MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE AND DEVELOPMENT

The company is engaged in the business of manufacturing, sale and supply of Pipes & fittings and accessories which are used in agriculture, construction segment (building products) and drip irrigation systems. The company also manufactures and sells PLB Ducts, HDPE & MDPE pipes largely used in infrastructure sector.

The Indian Pipe Industry has been showing rapid growth since past several years, PVC pipes and fittings market in India has consistently grown in last five years. The demand for plastic pipes such as PVC and CPVC is also increasing as these pipes are better in quality and durability.

The PVC/HDPE pipes and fittings industry outlook is of strong growth due to increased focus on irrigation, housing and infrastructure sectors in the economy.

PERFORMANCE & MARKET REVIEW

The company achieved sales of Rs. 398.44 crores during the year and a net profit of Rs. 2.69 crores.

The growth of the company is being powered by introduction of new products in new categories with a renewed focus on delivery through high impact teams. The company has created additional capacities at its existing manufacturing facilities coupled with technological improvements & cost efficiencies with minimal capital expenditure. With these improvements, the company has further increased its market share of products in line with the planned strategy.

The key drivers for growth and stability of the company are summarized below:

- Focused team work
- Enhanced capacity
- New products
- New territories

BUSINESS STRATEGY ANALYSIS AND FUTURE GROWTH DRIVERS

Company has successfully introduced premium range of products which are preferred by customers. The company has further introduced standards which help in the measurement of quality of designs and products. The company will leverage its manufacturing strength and integrated flexible facilities to widen the scope of product application in unexplored areas.

However the company's profitability in year under review was under pressure due to wide fluctuations in raw material prices. Despite these challenges, we believe we are well placed to deliver strong performance.

Infrastructure development, urbanization and the subsequent development of residential and industrial construction are facilitating the growth of pipe industry in India.

India's area under crop cultivation at nearly 142 million hectares is the world's second largest of which 60% is rain fed. The Government's latest irrigation programme Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) aims to bring water to every farm. The scheme would give a boost to sales demand for pipes. In drip irrigation the company has established its market in Andhra Pradesh and Telangana State besides Madhya Pradesh and Gujarat.

The long term outlook of the Micro Irrigation Industry is robust. The real boost to the business is likely to come from the micro irrigation projects launched by various state governments and the recently introduced National Mission for Sustainable Agriculture (NMSA). Agricultural growth can be sustained by promoting conservation and sustainable use of these scarce natural resources through appropriate location specific measures. Towards this end, NMSA has been formulated for enhancing agricultural productivity especially in rain fed areas focusing on integrated farming, water use efficiency, soil health management and synergizing resource conservation. NMSA derives its mandate from Sustainable Agriculture Mission which is one of the eight missions outlined under National Action Plan on Climate Change (NAPCC)

Housing project, infrastructure sector and increasing demand of gas transportation will act as growth driver for the industry. Favorable demographics, higher disposable income leading to better lifestyle, concept of nuclear families and a rising middle class also drive the growth in the demand for housing.

Replacement of conventional piping system like galvanized iron and cast iron piping systems with plastic is going on and will continue in the near term. Growth in construction, particularly in rural & Tier-II and Tier-III cities is going to be supported by demographic change aspirations of better lifestyle, nuclear family concept and continuous rise of the middle class.

The Company as a part of its growth strategy has progressed towards expanding its products portfolio by addition of CPVC pipes and fittings. The company continues to grow into new territories with new product lines and geographical expansion.

Kriti has strong brand equity 'Kasta' and single handedly has a market leadership in areas it operates in. The business strategy in the year under review was to consolidate market share in the existing markets and aggressively expand reach in new territories.

Reaping the benefits of its distribution enhancement initiatives and investment behind its brand 'Kriti'. Company is capturing opportunities through continuous evolution of its product range, packaging – by investing in new packaging innovations, deepening its distribution network and reach, creating awareness about its products through judicious use of media and other consumer connect activities.

THREAT

The industry is highly raw material intensive, with the raw material cost more than 70% of the total cost. The industry relies heavily on imports with associated forex fluctuation risk.

The availability of key raw materials from international sources at the right quantity and at right price is a risk factor associated with the business of the Company. The main raw material is now available in the right quantity at the right price through proper planning.

Further, on international currencies front, volatility of exchange rate is a matter of concern for a company. However, the risk associated with currency fluctuation has been mitigated by effective forex management policy. The company still believes in adopting a very conservative and cautious policy to avoid any unwarranted effects of currency volatility.

INFORMATION & TECHNOLOGY

In line with overall growth objective and strengthening of infrastructure base, the company continues to invest in Information Technology (IT) viz. SAP Enterprising Resource Planning System, CRM, HRM, Sales Force Mobility for leveraging its business values. Through implementation of these software's the company has improved its operational efficiencies, inventory minimization and cost optimization.

The company views these investments as a strategic tool to enhance its operational efficiencies, through various functional integration.
