our liquidity by making our operations more efficient and nimbler, putting on hold discretionary expenses, deferring certain capital expenditures, etc. In order to sustain operations, we also had to take actions to cut employee costs through pay cuts, leave without pay and reduction in workforce. We are ramping up our operations in a phased manner, subject to Government directions. The unprecedented nature of the pandemic makes the future business environment uncertain, however, we will continue to carry out the impact assessment on our assets and closely monitor any material changes to future economic conditions.

Net Sales during the year was ₹25,820 lakhs as compared to ₹41,278 Lakhs in PY, reporting a decrease by **37.4%** on account of decrease in Average Unit Realisation of the Products sold due to resumption Chinese supply, Lower sales volume and capacity utilisation on account of shortage of Nitric Acid & water and restricted effluent discharge permitted by Pollution control authorities as per NGT(National Green Tribunal) directives in MIDC Tarapur due to pending implementation of expanded CETP in MIDC Tarapur in which the manufacturing facilities are located. The prices of crude oil and related petrochemical intermediates, which form an important source of raw materials for your Company and which govern the Selling Prices of the Products also marginally decreased.

Segment Revenue

Your Company has been focusing only on Specialty Chemical segment end-users with higher profitability, higher volumes, stable and increasing demand thereby resulting almost 100% revenues from the segment, hence segment wise analysis in accordance with IND-AS 108 is not applicable.

Due to the differentiation from standardised products, the products manufactured by your company are customised as per specific customer requirements and enjoy higher value. The shift towards higher contribution products in the overall product mix and traction from newly introduced products has been instrumental in the sustainable performance of this segment. Your Company demonstrated its versatility, adaptability and dynamism by focusing on Specialty Chemical segment thereby and maintaining profitable operation performance despite adverse economic environment.

Profitability

EBITDA for FY20 was lower by 45.52% at ₹ 7,650 lakhs compared to ₹ 14,042 lakhs in PY. The decline in EBITDA was due to normalisation of Sales prices of products which had spiked up due to closure of competing Chinese producers and their resumption of supplies during FY20, lower sales volume and capacity utilisation on account of shortage of Nitric acid(critical raw material) and water(critical utility) and imposition of restricted Effluent discharge(than what is permitted as per Sanction) by Pollution control authorities due to NGT directives. The spread in key products normalised due to resumption of Capacities from China however your Company, due to its favourable product mix, efficiency gains and better realisations across key products, achieved sustained and above normal profitable performance.

Profit before Tax (PBT) was at ₹ 5,197 lakhs compared to ₹ 10,624 lakhs in PY. **Profit after Tax (PAT)** was at ₹ 4,702 lakhs in FY20 compared to ₹ 8,849 lakhs in PY19 despite the above challenges. Your Company was able to maintain its trend of sustained profitability on vertebrae of value-added products.

Raw material cost stood at ₹ 14,402 Lakhs compared to ₹ 20,587 Lakhs in PY, a decrease by 1.32% inline with Lower capacity utilisation and suspension of Production on account of COVID-19 pandemic. There was an increase in the average unit price of Raw materials despite which the Management due to better negotiations, efficient Inventory Management and Price correction forecast, could reduce the impact of increase in Raw materials cost.

Finance cost was at ₹ 792 Lakhs. Due to ongoing dispute with the Lenders in relation to their failure to comply with committed lending obligations and outstanding, the Company has, basis of legal advice, not provided for interest costs on certain loans outstanding, amounting to INR 807.98 Lacs in respect of Operating Assets. The Company continues to believe in the merits of the litigation.

Depreciation and Amortisation Expenses increased to ₹ 1,662 Lakhs from ₹ 1,599 Lakhs (Y-o-Y) due to post commissioning Depreciation expense of expanded Plant capacities which were commissioned during previous year.

Employee Benefit Expenses marginally decreased to ₹ 631 Lakhs from ₹ 640 Lakhs (Y-o-Y) due impact of COVID-19 pandemic outbreak in Mar-20 and resulting rationalisation of expenses.

Other Expenses were lower at ₹ 3,562 Lakhs vs. ₹ 6,045 Lakhs (Y-o-Y) due to lower capacity utilisation and rationalisations and control of various expenses on account of COVID-19 pandemic outbreak.

SWOT ANALYSIS

The present per capita consumption in India is very low as compared to other countries and the growing domestic household promises increasing opportunities for growth on the back of increasing disposable income of growing middle class. China no longer controls the market repelled by its present pricing policy due to increasingly stringent pollution control policy and measures being administered by its Government. The brand value 'Make in India' is lead by knowledge power and vast experience in handling customer demands and is at its brightest spot in the Chemical industry. Challenges of COVID-19 weigh on the Company, though your Company has resolved its SWOT for clenching the Opportunities and mitigating the Threats:

Key Strengths

Adroit Leadership & Management Team: Seya is led by a strong and experienced management team with strong fundamental knowledge and keen awareness of the shifts in the industry landscape comprising first generation technocrats all possessing excellence in Chemical Engineering. Your management possesses a proven track record in formulating strategies, implementing pioneering technologies and introducing high value high margin products to sustain profitable operational performance which have enabled your Company to enhance stakeholder value while adhering to the code of Responsible Care and ethical values.

Integration & Global Size Plant: Seya's sustained focus on process development, plant automation and high quality benchmarks has made it possible to emerge as one of the highest quality at lowest-cost producers of benzene derivatives in the world. Your Company's environment friendly integrated facilities with backward and forward cost-efficient processes and diversified downstream applications complemented by competitive, large and integrated supply chains empower your Company to address the growing needs of large global customers with committed and secured Supply Chain. Your Company has the largest installed capacities for its premium high value and high margin products. Your Company is a global entity integrated backwards and forwards in its range of chemicals and also across various value chains, enhancing its capability to supply a basket of products and becoming a one-stop source. This has resulted in the fragmentation of competitive risks as very few global players are as integrated and diversified as your Company.

Diversified Product portfolio: Your Company's de-risked portfolio with diverse products addresses different end-user applications across customers and geographies spanning from Agrochemicals, Polymers, Dyes, Pigments, Printing Inks, Pharmaceuticals, Health & Home Care, Oil & Gas, Rubber Chemicals, Flavours & Fragrances, Food Ingredients, Cattle Feed, etc. thereby insulating itself from vagaries in any one product or segment. Your Company supplies products to more than 100 customers. Each Product results in engagements with multiple customers, an effective entry barrier for competition providing flexibility to shift products based on market dynamics, countering demand vagaries and converting process by-products into commercially viable products, enhancing value. There has been focus on developing integrated product chains rather than fragmented, standalone products enabling significant cost synergies and deeper relationships with clients who partner with the Company for multiple products over several years. Your company's leadership in certain products facilitates knowledge transfer, provides demand

foresight, the ability to absorb incremental SH&E costs. Diversified and comprehensive product portfolio and large customer base spread across several countries and customer categories, strengthen your Company to face headwinds, if any and dependence on any product, customer or geography.

Innovation & Technical Expertise: Innovation is deep-rooted in the DNA of your Company. Seya executes complex and hazardous chemical processes with high success rates by leveraging its License for niche chemistries from expert Technology Suppliers in Germany and its capability in managing, storing and handling various types of chemicals in quantities ranging from few kilos to several tons. Your Company's ability to develop new product application and to customize products to suit customer needs have helped in expanding its customer base and thereby enabling your Company to establish its leadership position. Your Company's expertise and competence provides customers the comfort that it will undertake these complex processes safely and in a cost competitive manner while adhering to the highest standards of quality. The enriching product mix combined with scale has enhanced the earning efficiency of value chain. Your Company's focus on R&D initiatives for Speciality Chemicals has built technological capabilities through know-how transfer resulting in several differentiated processes/ chemistries. The focus has always been on improving product quality and process yields of existing products, forward integration for downstream products etc, with thrust on environment friendly processes to further strengthen its global presence in the end-user applications.

Quality, Safety, Sustainability: Your Company practices the most stringent global environment, health and safety standards, ensuring optimal productivity and business sustainability. Seya emphasizes on Reduce-Reuse-Recover principles across its manufacturing site following the highest SHE (Safety, Health & Environment) standards. Your Company is looked upon as a benchmark and standard of Quality. Your company has revolutionized Quality of all the Products it manufactures to standard which can be matched by none and commands premium pricing for all its products.

Key Opportunities

Favorable Government Initiatives - Make in India – Geographical shift: India has developed into an important manufacturing hub for Speciality chemicals on account of superior compliance with environmental norms, increasing competitiveness and decline in Chinese competitiveness. India is capitalising on growing opportunities in the export of Speciality chemicals with increasingly stringent compliance to environment norms in China which has affected global supply enabling Indian producers with large capacities, international quality compliance and environment standards to benefit. Maturing of the Chinese economy has increased labour and other Costs in China with incremental compliances necessitating additional investments in effluent treatment thereby enhancing costs and impacting capacity utilization assessed by increased competitiveness of Rupee v/s. Chinese Yuan widening the Indian fosse. Amidst this the Government's ambitious 'Make in India' and 'Atmanirbhar' initiative has given tremendous boost to the Indian manufacturing sector attracting capital, technological investment and toting impetus to the emergence of India as a manufacturing hub for the chemical industry. Your Company driven by extensive product and process innovation, a significant differentiator over

the commoditized Indian chemical industry. With strong technical expertise, high Safety Health & Environment standards as well as deep customer relationships, it remain at the forefront to make significant headway in high value chemicals strengthening product mix and scale resultantly driving earnings efficiency.

