Management Discussion and Analysis

Your Company, Kisan Mouldings Limited (“KML”) operates in diverse but integrated segments of the Plastic Piping value chain. It has established its position as the manufacturer of multiple applications of pipes for water supply, sanitation, sewerage, construction, cable ducting, drinking water, tube wells, submersible pumps and other polymer products for various uses. The adaptability of plastic pipe systems has made it a preferred choice for a wide range of applications for Water Management, Irrigation, Water Distribution and Sewage Disposal Systems and other industrial applications.

INDUSTRY STRUCTURE AND DEVELOPMENTS:

India’s plastics industry is projected to grow dramatically in the coming years. There is a huge potential to grow business not only for catering to domestic demand but also for catering to global demand of plastics products. Translating the expected growth into incremental demand, it is obvious that the country will remain one of the largest sources of additional demand for almost all kinds of plastics and plastics products for major usages i.e. domestic, industrial and agriculture.

Polymer consumption in the country has witnessed a growth in the year under review but there was tremendous volatility in the Polymer prices during the preceding year, owing to the drastic changes in crude prices. Such price fluctuations have affected the growth in the consumption of Plastics in country’s economy. It also has put pressure on operating profit margins of your Company, and the industry as a whole.

BUSINESS PERFORMANCE/OPPORTUNITIES AND THREATS:

The Company has experienced a reduction of sales of about 16% in terms of Value. From a segmental point of view, Agricultural PVC Pipes have declined by over 30% in terms of Value, while the construction segments – CPVC, ASTM and SWR Pipes and Fittings had no change from FY13-14. The relatively better performance of the construction segment is in line with the Company policy of focusing on this area of the market. Due to the drop in sales and the relative fixed nature of expenses, the operating margins (EBITDA) of the Company were at 3.7%.

Despite the aforementioned performance, the stakeholders of your Company remain confident in the potential for revival. Therefore we expect double digit growth in line with the industry in FY2015-16.

FUTURE OUTLOOK:

PVC pipes and fittings market in India has grown at a CAGR of 12.5% during the period from FY’2009-FY’2014. In the past few years, government of India has initiated many new projects and investments in the irrigation sector. The focus of the government is on rural water management, which will be fulfilled only when there will be proper infrastructure for the transportation of water to the end-user. This factor will remain as one of the major drivers for the growth of PVC pipe industry in the Country along with the expansion of housing sector and increasing demand for oil and gas transportation.

Your Company is therefore operating with focused efforts on cost control, reduction in cycle times, economies of scale, improvement on operational efficiency and efficient Working Capital Management Program. Timely delivery has reaffirmed the self-dependable image created by the Company in the market.

KML has decided to restructure its manufacturing footprint and is now focusing on reallocating capacities from various units to the core units in Tarapur and Tumkur. This will allow for lower order completion times and better economies of scale.

RISKS AND CONCERNS

The Company is exposed to the financial market risks from changes in rate of interest and inflation. The volatile movements in exchange rates are caused by major geo-political developments besides mere economic and financial issues. These factors are beyond the control of your Company.
