## **ITEM NO.9**

The Company has suspended its Hotel operation since March 2020 and has not resumed its operation yet. To generate revenue / income from the idle assets, the main objects are proposed to be altered as the Company looks towards widening the sphere of its existing main business and activities to cover new and emerging areas of business of computer software. Generally, computer software business model has low startup costs and minimal space requirements, especially when adopting a cloud-based approach. By focusing on providing services rather than selling physical products, companies can leverage subscription-based models, remote workforces, and third-party cloud infrastructure to reduce expenses and overhead.

It is also proposed to alter the main objects to enter into new business model with low investment and less infrastructure. These clauses provide a legal framework for the company to engage in a wide range of activities beyond its primary existing business objectives. This flexibility can be invaluable in adapting to changing market conditions and opportunities, allowing the company to thrive and grow while staying within the bounds of the law. The Company owns immovable properties such as land and buildings, which are not expected to be used for the business of the Company in the foreseeable future. In view of the above, your directors are considering new business model as mentioned in the resolutions.

### **The main advantage of the computer software business model**

- Minimal infrastructure: A cloud-based software service model (SaaS) eliminates the need for expensive physical servers and hardware on-site. This drastically reduces capital expenditure and allows a company to start with just a few laptops and an internet connection.

- Remote workforce: By using cloud services, team members can collaborate and work from anywhere, removing the need for a large, expensive physical office space. This saves on rent, utilities, and other costs associated with a physical office.
- Pay-as-you-go model: With a SaaS model, you only pay for the resources you use on a third-party cloud provider's infrastructure (like AWS or Google Cloud), avoiding the high upfront costs of building own data center.
- Reduced hardware investment: The customer is responsible for their own hardware, meaning a company doesn't need to purchase or maintain extensive computer hardware for the clients.
- Focus on innovation: Without the burden of managing physical infrastructure, a company can focus its capital and resources on research, development, and scaling the business.

### **Benefits of the software services business model**

- Scalability: Cloud-based models facilitate quick expansion without significant physical infrastructure investment.
- Recurring revenue: Subscription-based models offer predictable income streams.
- Lower customer risk: SaaS is often less risky for customers due to lower upfront costs.
- Automatic updates: Provider-managed updates reduce customer and company effort.

- A. Two new clauses numbered 9 and 10 will be added to the existing Part III(A) (main objects) to enable the Company to widen the scope of its business activities such computer software.

The alteration of objects clause of the Memorandum of Association is an item required to be transacted by means of postal ballot under the provisions of section 110 of the Companies Act, 2013 read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014. However, in terms of the proviso to section 110 of the Companies Act, 2013 introduced as per the Companies (Amendment) Act, 2017, read with Rules 20 and 22 of the Companies (Companies Management and Administration) Rules, 2014 including any statutory modifications and amendments thereto, approval of shareholders for any item of business required to be transacted through postal ballot may be transacted at a general meeting by a company which is required to provide the facility of voting by electronic means to its shareholders. ## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

### A. INDUSTRY STRUCTURE AND DEVELOPMENTS:

The Indian hospitality sector is one of the fastest-growing industries in the country, making significant contributions to both the economy and employment. As India strengthens its position as a global economic power, the hospitality industry is primed for continued growth. With a total area of 3,287,263 sq. km extending from the snow-covered Himalayan heights to the tropical rain forests of the south, India has a rich cultural and historical heritage, variety in ecology, terrains and places of natural beauty spread across the country. This provides a significant opportunity to fully exploit the potential of the tourism sector. It is irrefutable that the tourist and hospitality industry is becoming a more significant economic force and has the potential to be used as a tool for development. The industry not only drives growth, but it also raises people's standards of living with its ability to provide significant amount of diverse employment opportunities. It promotes environmental preservation, champion's diverse heritage, and bolsters international peace. By 2028, Indian tourism and hospitality is expected to earn US\$ 50.9 billion. Hospitality industry in India will continue to enjoy high occupancy in the range of 70- 75%, inching up from 2024 (68-72%).

### B. OPPORTUNITIES

The hospitality industry in India will be backed by rise in domestic leisure & business travel. Besides other factors such as MICE tourism, destination wedding, transient passengers will also push occupancy. As per ICRA study, 7-9% revenue growth is expected for hospitality sector in 2025.

Domestic tourism is a key driver for the Indian hospitality sector, with domestic tourist visits expected to double over the next six years. Rising disposable income, improved connectivity, through development of air, road and rail travel infrastructure and development of tourist destinations have driven resurgence in domestic travel in India post COVID. Continued push on tourism related infrastructure spending is expected to support growth in air traffic, and domestic passenger traffic is expected to more than double to 693 million in FY2030 from 307 million in FY2024.

