MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY OVERVIEW AND OUTLOOK

The textiles industry in India enjoys a distinctive position due to the pivotal role it plays by way of contribution to industrial output, employment generation and export earnings of the country. The industry currently contributes about 14 per cent to industrial production, 4 per cent to GDP, and 17 per cent to the country's export earnings, according to the Annual Report 2010-11 of the Ministry of Textiles. The industry accounts for nearly 12 per cent share of the country's total exports.

India is potentially one of the strongest emerging global destination for not only cotton bath and accent rugs but also synthetic and woolen product. Large Indian manufacturers have realized the potential of influencing a shift in the USD 400 million bath rug business. With the anticipated global shift of rug manufacturing to the East, India is currently among the first countries to have perceived this shift and already has world class manufacturing units in place with capacities matching the requirement of global retailers.

FTL's key export markets are US and UK, which together constitutes 79% of the total exports. To expand the markets in US and UK, FTL has increased its manufacturing capacities by optimum utilization of existing plant & machinery. With the Research & Development activities in design development, quality standardization and innovation in features of various products, the company is confident to create new markets to its products and to grab every new opportunity in the home textile segment.

OPPORTUNITIES, CHALLENGES AND THREATS

The Union textile ministry's Technology Upgradation Fund Scheme (TUFS), discontinued in June 2010, has been relaunched in a restructured form. The revised scheme has been extended till March 31 2012. The scheme facilitates increased productivity, cost and waste reduction and improved quality across the value chain. To ensure optimum value addition across the chain, the scheme has been reintroduced to channelise the investments towards hitherto low-focus areas.

The interest subvention of 2% on pre and post shipment credit announced to support the exporters during the slowdown owing to the crisis came to an end in March 2011. However, the recent reports opined that the government is extending the same till March 2012. Further, DEPB scheme is also coming to an end on 30.09.2011 and exporters are hoping that the government would evolve an alternate scheme that would support exports.

Rising raw material costs and oil prices will also have an adverse effect on the exporters. The textile sector is facing the heat due to surging cotton and yarn prices. FTL is implementing various cost reduction strategies and cost control measures to face the adverse effects of high raw material cost. FTL is identifying the key areas where the measures can be implemented and cost can be controlled. The effective implementation of these measures will enable the company to face the global competition and offer its products at competitive prices.
