| Product basket               | Multiple products from basic Chemicals to value added chemicals  |
| Customer proximity           | Bulk Consumers situated in nearby area                           |

#### **Major Challenges**

- 1) Contribution & market share of flagship products
  - Ever increasing competition for market share
  - Urgent need for expansions
  - Highly dependent on a single bulk product i.e. Caustic Soda
  - A good product basket but low production capacity of Chlorine based products
- 2) Chlorine disposal major bottleneck
  - Additional in-house consumption to improve capacity utilisation
  - Future projects must also have an add-on project to consume chlorine

#### **Major Challenges**

#### 3) Very high logistics cost

- Bulk commodity products can't be sustained beyond 500 km, if transported by road,
- Uncompetitive in other distant States,
- Both plants located in Caustic soda surplus State of Gujarat
- Pressure on market share compared to M/s. Grasim, which has country-wide presence
- 4) Optimizing Power cost keeping an eye on the power cost of co-producers
  - NG based power plant is costlier than coal based power plants
  - Need to look at coal based Power plant
  - Focus on Renewable energy to bring down the average price of energy basket
