## Press Release

### Swarnsarita Jewels India Limited (SJIL)

**August 26, 2025**

#### **Ratings**

<b>Instrument / Facility</b>	<b>Amount (Rs. crore)</b>	<b>Current Ratings</b>	<b>Previous Ratings</b>	<b>Rating Action</b>	<b><a href="#">Complexity Indicator</a></b>
Long Term Bank Facilities	80.00 (Includes proposed limits of Rs. 9.27 crores)	IVR BBB-/ Stable (IVR Triple B Minus with Stable Outlook)	-	Rating assigned	Simple
<b>Total</b>	<b>80.00</b> <b>(Rupees Eighty Crores Only)</b>				

**Details of Facilities/Instruments are in Annexure 1. Facility wise lender details are in Annexure 2. Detailed explanation of covenants is in Annexure 3.**

#### **Detailed Rationale**

The long-term rating assigned to the bank facilities of Swarnsarita Jewels India Limited (SJIL) considers the common management team and financial linkages between SJIL and its subsidiary, Swarnsarita Trading Private Limited. Infomerics has taken a consolidated view of these entities, referred together as Swarnsarita Group.

The rating assigned to the bank facilities of SJIL considers the comfortable capital structure, enhanced export demand and established customer relation by the Group. The rating also factor in the long track record of operation and experienced management. However, these strengths are constrained by the thin profitability margins, forex risk, volatility in raw material prices leading to susceptibility in profit margins and intense competition from the unorganised sector.

The outlook assigned on the long-term rating of SJIL is Stable as it will continue to benefit from the extensive experience of the promoters coupled with improvement in profitability margins on account of backward integration.

#### **Key Rating Sensitivities**

##### **Upward Factors**

- Significant improvement in scale of operations and profitability margins
- Improvement in working capital management leading to improvement in liquidity

## Press Release

### **Downward Factors**

- Moderation in the scale of operations and/or profitability impacting the debt protection metrics
- Any significant rise in working capital intensity leading to a deterioration in liquidity

### **List of Key Rating Drivers with Detailed Description**

#### **Key Rating Strengths**

##### **Established experience of promoters in the jewellery industry**

The promoters of the Group are Chordia family of Mumbai have nearly three-decade long experience in the gold jewellery industry. The extensive experience coupled with long track record of operations has enabled the Group to forge long term relations with customers and suppliers. Infomerics believes that the experience of the management in the industry is likely to favourably impact the business risk profile of the Group over the near to medium term.

##### **Conservative capital structure**

The capital structure of the Group remains healthy. The net worth improved from Rs. 122.80 crores as on March 31, 2024, to Rs. 127.84 crores as on March 31, 2025, mainly on account of accretion of reserves. The overall gearing stood at 0.68x as on March 31, 2025. The total indebtedness of the Group reflected by TOL/TNW stood at 0.76x as on March 31, 2025. Going ahead the capital structure is likely to remain on similar levels since no large debt funded capex is planned.

##### **Established Customer Relationships and Improved Export Demand**

The Group exports its jewellery to overseas clients. Its strong and long-standing client relationships enable a steady flow of repeat orders. In FY25[referred period April 01, 2024, to March 31, 2025], ~30% sales volume was generated through exports. Additionally, the Group has expanded its presence in various new international markets. And its long-standing relation with the domestic players imparts comfort of recurring business.

#### **Key Rating Weaknesses**

##### **Moderation in operation**

## Press Release

SJIL's TOI declined from Rs. 769.69 crores in FY24[referred period April 01, 2023, to March 31, 2024] to Rs. 761.37 crores in FY25. This was because of the voluntary reduction in the gold bullion trading because of lower margins from that segment. This in turn helped the Group to improve its operating margins marked by EBITDA margins from 1.81% in FY24 to 2.00% in FY25.

### **Susceptibility of profitability to volatility in raw material prices**

Gold is the primary raw material for SJIL. Gold being a commodity metal the price stays volatile and due to which any fluctuation in the price of gold will impact the operating margins significantly.

### **Susceptible to regulatory changes**

As the Group is exporting ~30% exports, changes in economies or government policies of the countries to which the Group is exporting and India may affect the operations and thereby revenue generation of the Group.

### **Exposure to forex risk**

SJIL is exposed to currency fluctuation risk to the extent that there is a mismatch between the currencies in which export sales, import purchase, other expenses and borrowings in foreign currency are denominated and the functional currency of the Group. Though the Group has adequate PAT to absorb losses arising due to the currency fluctuation, profitability of SJIL may get affected by volatility in forex rate. The unhedged forex exposure stands at Rs. 0.54 crores as on March 31, 2025.

### **Analytical Approach: Consolidated**

For arriving at the rating Infomerics has considered consolidated financial statements of SJIL, which includes its subsidiary, Swarnsarita Trading Private Limited. This is because these companies are under the control of the same management.

Considered for consolidated analysis is given at Annexure 4.