Plenty of opportunity in wellness, religious and spiritual tourism in India. As India emerges as a spiritual super house, there will be rise in religious tourism. Hospitality sector in sacred sites such as Prayagraj, Ayodhya, Ajmer, Amritsar, Puri, Madurai, etc. will rise fast.

As per a Euromonitor Report, Indians will take around 5 billion trips by 2030. The positive impact of Indian hospitality industry will cascade into other allied segments such as real estate, food & beverage, logistics, aviation, convention, etc.

India will be a key hub of medical tourism in 2025 backed by affordable treatment cost, improved infrastructure and rise in healthcare service providers. The overall medical tourism market is set to reach USD 13 Billion. Each year, around 2 million patients come to India from 80+ countries for availing quality medical services. India's average medical cost is around 60-80% cheaper than USA and UK which will continue to be a major growth driver.

The India's wellness segment is growing fast and the market will amount to USD 70- 75 billion in 2025. The traditional boundary between vacation, tourism and wellness is blurring. There is rising demand for wellness driven vacations such as yoga retreats, spiritual tours, medication and reiki classes amidst picturesque destinations. Besides general surge in disposable income, factors such as jump in chronic diseases, and

increased demand for introducing positive lifestyle changes are driving the wellness tourism market. Government of India is also fostering growth in the wellness sector through concentrated policy support and financial impetus. It has introduced a separate ministry in the form of AYUSH to support alternate healing. By 2047, the overall tourism industry in India is slated to reach USD 1 trillion.

## **C. SEGMENTWISE PERFORMANCE :**

During the year, the Company has only one reportable business segment as it deals only in Operation and running of Hotels in terms of Ind-AS108 "Operating Segment"

## **D. THREATS, RISKS AND CONCERNS :**

Despite growth in infrastructure development, many parts in India are still marred with poor connectivity & accessibility. Close to 80% of the hospitality market in India is still unorganized. Rise in geopolitical tensions & slowdown in world economy is a cause for concern. Growing threat from the rise in popularity of homestays, rental villas, boutique farm stays, etc .

Availability of suitable land with a clear title, required land use permissions, and end-use restrictions, create limitations for hotel development. Increase in market competition is necessary to absorb the increase in demand from leisure and business travelers, but the inelastic nature of supply growth makes it challenging to timing its opening.

The hotel industry is heavily dependent on a large workforce combined with rising labor costs and scarcity of trained workforce presents a significant challenge in addition to operational challenges. The single largest operating cost in hotels is attributable to Salaries, Wages and Benefits costs, which accounted for 17% of the total revenue of hotels.

The hospitality industry in India depends on not only on the discretionary spend of leisure tourists, but also on the buoyancy in demand from corporate travel – both of which are intrinsically tied to economic performance of the country.

Changes in government policy such as taxation, labor laws, and environmental regulations may require hotels to incur capital / operational costs to comply. Policies relating to foreign investment, tourism promotion, and visa regulations also impact international travel demand.

Rising operational costs in particular energy, utilities, maintenance, as well as supply chain disruptions or an increase in the cost of materials may impact operational efficiency.

## **E. OUTLOOK:**

The Indian hospitality sector is projected to grow at a compound annual growth rate (CAGR) of 10-12% from 2024 to 2025, reaching USD 55 billion by 2025. This growth will be driven by increasing tourism, government support, and infrastructure development, with business travel and emerging tourism segments playing a pivotal role.

India is on track to emerge as a global tourism hub, with significant growth anticipated in domestic and international travel. The government's efforts, such as E-visa facilities and tourism infrastructure improvements, are expected to further bolster the sector's growth.

### Audit Qualification (each audit qualification separately):

#### a. Details of Audit Qualification:

##### i) Going Concern

We draw attention to Note No. 4 of the attached Financial Results for the year ended 31st March 2025. The Company's borrowings were taken over by M/s. RARE Asset Reconstruction Limited ("ARC") commencing from April 1, 2017 and out of the final One-time settlement amount of Rs. 97.32 crores agreed with the ARC, the Company has made a payment of Rs. 60.23 crore upto 31st March 2024 and during the year, the Company has repaid a further sum of Rs.22.29 crore from the funds infused by the Directors and Associate Enterprises of the Company. The company intends to repay the balance to the ARC from the sale of other assets of the Company. In addition, as per the financial statements for the year ended March 31, 2025, the net worth has been eroded indicating the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

Further, we draw attention to Note No. 3, the Company having suspended all business operations and with no revenue being generated, the ability of the Company to repay its debts depends on the quantum of realisation from the sale of Assets, there exists a concern on the ability of the Company continuing as a Going Concern.