Large addressable market: To address the country's large and dispersed end-user market, companies have to start adopting a key-account strategy for large customers and partnership with other companies to build distribution networks across geographies. Companies have realized the importance of having a strong vendor base and partnership arrangements with cost effective local companies to achieve a leadership position.

India as an R&D hub for speciality chemicals: Large MNCs have started tapping the India's cost advantage by investing in production for exports and also moving some of their R&D work to India. There is a large untapped potential in this space.

Opportunities for local customization: A key success factor in the Indian speciality chemical market is the local customization. Many customers are willing to sacrifice on some of the product attributes for a lower product price. These offerings can also be expanded to other Asian markets. The recent trend evidenced by the structural headwinds prevalent in the chemicals industry is the extraction of increased value from its operations and embracement of smarter portfolio management to improve performance. Leveraging skilled labour, lower capital costs, improved knowledge, equity and cost advantages of Asian players have compelled the larger players from developed countries to progressively discontinue their operations and transfer capacities eastwards and using local facilities for manufacturing high-end performance products. Many of these companies operate asset-light structures that increasingly outsource intermediates from China and India. While this trend was for long favourably disposed towards China for various end user products, India has recently been developed into an important manufacturing hub for speciality chemicals on account of superior compliance with environmental norms, increasing competitiveness and decline in Chinese competitiveness. Moreover, as MNC customers remain keen to allay their country risk through widening diversification; India is well positioned to capitalise, translating into growing opportunities for the export of speciality chemicals. Regulating agencies in developing countries have become more stringent in ensuring a complete compliance with environment norms. In China, restrictions have firmed up and imposed over last 2 years; in India, compliances were stringent for five or six years, providing the country a competitive advantage, making it possible for Indian players with large capacities and international quality compliance and environmental standards to corresponding benefit. The incremental compliances necessitate additional investments in effluent treatment, enhancing costs and impacting capacity utilization for the Chinese. The maturing of Chinese economy, labour and other costs have increased meaningfully.

Key Challenges

Regulatory and environment: While chemical industry addresses growing need for materials required by different sectors, the industry employs highly complex manufacturing process that often involves handling of toxic and hazardous chemicals. The process being energy intensive, the importance of safety, health, security and environmental protection cannot be underestimated. Like all chemical companies, your Company is subject to central, state, local and foreign laws and regulations relating to pollution, protection of the environment, greenhouse gas emissions, and the generation, storage, handling, transportation, treatment, disposal and remediation of hazardous substances and waste materials. Costs and capital expenditures relating to environmental, health or safety matters are subject to evolving regulatory requirements and depend on the timing of the promulgation and enforcement of specific standards which impose the requirements. Moreover, changes in environmental regulations could inhibit or interrupt the Company's operations, or require modifications to its facilities. Accordingly, environmental, health or safety regulatory matters could result in significant unanticipated costs or liabilities. European and developed markets have progressively tightened their import regulations citing environmental concerns and protection of domestic manufacturers.

Non-availability of Alternate Energy Sources: Chemicals manufacturing industry consistently requires high amount of energy in production processes through conventional fuels like coal, furnace oil, etc. for generation of power or as a heat energy source. Use of non-conventional energy like wind power, solar power or natural gas becomes unfeasible as these alternate fuels have shortcomings like lack of reliability of continual supply, inability to generate energy in large quantity, sizeable capital expenditure, availability at higher costs, etc. However your Company has implemented state-of-art Energy Management Systems and continues to focus sharply on improving Utility efficiencies at its facilities along with widening its scope of Green Chemistry.

Volatility in Raw Materials Prices: Volatility in the global prices of raw materials is the foremost challenges faced by the chemical industry which can be well mitigated due to the time lag before price hikes or cost revision enabling the same to be passed on to customers. While your Company has enhanced inventory management procedure, it periodically reviews prices with suppliers, which remains as an inherent weakness in the industry. Sharp corrections in the crude oil prices aligns prices of various raw materials procured by the Company which influence topline even as they have a limited impact on profitability due to adoption of a cost plus pricing model for all its products. While the topline remains elastic to raw material price movements, enhanced volumes and superior product mix drive the profit capturing the essence of your Company's value chain.

Obsolescence of Product and Processes: Obsolescence of products and existing manufacturing processes pose a threat to the global chemical industry. Swift technological transformations, changes in materials and innovation-driven changes in manufacturing process render existing products and processes obsolete. Latest technologies can affect the overall market dynamics and existing operations of the industry.

Slowdown in End User Industries: The slowdown in growth of end-user industries such as Printing Inks, Paints, Pigments & coatings, Agrochemicals, Rubber, Paper and Textiles amongst others could impact the overall growth. Your Company caters to several industries, not overtly dependent on any single industry, customer or geography with its diversified portfolio comprising multiple products that cater to multiple customers across geographies and varied economic cycles.

Momentous Currency Appreciation: Sharp appreciation in the currency could impact growth as competitive advantages vis-à-vis China could reduce thereby slowing the pace of shifting of volumes from China to India. Appreciation of Indian Rupee against US Dollar also lowers the export realisation thus impacting the export potential.

Lack of Talent Pool: Efficient and hard-working human capital is a rare and valuable resource today. India lacks widespread and abundant availability of technically skilled laborers. Your Company has initiated several measures to develop talent and undertakes comprehensive training for skill development, understand business complexities and adherence to global best practices

STRATEGIES FOR GROWTH

SEYA has envisaged its growth path, by a clear and defined vision to:

- Invest locally with Scale and Size matching global norms and adopt cutting edge technology (developed or acquired)
- Secure Feedstock and Technology
- Become a coveted employer - Attract and Retain talent
- Establish a targeted innovation platform, Invest more in R&D
- Create a positive, consumer & environment friendly image

Capacity Expansions

The Company had completed the capacity of one of its product in Q1FY20, however due to unavailability of one of the critical raw material ie. Conc. Nitric Acid and restriction over permitted effluent discharge due to pending implementation of MIDC CETP the capacity could not be ramped up.

De-bottlenecking & Efficiency Improvement

The said brown-field project has been completed to the extent of 30% and shall be completed once the funds tied-up with Lender shall be released. Once completed, the Company shall have parallel capacities for select products to align the production plants and processes on new Technologies. In addition to this, considering the restriction imposed on all industries in MIDC Tarapur on permitted Effluent discharge, the Company shall on top priority be upgrading its Effluent Treatment Plant to Zero Liquid Discharge(ZLD) to permanently circumvent restriction imposed by NGT and support its capacity expansions. The de-bottlenecking and efficiency improvement exercises under implementation are expected to boost production volumes and margins. The estimated capital expenditure for above Capital expansion and de-bottlenecking project is Rs. 70 – 75 Crores which is being funded through Debt.

Mega Green-Field Project Under Implementation

Your Company is addressing cost issues of raw materials and its price volatility and high energy costs which shall result in reduction in energy and fixed costs, yield better cash flows and aid in debt reduction, all of which will result in long-term value creation for its stakeholders. Cash generation through operational excellence and to realize the synergies of being a fully integrated facility shall drive efficiencies and effectiveness in transitioning to value-added products. With a clearly defined vision to emerge as an Integrated Global producer for Speciality Chemicals and having invested Rs. 5 Bn in Capex in last 6 years, Company took its next step forward to start next round of expansion at cost of Rs. 7.35Bn to set-up additional installed capacity of 527,900 MTPA. The project is expected to contribute additional Rs. 10-12Bn in Revenue at an estimated capacity utilization of 80%. The project is in close vicinity of Seya's existing manufacturing operations at MIDC Tarapur, Boisar in State of Maharashtra and is presently awaiting disbursement from its Lenders who failed to keep up their commitment. The Company has filed representation in Hon'ble High Court and based on its directions has submitted the funding plan to the Lenders which is under consideration with the Lenders. The Equity has been fully introduced by the Promoters and is forming part of present Share Capital/Equity Structure of the Company. The Project is being built under the supervision of highly experienced and reputed EPC contractors, German Technology Suppliers and PMC's holding successful track-record of more than 105 years backed by performance guarantee. It involves latest state-of-the-art, cutting edge, continuous, fully automated process technology which will enable Seya to be the lowest cost producer in the World for the products under set-up. The installed capacities of proposed products under set-up will be the largest in the world at a single location.

Seya has safeguarded any copy of the Technology by executing confidentiality and copyright agreements with its technology suppliers restricting sale of technology acquired, for next 20 years from the Contract date. Almost 50% of the installed capacity in the proposed greenfield mega project is to be captively consumed as intermediates. Out of balance 50%, 30% of the proposed installed Capacity is contracted to existing customers on long term supply contract and balance 20% is envisaged to provide as import substitute to cater to the increasing demand arising from Supply disruptions and geographical shift from China.

