CHAIRMAN CUM MANAGING DIRECTOR'S MESSAGE

Dear Valued Shareholders,

It is with immense pride that I share the 8th Annual Report of D.P. Abhushan Limited for the year 2024-2025. In a year marked by elevated gold prices and evolving consumer behaviour driven by caution and as pirational shifts, our Company not only demonstrated resilience but also achieved commendable financial and operational milestones. This pivotal year witnessed strategic expansion of our retail footprint, reaffirming our commitment to serve a broader spectrum of customers with excellence and innovation.

The Indian jewellery industry in FY2025 experienced significant shifts. Gold prices surged by approximately 33%, reaching historic highs of ₹1,01,078 per 10 grams. This price escalation led to a 7% decline in jewellery consumption volumes; however, the value of gold jewellery consumption increased by 28%, driven by the price surge. Despite these challenges, the sector demonstrated resilience, with investment demand for gold bars and coins rising by 25%.

I am proud to report that D.P. Abhushan Limited achieved a remarkable 42% year-on-year growth in revenue, reaching ₹3,312 Crores in FY25. Our EBITDA surged by 74% YoY to ₹175 Crores, and our Profit After Tax (PAT) grew by an impressive 82% to ₹113 Crores. These results are a testament to our strategic initiatives and the dedication of our team to deliver exceptional value to our customers and stakeholders.

During FY25, we embarked on an ambitious expansion strategy that has augmented our footprint to 11 stores across Madhya Pradesh and Rajasthan and reinforcing our leadership in Central India. The year commenced with the inauguration of a new showroom in Ajmer, Rajasthan, which spans approximately 6,000 sq. ft. This showroom was strategically designed to cater to the escalating demand for gold, diamond, and silver jewellery in the region, featuring a spacious layout that includes a basement, ground floor, two additional floors, and a rooftop, providing customers with a luxurious shopping experience.

Following this, the company made a significant move by inaugurating a modern G+3 showroom in Neemuch, Madhya Pradesh, with a super built-up area of 7,700 sq. ft. This facility, strategically located just 150 kilometers from the company's registered office in Ratlam, is designed to enhance the shopping experience while showcasing D.P. Abhushan's commitment to purity, transparency, and exceptional service. The Neemuch showroom represents a critical milestone in our expansion strategy, tapping into the region's tremendous growth potential and allowing us to better understand and cater to evolving customer preferences.

In April 2025, the company further solidified its leadership in the jewellery market by opening a second showroom in Ratlam, a city synonymous with gold. This new showroom, spanning approximately 15,000 sq. ft. on a 3,150 sq. ft. plot, features a contemporary Basement & Ground+4 floor design. The retail area is spread across the basement, ground, and first floors, while the upper floors are dedicated to office and administrative functions. This expansion not only addresses the growing demand but also ensures that customers have access to an even wider range of jewellery collections, enhancing their shopping experience.

Looking ahead, we maintain a positive outlook on the long-term potential of India's gold and jewellery sector. By extending our retail presence in high growth regions such as Madhya Pradesh, Rajasthan, Chhattisgarh, and Gujarat, we are well on course to double our store outlets by FY 2028. With gold prices stabilizing from recent peaks and a growing consumer preference for lightweight, lower-carat designs a trend being embraced even by leading jewellery brands we are strategically positioned to capture both value and volume. Simultaneously, silver's investment appeal has surged, with a 21% increase in domestic prices over the past three months—significantly outpacing gold's 5% gain and silver ETF inflows surpassing those of gold for three consecutive months. Recognising such momentum, we intend to explore opportunities to diversify our precious metal offerings across both gold and silver segments. Consumer sentiment is supported by proactive retail expansion, a resurgence in auspicious wedding & festive dates, and a gradual shift from unorganised to branded retail.

With the rising demand of fashion accessories D. P. Abhushan has launched its exquisite collection Amoura offering minimal, elegant, and timeless diamond jewellery for the modern consumer. Amoura by D.P. Jewellers isn't just a new collection; it's the realization of a critical strategic goal: significantly boosting our revenue from diamond-studded jewellery. This move is key to enhancing our profitability in the coming years. Exclusively available at DP Jewellers stores, this versatile collection features pieces perfect for everyday wear, easily transitioning from a boardroom meeting to a casual brunch. Amoura reflects DP Jewellers' dedication to providing contemporary designs that meet the evolving consumer demand for subtle yet sophisticated accessories, making every day an opportunity to celebrate personal style. This trend reflects a fascinating shift in consumer behaviour, where jewellery is increasingly perceived not just as an investment but also as a personal expression and a significant status symbol, driving frequent purchases. This aligns perfectly with current consumer trends that increasingly favour modern, sophisticated designs and the enduring appeal of diamonds.

As we continue to adapt to evolving market dynamics, our commitment to purity, transparency, and exceptional service remains steadfast. I extend my profound and heartfelt gratitude to our dedicated employees, whose unwavering hard work, exceptional skill, and relentless commitment are the very bedrock of our achievements and success. To our loyal customers, thank you for your continued trust, your discerning patronage, and for making D.P. Abhushan a part of your most cherished moments. And to our valued shareholders and all stakeholders, your unwavering support, confidence, and belief in our vision fuels our journey and inspire us to reach for greater heights.

Together, we will navigate the future with confidence, creating lasting value for all.

With best regards,

For: **D.P. Abhushan Ltd.**

CORPORATE GOVERNANCE

Your Company strives to incorporate the appropriate standards for corporate governance. As stipulated in Schedule V of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, Report on Corporate Governance and Certificate of the Practicing Company Secretary with regards to compliance with the conditions of Corporate Governance is annexed to the Board’s Report as **Annexure – E**.

BUSINESS RESPONSIBILITY AND SUSTAINABILITY REPORT

The Business Responsibility and Sustainability Report as required by Regulation 34(2)(f) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, for the year under review is annexed to the Board’s Report as **Annexure – F** and forms an integral part of this report.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

In terms of Regulation 34, and Schedule V of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 a review of the performance of the Company, for the year under review, Management Discussion and Analysis Report, is presented in a separate section forming part of this Annual Report.

STATUTORY AUDITOR AND THEIR REPORT

M/s. Jeevan Jagetiya & Co., Chartered Accountants, Ahmedabad (FRN: 121335W) were re-appointed as Statutory Auditors of the Company at the Sixth Annual General Meeting held on September 30, 2023, for a term of four consecutive years i.e. up to 10th Annual General Meeting to be held in the year 2027. The Notes to the financial statements referred in the Auditors Report are self-explanatory and therefore do not call for any comments under Section 134 of the Companies Act, 2013. The Auditors’ Report does not contain any qualification, reservation or adverse remark. The Auditors’ Report is enclosed with the financial statements in this Annual Report.

