The Company is also finding new avenues in the international market also and the work in this area is in advanced stage.

(e) Risks and concerns. Risks, liabilities and losses are part and parcel of any industry and need to be tackled through well forecasted strategies and actions. To mitigate and avoid risks in the current scenario, the Company is focusing on shifting API to Formulation business and also improving its market access for the existing products.

Besides, the risks in Domestic market there are various risks in the International markets as well, an important one being regulatory risk, Plant inspections, vendor approvals etc.

NOTE NO. 1

Significant Accounting Policies

(i) Basis Of Preparation

- a) The Consolidated Financial Statements are prepared in accordance with Accounting Standard (AS) 21 on consolidated financial statements notified pursuant to the Companies (Accounting Standards) Rules, 2006 (as amended).
- b) All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule VI to the Act. Based on the nature of services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current – noncurrent classification of assets and liabilities.
- c) The Consolidated Financial Statements have been prepared and presented in accordance with the generally accepted accounting principles in India. (Indian GAAP) under the historical cost convention on an accrual basis. The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 2013.
- d) The Consolidated Financial Statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented, to the extent possible, in the same manner as the Company's separate financial statements.
- e) Interest in Joint Ventures have been accounted by using the proportionate consolidation method as per Accounting Standard 27 - "Financial Reporting of interests in Joint Ventures" notified by Companies (Accounting Standards) Rules, 2006 (as amended).

f) Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses and the disclosure of contingent liabilities on the date of the financial statements. Management believes that the estimates made in the preparation of the financial statements are prudent and reasonable. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to accounting estimates is recognized prospectively in current and future periods.

g) Tangible fixed assets and depreciation:

Tangible fixed assets:

Tangible fixed assets are carried at cost of acquisition or construction less accumulated depreciation. The cost of an item of tangible fixed asset comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditures related to an item of tangible fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. Tangible asset is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Tangible fixed assets under construction are disclosed as capital

work in progress. Losses arising from retirement and gains or losses arising from disposal of an tangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss.

Intangible fixed assets:

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at its cost less any accumulated amortization and accumulated impairment loss.

Subsequent expenditure is capitalized only when it increases the future economic benefits from the specific asset to which it relates. An intangible asset is derecognized on disposal or when no future economic benefits are expected from its use and disposal.

Losses arising from retirement and gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss.

Depreciation / amortisation:

Depreciation is provided on straight line method over the estimated useful life of each asset as determined by the management. The rates of depreciation prescribed in Schedule II of the Companies Act, 2013 are considered at the minimum rates. If the management's estimate of the useful life of a fixed asset at the time of acquisition of the asset or of the remaining useful life on a subsequent review is shorter than the envisaged in the aforesaid schedule, depreciation is provided at a higher rate based on the management's estimate of the useful life/remaining useful life.

In case of Richter Themis Medicare (India) Private Limited, a Joint Venture Company which is providing the depreciation at the following rates on straight line method which are higher than the rates specified in Schedule II of the Companies Act, 2013 based on the useful life as determined by the management:

Assets	Periods / Rate
Machinery and Equipment: On Single Shift	5.00%
Office Equipment, Furniture & Fixture	15.00%
Vehicles	20.00%
Computer	20.00%
Leasehold land	Over the lease period.
Intangible assets - Technology Transfer Fees	over the Agreement period
	(5 Years)

Depreciation is provided on a pro-rata basis i.e. from the date on which asset is ready for use.

Depreciation on assets other than Trademarks is provided at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013.

Depreciation/amortization for the year is recognized in the statement of profit and loss.

Losses arising from retirement or gains or losses arising from disposal of fixed assets which are carried at cost are recognized in the statement of profit and loss.

h) Impairment of assets

Impairment loss, if any, is provided to the extent, the carrying amount of assets exceeds their recoverable amount. The recoverable amount is the higher of an asset's net selling price and its value

in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

Assessment is done at each balance sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have decreased.

i) Borrowing costs

Borrowing cost directly attributable to the acquisition or construction of qualifying assets are capitalized till the month in which the asset is ready to use, as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which these are incurred.

j) Investments

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long term investments.