INTERNAL CONTROL SYSTEMS & ITS ADEQUACY

The Company has systems for internal audit, risk assessment and mitigation and internal control and risk management processes both at the business and operational levels. Internal audit function plays a key role in providing to both the operating management and to the Audit & Risk management Committee of the Board, an objective is to view and reassurance of the overall control systems and effectiveness of the risk management processes across the Company. Internal Audit also assesses opportunities for improvement in business processes, systems and controls and provides recommendations designed to add value to the operations. The scope and authority of the Internal Audit Department is derived from the Audit Charter approved by the Audit Committee. Internal Audits with respect to financial and compliance matters are performed by an internal Auditor and operational level internal audit is performed by the in house team of managers, engineers and project and production team. The internal audit department which operates on a decentralised basis continuously monitors the adequacy and effectiveness of the

internal control environment across the Company and the status of compliance

RISK MANAGEMENT

Managing Risk is an integral part of Seya's business. The Company operates a structured and continuous process of identifying, analysing, responding and mitigating the risk events that have the potential to generate adverse effect on the achievements of organisational objectives. This section discusses various dimensions of our enterprise risk management and is not exhaustive and is for information purpose only. Our business model is subject to uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements.

Risk Categories & Mitigants

Given the nature of the Company's business and changing market dynamics, it is exposed to various risks during its daily course of

operations. Some of the key risks and mitigation strategies adopted by the company is illustrated below: The following broad categories of risks have been considered in the risk management framework:

➤ Strategic Risk

It includes the range of external events and trends (like government policies that can adversely impact the Company's strategic growth trajectory and destroy stakeholder value.

Mitigant

The applicable regulatory framework is continuously tracked by various teams within Seya. Appropriate action as necessary is being undertaken to ensure compliance with all regulatory requirements.

➤ Operational Risk

These are those risks which are associated with operational uncertainties like failure in critical equipment, attrition etc.

Mitigant

Hazop Study and Safety studies for Process risks are carried out at regular intervals through EHS initiatives and dedicated committee formed for Managing process related hazards and safety

➤ Financial Risk

This covers financial risk facing the organisation in terms of internal systems, planning & funding.

Mitigant

Apart from detailed review across levels and functions an independent risk team evaluates all deals before the approval

➤ Reputational Risk

Seya is expected to maintain global quality standards in manufacturing. Any deviation with regards to quality compliance of products would impact the Consumers and hence adversely affect the Company's performance.

Mitigant

Dedicated quality control and assurance team actively monitors the adherence to prescribed quality standards. Most stringent Quality Control and Quality Management systems are in place and reviewed periodically.

➤ Economic Uncertainty

Rising trade tension, decreasing consumer confidence and political tension significantly affected the growth prospects of the Indian and global economy. The recent outbreak of COVID-19 has further dampened the growth potential, plunging major economies into recession. This might have an adverse impact on the Company's operations.

Mitigant

The Company constantly monitors changes in the macroeconomic environment and assesses its potential impact on the company's operations. It enables the Company

to quickly respond to changing market trends and safeguard its operations against uncertainty. Further, the COVID-19 outbreak has led to a temporary slowdown and the Company is proactively dealing with the situation, following safety protocols in all its manufacturing facilities to ensure smooth operations even during the countrywide lockdown.

➔ **Competition**

The Company faces competition from domestic as well as international players. The Company's inability to deliver new and innovative solutions and keep up with dynamic changes in the market may lead to loss of revenues. Further, competition may also result in pricing pressure leading to an impact on its margins and profitability.

Mitigant

Over the years, Seya has established a firm foothold in key markets and has built a strong and healthy relationship with customers. It also significantly invests towards research and development of improved products quality, aligned to changing customer needs. This has enabled the Company to further strengthen its relation with its Customers, giving it a competitive edge over its peers

➔ **Environment**

With increasing pressure from NGT to reduce the Effluent discharge by Industries to manage the Central Effluent Treatment with available capacity, the Company is being restricted to operate its Plant at 30~40% capacity utilisation, which may severely impact Company's revenue and profitability and also lead to loss of Customers.

Mitigant

The Company after completing the Basic & Detailed Engineering for setting-up its own ZLD-ETP has placed orders for Supply of Equipments and 30% of the Equipments have been delivered. The balance shall be delivered once the funds are released by the Lenders. Once the ZLD-ETP is set-up the company shall not have any interference from any Pollution Control Authority and the Company shall be at free fill to operate the Plant at full capacity.

The Company has perceived certain risk mitigation strategies w.r.t. its business risks:

Nature of Risks		Mitigation Strategies
Foreign Exchange volatility	Exchange	>70% of Sales are in domestic currency. For balance, the INR vs USD price is fixed and hedged to avoid any exceptional financial effect.
Customer Retention		Product customisation as per Customer requirements, Long-term contracts with pass through mechanism, attractive prices, world-class Infrastructure and Robust customer relationships
Availability of Skilled Personnel		Incentive and growth opportunities, all round learning experience, nurturing talent in a structured manner and proper mentoring
Technology Risks		License and Patented Technology driven state of art manufacturing with Continuous upgradations of Technology through OEM support and R&D
Product Quality		Rigorous monitoring and controlled by technically qualified personnel in QC, Most stringent Quality & Environment certifications like ISO 9001: 2008, ISO 14001:2004 and ISO 18001:2007, periodic QC & EHS audit by customers

HUMAN RESOURCES

Seya's talent base, as on March 31, 2020 stands at 131. With a view to equip the Company to address the business challenges of a dynamic economic environment, the HR function focused on retaining and attracting suitable talent, enhancing the technical / behavioural skills of employees and optimising employee costs. Learning and Development has been prioritized as a means of expanding the knowledge base of employees, which is seen as a key driver of growth. Taken together, these initiatives and processes are making a positive impact on talent attraction, retention and commitment. Managing the human asset for an Organization is a strategy that helps build the resources for a robust future. A ready second line of leadership; a highly engaged workforce; low manpower turnovers are few of the multiple gambits handled by the Human Resources Team.

A productive and innovative workplace has been and will continue to remain a key requirement for successful business performance in the Company's perspective. It is in the DNA of SEYA where employees are empowered with the ability to bring new ideas to the table. The Company believes in the conduct of affairs of the Company in a fair and transparent manner by adopting the highest standards of professionalism, honesty, integrity and ethical behaviour. With this aim, the Company has introduced the "Whistle Blower Policy/Vigil Mechanism" for Directors and Associates to report genuine concerns or grievances of unethical behaviour, actual or suspected fraud or violation of the Company's Code of Conduct or Ethics Policy. The main objective of the policy is to build and strengthen a culture of transparency and trust within the organisation. As per the requirement of The Sexual Harassment of Women at Workplace (Prevention, Prohibition & Redressal) Act, 2013('Act'), the Company has constituted Internal Complaints Committees (ICC) across all the locations which are responsible for redressal of complaints related to sexual harassment at respective locations. The objective of the Policy is to create and provide a work environment that is safer, civilized, free from any sort of hostility, supportive to the diversity & dignity of all Associates, where Associates feel secure at the workplace on the basis of natural justice and confidentiality.

COMPANY OUTLOOK

Your company is in the business of manufacture of specialty chemicals which have applications in end user segments like Computer Printing Inks, Pigments & Paints, Pharmaceuticals, Personal & Health Care Products, Agrochemicals, Insecticides/Pesticides, Organic Chemical Intermediates, Rubber chemicals, Textile dyes, Thermic fluids, etc. The COVID-19 pandemic has caused unprecedented impact on the global economy. It has disabled global trade and cross border transactions like never before. The lockdown of countries and economies has resulted in overnight evaporation of demand for industries such as airlines, hotels, cinemas, and entertainment among others.

Global supply chains have been hindered and it is expected that consumption will pick up gradually where it was disrupted. This disruption has accelerated some of the emerging trends like virtualization, remote interactions and electronic transactions. Your Company is closely monitoring the development in its customer industries and assessing the near term as well as long term effects of this development. In its own operations, your Company is mindful and has taken all the necessary precautions while resuming plants operations to provide desired safety and security to its the employees. Your Company believes that the customer industries, in aggregate, will recover and grow to be larger in the future. Your Company has well-integrated operations and a healthy balance sheet position which will allow it to overcome the near term challenges and return to creating value in the long run.

Earnings Per Share – Diluted (₹)	35.97	17.69	

Performance review

During the year under review, despite exceptional business conditions, extremely challenging backdrop of economic environment due to Covid-19 inception in Q3FY20 in China and other challenges faced due to shortage of Nitric acid, Effluent disposal and water scarcity which impacted Company's manufacturing operations and performance, your Company has delivered competitive and profitable performance with Sales Turnover of ₹258.19 Cr, EBIDTA of ₹ 76.50 Cr, EBIT of ₹ 59.88 Cr and PAT of ₹ 47.02 Cr. Lowering of EBIDTA spreads, reduction in Unit sale price of Products, resumption of Supplies from China are various factors which affected the Revenue and Profitability.

The traction from Modernization and Upgradation initiatives taken by your Company to improve operating efficiency has been vertebrae of sustaining profitable performance, maintain high quality standards, timely servicing of Customers. Your company is working on priority to mitigate the restriction on Effluent discharged imposed by NGT by establishing its own captive ZLD based ETP plant. Once completed the company shall be able to ramp up its manufacturing capacities to optimum levels.

State of Company Affairs: COVID-19 Impact

Your Company is in the business of manufacture of speciality chemical intermediates having applications in the manufacture of Pharmaceuticals (like Paracetamol, floxacins, etc), Personal & Health Care Products (like Hair dyes), Printing Inks & Paints (used in Laser/ Ink jet Printers, for Road markings, etc), Agrochemicals (like DDT, etc) Insecticides/Pesticides (like Quinalphos, Mortein, Baygon, etc), Rubber chemicals (for Leather protection), Textile dyes, Thermic fluids (used as heating medium), etc.

