ANNEXURE 'B' TO DIRECTORS' REPORT FOR THE YEAR ENDED 31ST MARCH, 2017

MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW OF THE ECONOMY

As in the previous year, during the year under review (2016-17), the World Economy faced uncertainty due to political and economic upheavals in major economies and protectionist policies of leading economies aimed at boosting their domestic markets.

During the year, there was some recovery in world trade. But, with almost all advanced and emerging economies reporting weak economic activity, Global growth is estimated to have remained flat at 3.1 % in 2016.

INDIAN ECONOMY WEATHERS DEMONETISATION

In the first half of last fiscal, GDP growth sustained at over 7%. Global agencies like IMF and World Bank also viewed India a "bright spot", expecting it to record the highest GDP growth among major economies, on the back of stable macro-economic conditions.

As the economy was awaiting a broad based recovery and revival of private investment, the Government announced on November 8, 2016 demonetisation of Rs.500 and Rs.1000 notes from circulation.

The drastic measure led to a cash crunch, albeit temporarily, affecting economic activity and deferment of private consumption. This led to Global agencies like IMF predicting one per cent fall in GDP growth to 6.6 % in 2016-17, mainly due to temporary shock to consumption.

However, following the remonetisation measures undertaken by RBI and restoration of liquidity with new currency notes, the economic activity started slowly picking up. Official estimates by Central Statistical Office (CSO) showed that the economy had weathered the note ban storm with GDP growth marginally slowing down to 7% in the third quarter (Oct- Dec 2016).

The overall growth for last year is estimated to be slightly lower at 7.1% against the earlier projected growth of 7.6% before demonetisation. Economic Survey has pegged the growth to be lower at 6.5% for 2016-17 against 7.6% in the previous year.

SECTORAL PERFORMANCE

Buoyed by normal rainfall during South West monsoon season, agriculture and allied activity is estimated to have posted a higher growth of 4.1% last year against a mere 1.5% in 2015-16. At the same time, the deficit rainfall during the North East Monsoon season severely affected cultivation of crops and led to drought conditions in Tamil Nadu, Kerala and Southern Karnataka.

India's industrial output, as measured by the index of industrial production (IIP), recorded subdued growth for most part of last year. On a low base, it registered a sharp growth of 5.7% in November 2016. It rose to 2.7% in January, apparently shrugging off the impact of demonetization. However, on a cumulative basis, industrial growth during 2016-17 is estimated to have moderated to 5.2% against 7.4% in the previous year mainly due to the contraction in manufacturing, mining, capital goods and construction sectors.

The combined growth of eight core sectors including cement (which account for nearly 38% of the weight of items included in IIP), is estimated to have slightly expanded by 4.5% during 2016-17 as against 4% in the previous year.

It was the most challenging year for the cement sector mainly due to the decline in the launch of new housing projects in major cities affecting construction activity. According to official estimates, during 2016-17, cement industry witnessed a negative growth of 1.29% in terms of production over 2015-16. The industry produced 279.81 million tonnes of cement last year compared to 283.46 million tonnes in the previous year. The industry posted a positive growth in the first two quarters of last year but recorded negative growth in the next two quarters.

Saddled with high bad debt and weak corporate demand, credit growth plunged to a six decade low of 5% during 2016-17 against 10.7% year ago. With weak demand affecting capacity utilisation in a number of industries, there was delay in the revival of fresh investments in the private sector.

Growth in the services sector, which was driving the high GDP growth in the past, is estimated to have moderated to 8.8% last year from 8.9% growth clocked in 2015-16. The overall Gross Value Added (GVA) is estimated at 7% against 7.2% in 2015-16.

EXPORTS / IMPORTS

India's merchandise exports recovered from second half of last year to post double digit growth in February and March 2017.

Overall exports during 2016-17 was US\$ 274645.10 Million (Rs.1841314.39 crore) against US\$ 262290.11 Million (Rs.1716377.99 crore), registering a growth of 4.71 per cent in Dollar terms and 7.28 per cent in Rupee terms over the previous year.

On the other, the import during 2016-17 was US\$ 380367.65 Million (Rs.2550926.19 crore) against US\$ 381006.64 Million (Rs.2490298.03 crore), registering a negative growth of 0.17 per cent in Dollar terms and up by 2.43 per cent in Rupee terms over the previous year.