##### ii) Pending Confirmation of balance of Outstanding Debt:

Due to non-availability of confirmations in respect of loan taken over by ARC. In the absence of such confirmations, any provisions to be made for the variations in carrying amounts of outstanding balance of debt, cannot be quantified as well as the quantum of adjustment if any, required to be made remains unascertained.

### iii) **Impairment of Assets**

The test for the impairment of the assets tied to the borrowings have not been carried out as only a portion of the assets have been sold at the year end. With the other assets still in the possession of the Company, impairment, if any, shall be quantifiable only on completion of the sale of the assets of the Company and extinguishment of the Debt. Therefore, no loss is recognised on account of potential impairment.

### iv) **Delays in remittance of statutory dues:**

There has been significant delay in the remittance of Tax Deducted at Source, Goods and Service Tax, Value Added tax, Service Tax, Provident Fund and Employees' State Insurance to appropriate authorities. There were no amount outstanding pertaining to the accounting year 2024-25.

Qualified Opinion

Repetitive
- d. For Audit Qualification(s) where the impact is quantified by the auditor, Management's Views:

The Company's account was categorized as NPA by Allahabad Bank and Andhara Bank during the year 2014. In April, 2017, the said Banks assigned the entire debts of the Company along with all underlying security interest, all rights, title & benefits to M/s. RARE Asset Reconstruction Limited (previously known as Raytheon Asset Reconstruction Private Limited) under the applicable provisions of the SARFAESI Act. The Company opted for One-Time Settlement offer with the said ARC and obtained in-principle approval from them during March, 2021 and the final approval has been received.

In view of the above, the Company has remitted Rs.60.23 crores to ARC upto 31st March, 2024, from the disposal / sale of assets of company.

During the year, the Company has remitted Rs.22.29 Crore from the funds infused by the Directors and Associate Enterprises of the Company. Also Interest of Rs.11.37 Crore has been accounted during the year for the period from April 2021 to March 2025 as agreed by the RARE ARC letter dated March 04, 2025.

The revenues of the Velan Greenfields Hotel Tirupur was severely impacted due to the Covid-19 Novel Corona Virus pandemic forcing the closure of operations. With this closure all revenue generating operations of the Company has been suspended. The Company is exploring options of selling a part or all of its revenue generating assets to settle all liabilities. In view of the above, the Company's ability of continuing as a Going concern is dependent on the value that can be generated by the sale of assets and the surplus, if any, available subsequent to the settlement of all liabilities. In view of the uncertainty on the realisable values, the impairment to the value of assets is not ascertainable at this juncture.

As per the final OTS offer provided by the ARC and accepted by the Company, such communication has been considered for the confirmation of the Outstanding Debt.

The Company is taking necessary steps to regularise the Statutory Dues. During the year, the Company has paid dues relating to Provident Fund, Sales Tax, Service Tax and Tax Deducted at sources for earlier years amounting to Rs.54.10 Lacs.

- a) Only a portion of the assets have been sold at the year end. With the other assets still in the possession of the Company, impairment, if any, shall be quantifiable only on completion of the sale of the assets of the Company and extinguishment of the Debt, therefore no loss is recognised on account of potential impairment of Fixed Assets tied to the borrowings.

  - b) In respect of Going Concern, the company's ability to run business as going concern is dependent on the value that can be generated by the sale of assets and the surplus, if any, available subsequent to the settlement of all liabilities.

## ANNEXURE - B TO THE INDEPENDENT AUDITOR'S REPORT

### Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of VELAN HOTELS LIMITED ("the Company") as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

#### Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control

over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## **Inherent Limitations of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

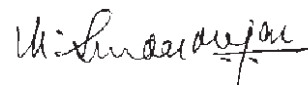

## **Opinion**

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III of the Companies Act, 2013 and Ind AS, based on the nature of products and the time between the acquisition of assets or processing and their realisation in cash and cash accruals.

#### B) Basis of measurement

These financial statements have been prepared on a historical cost convention and on an accrual basis, except for the following material items which have been measured at fair value as required by relevant Ind AS:-

- a) Derivative financial instruments;
- b) Financial instruments classified as fair value through other comprehensive income or fair value through profit or loss; and
- c) The defined benefit asset/(liability) is recognised as the present value of defined benefit obligation less the fair value of plan assets.