The Operations of the Company have been severely impacted due to the Covid -19 pandemic. The Government of India declared a nationwide lockdown w.e.f. 21 March, 2020 and hence the manufacturing operations of the Company were halted. Upon obtaining necessary permissions from the concerned authorities and after taking all safety measures as prescribed in the said permissions, though the Company have resumed operations in a phased-wise manner w.e.f. May-2020, several International and State governments continue to restrict distribution operations which impact the Company's operations. As a result, the revenues continue to be materially impacted. Subsequent to the period under review, your Company has received notices of Force Majeure from certain suppliers and customers and similarly the Company has also issued notices of Force Majeure to customers and suppliers. However, based on the preliminary legal evaluation of these notices, the Management does not anticipate any material economic outflow of resources which would impact its cash position and the carrying value of its assets. The Company however continued to incur committed expenditure with respect to its Employees, Plant related expenditures and Other expenditures. This has significantly

impacted the profitability. Covid-19 has also had a significant impact on customers and their ability to meet their committed obligations. The extent and duration of COVID-19 is currently unknown and depends on future developments that are uncertain. Any resultant outcome and impact on business, due to this, is unpredictable. The Management in process of evaluating the possible effects if any that may result from COVID-19 pandemic on the carrying amounts of Trade receivables and Inventories. In developing the assumptions and estimates relating to the uncertainties as at the balance Sheet date in relation to the recoverable amounts of these assets, the management has used internal and external sources of information to the extent determined by it. The Impact of the same may differ from that estimated as at the date of approval of these financial statements due to the impact of the pandemic and the Management will continue to closely monitor the developments.

We have taken several actions to mitigate the effect of Covid-19 on our business. We have taken steps to reduce our unit costs and increase our liquidity by making our operations more efficient and nimbler, putting on hold discretionary expenses, deferring certain capital expenditures, etc. In order to sustain operations, we also had to take actions to cut employee costs through pay cuts, leave without pay and reduction in workforce. We are ramping up our operations in a phased manner, subject to Government directions. The unprecedented nature of the pandemic makes the future business environment uncertain, however, we will continue to carry out the impact assessment on our assets and closely monitor any material changes to future economic conditions.

Management Discussion & Analysis and Corporate Governance Reports

Pursuant to Regulation 34 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 ("Listing Regulations"), Management Discussion & Analysis and the Corporate Governance Report are presented in a separate section forming part of the Annual Report.

Capacity Expansion, New Projects & Diversification

Capacity Expansions: The Company had completed the capacity of one of its product in Q1FY20, however due to unavailability of one of the critical raw material ie. Conc. Nitric Acid and restriction over permitted effluent discharge due to pending implementation of MIDC CETP the capacity could not be ramped up.

De-bottlenecking & Efficiency Improvement: The said brown-field project has been completed to the extent of 30% and shall be completed once the funds tied-up with Lender shall be released. Once completed, the Company shall have parallel capacities for select products to align the production plants and processes on new Technologies. In addition to this, considering the restriction imposed on all industries in MIDC Tarapur on permitted Effluent discharge, the Company shall on top priority be upgrading its Effluent Treatment Plant to Zero Liquid Discharge(ZLD) to permanently circumvent restriction imposed by NGT and support its capacity expansions. The de-bottlenecking and efficiency improvement exercises under implementation are expected to boost production volumes and margins. The estimated capital expenditure for above Capital expansion and de-bottlenecking project is Rs. 70 – 75 Crores which is being funded through Debt.

Mega Green-Field Project Under Implementation: Your Company is addressing cost issues of raw materials and its price volatility and

high energy costs which shall result in reduction in energy and fixed costs, yield better cash flows and aid in debt reduction, all of which will result in long-term value creation for its stakeholders. Cash generation through operational excellence and to realize the synergies of being a fully integrated facility shall drive efficiencies and effectiveness in transitioning to value-added products. With a clearly defined vision to emerge as an Integrated Global producer for Speciality Chemicals and having invested Rs. 5 Bn in Capex in last 6 years, Company took its next step forward to start next round of expansion at cost of Rs. 7.35Bn to set-up additional installed capacity of 527,900 MTPA. The project is expected to contribute additional Rs. 10-12Bn in Revenue at an estimated capacity utilization of 80%. The project is in close vicinity of Seya's existing manufacturing operations at MIDC Tarapur, Boisar in State of Maharashtra and is presently awaiting disbursement from its Lenders who failed to keep up their commitment. The Company has filed representation in Hon'ble High Court and based on its directions has submitted the funding plan to the Lenders which is under consideration with the Lenders.

The Equity has been fully introduced by the Promoters and is forming part of present Share Capital/Equity Structure of the Company. The Project is being built under the supervision of highly experienced and reputed EPC contractors, German Technology Suppliers and PMC's holding successful track-record of more than 105 years backed by performance guarantee. It involves latest state-of-the-art, cutting edge, continuous, fully automated process technology which will enable Seya to be the lowest cost producer in the World for the products under set-up. The installed capacities of proposed products under set-up will be the largest in the world at a single location.

Seya has safeguarded any copy of the Technology by executing confidentiality and copyright agreements with its technology suppliers restricting sale of technology acquired, for next 20 years from the Contract date. Almost 50% of the installed capacity in the proposed greenfield mega project is to be captively consumed as intermediates. Out of balance 50%, 30% of the proposed installed Capacity is contracted to existing customers on long term supply contract and balance 20% is envisaged to provide as import substitute to cater to the increasing demand arising from Supply disruptions and geographical shift from China.

ANNEXURE – I

Criteria for determining Qualifications, Positive attributes and Independence of Directors and Nomination, Remuneration and Evaluation Policy for Directors, Key Managerial Personnel and Others

Criteria for determining qualifications, positive attributes and independence of Directors

The Nomination and Remuneration Committee (NRC) has formulated the criteria for determining qualifications, positive attributes and independence of Directors in terms of provisions of the Companies Act, 2013 ("the Act") and SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 ("Listing Regulations").

Independence: A Director will be considered as an 'Independent Director' if he / she met with the criteria for 'Independent Director' as laid down in the Act and the Listing Regulations.

Qualifications: A transparent Board nomination process is in place that encourages diversity of thought, experience, knowledge, perspective, age and gender. It is also ensured that the Board has an appropriate blend of functional and industry expertise. While recommending the appointment of a Director, the NRC considers the manner in which the function and domain expertise of the individual will contribute to the overall skill-domain mix of the Board.

Positive Attributes: In addition to the duties as prescribed under the Act, the Directors on the Board of the Company are also expected to demonstrate high standards of ethical behavior, strong interpersonal and communication skills and soundness of judgment. Independent Directors are also expected to abide by the 'Code for Independent Directors' as outlined in Schedule IV to the Act.

A. Nomination, Remuneration and Evaluation Policy for Directors, Key Managerial Personnel and Others

1. Objective:

The Nomination, Remuneration and Evaluation policy (the Policy) is in compliance with Section 178 of the Act, read along with the applicable rules thereto and the Listing Regulations

7. **Focus areas:**

i. **Vocational Skill Development Programs:**

- Unemployment and the lack of a stable source of income is often the result of skill vs. job requirement mismatch. Apart from inadequate training facilities, the ease of accessibility to available training is also an issue for large sections of the marginalized population. Therefore, SEYA intends to strengthen its focus on Skill Development to address critical national and state level skill training gaps. These interventions are expected to assist and result in income generation and social inclusion for youth coming from underprivileged sections of the community.
- SEYA will also address the critical needs of the community around its areas of operation and in locations where skill development interventions are necessary. The objective of these initiatives

is to holistically address various socio-economic needs and aspirations of the community.

ii. **Education:**

- SEYA will undertake initiatives for imparting training to develop language skills to enhance individual employability of youth in marginalized and deprived sections of Society. These Programs will also incorporate awareness and advocacy modules on values and ethics, intended to benefit the community at large, by preparing young people to be better corporate citizens.
- Supporting projects and programs for Quality Education and Development of Children from weaker sections of the society, as considered necessary.

iii. **Health:**

- Providing financial assistance to institutions, hospitals, charitable trusts and NGOs, including projects and programs aimed at supporting differently abled children including rehabilitation of mentally challenged people.
- Providing financial assistance to institutions, hospitals, charitable trusts and NGOs pursuing projects and programs benefiting pediatric and cancer patients, people suffering from AIDS, the Blind, Deaf and Mute.
- SEYA will promote health care including preventive measures and sanitation. It will undertake programmes to promote comprehensive sanitation and address availability of safe drinking water.

Share Transfer Process

Effective April 1, 2019, SEBI has amended Regulation 40 of the Listing Regulations, which deals with transfer or transmission or transposition of securities. According to this amendment, the requests for effecting the transfer of listed securities shall not be processed unless the securities are held in dematerialised form with a Depository. This will, inter alia, bring the following benefits:

- It shall curb fraud and manipulation risk in physical transfer of securities by unscrupulous entities.
- Transfer of securities only in demat form will lead to ease, convenience and safety of transactions for investors.

The Company has stopped accepting any transfer requests for securities held in physical form with effect from the said date. During the year, the Company accepted those transfer requests pertaining to securities held in physical form which were lodged for transfer before April 1, 2019 and were returned due to discrepancies. Transfers of equity shares in electronic form are effected through the depositories with no involvement of the Company.

In view of the aforesaid amendment and in order to eliminate the risks associated with physical holding of shares, Members who are holding shares in physical form are hereby requested to dematerialise their holdings.