India's foreign exchange reserves surged by \$2.671 billion to \$366.781 billion during the year on account of increase in foreign currency assets. The Current account deficit, the gap between inflows and outflows, declined to 0.3% of GDP in the first half of last year. It jumped to a four quarter high of 1.4% of GDP in December 2016.

During April-December, CAD narrowed to 0.7% of GDP on the back of contraction in trade deficit due to steep fall in crude prices. The nominal value of Rupee, which was depreciating through most of FY 2017, has started appreciating in the last two months of financial year.

FISCAL DEFICIT

Fiscal deficit, the gap between expenditure and revenue for the entire fiscal, has been pegged at Rs.5.33 lakh crore or 3.5 per cent of GDP in 2016-17. The Government has retained its fiscal deficit target at 3.5% despite the shortfall in proceeds from disinvestment and spectrum auctions. With fiscal discipline, targeting subsidies and higher tax collections, it is hoped to contain it at 3.2% in the current year and achieve the fiscal consolidation goal of 3% by next fiscal.

INFLATION

During the year, inflationary pressure was seen building up. The annual rate of inflation in terms of Wholesale Price Index (WPI) stood at 5.53% as compared to 5.25% in the previous year. Inflation accelerated to its highest reading since November 2013 and it stood at 6.55% in February 2017. This was due to substantial increase in the prices of fuel & power and food inflation. WPI eased to 5.7% in March 2017.

Consumer Price Index (CPI) too edged up and the overall average for April-February 2017 was 4.6%. But, it is expected to remain within RBI mandated rate of 2 to 6%.

CEMENT INDUSTRY

The Cement Industry continued to reel under pressure with practically nil growth in the consumption during the year, following a very meagre growth in the previous year. While, the industry has created a capacity of over 375 mn.tons/annum, according to DIPP, the production during the year was only 280 mn.tons, with an effective capacity utilisation of around 74-75%. As per the publication by DIPP, the industry had witnessed a negative growth of 1.2% during the year under review.

While, the cement plants in the North, West and Central regions of the country were able to clock a capacity utilisation of over 80%, according to the information available, the industry in the South, had a very low capacity utilisation of sub-60%. It has to be seen that the industry had a growth of over 5% in the first half of the year, while there was a negative growth in the second half, caused partially by the demonetisation exercise. With remonetisation having taken place, this trend is expected to reverse.

South has shown a growth of 7% in production during the year, despite a flat growth in the 4th quarter, driven primarily by the increase in the consumption in Andhra Pradesh, Telangana and Karnataka.

The price of petroleum products and fuel, which reached its lowest ebb in the first quarter of the year, started firming-up in the third quarter and increased substantially in the fourth quarter of the year, affecting the industry's margin considerably in this tight market situation.

The deficit monsoon during the year and near drought-like situation in the Southern states, together with restrictions on the availability of sand, also had its toll on the cement consumption.

With major agencies predicting a smart revival of the economy in 2017 and with several important pieces of legislation put in place to promote recovery and growth like Housing for all, Smart-cities, Broadening financial inclusion and with the passage of GST, it is expected that the overall cement demand in the country is likely to grow.

The industry, on its part, is also not lagging behind in its initiatives in adopting improved manufacturing technology, reducing power consumption, increasing the utilisation of blending materials & waste, thereby contributing for the environment.

COMPANY PERFORMANCE

The performance of the company for the current year includes merged entity of Trinetra Cement Limited and is presented as a whole and hence are not comparable with previous year:

	In Lakh Ts	
	2016-17 (merged)	2015-16
Clinker production	81.91	64.83
Cement production	108.14	84.31
Cement sales	108.36	84.72
Clinker sales	2.03	2.06
Total overall sales	110.39	86.78

The performance of the Company was better than peers in the South, with an improvement in the clinker production by 9.80% on a combined basis. The Company also explored export route better with improvement in the overall export in clinker and cement at 4.84 Lakh tons, as compared to 3.25 Lakh tons. The overall volume of cement and clinker including the merged unit has improved as above, registering a growth of 10.1% on a combined basis. The capacity utilisation of the company was at 70%, which was better than the industry average in the South. The performance of the company would have been better but for the disruption in consumption caused by cyclone Vardah and the prolonged agitations for Jallikattu affecting the normal activities in Tamilnadu during the last quarter.