APPOINTMENT OF SECRETARIAL AUDITOR AND THEIR REPORT

The Company has appointed M/s. ALAP & Co. LLP, Company Secretaries, to conduct the secretarial audit of the Company for the financial year 2024-25, as required under Section 204 of the Companies Act, 2013 and Rules thereunder. The Secretarial Audit Report for the financial year 2024-25 is annexed to this report as an **Annexure– G-1**.

The Annual Secretarial Compliance Report for the financial year ended March 31, 2025 issued by M/s. ALAP & Co. LLP, Company Secretaries, in relation to compliance of all applicable SEBI Regulations/Circulars/Guidelines issued thereunder, pursuant to requirement of Regulation 24A of the Listing Regulations read with Circular no. CIR/CFD/CMD1/27/2019 dated February 08, 2019 (including any statutory modification(s) or re-enactment(s) thereof for the time being in force) is annexed to this report as an Annexure – G-2.

Mr. Anand Sureshbhai Lavingia Practicing Company Secretary (CP No. 11410), partner of M/s. ALAP & Co. LLP, Company Secretaries has observed that 1) the Company has done Late intimation of resignation of Mrs. Seema Mandloi (DIN: 10617559) with effect from February 18, 2025, within 24 Hours from the Effective date of Resignation to the stock exchanges and 2) The capturing of some of the UPSI entries in the SDD Software has been done with a delay from the actual date of sharing of UPSI

In response to the same Board hereby comment that 1) the resignation letter of Mrs. Seema Mandloi (DIN: 10617559) was received by the concerned department of the Company. However, due to an inadvertent error, the letter was misplaced and was not handed over to the management or compliance team on the same day of receipt. As soon as the compliance team became aware of the resignation, the necessary announcement was promptly submitted to the stock exchange on March 11, 2025 and 2) The Company takes all measures to timely comply with the entire requirement. However, the delay occurred purely due to oversight and Company ensures to make timely compliance in future.

DETAILS OF COMPLIANCE WITH MANDATORY REQUIREMENTS

During the period 01st April, 2024 to 31st March, 2025, the Company has complied with the applicable mandatory requirements as specified under Regulation 15 to 27 of SEBI LODR.

ADOPTION OF NON-MANDATORY REQUIREMENTS

The Company has adopted following non-mandatory requirements as prescribed under Regulation 27(1) read with Part E of Schedule II of the SEBI LODR.

- There is no modified opinion given in the Auditors' Report on Financial Statements.
- The internal auditor directly reports to audit committee.

AGREEMENTS BINDING THE COMPANY

During the year under review, no agreement has been executed impacting the management or control of the Company or impose any restriction or create any liability upon the company, which is not in the normal course of business.

INVESTOR INFORMATION

SEBI Complaint Redressal System (SCORES 2.0) - The investors' complaints are also being processed through the centralized web-based complaint redressal system. The salient features of SCORES include availability of centralised database of the compliants and provision for the Company to upload online action taken reports. Through SCORES, the investors can view online, the actions taken and current status of the complaints. In its efforts to improve ease of doing business, SEBI has launched a mobile app "SEBI SCORES", making it easier for investors to lodge their grievances with SEBI, as they can now access SCORES at their convenience. SEBI has launched the new version of the SEBI Complaint Redress System (SCORES 2.0) and with effect from 28th March, 2024, the old version of SCORES has been closed for lodging complaint. However investors can check status of their complaints lodged in old SCORES on the old portal. Investors can lodge complaints only through new version of SCORES i.e. <https://scores.sebi.gov.in> from 01st April, 2024.

Online Dispute Resolution (ODR) Mechanism - SEBI vide Circular Nos. SEBI/HO/OIAE/OIAE_IAD-1/P/CIR/2023/131 dated July 31, 2023, and SEBI/HO/OIAE/OIAE_IAD-1/P/CIR/2023/135 dated 4th August, 2023, read with Master Circular No. SEBI/HO/OIAE/OIAE_IAD1/P/CIR/2023/145 dated 31st July, 2023 (updated as on 11th August, 2023), has established a common Online Dispute Resolution Portal ("ODR Portal") for resolution of disputes arising in the Indian Securities Market. Pursuant to above-mentioned circulars, the Company has enrolled on the ODR Portal and the investors can initiate dispute resolution through the ODR Portal (<https://smartodr.in/login>). This option can be exercised by the investor after exhausting other options like lodging direct complaint with the Company or escalating the same through SCORES Portal.

Compliance Certificate of the Auditors - A Certificate from the Auditors of the Company Mr. Anand Sureshbhai Lavingia, Practicing Company Secretary, Ahmedabad confirming the compliance with the conditions of Corporate Governance as stipulated under Clause E of Schedule V of the SEBI LODR Regulations is attached as an **Annexure – E3** to this Report.

CERTIFICATE ON COMPLIANCE WITH THE CONDITIONS OF CORPORATE GOVERNANCE

(Refer Chapter IV of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015)

To,

The Members,

D. P. ABHUSHAN LIMITED

138, Chandani Chowk,

Ratlam, Madhya Pradesh – 457 001, India

The Corporate Governance Report prepared by D. P. Abhushan Limited ("the Company"), contains details as specified in Regulations 17 to 27, Sub-Regulation (2) of Regulation 46 and para C, D and E of Schedule V of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ("the Listing Regulations"), to the extent applicable, with respect to Corporate Governance for the year ended March 31, 2025. This report is required by the Company for submission to the Shareholders of the Company.

MANAGEMENT'S RESPONSIBILITY

The preparation of the Corporate Governance Report is the responsibility of the Management of the Company including the preparation and maintenance of all relevant supporting records and documents. This responsibility also includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Corporate Governance Report.

The Management along with the Board of Directors are also responsible for ensuring that the Company complies with the conditions of Corporate Governance as stipulated in the Listing Regulations, issued by the Securities and Exchange Board of India.

AUDITOR'S RESPONSIBILITY

Our responsibility is to provide a reasonable assurance in the form of an opinion whether the Company has complied with the condition of Corporate Governance, as stipulated in the Listing Regulations.

The procedures selected depend on the auditor's judgment, including the assessment of the risks associated in compliance of the Corporate Governance Report with the applicable criteria. The procedures include but not limited to verification of secretarial records and financial information of the Company and obtained necessary representations and declarations from directors including independent directors of the Company.

The procedures also include examining evidence supporting the particulars in the Corporate Governance Report on a test basis. Further, our scope of work under this report did not involve me performing audit tests for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

OPINION

Based on the procedures performed by us as referred above and according to the information and explanations given to me, we are of the opinion that;

- the Company has complied with the conditions of Corporate Governance as specified in the Regulations 17 to 27, Sub-Regulation (2) of Regulation 46 and para C, D and E of Schedule V, to the extent applicable to the Company during the period April 1, 2024 to March 31, 2025..
- as regards Discretionary Requirements specified in Part E of Schedule II of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Company has complied with items C and E.

