MANAGEMENT DISCUSSION AND ANALYSIS REPORT

REVIEW OF MACRO-ECONOMIC ENVIRONMENT FY2014-15 & OUTLOOK FOR FY 2015-16:

Global Economy

The global economy in 2014-15 felt the brunt of multiple economic and geo-political events across the world. The fall in crude was the single most significant economic event that spanned the major part of the year, along with most other commodities. The Chinese dragon seems to be slowing from its brisk gallop. Growth in many emerging market economies is softening, indicating an adjustment to diminished medium term growth expectations and lower revenues from commodity exports, as well as country-specific factors. The outlook for advanced economies led by the US is showing signs of improvement, owing to the boost to disposable incomes from lower oil prices, continued support from accommodative monetary policy stances, and more moderate fiscal adjustment. If the decline in oil prices manage to sustain, it could boost consumption and support growth. Geopolitical tensions continue to pose threats, and risks of disruptive shifts in asset prices remain relevant. In some advanced economies, protracted low inflation or deflation also pose risks to activity.

The International Monetary Fund (IMF) has projected global growth to increase slightly to 3.50% in 2015 from 3.40% in 2014 and then to rise further in 2016 to 3.80% according to the International Monetary Fund (IMF). The increase in 2015 will be driven by are bound in advanced economies (which is expected to increase to about 2.4% in 2015, compared to 1.8% in 2014) supported by the decline in oil prices, with the United States playing the most important role in the recovery. In emerging and developing markets, in contrast, growth is projected to decline to 4.3% in 2015 compared to 4.6% in 2014, reflecting downward revision for oil exporters, a slowdown in China which reflects a move toward more sustainable growth

Indian Economy

The Indian Economy was witness to some very dramatic changes during the last one year. Prior to FY2014, the Indian economy was going through turbulent times with high inflation, a shockingly adverse balance of payment (BoP) situation and languishing growth (based on an old GDP series). While the Indian position looked quite fragile a year back, today, it appears as if the past belonged to a different country. The twin deficits, namely current account and fiscal deficit, are now in comfort zone and inflation has nearly halved from a year ago.

Fy2015 saw the Union Elections deliver an unprecedented, decisive mandate - the first-ever after 30 years. Following its success in the Union Elections, the NDA registered wins in several State Elections, strengthening its mandate further for enactment of reforms. The year FY2015 also witnessed softening of the global commodity prices, which gave a huge and unexpected relief to commodity importers like India.

The Indian economy showed signs of recovery, with GDP growth rising to 7.3% (source – mospi.nic.in) for the financial year ended March 31, 2015 (FY15). Growth prospects are likely to improve in the current fiscal, driven by the government's development initiatives and pick-up in business cycle. While agriculture growth remained weak due to poor monsoon, manufacturing and industrial growth saw an improvement in FY15. Agriculture growth could continue to remain sluggish in FY16 owing to uncertainty in monsoon.

Overall, the momentum in government-led infrastructure spending, combined with revival in consumer demand, is likely to provide the necessary impetus for economic growth. We expect weakness in commodity prices, especially in crude oil, can help manage both, the current account deficit (CAD) and the fiscal deficit. CAD is likely to remain below 1% of GDP in FY16, and recent steps to reduce fuel subsidies, through decontrol of diesel prices and direct transfer of LPG subsidies to bank accounts of beneficiaries, can contain fiscal deficit to the targeted 3.9% of GDP. Fiscal balance further improved with Government's fiscal deficit has fallen to 4.1% of GDP in FY 2014-15 from 4.5% of GDP in FY 2013-14, this fall is aimed to be achieved through the government's stake sale in state owned entities and rationalization of fuel subsidy amid higher devolution to the states.

Lower global commodity prices helped WPI inflation move south, as manufacturing comprises a large weight in WPI. Impact of commodity prices into CPI inflation may be muted, since local factors like food and services comprise a larger weight within CPI. The government is focusing on food inflation through administrative measures, including lower MSP hike, release of stocks and restrictions on exports.

Equity Markets

The benchmark Nifty was up 26.65% YoY in FY2015 (21.61% YoY in USD terms). Bulk of the returns came during the first quarter, as expectations built around the Elections and then immediately following the decisive results. The subsequent quarters saw the returns taper, as markets awaited a revival in business cycle and improvement in corporate earnings. Short-term returns (3-Month) were marked by heightened volatility, which picked up in Q4FY2015 vs. previous quarters. Nifty's average P/E in FY2015 was 21.08x, with an increasing trend since the Elections. This is up from the 5-Year historical average of 19.73x. CNX Midcap's average P/E in FY2015 was 18.59x, up from the 5-Year average of 17.15x. The gap between the large-cap and mid-cap indices had broadened in the immediate months after the election results, but

has been closing since Jan 2015 onwards. As and when corporate earnings pick up, valuations should re-rate. But despite tapering returns, FIIs and domestic investors still clocked strong net inflows into equities during that period.

Outlook for FY2016

The outlook for growth has improved modestly on the back of disinflation, real income gains from decline in oil prices, easier financing conditions and some progress on stalled projects. These conditions should augur well for a reinvigoration of private consumption demand. Conditions for growth are slowly improving with easing input cost pressures, supportive monetary conditions and recent measures relating to project approvals, land acquisition, mining and infrastructure.