With poor growth in the markets, the Company expanded its marketing horizon to West, East and Central markets of India, thereby ensuring additional marginal contribution. Despite operating at lower capacity level, the operating parameters and the power consumption were kept under check during the year. The Company also enhanced the usage of cost-effective petcoke in the overall fuel mix to 73% from 23% in the previous year. The blending efficiency has also improved during the year under review, paving the way for reduction in the operating cost and reduced emission levels. The selling price of cement, which remained firm in the first half of the year, showed aberrations in the second half of the year, resulting in the overall net realisation coming down by 7% during the year on a comparable basis.

COST MITIGATION MEASURES / OTHER IMPROVEMENT MEASURES:

The Company is committed to the conservation of biodiversity and in line with its philosophy of sustainable operations; it has taken lot of proactive steps.

- Additional bag filters have been provided replacing the ESPs to comply with the revised pollution norms relating to emissions.
- Through concerted efforts for reducing carbon emission, the clinker factor has been continuously improved through higher blending using fly-ash and other additives and the ratio has improved by 2% during the year under review.
- The waste generated from its thermal power plants at units by way of fly ash and others have also been recycled into the operations to reduce cost and to conserve atmosphere.
- The Company has started using low cost petcoke at increased levels after making necessary modifications, which has substantially reduced the cost of operations.
- The overall clinker output per day has further improved at Sankarnagar and Sankari during the year under review.
- Despite higher proportion of consumption from traditionally higher power consuming units, the overall power consumption was maintained at the last year levels with substantial reduction in power consumption in two of the Tamil Nadu units.
- The average cost of power was also brought down with sizable increase in the usage of power from its own thermal power plants with higher capacity utilization of the same.
- The Company during the year used 8030 lakh units of power from its various captive power sources, which constituted around 81% of its total power consumption. The operating efficiency of the thermal power plants has also improved during the year under review.
- The Company has also got the licenses to produce value added products like oil well cement and sleeper cement, which will also cater to the niche markets yielding higher contribution.

GREEN ENERGY AND CLEAN DEVELOPMENT MECHANISM:

- The Company had proactively installed wind mills of a capacity of 18.65 MW in Tamil Nadu, which have generated a quantum of 291 lakh units during the year, which has been used by the Company's plants in Tamil Nadu, which could be offset against the renewable energy purchase obligations.
- The unique waste heat recovery system at Vishnupuram also has contributed with 555 lakh units of power (572 lakh units), which was consumed by the Vishnupuram power plant at the cheapest cost.
- As part of low carbon technology road map for the Indian cement industry, the Company has been continuously striving to reduce the clinker content in cement and has also been on the lookout for other varieties of cement entailing minimum clinker usage.
- As part of emission control, the Company has been changing all its Electro Static Precipitators (ESPs) to high efficiency bag filters and Continuous Ambient Air Quality System Monitors have also been located at the strategic locations of its plants.
- Continuous online reporting of the emission levels are also being uploaded on Central and State Pollution Control Board's websites.
- The Company has also taken various steps for upgradation / modification of pollution control systems for controlling the fugitive emissions through Dust Extraction / Suppression Systems.
- The Company is committed to the cause of sustainable development through slew of measures taken for improvement of environment, biodiversity, mine rehabilitation and also for greener initiatives in and around all its plants.

HEALTH AND SAFETY

The Company has a well-defined Safety, Health and Environment (SHE) Policy, which inter alia, contain the objectives, ownership and accountability. For shop floor employees and senior management executives' safety, frequent workshops on safety and health check-ups are being conducted to increase awareness. Frequent inspections are being carried out by respective statutory authorities on electrical and instrumentation safety to comply with the statutory requirements and to adopt the best practices.

Personal protective equipments have been provided for all the executives and staff and workers and stringent rules have been framed for strict adherence to this. Number of specialised outside programmes have been organised to enhance the health and safety consciousness, risk assessment, accident investigations etc. Daily safety prayer meetings are also conducted in a systematic way at all the locations.

Medical facilities have also been upgraded at all the plant locations to ensure primary level treatment, in addition to first aid and emergency care, duly supervised by qualified medical practitioners with ambulance at their end for emergency. The employee profile in the data system is also being upgraded to include the basic health details, blood group and the frequency of check-ups, through which the health of the employees is monitored in a systematic way.

Health and safety programmes are not necessarily confined to the employees and workers but also extends to the nearby villages as part of CSR. Frequent health check-up programmes are conducted to improve the health and hygiene as well as the welfare of the people through eye screening, supply of free spectacles / free cataract operations / hearing aids / medical and diabetes camps / drunkard rehabilitation schemes to name a few.