#### C) Use of estimates and judgment

The preparation of the financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

- a) **Impairment testing:** Investments in subsidiaries, goodwill and intangible assets are tested for impairment at least annually and when events occur or changes in circumstances indicate that the recoverable amount of the asset or cash generating units to which these pertain is less than its carrying value. The recoverable amount of cash generating units is higher of value-in-use and fair value less cost to dispose. The calculation of value in use of a cash generating unit involves use of significant estimates and assumptions which includes turnover and earnings multiples, growth rates and net margins used to calculate projected future cash flows, risk-adjusted discount rate, future economic and market conditions.
- b) **Deferred taxes:** Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry forwards become deductible. The Company considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of the deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced. the near term if estimates of future taxable income during the carry-forward period are reduced.
- c) **Defined benefit plans and compensated absences:** The cost of the defined benefit plans, compensated absences and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

### 3. Significant Accounting Policies

- i) **Functional and presentation currency :** These financial statements are presented in Indian rupees, the national currency of India, which is the functional currency of the Company.
- ii) **Foreign currency transactions and translation :** Foreign currency transactions and translation Transactions in foreign currency are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at the exchange rates prevailing at the reporting date of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of profit and loss and reported within foreign exchange gains/(losses), net within results of operating activities. Gains/(losses) relating to translation or settlement of borrowings denominated in foreign currency are reported within finance expense. Nonmonetary assets and liabilities denominated in foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. Translation differences on nonmonetary financial assets measured at fair value at the reporting date.
- iii) **Equity**
  - a) **Share capital and share premium**

The authorized share capital of the Company as of March 31, 2025 and March 31, 2024 is 50,00,00,000 divided into 5,00,00,000 equity shares of ` 10 each. Par value of the equity shares is

recorded as share capital and the amount received in excess of par value is classified as share premium.

Every holder of the equity shares, as reflected in the records of the Company as of the date of the shareholder meeting shall have one vote in respect of each share held for all matters submitted to vote in the shareholder meeting.

b) **Revaluation Reserve**

Revaluation reserve amounting to Rs. 5,64,19,070 (March 31, 2024 Rs. 5,70,97,925) is not freely available for distribution.

c) **Retained earnings**

Retained earnings comprises of the Company's undistributed earnings after taxes.

d) **Other comprehensive income**

Changes in the fair value of financial instruments measured at fair value through other comprehensive income and actuarial gains and losses on defined benefit plans are recognized in other comprehensive income (net of taxes), and presented within equity as other comprehensive income.

iv) **Property, plant and equipment**

a) **Recognition and measurement**

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset. General and specific borrowing costs directly attributable to the construction of a qualifying asset are capitalized as part of the cost.

b) **Depreciation**

The Company depreciates property, plant and equipment over the estimated useful life on a straight-line basis from the date the assets are available for use. Assets acquired under finance lease and leasehold improvements are amortized over the shorter of estimated useful life of the asset or the related lease term. Term licenses are amortized over their respective contract term. Freehold land is not depreciated. The estimated useful life of assets are reviewed and where appropriate are adjusted, annually.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably.

The cost of property, plant and equipment not available for use as at each reporting date is disclosed under capital work-in-progress.

v) **Intangible assets**

Intangible assets acquired separately are measured at cost of acquisition. Intangible assets acquired in a business combination are measured at fair value as at the date of acquisition. Following initial recognition,

intangible assets are carried at cost less accumulated amortization and impairment losses, if any.

The amortization of an intangible asset with a finite useful life reflects the manner in which the economic benefit is expected to be generated. The estimated useful life of amortizable intangibles are reviewed and where appropriate are adjusted, annually.

## vi) **Leases**

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date. The arrangement is, or contains a lease if, fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

### a) **Arrangements where the Company is the lessee**

Leases of property, plant and equipment, where the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at lower of the fair value of the leased property and the present value of the minimum lease payments. Lease payments are apportioned between the finance charge and the outstanding liability. The finance charge is allocated to periods during the lease term at a constant periodic rate of interest on the remaining balance of the liability.

Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognized in the statement of profit and loss on a straight-line basis over the lease term.

### b) **Arrangements where the Company is the lessor**

In certain arrangements, the Company recognizes revenue from the sale of products given under finance leases. The Company records gross finance receivables, unearned income and the estimated residual value of the leased equipment on consummation of such leases. Unearned income represents the excess of the gross finance lease receivable plus the estimated residual value over the sales price of the equipment. The Company recognizes unearned income as finance income over the lease term using the effective interest method.

