## **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31-03-2022**

### **NOTE 1: Summary Of Significant Accounting Policies**

#### **A. Basis of preparation of financial statements**

These financial statements have been prepared to comply with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on a going concern basis under the historical cost convention on accrual basis. The accounting policies have been consistently applied by the Company unless otherwise stated.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

#### **B. Use of estimates**

The preparation of financial statements in conformity with generally accepted accounting principles requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Differences between actual results and estimated are recognized in the period in which the results are known / materialized.

#### **C. Revenue Recognition**

Revenue from sale of goods is recognized on transfer of significant risks and rewards of ownership of the goods to the buyer. Sales of products are stated net of sales tax, returns, discounts and allowances.

Interest income are recognized on time proportion basis taking into account the amount outstanding and the applicable interest rate except, where the recovery is uncertain, in which case it is accounted for on receipt.

#### **D. Other Income**

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

Dividend is accounted when the right to receive payment is established

#### **E. Fixed Assets**

There are no fixed assets as on the balance sheet date.

#### **F. Depreciation**

As there are no fixed assets, depreciation also not provided.

## **G. Investments**

Investments are classified into long term investments and current investments. Investments which are intended to be held for one year or more are classified as long term investments and investments which are intended to be held for less than one year are classified as current investments. Long term investments are carried at cost less other than any temporary diminution in value, determined separately for each investment. Current investments are carried at lower of cost or fair value. The comparison of cost and fair value is done separately in respect of each category of investment.

## **H. Inventories**

Inventories are stated at the lower of cost or net realizable value. Cost includes product's invoice price, duties, vendor obligation, if any, and other expenses incurred to bring the inventories to their present condition and location. Costs of inventories are determined on the basis of First-In-First-Out ('FIFO') method.

## **I. Miscellaneous Expenditure**

Preliminary expenditures are amortized in the year in which incurred.

## **J. Accounting for Taxation of Income**

Tax expense for the period, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws prevailing in the respective jurisdictions.

Deferred tax is recognized for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognized and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the group reassesses unrecognized deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

## **K. Accounting for Commodity Derivatives**

Commodity Instruments are initially measured at cost, which is the fair value of whatever was paid or received to acquire the financial asset or liability. Transaction costs are included in the initial measurement of financial instruments. Subsequent to initial measurement, at each reporting date, all such instruments are re-measured to fair value (mark-to-market) with gains and losses recognized in the statement of profit and loss immediately. Gains or losses on settlement of Commodity Instruments during the year are recognized in the statement of profit and loss immediately.

## **L. Provisions and Contingent Liabilities**

**Provisions:** Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

**Contingent Liabilities:** Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

## **M. Earnings Per Share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.