PRACTISING COMPANY SECRETARIES CERTIFICATE ON CORPORATE GOVERNANCE

To the Members of

SEYA INDUSTRIES LTD

We have examined the compliance of the conditions of Corporate Governance by Seya Industries Ltd ('the Company') for the year ended on March 31, 2020, as stipulated under Regulations 17 to 27, clauses (b) to (i) of sub-regulation (2) of Regulation 46 and para C, D and E of Schedule V of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations").

The compliance of the conditions of Corporate Governance is the responsibility of the management. Our examination was limited to the review of procedures and implementation thereof, as adopted by the Company for ensuring compliance with conditions of Corporate Governance. It is neither an audit nor an expression of opinion on the financial statements of the Company.

In our opinion and to the best of our information and according to the explanations given to us, and the representations made by the Directors and the management and considering the relaxations granted by Ministry of Corporate Affairs and Securities and Exchange Board of India warranted due to the spread of the COVID-19 pandemic, we certify that the Company has complied with the conditions of Corporate Governance as stipulated in the SEBI Listing Regulations for the year ended on March 31, 2020.

We further state that such compliance is neither an assurance as to the future viability of the Company nor of the efficiency or effectiveness with which the management has conducted the affairs of the Company.

INDEPENDENT AUDITOR'S REPORT

To the Members of

SEYA INDUSTRIES LTD

Report on the Standalone Financial Statements

Opinion

We have audited the accompanying standalone Financial Statements of SEYA INDUSTRIES LTD ('The Company'), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including other Comprehensive income), the statement of Changes in Equity and the Cash Flow Statement for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "Standalone Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair

view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis of Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those SAs are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Due to COVID-19 lockdown throughout the country since last week of March 2020, we have adopted alternative methodologies solutions in performing our audit procedures. We have determined the matters described below to the Key Audit Matters to be communicated in the Report.

The Key Audit Matter	How the matter was addressed in our audit
Accuracy of recognition, measurement, presentation and disclosures of revenues and other related balances in view of adoption of Ind AS 115 "Revenue from Contracts with Customers" (new revenue accounting standard)	<p>Principal Audit Procedure</p> <p>We assessed the Company's process to identify the impact of adoption of the new revenue accounting standard. Our audit approach consisted testing of the design and operating effectiveness of the internal controls and substantive testing as follows:</p> <ul style="list-style-type: none"> Evaluated the design of internal controls relating to implementation of the new revenue accounting standard. Selected a sample of continuing and new contracts, and tested the operating effectiveness of the internal control, relating to identification of the distinct performance obligations and determination of transaction price. We carried out a combination of procedures involving enquiry and observation, re-performance and inspection of evidence in respect of operation of these controls. Tested the relevant information technology systems' access and change management controls relating to contracts and related information used in recording and disclosing revenue in accordance with the new revenue accounting standard.

Information other than the standalone Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Management Discussion and Analysis, Report on Corporate Governance, Business Responsibility Report, but does not include the Standalone financial statements and our auditor's report thereon.

Our opinion on the Standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone financial statements or our knowledge obtained

during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flow and changes in equity of the Company in accordance with the Accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act read with relevant rules thereunder. This responsibility also includes maintenance of adequate

accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process

Auditor's Responsibility for the audit of the standalone financial statements

Our objectives are to obtain reasonable assurance about whether the Standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government of India, in terms of sub-section (11) of Section 143 of the Act and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give, in the "Annexure A" a statement on the matters specified in paragraph 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
 - b. In our opinion, proper books of accounts as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c. The Balance Sheet, Statement of Profit & Loss, the Cash Flow Statement and statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
 - d. In our opinion, the aforesaid standalone financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act
 - e. On the basis of written representations received from the Directors as on March 31, 2020 taken on record by the Board of Directors, none of the Directors are disqualified as on March 31, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

- f. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".
3. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and belief and according to the information and explanations given to us:
- a. The Company has disclosed the impact of pending litigations as at March 31, 2020 on its financial position in its Standalone Financial Statements.
 - b. The Company did not have any long-term contracts including derivatives contracts; as such the question of commenting on any material foreseeable losses thereon does not arise.
 - c. There has not been any occasion in case of the Company during the year under report to transfer any sum to the investor Education and protection Fund, hence the question of delay in transferring such sums does not arise.
 - d. The disclosure in the Standalone Financial Statements regarding holding as well as dealing in specified bank notes during the period from November 08, 2016

to December 30, 2016 have not been made in these Financial Statements since they do not pertain to the Financial Year ended March 31, 2020

4. With respect to the matter to be included in the Auditor's Report under Section 197(16) of the Act:

In our opinion and according to the information and explanations given to us, the remuneration policy by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in the excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) of the Act which are required to be commented upon by us.

"ANNEXURE B" TO INDEPENDENT AUDITOR'S REPORT

[Referred to in paragraph 2(f) under 'Report on other Legal and Regulatory Requirements' section of our report of even date]

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (the "Act")

We have audited the internal financial controls over financial reporting of Seya Industries Limited (the "Company") as of March 31, 2020 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk if a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2020

1. CORPORATE INFORMATION

Seya Industries Ltd (the Company) is a Public Limited Company domiciled in India and incorporated under the provisions of the Companies Act, 1956. Its shares are traded on BSE Limited and National Stock Exchange of India Ltd. The Company is engaged in manufacturing of Speciality Chemicals intermediates.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1. Statement of Compliance

The Standalone Financial Statements have been prepared in accordance with Ind AS, as prescribed under Section 133 of the Companies Act, 2013 ('the Act'), the Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

2.2. Basis of Preparation and Presentation

The financial statements have been prepared on the historical cost basis, except for the following assets and liabilities which have been measured at fair value or revalued amount:

- Certain financial assets/liabilities that are measured at fair values at the end of each reporting period;
- Defined benefit plans – plan assets that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Whenever the Company changes the presentation or classification of items in its financial statements materially, the company reclassifies comparative amounts, unless impracticable. Non-Convertible Redeemable Preference Shares which under IGAAP was classified in Share Capital now as per Ind AS forms part of the Non-Current Liabilities under Long Term Borrowings from Related Parties.

2.3. Classification of Current/Non-Current Assets and Liabilities

All the assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1 "Presentation of financial statements".

Assets:

An asset is classified as current when it satisfies any of the following criteria:

- a. it is expected to be realised in, or is intended for sale or consumption in, the Companies normal operating cycle;
- b. it is held primarily for the purpose of being traded;
- c. it is expected to be realised within twelve months after the reporting date; or
- d. it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

Liabilities:

A liability is classified as current when it satisfies any of the following criteria:

- a. it is expected to be settled in the companies normal operating cycle;
- b. it is held primarily for the purpose of being traded;
- c. it is due to be settled within twelve months after the reporting date; or
- d. the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification. All other assets/ liabilities are classified as non-current.

Operating Cycle:

Based on the nature of activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as twelve months for the purpose of classifications of its assets and liabilities as current and non-current

2.4. Critical accounting estimates, assumptions and judgements:

The preparation of financial statements requires management to make estimates, assumptions and judgements that affect the reported balances of assets and liabilities and disclosures as at the date of the financial statements and the reported amounts of income and expenditure for the periods presented. Actual results may differ from the estimates considering different assumptions and conditions. Estimates and underlying assumptions are reviewed on an ongoing basis. Impact on account of revisions to accounting estimates are recognized in the period in which the estimates are revised, and future periods are affected.

2.5. Measurement of fair values:

The Company's accounting policies and disclosures require the measurement of fair values, for both financial assets and liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

All assets and liabilities, for which fair value is measured or disclosed in the financial statements, are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i. Level 1 - inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- ii. Level 2 -inputs other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and
- iii. Level 3 - inputs that are unobservable for the asset or liability

2.6. Operating Segment

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker of the Company is responsible for allocating resources and assessing performance of the operating segments and accordingly is identified as the chief operating decision maker.

The Chief Operational Decision Maker monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit and loss and is measured consistently with profit and loss in the financial statements. The Operating segments have been identified on the basis of the nature of products/services.

- a) Segment revenue includes sales and other income directly identifiable with the segment including intersegment revenue.
- b) Expenses that are directly identifiable with the segments are considered for determining the segment results. Expenses which relate to the Company as a whole and not allocable to segments are included under unallocable expenditure.
- c) Income which relates to the Company as a whole and not allocable to segments is included in unallocable income.
- d) Segment result includes margins on inter-segment and sales which are reduced in arriving at the profit before tax of the Company.

Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable assets and liabilities represent the assets and liabilities that relate to the Company as a whole and not allocable to any segment.

Secondary segment have been identified with reference to geographical location of external customers. Composition of

secondary segment is as follows:

- (i) India and
- (ii) Outside India

2.7. Functional and Presentation Currency

These financial statements are presented in Indian Rupees (₹) which is the functional currency of the Company

2.8. Property, plant and equipment (PPEs)

Items of property, plant and equipment are stated in balance sheet at cost less accumulated depreciation and accumulated impairment losses, if any except for land which is been carried as per revaluation of model. Under revaluation model, after recognition as an asset, an item of property, plant and equipment whose fair value can be measured reliably shall be carried at a

revalued amount, being its fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The frequency of revaluations depends upon the changes in fair values of the items of property, plant and equipment being revalued. Company estimates to revalue its land every 3 years. When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Items of property, plant and equipment acquired through exchange of non-monetary assets are measured at fair value, unless the exchange transaction lacks commercial substance or the fair value of either the asset received, or asset given up is not reliably measurable, in which case the acquired asset is measured at the carrying amount of the asset given up.