OTHER MATTERS AND RESTRICTION ON USE

This report is neither an assurance as to the future viability of the Company nor the efficiency or effectiveness with which the management has conducted the affairs of the Company.

This report is addressed to and provided to the members of the Company solely for the purpose of enabling it to comply with its obligations under the Listing Regulations and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care or for any other purpose or to any other party to whom it is shown or into whose hands it may come without our prior consent in writing. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

c. A brief on types of Customer:

B2C Model: Our Company operates in the Jewellery industry, employing a Business-to-Consumer (B2C) retail model. The company's core business involves sourcing Jewellery from reputable suppliers and Jewellers. These carefully curated Jewellery pieces are then made available directly to end consumers, through its Retail outlets, who purchase them for personal use.

In addition to being a retailer, our Company also undertakes Jewellery manufacturing and design services on a need/customization basis. This allows customers to have bespoke pieces created according to their preferences and requirements.

We primarily cater to individual customers, referred to as end consumers, who seek to acquire Jewellery items for personal adornment and self-expression. These customers are distinct from resellers or distributors who purchase Jewellery for the purpose of further distribution or resale.

D. P. Abhushan Limited operates through its own network of retail stores where customers can physically explore and select Jewellery.

B2B Model: Under B2B Model D. P. Abhushan Limited caters to Corporate Client by Issuing Gift Cards or Coins as per the Requirement of the Client. D P Abhushan Limited also serves to the businesses engaged in Same Industry.

27. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
a.	Energy Management	Opportunity	The retail sector of the Jewellery industry presents an opportunity for energy management. Retail stores necessitate energy for their functioning, including lighting, heating, cooling systems, and electronic devices like computers and cash registers. By employing energy management, retail stores can effectively curtail their energy consumption and associated expenses.	-	-
b.	Customer privacy and data security	Risk & Opportunity	Risk Our company faces a substantial peril regarding customer confidentiality. Any unauthorized access or security breach to critical information can result in severe outcomes, such as financial losses, identity theft, and a loss of customer confidence. Such an eventuality can eventually harm the company's reputation. Opportunity The company recognizes data security as a chance to safeguard their valuable trade secrets, which encompass their designs, manufacturing processes, and supply chain. By integrating appropriate data security measures, it will mitigate the possibility of cyber-attacks, ultimately safeguarding their reputation and assets.	Our company has implemented robust measures to mitigate risks by upholding stringent data privacy policies. We restrict access, utilize password protection, and employ firewalls. Furthermore, dedicated server rooms have been set up to prevent potential data leaks, and we consistently update and evaluate our IT security protocols to align with industry standards.	Negative Failing to adequately protect customer privacy will result in legal penalties and fines.. Positive Implementing advanced cyber security solutions has reduced cyber security risks for both the company and its customers.
c.	Access and Affordability	Risk	In the jewellery industry, companies need to strike a delicate balance. It's crucial to offer affordable options while upholding the perceived value of products and services. They also have to consider the	Our company has implemented measures to minimize potential risks through several strategies. A strategic approach to material procurement helps us curtail costs and provide affordable options for our customers. Furthermore, we adopt a customer-centric approach to pricing and product offerings, with the goal of enhancing our competitiveness and minimizing potential hazards.	
d.	Product Quality & safety	Opportunity	In the Jewellery industry, a company's brand reputation hinges on the quality and safety of its products. To uphold their brand reputation, Our Company takes measures to ensure that their products meet high standards of quality and safety. This, in turn, fosters customer loyalty and helps to build a positive brand image.	-	Positive - By ensuring product quality and safety, Our Company can generate higher sales and revenue, decrease costs, and unlock opportunities for market expansion.
e.	Selling practices and\ product labelling	Opportunity	Our Company is enhancing its credibility and fostering consumer trust by implementing fair trade practices and providing comprehensive product labeling. These ethical selling practices have the potential to increase sales for the company. Additionally, Our Company ensures compliance with Hallmarking Unique ID (HUID) for its jewellery products.	-	Positive - These measures have the potential to significantly boost consumer demand for our products and strengthen our brand's reputation.
f.	Employee Engagement, Diversity	Opportunity	Engaging employees leads to increased productivity, innovation, and commitment to our company's success. An inclusive work culture also helps attract and retain top talent from diverse backgrounds, providing a competitive advantage. Measures to enhance engagement include Feedback mechanisms, Recognition programs, Fostering a sense of belonging. Furthermore, diverse hiring practices are key to fostering a more diverse workforce.	-	Positive - The expenses related to acquiring and fostering human resources may be reduced.

g.	Supply Chain management	Risk & opportunity	Risk- Supply chain management poses risks to our company due to potential disruptions and ethical sourcing challenges. This can lead to delivery delays, lost sales, and damage to our reputation. Opportunity: Our company will benefit from an optimized supply chain. This means reduced costs and access to new ideas and technologies through supplier collaboration. An efficient supply chain also allows us to quickly respond to changes in demand or market conditions, boosting profitability.	Our Company implements a two-pronged approach to mitigate supply chain risks. Firstly, we carefully select ethical suppliers who possess a proven track record of reliability and integrity. Secondly, we maintain regular and open communication with our suppliers. This ongoing dialogue ensures that they consistently meet our established standards for quality, pricing, lead time, and social responsibility.	Negative- Supply chain disruption will result in higher production costs for the product. Positive: Reduction in costs, improving efficiency, and enhancing customer satisfaction.
h.	Business Ethics	Opportunity	By prioritizing business ethics, our Company stands to build trust, attract new customers, enhance its brand image, and increase its credibility with both customers and stakeholders. Furthermore, ethical practices will have a positive impact on employee engagement.	-	Positive- Increased customer loyalty translates into higher sales, improved customer retention, and ultimately, better financial performance.
i	Competitive Behaviour	Risk & opportunity	Risk- Competitor behaviour poses a risk to the company through aggressive competition. This can lead to price wars impacting profitability, loss of market share if the company fails to match innovation, and harm to reputation. Opportunity: Conversely, competitive behaviour offers an opportunity to monitor market trends and identify gaps. This insight can drive the design of new products and marketing campaigns, helping to attract new customers and retain existing ones.	To reduce risk, our company is focusing on a multi-pronged approach. This includes excelling in rural markets and introducing new and unique products to gain a competitive advantage. Furthermore, the company is prioritizing the improvement of customer service through both online and offline channels, and committed to maintaining a strong brand image to ultimately increase its market share.	Negative- May lead to legal actions and fines, resulting in higher legal costs and decreased sales. Positive- Healthy competition can lead to increased sales and profitability. Companies may also invest in research and development, leading to new products or services that can boost revenue.

j.	Critical Incident Risk Management	Opportunity	Critical Incident Risk Management (CIRM) is essential for protecting our company from financial losses and reputational harm. It works by proactively identifying and mitigating potential risks and incidents, such as product quality issues, supply chain disruptions, or security incidents like theft or fraud, that could impact our operations, reputation, or financial performance.	-	Positive- It helps to minimize financial losses resulting from critical incidents, lower its insurance premiums, and safeguard its reputation.

