Management's Message

Commenting on the performance for Q1 FY2016, Mr. Vivek Saraogi, Managing Director, Balrampur Chini Mills Limited (BCML), said:

“The industry is currently going through its worst down cycles owing to the huge increase in sugar production this season and large carryover sugar stocks from previous year which led to low sugar prices. In addition, unreasonably high sugarcane prices fixed by state governments further impacted the financials of the industry. Given the large disparity in raw material and end product prices, sugar operations were highly unviable in the current season. This resulted in cane arrears across India reaching levels of over ₹21,000 crore.

A normalized performance from the sugar division will only be achieved if sugarcane prices are linked to sugar realizations. We remain hopeful that the Central and State governments will address industry concerns soon, which would aid the sustainability of the sugar sector and benefit all stakeholders involved.”