Long-term investments are carried at cost. Provision for diminution is made to recognize a decline, other than temporary in value of long-term investments and is determined separately for each individual investment. Current investments are carried at lower of cost and fair value, computed separately in respect of each category of investment.

k) Inventories

Inventories which comprise raw materials, packing materials, work-in-progress, finished goods, stock-in-trade, stores and spares, and loose tools are carried at the lower of cost and net realizable value.

Cost of inventories comprises all costs of purchase, costs of conversion and other cost incurred in bringing the inventories to their present location and condition.

In determining the cost, weighted average cost method is used. In the case of manufactured inventories and work-in-progress, fixed production overheads are allocated on the basis of normal capacity of production facilities.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and estimated costs necessary to make the sale.

The net realizable value of work-in-progress is determined with reference to the selling prices of related finished products. Raw materials and other supplies held for use in production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realizable value. The comparison of cost and net realizable value is made on an item-by-item basis.

l) Cash and cash equivalents

Cash and cash equivalents include cash in hand and demand deposits with banks with original maturities of three months or less.

m) Revenue recognition

(i) Revenue from sale of goods in the course of ordinary activities is recognized when property in the goods or all significant risks and rewards of their ownership are transferred to the customer and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods and regarding its collection. The amount recognized as revenue is exclusive of sales tax, value added taxes (VAT) and service tax, and is net of returns, trade discounts and quantity.

(ii) Interest income is recognized on time proportion basis after taking into account the amount outstanding and the interest rate applicable.

(iii) Dividend income is recognized when the right to receive payment is established.

n) Research and Development

Revenue expenditure on research and development is recognized as expense in the year in which it is incurred and the expenditure on capital assets is depreciated over the useful lives of the assets.

o) Foreign currency transactions

(i) The Company is exposed to currency fluctuations on foreign currency transactions. Transactions denominated in foreign currency are recorded at the exchange rate prevailing on the date of transactions. Exchange differences arising on foreign exchange transactions settled during the year are recognized in the statement of profit and loss of the year.

Translation

Monetary assets and liabilities in foreign currency, which are outstanding as at the year-end, are translated at the year-end at the closing exchange rate and the resultant exchange differences are recognized in the statement of profit and loss. Non monetary items are stated in the balance sheet using the exchange rate at the date of the transaction.

(ii) Foreign currency exposure in respect of Long Term Foreign currency Monetary items, for financing fixed assets, outstanding at the close of the financial year are revalored at the contracted and /or appropriate exchange rates at the close of the year. The gain or loss due to decrease / increase in Rupee liability due to fluctuation in rate of exchange is recognized in the Profit and Loss Account.

(iii) Though the accounting policy detailed in (i) and (ii) above have been consistently followed in terms with the Accounting Standard 11, the policy followed in current year retrospectively w.e.f. 1st April, 2007, has been overridden by an amendment to the aforementioned accounting standard for limited period of time.

p) Employee benefits

In case of Defined Contribution plans the Company's contributions to these plans are charged to the statement of Profit and Loss as incurred. The Company's provident fund, gratuity and leave wages are defined benefit plans. The Company maintains gratuity fund with a separate trust formed by the Company, to which contributions are made on an annual basis. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation at the balance sheet date using the Projected Unit Credit Method by an independent actuary, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the financial obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans are based on the market yields on Government securities as at the balance sheet date. Actuarial gains and losses are recognized immediately in the statement of profit and loss.

q) Income taxes

Current tax is determined as the amount of tax payable in respect of taxable income for the period. Deferred tax is recognized, subject to the consideration of prudence in respect of deferred tax assets, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and deferred tax liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date.