10. Health and safety management system:

- a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/No). If yes, the coverage of such system?

Yes, our company has implemented an occupational health and safety management system. This system encompasses the entirety of the company's operations, including:

- Comprehensive training in employee and worker health and safety
- Rigorous hazard identification and risk assessment
- Meticulous incident reporting and investigation
- Continuous monitoring and enhancement

Its purpose is to establish a work environment that prioritizes the safety and well-being of all employees while ensuring strict adherence to pertinent health and safety regulations and standards.

- b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

The company proactively implements a robust safety framework to protect its workers and employees as follow:

- **Regular Inspections:** The company conducts thorough inspections to identify workplace hazards and assess associated risks. Each task is carefully analyzed to determine and implement appropriate control measures.
- **Encouraging Incident Reporting:** Workers and employees are actively encouraged to report any incidents or potential hazards. Their valuable input helps in promptly identifying and addressing risks, thereby enhancing overall workplace safety.

- **Comprehensive Training Programs:** Significant emphasis is placed on regular training programs. These programs equip workers and employees with the necessary knowledge and skills to effectively mitigate risks and take preventive measures.
- **Prompt Implementation of Preventive Measures:** Upon identifying hazards, the company takes immediate action to implement preventive measures. This plays a crucial role in mitigating risks and safeguarding the well-being of all personnel.

Through these proactive measures, the company demonstrates its strong commitment to prioritizing workplace safety, creating a secure work environment, and significantly reducing the potential for accidents or injuries.

- c. Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks.

Our company places great emphasis on maintaining transparency in reporting work-related hazards. We achieve this by implementing clear and confidential channels. Workers receive regular training to enhance their ability to identify and report hazards effectively, fostering a proactive safety culture within the organization.

To ensure the prompt response to immediate risks, the company has established clear emergency procedures. These procedures equip workers with the necessary knowledge and guidance to respond swiftly and appropriately in emergency situations. By providing workers with a structured framework for action, the company prioritizes their safety and minimizes potential harm.

By maintaining transparent reporting channels and empowering workers through training and emergency procedures, the company demonstrates its commitment to creating a safe work environment. These measures enable the identification and mitigation of hazards, allowing for proactive risk management and the continuous improvement of workplace safety practices.

PRINCIPLE 4: Businesses should respect the interests of and be responsive to all its stakeholders**A. Essential Indicators****1. Describe the processes for identifying key stakeholder groups of the entity.**

The company has developed a comprehensive **stakeholder engagement framework** to improve how it identifies and interacts with its stakeholders. The goal is to boost engagement effectiveness, maintain the company's reputation, build trust, and create value for everyone involved.

The framework is built upon the following key elements:

1. Two Crucial Dimensions

The framework uses **two important dimensions** for identifying stakeholders:

- **Interests:** Understanding what matters to each stakeholder group.
- **Level of Influence:** Assessing how much impact each group has on the company.

Considering both these dimensions helps the company pinpoint stakeholders and decide on the best ways and levels of engagement for each group.

2. Identification Criteria

In addition to the two dimensions, the company uses several criteria when identifying stakeholder groups:

- **Level of dependency** on the organization.
- **Level of responsibility** they hold towards the organization.
- **Attention** they receive from the organization.
- **Level of influence** they have over the organization.

By using this stakeholder engagement framework and applying these criteria, the company can effectively identify the key stakeholders vital to its success. This allows them to develop **tailored engagement strategies** that align with each group's specific needs and interests. This approach is essential for maintaining positive stakeholder relationships and achieving strategic objectives.

2. List stakeholder groups identified as key for your entity and the frequency of engagement with each stakeholder group.

Stakeholder group	Whether identified as vulnerable and marginalised group (Yes/No)	Channels of communication (email; SMS; newspaper; pamphlets; advertisement; community meetings; notice board; website); other	Frequency of engagement (annually/ half yearly/ quarterly/ other- please specify)	Purpose and scope of engagement including key topics and concerns raised during such engagement

MANAGEMENT DISCUSSION AND ANALYSIS REPORT FY 2025

GLOBAL ECONOMY REVIEW

The year 2025 unfolded against a backdrop of cautious optimism and recalibrated ambitions. As the global economy emerged from the shadows of post-pandemic recovery and geopolitical realignments, it found itself navigating a complex mosaic of resilience and reinvention. The global economy is facing another substantial headwind, with increased trade tension and heightened policy uncertainty. This is contributing to a deterioration in prospects across most of the world's economies.

GROWTH TO SLOW AMID ELEVATED TRADE TENSIONS

In FY2025, the global economic outlook remains challenging amid rising trade tensions and elevated uncertainty. Growth is expected to decelerate from an estimated 3.3% in 2024 to 2.8% in 2025, before modestly rebounding to 3% in 2026. Emerging markets and developing economies (EMDEs) face particular headwinds. East Asia and Pacific, along with Europe and Central Asia both heavily reliant on global trade are projected to see slower growth. South Asia may also experience a mild deceleration, while Latin America and the Caribbean are expected to post the weakest performance among EMDEs due to persistent structural issues and high trade barriers. Commodity-exporting regions such as the Middle East and North Africa and Sub-Saharan Africa are likely to be impacted by softening external demand. While the world's two largest economies China and the United States are projected to maintain moderate growth, this will be partially offset by a mild recovery in the EU, Japan, and the UK, and strong momentum in large developing economies like India and Indonesia. However, the outlook for many low-income and vulnerable nations remains subdued, with only a slight improvement expected among least-developed countries. The escalation of tariffs and the resulting uncertainty continue to weigh on global growth prospects.

INFLATION CONTINUES TO MODERATE BUT CORE PRESSURES PERSIST

Inflation has continued to decline across most countries and regions in 2024. Global headline inflation fell from 5.6% in 2023 to an estimated 4.0% in 2024 and is projected to decrease further to 3.4% in 2025. This decline is attributed to a combination of demand- and supply-side factors, including easing labour market pressures and moderating international food, energy, and commodity prices. In developed economies, average inflation declined from 4.8% in 2023 to an estimated 2.6% in 2024 and is projected at 2.2% for 2025, approaching central bank targets and the long-term average. While food and energy price inflation has declined substantially, core inflation which excludes food and energy remains particularly sticky and has decreased slowly, primarily driven by inflationary pressures emanating from the services sector. In developing countries, despite some spikes, average headline inflation has followed an overall downward trend, falling from 7.0% in 2023 to an estimated 6.0% in 2024 and projected at 5.1% in 2025. Inflation rates are expected to decline in the near term, approaching their long-term averages, in all developing regions except Africa and Western Asia.