De-recognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of property, plant and equipment and is recognised in profit or loss.

Depreciation

Depreciation is recognised so as to write off the cost of assets (other than freehold land and Capital work-in-progress) less their residual values on straight-line method over their useful lives as indicated in Part C of Schedule II of the Companies Act, 2013. Depreciation methods, useful lives and residual values are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The estimated useful lives are as follows:

Asset	Useful life
Leasehold Land	99 years
Building	1 – 25 years
Plant and Machinery	3 – 20 years
Furniture & Fixtures	3 – 12 years
Vehicles	3 – 10 years

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its PPE recognised as of April 01, 2016 i.e. transition date, measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

2.9. Intangible Assets

Intangible assets that are acquired by the Company and that have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses, if any. Subsequent expenditures are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate. Amortisation is recognised on a straight-line basis over the estimated useful lives of intangible assets. Intangible assets that are not available for use are amortised from the date they are available for use.

De-recognition of intangible assets

Intangible assets are de-recognised either on their disposal or where no future economic benefits are expected from their use. Gain or loss arising on such de-recognition is recognised in profit or loss and are measured as the difference between the net disposal proceeds, if any, and the carrying amount of respective intangible assets as on the date of de-recognition.

2.10. Impairment of Non-Financial Assets

The carrying amounts of the Company's PPE and intangible assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated in order to determine the extent of the impairment loss, if any. The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. An impairment loss is recognised in the profit or loss if the estimated recoverable amount of an asset or its cash generating unit is lower than its carrying amount. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of the other assets in the unit on a pro-rata basis. In respect of other asset, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.11. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

Initial Recognition and measurements

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Financial assets are classified, at initial recognition, as financial assets measured at fair value or as financial assets measured at amortized cost.

Subsequent measurements

For purposes of subsequent measurement, financial assets are classified in Three categories:

- i. Financial assets measured at amortised cost
 - ii. Financial assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)
 - iii. Financial assets measured at Fair Value Through Profit or Loss (FVTPL)
- i. A financial asset that meets the following two conditions is measured at amortized cost.
 - Business Model test: The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

- Cash flow characteristics test: Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.
- ii. A financial asset that meets the following two conditions is measured at fair value through OCI:-
 - Business Model test: The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
 - Cash flow characteristics test: The contractual terms of the instrument give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.
 - iii. All other financial assets are measured at fair value through profit and loss.

Classification as Debt and Equity

Debt and Equity instruments issued by the company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument

Equity Instruments

All equity instruments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present subsequent changes in the fair value in OCI. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable. If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, including foreign exchange gain or loss and excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to profit or loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity. Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the profit or loss.

Derecognition-

A financial asset is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The contractual rights to receive cash flows from the asset have expired, or
- The Company has transferred substantially all the risks and rewards of the asset, or the Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in OCI and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Impairment of financial assets-

In accordance with Ind AS 109, The company assesses impairment based on expected credit losses (ECL) model at an amount equal to: -

- 12 months expected credit losses, or
- Lifetime expected credit losses

depending upon whether there has been a significant increase in credit risk since initial recognition.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or any contractual right to receive cash or another financial asset. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

2.12. Financial Liabilities**Initial recognition and measurement**

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Subsequent measurement

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities at Fair Value Through Profit or Loss

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or is designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred principally for the purpose of repurchasing in the near term or on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking. This category also includes derivative entered into by the Company that are not designated and effective as hedging instruments in hedge relationships as defined by Ind AS 109. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Derivative financial instruments**Initial recognition and subsequent measurement**

The Company uses derivative financial instruments, such as forward currency contracts, full currency swap, options and interest rate swaps to hedge its foreign currency risks and interest rate risks respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount is reported in the Balance Sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Compound financial instruments

The component parts of compound financial instruments issued by the company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definition of financial liability and an equity instrument.

2.13. Leases

A lease that transfers substantially all the risks and rewards incidental to ownership to the lessee is classified as a finance lease. All other leases are classified as operating leases.

Company as a lessee-

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in profit or loss as finance costs, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Company's general policy on the borrowing costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are generally recognised as an expense in the profit or loss on a straight-line basis over the lease term. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are also recognised as expenses in the periods in which they are incurred.

Company as a lessor-

Rental income from operating lease is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to

compensate for the Company's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

2.14. Cash and Cash Equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and Fixed deposits. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and fixed deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.15. Provisions, contingent liabilities and assets

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent Assets are not recognised in the financial statements.

2.16. Borrowing Cost

Borrowing cost that are directly attributable to the acquisition, construction, or production of a qualifying asset are capitalized as a part of the cost of such asset till such time the asset is ready for its intended use or sale.

Borrowing cost consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs also includes exchange differences to the extent regarded as an adjustment to the borrowing costs. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing cost are recognized as expense in the period in which they are incurred.

2.17. Inventories

- Raw materials, Work in progress, manufactured goods and Stores & Spares are valued at lower of Cost (FIFO) or estimated net realisable value after providing for obsolescence and other losses, where considered necessary.
- By-products, self-generated scrap and non-reusable waste are valued at estimated net realisable value.
- Cost includes all charges in bringing the goods to their present location and condition, including other levies, transit insurance and receiving charges.

- Work in progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty.
- Estimated net realisable value is the estimated selling price in the ordinary course of business, reduced by estimated costs of completion and estimated costs necessary to make the sale.

2.18. Revenue Recognition

Sale of Goods

Revenue from sales are recognized, when risks and rewards of ownership of products are passed on to the customers, which is generally on dispatch/delivery of goods and there is no significant uncertainty regarding amount of consideration that will be derived. Revenue from sale of goods are recognized at the fair value of the consideration received or receivable, net of returns including estimated returns where applicable, and trade discounts, rebates, sales tax and value added tax/GST. Revenue is recognized only when risks and rewards incidental to ownership are transferred to the customer, it can be reliably measured, and it is reasonable to expect ultimate collection.

The Company has adopted Ind AS 115 Revenue from contracts with customers, with effect from April 1, 2018. Ind AS 115 establishes principles for reporting information about the nature, amount, timing and uncertainty of revenues and cash flows arising from the contracts with its customers and replaces Ind AS 18 Revenue and Ind AS 11 Construction Contracts.

The Company has adopted Ind AS 115 using the cumulative effect method whereby the effect of applying this standard is recognised at the date of initial application (i.e. April 1, 2018). Accordingly, the comparative information in the statement of profit and loss is not restated.

Other Income

Interest Income

Interest income is recognized using effective interest rate method and on time proportion basis taking into account the amount outstanding and the interest rate applicable.

Dividend

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

2.19. Employee Benefits

Defined benefit plans

The liability in respect of defined benefit plans is calculated using the projected unit credit method with actuarial valuations being carried out at the end of each annual reporting period. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds. The currency and term of the government bonds shall be consistent with the currency and estimated term of the post-employment benefit obligations. The current service cost of the defined benefit plan, recognised in the profit or loss as employee benefits expense, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes, curtailments and settlements. Past service costs are recognised in profit or loss in the period of a plan amendment. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in profit or loss. Actuarial

gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to OCI in the period in which they arise and is reflected immediately in retained earnings and is not reclassified to profit or loss.

Short-term and Other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, and casual leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

The Company's net obligation in respect of other long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and previous periods. That benefit is discounted to determine its present value.

Defined contribution plans

The Company's contributions to defined contribution plans are recognised as an expense as and when the services are received from the employees entitling them to the contributions.

2.20. Income Tax

Current Income Tax

Income tax expense consists of current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised in OCI or directly in equity, in which case it is recognised in OCI or directly in equity respectively. Current tax is the expected tax payable on the taxable profit for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous years. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period. Deferred tax assets and liabilities are offset if there is a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Withholding tax arising out of payment of dividends to shareholders under the Indian Income tax regulations is not considered as tax expense for the Company and all such taxes are recognised in the statement of changes in equity as part of the associated dividend payment.

Minimum Alternate Tax ('MAT') credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the period for which the MAT credit can be carried forward for set-off against the normal

tax liability. MAT credit recognised as an asset is reviewed at each Balance Sheet date and written down to the extent the aforesaid convincing evidence no longer exists.

2.21. Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential ordinary shares, which includes all stock options granted to employees.

2.22. Foreign Currency

Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currencies of entities within the Company at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate at that date. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in the income statement in the period in which they arise. When several exchange rates are available, the rate used is that at which the future cash flows represented by the transaction or balance could have been settled if those cash flows had occurred at the measurement date.

2.23. Research and development

Expenditures on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are recognized in the income statement when incurred. Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditures are capitalized only if:

- development costs can be measured reliably;
- the product or process is technically and commercially feasible;
- future economic benefits are probable; and
- the Company intends to and has sufficient resources to complete development and to use or sell the asset.

The expenditures to be capitalized include the cost of materials and other costs directly attributable to preparing the asset for its intended use. Other development expenditures are recognized in the income statement as incurred.