Deferred tax assets are recognized to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonably/virtually certain (as the case may be) to be realized.

r) Provision and contingent liabilities

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources, when there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

s) Earning per share

Basic earnings per share is calculated by dividing the Net Profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

“Annexure B” to the Independent Auditor’s Report of even date on the Standalone Financial Statements of Themis Medicare Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of

Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **Themis Medicare Limited** (“the Company”) as of March 31, 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.”] These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance

Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the Standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets

of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”].

NOTE NO. 1

Significant Accounting Policies

(a) Basis of preparation of financial statements:

These financial statements have been prepared and presented on the accrual basis of accounting and comply with the Accounting Standards prescribed in the Companies (Accounting Standards) Rules, 2006 issued by the Central Government, the relevant provisions of the Companies Act, 2013 and other accounting principles generally accepted in India, to the extent applicable.

(b) Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses and the disclosure of contingent liabilities on the date of the financial statements. Management believes that the estimates made in the preparation of the financial statements are prudent and reasonable. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to accounting estimates is recognized prospectively in current and future periods.

(c) Current-non-current classification:

All assets and liabilities are classified into current and non-current.

Assets

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is expected to be realized within 12 months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets.

All other assets are classified as non-current.

Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is due to be settled within 12 months after the reporting date; or
- the company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Current liabilities include current portion of non-current financial liabilities.

All other liabilities are classified as non-current.

(d) Tangible fixed assets and depreciation:***Tangible fixed assets:***

Tangible fixed assets are carried at cost of acquisition or construction less accumulated depreciation. The cost of an item of tangible fixed asset comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditures related to an item of tangible fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. Tangible asset is derecognized on disposal or when no future economic benefits are expected from its use of disposal.

Tangible fixed assets under construction are disclosed as capital work in progress.

Losses arising from retirement and gains or losses arising from disposal of an tangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss.

Intangible fixed assets:

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at its cost less any accumulated amortization and accumulated impairment loss.

Subsequent expenditure is capitalized only when it increases the future economic benefits from the specific asset to which it relates. An intangible asset is derecognized on disposal or when no future economic benefits are expected from its use and disposal.

Losses arising from retirement and gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss

Depreciation/amortisation:

Depreciation is provided on straight line method over the estimated useful life of each asset as determined by the management. The rates of depreciation prescribed in Schedule II of the Companies Act, 2013 are considered at the minimum rates. If the management's estimate of the useful life of a fixed asset at the time of acquisition of the asset or of the remaining useful life on a subsequent review is shorter than the envisaged in the aforesaid schedule, depreciation is provided at a higher rate based on the management's estimate of the useful life/remaining useful life.

Depreciation is provided on a pro-rata basis i.e. from the date on which asset is ready for use.

Depreciation on assets other than Trademarks is provided at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013.

Depreciation/amortization for the year is recognized in the statement of profit and loss.

Losses arising from retirement or gains or losses arising from disposal of fixed assets which are carried at cost are recognized in the statement of profit and loss.

(e) Borrowing costs:

Borrowing cost directly attributable to the acquisition or construction of qualifying assets are capitalized till the month in which the asset is ready to use, as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which these are incurred.

(f) Impairment of assets:

Impairment loss, if any, is provided to the extent, the carrying amount of assets exceeds their recoverable amount. The recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is done at each balance sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exists or may have decreased.

(g) Investments:

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long term investments.

Long-term investments are carried at cost. Provision for diminution is made to recognize a decline, other than temporary in value of long-term investments and is determined separately for each individual investment. Current investments are carried at lower of cost and fair value, computed separately in respect of each category of investment.

(h) Inventories:

Inventories which comprise raw materials, packing materials, work-in-progress, finished goods, stock-in-trade, stores and spares, and loose tools are carried at the lower of cost and net realizable value.

Cost of inventories comprises all costs of purchase, costs of conversion and other cost incurred in bringing the inventories to their present location and condition.

In determining the cost, weighted average cost method is used. In the case of manufactured inventories and work-in-progress, fixed production overheads are allocated on the basis of normal capacity of production facilities.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and estimated costs necessary to make the sale.