MONETARY POLICY ADJUSTMENTS SIGNAL A SHIFT TOWARD NORMALIZATION

The Federal Reserve and the European Central Bank are expected to continue to reduce interest rates in the coming quarters, albeit at different paces from one another. In the United States, the federal funds rate is projected to be down to 4 % at the end of 2025 and reach its long-term equilibrium of 2.9 % at the end of 2028. In the euro area, 100 basis points in cuts are expected in 2025 (with three cuts having already occurred this year), bringing the policy rate to 2 % by the middle of the year. In Japan, policy rates are expected to be lifted at a similar pace as assumed in October 2024, gradually rising over the medium term toward a neutral setting of about 1.5 %, consistent with keeping inflation expectations anchored at the Bank of Japan's 2 % target.

CURRENCY VOLATILITY AND SHIFTING RISK SENTIMENT

The dollar appreciated sharply in the run-up to the US elections in November 2024, with markets expecting higher US growth and tighter monetary policy. However, since February 2025, the dollar has lost all the gains it achieved in the last quarter of 2024 on the back of weaker US growth prospects and uncertainty. Initial depreciation pressures were particularly pronounced for the currencies of emerging market and developing economies, but they have dissipated following the softening in 2025. Since April, global risk appetite has declined substantially, with the risk-off environment inducing an offset to the appreciation of emerging market currencies.

GOLD SHINES AMID COMMODITY MARKET VOLATILITY

Between August 2024 and March 2025, primary commodity prices rose by 1.9%, largely driven by gains in natural gas, precious metals, and beverages. However, oil prices declined by 9.7% during the same period, weighed down by fears of a trade war, robust non-OPEC+ supply growth, and the unwinding of OPEC+ production cuts, despite ongoing supply risks. Natural gas prices also began to fall in early April, following a six-month rally. Metals prices saw notable gains up to March-end, supported by safe-haven demand and supply disruptions. The IMF's metals price index rose 11.2%, led by sharp increases in gold, aluminium, and copper. Among base metals, aluminium and copper prices rose 12.7% and 8.4%, respectively, driven by supply concerns and front-loading of demand ahead of tariffs. However, both industrial and energy-related metals experienced a sharp price correction in early April as trade tensions escalated. Futures markets now anticipate declines by end-2026: aluminium (-5.7%), copper (-4.5%), and iron ore (-14.3%). Agricultural commodities also saw price gains, mainly due to adverse weather. New trade barriers introduced in April had mixed effects: prices of income-elastic and trade-sensitive crops like coffee and soybeans declined sharply, while staples such as corn and wheat remained relatively stable.

In FY 2025, gold emerged as a standout performer in the global commodity market, driven by heightened geopolitical tensions, monetary policy uncertainty, and safe-haven demand. Prices surged to historic highs, surpassing USD 3,000 per ounce a new milestone that reflects investors' shift toward lower-risk assets amid global economic volatility. The precious metal's strong performance was further supported by central banks' continued accumulation of gold reserves and persistent inflation concerns in several major economies. Unlike industrial metals, which saw gains eroded by trade tensions and market corrections, gold maintained its upward trajectory, reinforcing its role as a reliable store of value in times of financial and political stress. Looking ahead, the outlook for gold remains robust, with ongoing global uncertainty likely to sustain demand in the near term.

RIISING TRADE BARRIERS INTENSIFY GLOBAL POLICY UNCERTAINTY

Global trade conditions experienced a large shock in early April when the United States announced prospective tariffs on most trading partners, with rates proportional to bilateral goods trade deficits, in addition to previously announced tariffs. A sharp escalation of trade barriers between China and the United States followed. Shifting policy announcements have led to heightened global trade policy uncertainty, measures of which reached historical highs over the past few months. This reflects uncertainty over whether current tariff rates will endure, their implementation, and the scale and timing of potential retaliatory responses. Global trade growth in goods and services is projected to slow sharply in 2025, to 1.8 %, from 3.4 % in 2024.

OUTLOOK: NAVIGATING UNCERTAINTY WITH MEASURED OPTIMISM

The global economy in FY 2025 stands at a crossroads, shaped by a mix of stabilizing trends and emerging challenges. The moderation in inflation and the gradual normalization of monetary policy in advanced economies offer some reassurance, laying the groundwork for more stable financial conditions. However, these positive signals are counterbalanced by intensifying trade tensions, policy unpredictability, and divergent growth trajectories across regions. The sharp volatility in commodity markets especially in metals and energy and the impact of new protectionist measures underscore the fragility of the recovery. For emerging and developing economies, the path forward is further complicated by external shocks, currency fluctuations, and structural challenges. In this evolving environment, sustained recovery will depend on strategic policy responses, international cooperation, and the ability of economies and businesses to remain agile and forward-looking. While risks remain, the foundations for resilience especially in key growth markets like India and Southeast Asia suggest that with prudent navigation, the global economy can weather short-term disruptions and gradually regain momentum.

INDIAN ECONOMY OVERVIEW

FY 2025 was a year of steady resilience and evolving opportunity for the Indian economy. Despite mounting global challenges including intensified trade tensions, volatile commodity prices, and subdued external demand India remained one of the fastest-growing major economies. The country's growth was propelled by strong domestic consumption, robust infrastructure spending, and a continued push for manufacturing and digital transformation. Prudent fiscal management, moderating inflation, and sustained financial sector stability further reinforced macroeconomic fundamentals. India's ability to maintain its growth trajectory amidst a turbulent global landscape reflects the growing depth and dynamism of its economic framework.

SECTORAL TRENDS AND STABLE DEMAND SUPPORTING GROWTH

In the 2024-25 fiscal year, India's real GDP growth is projected at 6.5%, as reported by the National Statistical Office (NSO). The growth during the first half of FY25 was bolstered by advancements in agriculture and services, with rural demand seeing an uptick due to record Kharif production and favourable agricultural conditions. However, the manufacturing sector encountered challenges stemming from sluggish global demand and seasonal domestic factors. Private consumption remained steady, indicative of robust domestic

demand. Fiscal discipline, coupled with a strong external balance supported by a surplus in services trade and healthy remittance inflows, has contributed to macroeconomic stability. Collectively, these elements have established a strong foundation for sustained growth despite external uncertainties.

