The Company continued with its practice of a lean organisation manned by involved and motivated employees with team orientation. The atmosphere encourages learning and informal communication.

Company is having Performance Management System (PMS) to objectively measure the performance of the individual and the organization. The overall remuneration structure is linked with PMS.

To further increase the competence level of the employees, systematic and structured training is provided at different levels, including training on leadership development, communication effectiveness and team working. This has made a significant contribution to Company's business.

Industrial relations were cordial throughout the year under review.

Employee strength as on 31st March, 2013 stood at 512 (31st March, 2012- 547).

INDUSTRY STRUCTURE AND DEVELOPMENTS

Since the Company's principal business is to supply engines for tractors being manufactured by M&M-Swaraj Division, it would be appropriate to take note of developments in the tractor industry.

Despite the lower and varying tractor penetration levels in many states compared to world standards, Indian tractor market is one of the largest markets in the world in terms of sales volume. The domestic tractor market is traditionally segmented by horsepower - the low horsepower 20 HP - 30 HP segment, the mid segment of 30 HP - 40 HP and the higher segment of above 40 HP. Most of the major players cater to all the three segments. However, their relative strengths and market positions differ from segment to segment. The medium and higher HP segments are the most popular and fastest growing segments in the country.

After experiencing robust growth during F10 to mid F12, tractor sales had witnessed demand contraction since November 2011. As observed from the past trends, the Indian Tractor Industry has a cyclical demand pattern and the lower demand trend continued in F13 as well. As a result, the overall industry for the financial year 2012-13 declined by 2% and closed at

5,26,000 tractors. The factors such as firmness in interest rates, increase in diesel prices, subdued demand from non-agricultural segment with no significant pick-up in construction and infrastructure related activities and lower disposable income levels of farmers are the main contributors for the sluggishness in tractor demand.

M&M, which designs, develops, manufactures and markets tractors for Indian and overseas markets is the largest manufacturer of tractors in India and has sustained its market leadership in the Indian tractor market for last 30 years. The consolidated market share of the Farm Equipment Sector of M&M is above 40% of the domestic market.

OUTLOOK AND OPPORTUNITIES

In the backdrop of current scenario, it is expected that while the industry may face challenges in near term, but factors such as government's continuous thrust towards rural development, agri-mechanization supported by higher allocation for agricultural sector augurs well for the tractor industry. Besides, moderate penetration, scarcity of farm labour especially during the sowing season, shortened replacement cycle, healthy credit availability, etc., continue to be the positive drivers for the industry growth. As the industry outlook for the Company's prime customer seems promising, SEL's business prospects appear to remain positive.

THREATS, RISKS & CONCERNS

As a component supplier to M&M & SML Isuzu, SEL would be directly affected by factors impacting tractor industry and commercial vehicle industry. These would include issues like the rain-dependent nature of our agriculture, Government policy on procurement, credit availability, auto regulations, commodity price trends etc.