## vii) **Inventories**

Inventories are valued at lower of cost and net realizable value, including necessary provision for obsolescence. Cost includes all direct costs and applicable overheads to bring the goods to present location and condition.

## viii) **Impairment**

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non- financial assets other than goodwill that suffered an impairment are reviewed for

possible reversal of the impairment at the end of each reporting period.

## ix) **Employee benefits**

### a) **Post-employment and pension plans**

The Company participates in various employee benefit plans. These employment benefits are classified as either defined contribution plans or defined benefit plans.

Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial and investment risks fall on the employee.

The expenditure for defined contribution plans is recognized as an expense during the period when the employee provides service.

Under a defined benefit plan, it is the Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks fall on the Company. The present value of the defined benefit obligations is calculated by an independent actuary using the projected unit credit method. All actuarial gains or losses are immediately recognized in other comprehensive income, net of taxes and permanently excluded from profit or loss. Further, the profit or loss will no longer include an expected return on plan assets. Instead net interest recognized in profit or loss is calculated by applying the discount rate used to measure the defined benefit obligation to the net defined benefit liability or asset. The actual return on the plan assets above or below the discount rate is recognized as part of remeasurement of net defined liability or asset through other comprehensive income, net of taxes.

The Company has the following employee benefit plans:

#### A. **Provident fund**

Employees receive benefits from a provident fund, which is a defined benefit plan. The employer and employees each make periodic contributions to the plan. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due.

#### B. **Gratuity**

In accordance with the Payment of Gratuity Act, 1972, applicable for Indian companies, the Company provides for a lump sum payment to eligible employees, at retirement or termination of employment based on the last drawn salary and years of employment with the Company. The Company's obligation in respect of the gratuity plan, which is a defined benefit plan, is provided for based on actuarial valuation using the projected unit credit method. The Company recognizes actuarial gains and losses in other comprehensive income, net of taxes.

### b) **Termination benefits**

Termination benefits are expensed when the Company can no longer withdraw the offer of those benefits.

### c) **Short-term benefits**

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are

recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

**d) Compensated absences**

The employees of the Company are entitled to compensated absences. The employees can carry forward a portion of the unutilized accumulating compensated absences and utilize it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement. The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The Company recognizes accumulated compensated absences based on actuarial valuation using the projected unit credit method.

Non-accumulating compensated absences are recognized in the period in which the absences occur.

**x) Provisions**

Provisions for legal claims, service warranties, volume discounts and returns are recognised when the group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

**xi) Revenue**

Income from Guest Accommodation is recognised on a day to day basis after the Guest Checks into the hotel. Sale of Food and beverage is recognised at the point of serving those items to the guest.

Revenues are shown net of sales tax, value added tax, service tax and Good and Service Tax.

**xii) Borrowing cost**

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. \

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

**xiii) Other income**

Other income comprises interest income on deposits and dividend income.

- a) Interest income is recognized using the effective interest method.
- b) Dividend income is recognized when the right to receive payment is established.

#### **xiv) Income tax**

Income tax comprises current and deferred tax. Income tax expense is recognized in the statement of profit and loss except to the extent it relates to a business combination, or items directly recognized in equity or in other comprehensive income.

##### **a) Current income tax**

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the period. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted as at the reporting date and applicable for the period. The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and liability simultaneously.

##### **b) Deferred income tax**

Deferred income tax is recognized using the balance sheet approach. Deferred income tax assets and liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax assets are recognized to the extent it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized. Deferred income tax liabilities are recognized for all taxable temporary differences except in respect of taxable temporary differences associated with investments in subsidiaries, associates and foreign branches where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Company offsets deferred income tax assets and liabilities, where it has a legally enforceable right to offset current tax assets against current tax liabilities, and they relate to taxes levied by the same taxation authority on either the same taxable entity, or on different taxable entities where there is an intention to settle the current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

#### **xv) Earnings per share**

Basic earnings per share is computed using the weighted average number of equity shares outstanding during the period adjusted for treasury shares held. Diluted earnings per share is computed using the weighted-average number of equity and dilutive equivalent shares outstanding during the period, using the treasury stock method for options and warrants, except where the results would be anti-dilutive.

#### **4. Recent Indian Accounting Standard (Ind AS) pronouncements which are not yet effective**

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

For the year ended March 31, 2025, MCA has notified Ind AS – 117 Insurance Contracts and amendments to Ind AS 116 – Leases, relating to sale and leaseback transactions, applicable to the Company w.e.f. April 1, 2024. The Company has reviewed the new pronouncements and based on its evaluation has determined that it does not have any impact in its financial statements.