Real GDP (on-year growth)	2019	2020	2021	2022	2023	2024	2025P	2029P
World	2.90%	-2.70%	6.60%	3.60%	3.50%	3.30%	2.80%	3.20%
India*	3.90%	-5.80%	9.70%	7.60%	9.20%	6.50%	6.50%	6.70%

INFLATION MODERATES, BUT FOOD VOLATILITY PERSISTS

Inflation converged closer towards the target during 2024-25 aided by easing input cost pressures, proactive supply management measures by the government and continuing transmission of past monetary policy actions. The average headline inflation decreased to 4.6% in 2024-25, down from 5.4% the prior year. This decline was primarily influenced by a reduction in core inflation (CPI excluding food and fuel) to 3.5% and a deflationary trend in fuel prices at 2.5%. The easing of core inflation was widespread across various goods and services. However, an increase in international gold prices contributed to a rise in core inflation during the latter half of the year. The deflation in fuel prices was largely due to lower liquefied petroleum gas (LPG) and kerosene prices, driven by softer global energy costs. Conversely, food inflation remained high at 6.7% in 2024-25, with occasional spikes caused by overlapping supply shocks related to weather anomalies, which added volatility to overall inflation. Food inflation peaked at 9.7% in October 2024 before sharply declining to 2.9% by March 2025. While vegetable prices showed significant volatility throughout the year, inflation persisted in cereals, fruits, edible oils, and meat and fish, indicating tight supply conditions. Additionally, domestic import duty increases and export restrictions on edible oils imposed by Indonesia contributed to the rigidity of food inflation.

POLICY SHIFT TOWARDS NEUTRALITY AND GROWTH SUPPORT

In light of the growth-inflation dynamics, the Monetary Policy Committee (MPC) shifted its policy stance from a withdrawal of accommodation to a neutral position in October 2024. This change provided the flexibility to assess the outlook for disinflation and growth, allowing for responsive actions based on the evolving economic landscape. Subsequently, as the growth-inflation dynamics created room for supportive measures, the MPC lowered the policy repo rate by 25 basis points to 6.25% in February 2025, following a period of stability at 6.50% since February 2023. Liquidity conditions during the 2024-25 fiscal year showed improvement compared to the previous year. However, throughout the year, system liquidity fluctuated, transitioning from a surplus phase between July and November 2024 to a deficit from December 2024 to March 2025. This shift was primarily driven by a significant increase in currency in circulation and the Reserve Bank's foreign exchange operations.

INR SHOWS RESILIENCE AMID GLOBAL CURRENCY VOLATILITY

The Indian Rupee (INR) experienced depreciation, though to a lesser extent than some of its emerging market economy (EME) counterparts, as the US dollar and US asset yields remained strong. However, India's solid macroeconomic fundamentals, marked by stable and

moderate current account and fiscal deficits, facilitated an orderly adjustment of the INR. Additionally, the Reserve Bank implemented various measures to encourage the use of the INR and the local currencies of partner trading nations for international cross-border transactions. The focus was also on streamlining regulatory, supervisory, and authorization frameworks to enhance the ease of conducting foreign exchange transactions.

RBI STRENGTHENS RESERVES WITH STRATEGIC GOLD ACCUMULATION

During the financial year 2024-25, the Reserve Bank of India (RBI) continued its strategic accumulation of gold reserves, reflecting a broader trend among central banks globally to diversify away from traditional foreign exchange assets.

According to the RBI's Annual Report & WGC, India's central bank added approximately 27 tonnes of gold to its reserves during the fiscal year, bringing the total official gold holdings to around 827 tonnes. This increase underscores the RBI's intent to strengthen its balance sheet and hedge against global financial uncertainties. The purchases were primarily aimed at enhancing reserve adequacy and reducing exposure to currency volatility, especially amid shifting geopolitical dynamics and evolving monetary policies worldwide.

MARKETS NAVIGATE GLOBAL UNCERTAINTY WITH RESILIENCE

During the 2024-25 fiscal year, domestic financial markets demonstrated resilience despite a challenging global environment. Government security (G-sec) and corporate bond yields experienced a decline throughout the year, which in turn stimulated an increase in corporate bond issuances. Domestic equities soared in the first half, reaching new highs, but faced a downturn in the second half due to concerns regarding a slowdown in GDP growth, corporate earnings growth, tariff policy uncertainties, and outflows of foreign portfolio investment (FPI). While primary market activity remained robust during 2024-25, it did see a moderation in the fourth quarter.

TRADE RECOVERY DRIVEN BY GOLD IMPORTS, ELECTRONICS AND PHARMA

In the 2024-25 fiscal year, India's merchandise exports saw a slight increase of 0.1% year-on-year, reaching USD 437.4 billion, marking a recovery from the 3.1% contraction experienced in 2023-24. This growth in merchandise exports was primarily driven by increases in electronic goods, engineering goods, drugs and pharmaceuticals, rice, and ready-made garments (RMG) across all textiles. However, sectors such as petroleum products and gems and jewellery faced contractions

On the other hand, merchandise imports rose by 6.2% year-on-year to USD 720.2 billion in 2024-25, following a contraction of 5.3% in the previous year. The increase in merchandise imports was largely attributed to gold, electronic goods, and petroleum, including crude oil and related products. Conversely, imports of coal, coke and briquettes, pearls, precious and semi-precious stones, and iron and steel negatively impacted overall import growth. Notably, the value of gold imports surged by 27.4% year-on-year to USD 58.0 billion, driven by a 30.0% rise in international prices, despite a contraction in total volume.

GROWTH OUTLOOK UPBEAT FOR FY 2026, BUT GLOBAL RISKS LINGER

The outlook for the Indian economy in FY 2025-26 remains robust, driven by a broad-based revival in domestic consumption, continued government focus on capital expenditure within the framework of fiscal consolidation, and strong balance sheets of banks and corporates enabling sustained credit growth. Rural demand is expected to improve on the back of a favourable south-west monsoon and targeted agricultural policies aimed at enhancing productivity and incomes. The services sector is likely to maintain its momentum, while the manufacturing sector may benefit from ongoing reforms in logistics, taxation, and the Production-Linked Incentive (PLI) schemes. Digital public infrastructure, formalisation of the economy, and growing private sector investments are expected to further strengthen economic efficiency and competitiveness. On the external front, a resilient services trade surplus and healthy remittances will help cushion the impact of global uncertainties. However, downside risks from persistent geopolitical tensions, volatility in global financial markets, and protectionist trade policies could weigh on external demand and pose inflationary pressures. Nonetheless, with sound macroeconomic fundamentals, supportive policy environment, and improving consumer and business confidence, India is well-positioned to remain one of the fastest-growing major economies in the world.

