- Robust double-digit volume growth for the Company led by strong growth in Transformer oils, White Oils and Export division for the quarter and H1'26 as compared to previous year same period.
- We continue building out our unique product range capitalizing on our Ester platform for high growth segments like Electric Vehicle, Battery Energy Storage System and Ester based refrigeration compressors lubricants.
- Savsol Ester5, range of Automotive Lubricants, launched last year, has gained strong customer acceptance and expected to continue the path of robust double-digit growth.
- Continue to focus on deepening market presence through brand strengthening and an expanding distribution network for this new technology.

Commenting on the performance Mr. Gautam N. Mehra, Chairman and Managing Director, said
"We are pleased to report a robust performance with Year-on-Year (YoY) growth in total income of 17% for the quarter and 11% for H1'26. Furthermore, Profit Before Tax (PBT) growth was 20% for the quarter and an even stronger 31% for the first half of fiscal year 2026. We delivered healthy double digit volume growth in Transformer and White Oil in the quarter as well as in H1'26.

Savsol Ester5 range of Automotive Lubricants launched last year has met with a very positive response from the market and is growing at 5X of the industry growth rate for Automotive Lubricants. With tremendous growth in the renewable energy generation capacity in India, there is going to be massive demand for the Energy Storage System in India. We have successfully tested and ready to launch advanced fluids for this application as well as for Refrigeration Compressor in the coming quarter.

We are witnessing healthy inquiries for our new immersion cooling fluids for Electric Vehicle applications and are steadily ramping up volumes. While these initiatives are still at a nascent stage, they hold strong potential to add significant volumes to our Synthetic Ester-based fluids portfolio."