3. RECENT ACCOUNTING PRONOUNCEMENTS

Standards issued but not yet effective

Amendments to Ind AS 12 – Income Taxes (Appendix C – Uncertainty over Income Tax Treatments):

This interpretation, which will be effective from April 1, 2019, clarifies how entities should evaluate and reflect uncertainties over income tax treatments, in particular when assessing the outcome, a tax authority might reach with full knowledge and information if it were to make an examination. The Company is in the process of evaluating the impact of this amendment on its financial statements

30.9. Disclosure under IND AS-19: Employee Benefits Obligations**30.9.1. Defined Benefit Plan**

During the Period under review Company has made contribution towards Employees' Group Gratuity-cum-Life Assurance Scheme of the Life Insurance Corporation of India.

Both are funded defined benefit plans for qualifying employees. The Scheme provides for lump sum payment to vested employees at retirement, death while in employment or on termination of employment as per the Company's Gratuity Scheme. Vesting occurs upon completion of Five years of services.

The present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation for Compensated Absences is recognised in the same manner as gratuity.

30.9.2. The discount rate is based on the prevailing market yields of Government of India securities as at the Balance Sheet date for the estimated term of the obligations.

30.9.3. The estimate of future salary increases considered, takes into account the inflation, seniority, promotion, Increments and other relevant factors.

30.9.4. The expected return on plan assets is determined considering several applicable factors mainly the composition of plan assets held, assessed risk of assets management and historical result of the return on plan asset.

30.9.5. In absence of specific details of plan assets from LIC, the details of plan assets have not been furnished. The details of experience adjustment relating to Plan assets are not readily available in valuation report and hence are not furnished.

30.9.6. The following table set out the funded status and amounts recognised in Company's financial statements as at March 31, 2020 for Defined Benefit Plan. (Disclosure as per IND AS-19)

Sensitivity Analysis

Significant Actuarial Assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and employee turnover. The sensitivity analysis below, have been determined based on reasonably possible changes of the assumptions occurring at end of the reporting period, while holding all other assumptions constant. The result of Sensitivity analysis is given below:

	2019-20	2018-19
Discount Rate - Increase of 1%	29.71	23.86
Discount Rate - Decrease of 1%	37.77	28.92
Salary Growth Rate - Increase of 1%	37.77	28.99
Salary Growth Rate - Decrease of 1%	29.65	23.77

In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as and when calculating the defined benefit liability recognised in the Balance Sheet. The methods and types of assumptions used in preparing the sensitivity analysis did not change as compared to the prior year.

30.9.7. Leave Encashment

- The Leave benefit Scheme is a defined Benefit Plan and is unfunded. Hence, there are no Plan Assets attributable to the Obligation
- Principal Actuarial Assumption

	2019-20	2018-19
Discount Rate	6.80	7.52

30.9.8. Defined Contribution Plan

Footnote

- The management assessed that cash and cash equivalents, trade receivables, trade payables, bank overdrafts and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments

(B) Fair Value Hierarchy

This section explains the judgments and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. An explanation of each level are follows

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

There are no Financial Assets which are required to be carried at Fair value using Fair value hierarchy

30.16. Financial Risk Management Objectives

The Company has adequate internal processes to assess, monitor and manage financial risks. These risks include market risk (including interest rate risk and other price risk), credit risk and liquidity risk.

(A) Market Risk

Market Risk is the risk of loss of future earnings, fair values or cash flows that may result from a change in the price of a financial instrument, as a result of interest rates, and other price risks. Financial instruments affected by market risks, primarily include loans, borrowings and Trade receivables.

(i) Interest Rate Risk

The Company borrows funds in Indian Rupees, to meet both the long term and short-term funding requirements. Interest on term borrowings is subject to Base rate / MCLR and is fixed for at least one year. The sensitivity analysis detailed below have been determined based on the exposure to variable interest rates on the average outstanding amounts due to bankers over a year.

If the interest rates had been 25 BPS higher / lower and all other variables held constant, the company's profit for the year ended March 31, 2020 would have been decreased/increased by ₹ 14.16 Lakhs.

(ii) Price Risk

100% of Company's revenues are generated from Local Markets and the raw materials are procured through local purchases where local purchases track import parity price. The Company is affected by the price stability of certain commodities. Due to the significantly increased volatility of certain commodities, the Company enters into contract with the customers that has provision to pass on the change in the raw material prices. The Company has a risk management framework aimed at prudently managing the risk arising from the volatility in commodity prices and freight costs.

(B) Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company is exposed to credit risk from its operating activities (primarily trade receivables)

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer.

COVID 19 impact resulted in lockdown from March 22, 2020 and continued post balance sheet date. The said pandemic is having an unprecedented impact on people and the economy. At our Company, we have moved fast to support our multiple stakeholders and sustain our operations through this crisis and prepare for revival in a new normal. We have structured our priorities in four areas: supporting our people, protecting customer and vendor relationships, maintaining our financial strength & contributing to society. Due to the lockdown, operations in most our locations including manufacturing plants, warehouses, offices etc had to be scaled down or shut down and are being operated as per the local guidelines of social distancing and high hygiene standards, wherever permitted. The complete resumption of operations will depend upon directives issued by the respective Government authorities. The Impact of COVID-19 is considered as a non-adjusting event.

While the current situation has adversely affected the economy at large, the chemical industry has also been affected in segments. We continue to closely monitor the situation and have been taking appropriate actions for both sustenance and revival. As part of its review of the year-end balance sheet, the Company has made an assessment of recoverability and carrying values of its assets comprising Property, Plant and Equipment, Intangible assets, Inventory and Financial assets and has concluded that no further adjustments are required to be made to the carrying values of such assets as at March 31, 2020, However, the impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration.

Though the Customer credit risk is managed by the Company's established policy, procedures and control relating to the customer credit risk management, the impact of COVID 19 on its trade receivables needs to be closely monitored on case to case basis and allowance if any should be appropriately considered. The Company uses financial information and past experience to evaluate credit quality of majority of its customers and individual credit limits are defined in accordance with this assessment through financial institutions. Outstanding receivables and the credit worthiness of its customers are periodically monitored and taken upon case to case basis.

The historical experience of collecting receivables of the Company is supported by low level of past default, however the impact of the pandemic needs to be evaluated by the management and hence the credit risk as at balance sheet date is perceived to be low, however expected to deteriorate going forward.

(C) Liquidity Risk

The Company manages liquidity risk by maintaining adequate surplus and financing facilities by continuously monitoring forecasts and actual cash flows. The Company has obtained fund and non-fund based working capital lines from various Banks/FI/Others. The Company invests its surplus funds in bank fixed deposit which carry low risks. The Company monitors funding options available in the debt and capital markets with a view to maintaining financial flexibility. All payments are made along due dates and requests for early payments are entertained after due approval and availing early payment discounts.

TOTAL	3,916.14	49,014.13	52,930.27

30.17. Investor Education and Protection Fund

There is no amount due and outstanding as at Balance Sheet date to be credited to the Investor Education and Protection Fund.

30.18. Corporate Social Responsibility

During FY 2019-20, the Company has spent ₹ 46 Lakhs on Corporate Social Responsibility activities, against the requirement of ₹ 151.15 Lakhs, being 2% of average of the net profits for the preceding three years, however on account of COVID-19 in the month of March-20, the Company will fulfil its shortfall in obligation during FY 20-21.

30.19. In the opinion of the Board of Directors, except as otherwise stated, the Current Assets, Loans and Advances have value on realisation in the ordinary course of business, at least equal to the amount at which they are stated in the foregoing Balance Sheet and adequate provision for all known liabilities on the Company has been made.

30.20. The Balance Sheet, Statement of Profit and Loss, Cash Flow Statement, Statement of Changes in Equity, Statement of Significant Accounting Policies and the Other Explanatory Notes for the year ended March 31, 2020 forms an integral part of the financial statements of the Company.

30.21. The Operations of the Company have been severely impacted due to the Covid -19 pandemic. The Government of India declared a nationwide lockdown w.e.f. 24 March, 2020 and hence the manufacturing operations of the Company were halted during the quarter. Upon obtaining necessary permissions from the concerned authorities and after taking all safety measures as prescribed in the said permissions, though the Company have resumed operations in a phased-wise manner, several International and State governments continue to restrict distribution operations which impact the Company's operations. As a result, the revenues were materially impacted during this period. The Company however continued to incur committed expenditure with respect to its Employees, Plant related expenditures and Other expenditures. This has significantly impacted the profitability. Covid-19 has also had a significant impact on its customers and their ability to meet their committed obligations. The extent and duration of COVID-19 is currently unknown and depends on future developments that are uncertain. Any resultant outcome and impact on business, due to this, is unpredictable. The Management has considered the possible effects if any that may result from COVID-19 pandemic on the carrying amounts of Trade receivables and Inventories. In developing the assumptions and estimates relating to the uncertainties as at the balance Sheet date in relation to the recoverable amounts of these assets, the management has used internal and external sources of information to the extent determined by it. The Impact of the same may differ from that estimated as at the date of approval of these financial statements due to the impact of the pandemic and the Management will continue to closely monitor the developments.

We have taken several actions to mitigate the effect of Covid-19 on our business. We have taken steps to reduce our unit costs and increase our liquidity by making our operations more efficient and nimbler, putting on hold discretionary expenses, deferring certain capital expenditures, etc. In order to sustain operations, we also had to take actions to cut employee costs through pay cuts, leave without pay and reduction in workforce. We are ramping up our operations in a phased manner, subject to Government directions. The unprecedented nature of the pandemic makes the future business environment uncertain, however, we will continue to carry out the impact assessment on our assets and closely monitor any material changes to future economic conditions.