GEMS & JEWELLERY INDUSTRY OVERVIEW

Global Market

FY 2024-2025 was a year of mixed fortunes for the global gems and jewellery industry, shaped by evolving consumer preferences, macroeconomic uncertainties, and shifting trade dynamics. While sustained demand for high-value jewellery in select markets like the United States, China, and the Middle East provided support, the industry faced headwinds from elevated gold prices, inflationary pressures, and subdued discretionary spending in several regions. The luxury segment continued to see resilience, driven by brand-conscious urban consumers and a growing preference for ethically sourced and customised pieces. At the same time, digitalisation, omnichannel retail, and traceability remained central themes, as players across the value chain adapted to changing consumer behaviour and regulatory expectations. Despite near-term challenges, the long-term fundamentals of the global gems and jewellery sector remained intact, underpinned by cultural significance, wealth preservation, and rising aspirational demand in emerging economies.

The global jewellery market size was valued at USD 232.94 billion in 2024 and is projected to grow from USD 242.79 billion in 2025 to USD 343.90 billion by 2032, exhibiting a CAGR of 5.10%. Asia Pacific dominated the jewellery market with a market share of 39.28% in 2024. In 2024, total gold demand was highest at 4,975 tonnes with significant over the counter (OTC) and stock flows (420 tonne). Annual gold demand (excluding OTC) of 4,554 tonne was 1.3% above 2023. Central bank buying was at a swift pace as purchase of 1,045 tonne almost

matched the 2023 number, lagging by just 6 tonnes. Gold exchange traded funds (ETFs) experienced a third consecutive year of outflows globally, shedding 6.8 tonne. Bars and coins investment declined slightly (-0.2% on-year) due to contrasting trends in major western and eastern markets, cancelling out each other. Jewellery consumption reduced by 11%, because of the high gold prices. China's resurgence contributed to the strong global total. Yearly gold volume utilised in the industrial segment in 2024 has seen a significant rise of 6.8% compared to 2023.

The global demand for gold jewellery, bars, and coins declined by ~6% in 2024 compared to the previous year, primarily due to high gold prices. However, a few countries bucked this trend, with Thailand, South Korea, and Japan experiencing double-digit year-over-year growth of 13.0%, 12.6%, and 10.7%, respectively. India also showed a positive trend in 2024, with a 5.5% increase in demand. In contrast, major markets such as Europe, the US, China, and the Middle East witnessed significant declines in demand, with decreases of 33.6%, 16.9%, 10.6%, and 6.7%, respectively, resulting in a declined growth in 2024.

Note: Middle East includes Saudi Arabia, UAE, Kuwait, Egypt, Islamic Republic of Iran and others; Europe includes France, Germany, Italy, Spain, UK, Switzerland, Austria and others. As the chart represents key regions, percentages will not add up to 100%

KEY TRENDS IN THE GLOBAL GOLD INDUSTRY

Surge in Gold Prices Amid Global Uncertainty

FY 2024-25 witnessed gold prices reaching all-time highs, averaging over USD 2,100 per ounce and peaking above USD 2,350 in Q4FY25. This rally was fuelled by heightened geopolitical tensions—particularly the prolonged Russia-Ukraine conflict, escalating unrest in the Middle East, and concerns over the Taiwan Strait. Additionally, stubborn inflation in major economies and expectations of monetary policy shifts supported investor appetite for safe-haven assets. As a result, physical gold demand in some price-sensitive regions declined, but investment demand surged. For Instance, old prices rose sharply in March 2025 after the U.S. Federal Reserve signalled a possible rate cut, which weakened the dollar and boosted demand for non-yielding assets like gold.

Continued Strong Central Bank Buying

Central banks remained net buyers of gold for the 15th consecutive year, with annual net purchases exceeding 1,000 tonnes for the second year in a row. The drive for diversification away from the US dollar amid deglobalisation trends, combined with gold's role as a long-term store of value, fuelled this buying spree. The People's Bank of China continued to be one of the largest buyers, increasing its official gold reserves for 17 straight months through March 2025. Similarly, Turkey and India also ramped up their gold reserves to strengthen monetary stability.

Softening of Jewellery Demand in Price-Sensitive Markets

Higher gold prices had a cooling effect on jewellery consumption in countries such as India, Indonesia, and Thailand. In India, gold jewellery demand fell by over 5% year-on-year, especially during festive periods like Akshaya Tritiya and Diwali, where elevated prices led consumers to shift towards lighter or alternative jewellery options. In India, despite a strong wedding season, Q3FY25 saw a dip in rural jewellery purchases due to price pressures and a delayed harvest, highlighting the sensitivity of demand to both gold prices and agricultural income.

Investment Demand Rebounds

Investment demand for gold gained traction globally, particularly in North America and Europe, where economic uncertainty, declining real interest rates, and banking sector stress led investors to reallocate portfolios. Gold-backed ETFs, which had witnessed net outflows in 2023, reversed course in FY24–25 with net inflows returning by Q3. During Q1CY25, U.S.-listed gold ETFs added over 60 tonnes as expectations of monetary easing rose and equity market volatility returned. Sovereign Gold Bonds in India also gained popularity due to attractive tax-free returns and safety compared to physical gold.

ESG and Responsible Sourcing in the Spotlight

There was a continued push for responsible sourcing and ESG compliance across the gold value chain. Both institutional buyers and retail consumers increasingly demanded transparency regarding gold origins, environmental impacts, and labour practices. As a result, refiners and large jewellery retailers adopted more rigorous traceability systems and sustainable production practices. World Gold Council updated its “Responsible Gold Mining Principles” to strengthen sustainability disclosures. India’s BIS (Bureau of Indian Standards) also expanded hallmarking regulations to improve quality and consumer confidence.

Stable Industrial and Technological Demand

Gold demand from industrial and technology sectors remained steady. While electronics demand was somewhat tempered by a global slowdown in smartphone and PC shipments, innovations in AI, EVs, and medical devices sustained gold’s role in niche but essential applications. Gold demand in electronics held firm in East Asian markets, particularly in South Korea and Japan, driven by advanced semiconductor manufacturing and medical imaging technologies.

Shifting Global Trade Dynamics and Regulatory Changes

Global trade in gold continued to evolve due to regulatory changes, shifting refining centres, and rising scrutiny of grey market transactions. The United Arab Emirates (UAE) introduced tighter compliance standards in its free zones, while India expanded its customs monitoring to curb under-invoicing and smuggling. India imposed a special additional duty on gold imports from countries like Indonesia and the UAE under the Free Trade Agreement (FTA) route, aiming to close loopholes and protect domestic refineries. Meanwhile, Switzerland saw increased volumes as a refining hub for ethically sourced gold from Africa and Latin America.

FACTORS INFLUENCING GLOBAL GOLD PRICES

Currency Movements – Impact of the US Dollar

Gold prices are closely tied to the movement of the US dollar. A strengthening dollar—often associated with positive economic indicators—typically leads to lower gold prices, as investor risk appetite improves. Since gold is priced in USD globally, a stronger dollar makes gold more expensive for holders of other currencies, thereby dampening demand.