BUSINESS RISKS AND OPPORTUNITIES

As mentioned earlier, the Company has got a detailed Risk Management Policy, which is well-defined to cover the various business risks and the mitigation process. The Board of Directors of the Company periodically review the risks and the action plans. The Policy encompasses all risks covering project, competition, raw materials, occupational health, hygiene, environmental, regulatory rules and operational risk of the business.

The primary risk faced by the industry in South, in particular, is the poor demand for cement in the last few years. From a level of steady growth of 8-9% in demand over 2 decades, the same had come down to practically nil and negative growth in the last 2 years and a marginal 6-7% growth during the current year in the South, basically caused by the poor economic growth, political disturbances and deficit in rainfall. However, with the Government push on infrastructure and with the massive housing scheme launched together with the forecast of IMF and RBI of a better tomorrow, it is expected that the economic growth will rebound from 2017, which in turn is expected to pave way for a better growth in demand for cement.

The Industry to a great extent depends on imported fuel and securing this fuel for the future is another risk factor, which needs to be addressed. Coal and petcoke are the main fuels used by the industry and the availability of the same of usable quality in India is very less. The international prices of such fuels are fluctuating so violently affecting the bottom line of the industry. The prices are also continuously on the upward trend since the second half of the last fiscal. The Company has partly mitigated this risk by securing mining rights in Indonesia, which will be used mainly in its thermal power plants for generation of power.

On the raw materials front, the non-availability of good quality gypsum at reasonable costs within the vicinity of the plants also leads to dependency on imported gypsum, the price of which is also subject to variations. The Company is sufficiently secured against this risk through contracts with nearby fertilizer plants for usage of its by-product chemical gypsum.

Ensuring raw material security is also a bigger challenge for the industry, as the current changes in the MMDR Act has complicated the process of procurement / mining of limestone, which necessitates securing the same through an auction. The Company has got adequate limestone reserves located nearer to the cement plants to take care of the requirements for the next several decades. The Company is also continuously scouting for additional availability of limestone to enhance the long-term security, taking into account, the future expansions at appropriate times.

To ensure continuous availability of fly-ash, the Company has taken proactive steps in installing collecting systems at the State-owned thermal plants situated near cement plants. However, the fluctuations in the price of fly-ash fixed by such thermal power plants is a risk and is expected to be revenue neutral with the passing of the same to the consumers.

Frequent fluctuations in the rupee-dollar exchange rate is also another cause for concern, as it increases the import burden of fuels. A portion of the same is mitigated through earnings from exports and the Company has also covered this through proper hedging mechanism at appropriate times.

Availability of continuous and quality power supply in the Southern grid has also been a concern for many years continuously and the Company has, in addition to the gas-based power plant at Ramanathapuram, Tamil Nadu, installed its own thermal plant in Tamil Nadu and Telangana to cater to its requirements. The unique waste heat recovery system to generate power from waste heat for 8.5 MW is also in place at its Vishnupuram plant. Besides the above, the Company has got the right to use the power from APGPCL for 21 MW and has installed wind mills for a capacity of 18.65 MW, which also supplement the power availability.

Import of cement into the country without any customs duty is also a risk factor. However given the present logistics costs and the handling costs in the ports, the same has not been experienced as a big risk, except in border States of India.

Another big risk for the industry is the logistics cost, which is fluctuating frequently. With the annual bout of increase by railways and with frequent fluctuations in the price of petroleum products, the logistics costs are varying widely throughout the year. The Company has developed dedicated fleet of transporters to ensure continuous availability at steady rates and also has got a small fleet of vehicles to cater to the needy areas in times of emergency. The Company judiciously uses the rail transport based on the cost economics.

Change in government policies / sudden action by government like demonetisation are also the external risk factors which are likely to have its impact on cement demand.

Annexure B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of The India Cements limited ("the Company") as of 31 March 2017 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Annexure - A to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated Ind AS financial statements of the Holding Company as of and for the year ended 31 March 2017, we have audited the internal financial controls over financial reporting of The India Cements Limited ("hereinafter referred to as "the Holding Company") and its subsidiaries, associates, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Holding Company, its subsidiary companies, associates which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Holding Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Consolidated Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Holding Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not to be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company, its subsidiary companies which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. As regards the associate companies where consolidation is based on financial statements prepared by management we express our inability to comment on the adequacy and operating effectiveness of internal financial controls over financial reporting.