30.22. Previous Year's figures

Previous year's figures have been regrouped / reclassified wherever necessary to correspond with the current year's classification / disclosure and to conform to Ind AS presentation requirements.

EXPLANATORY STATEMENT PURSUANT TO SECTION 102 (1) OF THE COMPANIES ACT, 2013

(Following Explanatory Statement sets out all material facts relating to the Special Business mentioned in the accompanying Notice)

Item No. 3

M/s. Anil Chauhan & Associates, Chartered Accountants, Statutory Auditor of the Company is shifting his operations abroad and has expressed his unwillingness to the Board of Directors of the Company ("the Board") to continue as Statutory Auditor of the Company with effect from ensuing Annual General Meeting. On recommendation of the Audit & Risk Management Committee ("the Committee"), appointment of M/s. S. S. Patwardhan & Co., Chartered Accountants, as the Statutory Auditors of the Company for a period of three years from the Conclusion of this AGM till the Conclusion of the 33rd AGM is proposed for the Consideration of the Meeting.

While considering the appointment of Statutory Auditors of the Company, the Committee considers various parameters like capability to serve a diverse and complex business landscape as that of the Company, audit experience in the Company's Operating segments, market standing of the firm, technical knowledge, etc. Accordingly, the Committee found M/s. S. S. Patwardhan & Co. reasonably suited to handle the scale, diversity and complexity associated with audit of financial statements of the Company.

M/s. S.S. Patwardhan & Co. have given their consent to act as the Auditors of the Company. The Confirmation of their appointment, if made, will be in accordance with the conditions prescribed under Section 139 and 141 of the Act.

None of the Directors and Key Managerial Personnel of the Company, or their relatives, is interested in this resolution.

The Board recommends the Ordinary Resolutions set out at Item No. 3 of the Notice for approval by the shareholders.

Item No. 4

The Board of Directors of the Company on February 06, 2020 Mr. Ronen Joshi (DIN: 08167071) as an Additional Director of the Company with effect from February 06, 2020. In terms of Section 161(1) of the Act, Mr. Ronen Joshi holds office upto the date of this Annual General Meeting ('AGM') and is eligible for appointment as a Director. The Company has received a Notice from a Member in writing under Section 160(1) of the Act proposing his candidature for the office of Director. Based on the recommendations of the NRC and subject to the approval of the Members, Mr. Joshi was also appointed as an Independent Director of the Company, not liable to retire by rotation, for a period of 5 years commencing from February 06, 2020 to February 05, 2025, in accordance with the provisions of Section 149 read with Schedule IV of the Act. Mr. Joshi has consented to act as Director of the Company and has given his declaration to the Board that he meets the criteria for independence as provided under Section 149(6) of the Act and Regulation 16(1)(b) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('Listing Regulations'). In terms of Regulation 25(8) of the Listing Regulations, Mr. Joshi has confirmed that he is not aware of any circumstance or situation which exists or may be reasonably anticipated that could impair or impact his ability to discharge his duties. He has also confirmed that he is not debarred from holding the office of a Director by virtue of any SEBI Orders or any such Authority pursuant to circular dated June 20, 2018, issued by BSE Limited and the National Stock Exchange of India Limited pertaining to enforcement of SEBI Orders regarding appointment of Directors by listed companies. Further, Mr. Joshi is not disqualified from being appointed as a Director in terms of Section 164 of the Act. Mr. Joshi has confirmed that he is in compliance with Rules 6(1) and 6(2) of the Companies (Appointment and Qualification of Directors) Rules, 2014, with respect to his registration with the data bank of Independent Directors maintained by the Indian Institute of Corporate Affairs.

In the opinion of the Board, Mr. Joshi fulfills the conditions specified under the Act read with Rules thereunder and the Listing Regulations

for his appointment as Independent Non-Executive Director of the Company and is independent of the management. Having regard to the qualifications, experience and knowledge, the Board considers that his association would be of immense benefit to the Company and it is desirable to avail the services of Mr. Joshi as an Independent Director. A copy of the draft letter for appointment of the Independent Director setting out the terms and conditions of his appointment will be available for inspection by the Members upto 30th AGM. Members who wish to inspect the same can send a request to the e-mail address of the Company

In compliance with the provisions of Section 149 read with Schedule IV of the Act, Regulation 17 of the Listing Regulations and other applicable regulations, the appointment of Mr. Joshi as an Independent Director for five consecutive years commencing from February 06, 2020 is now placed for the approval of the Members by an Ordinary Resolution. Mr. Joshi would be entitled to sitting fees for attending the Meetings of the Board of Directors and Committees thereof where he is a Member.

The Board commends the Ordinary Resolution set out in Item No. 4 of the accompanying Notice for approval of the Members. This item being special business, is unavoidable in nature. Except Mr. Joshi, none of the Directors or Key Managerial Personnel (KMP) of the Company and their respective relatives are concerned or interested, financially or otherwise, in the resolution set out at Item No. 4 of the accompanying Notice. Mr. Joshi is not related to any other Director or KMP of the Company.

Item No. 5

The Board of Directors of the Company on September 15, 2020 Mr. Amit Chandrakant Pandya (DIN: 08878579) as an Additional Director of the Company with effect from September 15, 2020. In terms of Section 161(1) of the Act, Mr. Amit Pandya holds office upto the date of this Annual General Meeting ('AGM') and is eligible for appointment as a Director. The Company has received a Notice from a Member in writing under Section 160(1) of the Act proposing his candidature for the office of Director. Based on the recommendations of the NRC and subject to the approval of the Members, Mr. Pandya was also appointed as an Independent Director of the Company, not liable to retire by rotation, for a period of 5 years commencing from September 15, 2020 to September 14, 2025, in accordance with the provisions of Section 149 read with Schedule IV of the Act. Mr. Pandya has consented to act as Director of the Company and has given his declaration to the Board that he meets the criteria for independence as provided under Section 149(6) of the Act and Regulation 16(1)(b) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('Listing Regulations'). In terms of Regulation 25(8) of the Listing Regulations, Mr. Pandya has confirmed that he is not aware of any circumstance or situation which exists or may be reasonably anticipated that could impair or impact his ability to discharge his duties. He has also confirmed that he is not debarred from holding the office of a Director by virtue of any SEBI Orders or any such Authority pursuant to circular dated June 20, 2018, issued by BSE Limited and the National Stock Exchange of India Limited pertaining to enforcement of SEBI Orders regarding appointment of Directors by listed companies. Further, Mr. Pandya is not disqualified from being appointed as a Director in terms of Section 164 of the Act. Mr. Pandya has confirmed that he is in compliance with Rules 6(1) and 6(2) of the Companies (Appointment and Qualification of Directors) Rules, 2014, with respect to his registration with the data bank of Independent Directors maintained by the Indian Institute of Corporate Affairs.

In the opinion of the Board, Mr. Pandya fulfills the conditions specified under the Act read with Rules thereunder and the Listing Regulations for his appointment as Independent Non-Executive Director of the Company and is independent of the management.

Having regard to the qualifications, experience and knowledge, the Board considers that his association would be of immense benefit to the Company and it is desirable to avail the services of Mr. Pandya as an Independent Director. A copy of the draft letter for appointment of the Independent Director setting out the terms and conditions of his appointment will be available for inspection by the Members upto the date of 30th AGM. Members who wish to inspect the same can send a request to the e-mail address of the Company

In compliance with the provisions of Section 149 read with Schedule IV of the Act, Regulation 17 of the Listing Regulations and other applicable regulations, the appointment of Mr. Pandya as an Independent Director for five consecutive years commencing from September 15, 2020 is now placed for the approval of the Members by an Ordinary Resolution. Mr. Pandya would be entitled to sitting fees for attending the Meetings of the Board of Directors and Committees thereof where he is a Member.

The Board commends the Ordinary Resolution set out in Item No.5 of the accompanying Notice for approval of the Members. this item being special business, is unavoidable in nature. Except Mr. Pandya, none of the Directors or Key Managerial Personnel (KMP) of the Company and their respective relatives are concerned or interested, financially or otherwise, in the resolution set out at Item No. 5 of the accompanying Notice. Mr. Pandya is not related to any other Director or KMP of the Company.

Item No. 6

The Board of Directors of the Company on September 24, 2020 appointed Mr. Siva Prasad Rao Buddi (DIN: 08891339) as an Additional Director in category of Executive Director.

Pursuant to provisions of Section 161 of the Companies Act, 2013, Mr. Rao shall hold office upto the date of the ensuing Annual General Meeting (AGM) and is eligible to be appointed as a Director of the Company.

Mr. Rao has done M. Tech (Chemical Engineering) with over 30 years of experience. He has been associated with the Company since last 17 years.

Your Director recommends the said Resolution for your Approval as an Ordinary Resolution.

Except Mr. Rao, none of the Directors or Key Managerial Personnel (KMP) of the Company and their respective relatives are concerned or interested, financially or otherwise, in the resolution set out at Item No. 6 of the accompanying Notice. Mr. Rao is not related to any other Director or KMP of the Company.

Item No. 7

The Company is directed under the provisions of Section 148 of the Act, read with the Companies (Cost Records and Audit) Rules, 2014 ('the Rules') to have the audits of its cost records conducted by a Cost Accountant in Practice. Further, in accordance with the provisions of Section 148 of the Act read with the rules, the remuneration payable to the cost Auditors has to be ratified by the Members of the Company.

The Board, on the recommendation of the Audit Committee, has approved the appointment of M/s. M/s.