The net realizable value of work-in-progress is determined with reference to the selling prices of related finished products. Raw materials and other supplies held for use in production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realizable value.

The comparison of cost and net realizable value is made on an item-by-item basis.

(i) Foreign currency transactions:

- i. The Company is exposed to currency fluctuations on foreign currency transactions. Transactions denominated in foreign currency are recorded at the exchange rate prevailing on the date of transactions.

Exchange differences arising on foreign exchange transactions settled during the year are recognized in the statement of profit and loss of the year.

Translation

Monetary assets and liabilities in foreign currency, which are outstanding as at the year-end, are translated at the year-end at the closing exchange rate and the resultant exchange differences are recognized in the statement of profit and loss. Non monetary items are stated in the balance sheet using the exchange rate at the date of the transaction.

- ii. Foreign currency exposure in respect of Long Term Foreign currency Monetary items, for financing fixed assets, outstanding at the close of the financial year are revalorized at the contracted and /or appropriate exchange rates at the close of the year. The gain or loss due to decrease / increase in Rupee liability due to fluctuation in rate of exchange is recognized in the Profit and Loss Account.

- iii. Though the accounting policy detailed in (i) and (ii) above have been consistently followed in terms with the Accounting Standard 11, the policy followed in current year retrospectively w.e.f. 1st April, 2007, has been overridden by an amendment to the aforementioned accounting standard for limited period of time as stated in point no. 14 in Note No. 4 "Other notes forming part of the Accounts.

(j) Revenue recognition:

- i. Revenue from sale of goods in the course of ordinary activities is recognized when property in the goods or all significant risks and rewards of their ownership are transferred to the customer and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods and regarding its collection. The amount recognized as revenue is exclusive of sales tax, value added taxes (VAT) and service tax, and is net of returns, trade discounts and quantity discounts.
- ii. Interest income is recognized on time proportion basis after taking into account the amount outstanding and the interest rate applicable.
- iii. Dividend income is recognized when the right to receive payment is established.

(k) Research and Development:

Revenue expenditure on research and development is recognized as expense in the year in which it is incurred and the expenditure on capital assets is depreciated over the useful lives of the assets.

(l) Proposed Dividend:

Dividend proposed by the Board of Directors is provided in the books of account pending approval at the Annual General Meeting.

(m) Employee benefits:

In case of Defined Contribution plans the Company's contributions to these plans are charged to the statement of Profit and Loss as incurred.

The Company's provident fund, gratuity and leave wages are defined benefit plans.

The Company maintains gratuity fund with a separate trust formed by the Company, to which contributions are made on an annual basis. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation at the balance sheet date using the Projected Unit Credit Method by an independent actuary, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the financial obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans are based on the market yields on Government securities as at the balance sheet date. Actuarial gains and losses are recognized immediately in the statement of profit and loss.

Employee Stock Options are evaluated and accounted on intrinsic value method as per the accounting treatment prescribed by Guidance Note on 'Accounting for Employee Share-based payments' issued by ICAI read with SEBI (Employee Stock Option Scheme & Employee Stock Purchase Scheme) Guidelines 1999 issued by SEBI. The excess of market value, if any, of the stock options as on the date of grant over the exercise price of the options is recognized as deferred employee compensation and is charged to the statement of profit and loss on vesting basis over the vesting period of the options. The un-amortised portion of the deferred employee compensation is reduced from Employee Stock Option Outstanding, which is shown under Reserves and Surplus.

(n) Earning per share:

Basic earnings per share is calculated by dividing the Net Profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

(o) Income taxes:

Current tax is determined as the amount of tax payable in respect of taxable income for the period. Deferred tax is recognized, subject to the consideration of prudence in respect of deferred tax assets, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and deferred tax liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognized to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonably/virtually certain (as the case may be) to be realized.

(p) Provision and contingent liabilities:

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources, when there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

(q) Cash and cash equivalents:

Cash and cash equivalents include cash in hand and demand deposits with banks with original maturities of three months or less.