Demand from Key Consumer Markets: India, China, and the US

Together, India, China, and the United States account for over half of the global gold demand. In India, gold holds cultural and religious significance, making it a preferred purchase during festivals, weddings, and other auspicious occasions. Similarly, in China, gold symbolizes prosperity and is widely regarded as a store of wealth. In both countries, gold continues to be seen as a reliable investment avenue, particularly during economic uncertainty.

Geopolitical Tensions and Global Unrest

Gold's traditional role as a safe-haven asset makes its demand highly sensitive to geopolitical developments. Escalating trade disputes, military conflicts, or diplomatic tensions typically lead to increased demand for gold. For instance, recent tariff actions by the US and geopolitical frictions in the Middle East and East Asia have contributed to upward pressure on global gold prices. Past events, such as tensions between North Korea and the US, have shown a similar pattern of price escalation driven by heightened uncertainty.

Performance and Volatility in Other Asset Classes

Gold prices are also influenced by the performance and perceived risk of other financial assets, particularly equities. When stock markets experience volatility or corrections, investors often shift towards gold as a hedge. Conversely, when equity markets deliver strong returns or when interest rates rise, gold becomes less attractive, as other instruments offer better yields.

Inflationary Pressures

Gold is widely viewed as a hedge against inflation. During periods of rising inflation or declining currency value, investors tend to increase gold holdings to preserve purchasing power. This characteristic reinforces gold's position as a universal store of value, particularly during periods of monetary expansion or weakening fiat currencies.

Central Bank Policies and Gold Purchases

Central banks are significant players in the global gold market. Sustained buying or selling by central banks—driven by reserve diversification, de-dollarisation strategies, or currency stability objectives—can materially affect gold prices. In FY24–25, central bank gold buying remained near historic highs, contributing to tight supply and price support.

Real Interest Rates

While nominal interest rates matter, it's the real interest rate (interest rate adjusted for inflation) that influences gold the most. When real rates are negative or low, the opportunity cost of holding non-yielding assets like gold decreases, making it more attractive. This dynamic played a key role during FY24–25 when several developed economies saw falling real yields.

Mining Supply and Production Costs

Gold prices are also affected by supply-side dynamics. Disruptions in mining operations due to political instability, strikes, environmental regulations, or higher input costs can tighten supply and support prices. Conversely, ramp-up in production or technological advances that reduce costs may ease price pressure. Stricter ESG regulations and energy cost inflation in major gold-producing countries like South Africa and Peru have increased production costs.

Market Speculation and Sentiment

Gold markets are also driven by speculative trading and investor sentiment. Futures markets, options contracts, and algorithmic trading can cause short-term price volatility based on macroeconomic data releases, interest rate expectations, or technical indicators.

INDIAN GEMS & JEWELLERY MARKET

The gems and jewellery industry in India holds immense economic and cultural significance. This industry contributes to country's GDP and employment generation, particularly for artisans and craftsmen. India is among the leading countries for production and export of gems and jewellery. Gems and jewellery serve as a symbol of status, wealth and adornment in Indian society, making it an integral part of celebrations, ceremonies and everyday life.

In FY 2024, the Indian gems and jewellery retail market reached a value of INR 6,490 billion, with gold jewellery continuing to dominate consumption. While the industry remained flat in FY2019 due to muted demand, a surge in gold prices provided some growth momentum. The onset of the COVID-19 pandemic in FY 2020 and FY 2021 led to a decline in volume demand, driven by high gold prices and pandemic-induced disruptions. However, FY 2022 saw a sharp recovery, fuelled by deferred bridal purchases and rising disposable incomes. In FY 2023, the industry's value grew by 9%, largely on account of increasing gold prices. FY 2024 witnessed robust demand recovery, supported by both price appreciation and volume growth, leading to a strong 15% year-on-year expansion reflecting sustained domestic consumption.

Looking ahead, the industry is projected to grow by 24% in FY2025, reaching an estimated INR 8,200–8,400 billion. This growth will be primarily driven by higher realizations, spurred by elevated international and domestic gold prices. However, the surge in prices may dampen demand, particularly in price-sensitive segments. This potential impact could be cushioned by a reduction in customs duties, seasonal festive demand, and investment-led gold purchases. Over the longer term, CRISIL Intelligence anticipates a CAGR of 13–14% from FY 2024 to FY 2029, with the industry expected to reach a market size of INR 12,000–12,200 billion by FY 2029.

The market remains largely fragmented, dominated by standalone, family-run jewellers, owing to strong customer loyalty and traditional buying behaviour. However, national and regional jewellery chains have gained significant ground in recent years, driven by increasing brand trust, standardised quality, and compliance with regulatory reforms such as GST implementation, mandatory Hallmarking, and the introduction of HUID. Additionally, the growing preference for branded jewellery and convenience has led to rapid expansion in online jewellery retail.

Jewellery consumption in India continues to be occasion-driven largely associated with weddings, festivals, and religious or cultural events. The growth trajectory is further supported by rising per capita incomes, increasing urbanisation, and greater exposure to global fashion and design trends. The Indian market can be broadly segmented into three categories: gold jewellery, studded jewellery (comprising diamonds and coloured gemstones), and other jewellery (including silver and platinum). Gold jewellery holds the lion's share, accounting for 81–86% of the market. However, studded jewellery offering higher gross margins is gaining traction, especially in urban centres.

The studded jewellery segment, particularly diamond-studded pieces, is being increasingly adopted by younger consumers for its lighter weight, versatility, and aspirational value. Typically crafted in 14k or 18k gold rather than traditional 22k, such pieces are becoming popular for everyday wear. This shift aligns with the preferences of millennials and Gen Z, who value affordability, design variety, and lifestyle fit. The segment offers a wide range of options across price points, catering to diverse consumer preferences.

India's lab-grown diamond (LGD) industry is poised for a modest rebound in FY2025, with exports projected to grow by 7–9% to approximately USD 1.5–1.53 billion. This follows a difficult FY2024, where exports declined by 16.5% due to price correction despite rising volumes. The global pivot toward sustainable and ethically sourced diamonds, along with the G7 ban on Russian-origin diamonds, has opened up new export markets for Indian LGD manufacturers, notably in Germany, the UK, and China. Domestically, the rising prices of natural diamonds and gold are pushing younger consumers to explore lab-grown alternatives. India continues to lead in LGD production, leveraging advanced technologies like Chemical Vapor Deposition (CVD) and High-Pressure High Temperature (HPHT), positioning itself as a global manufacturing hub. That said, challenges such as oversupply and price erosion remain critical for the segment's long-term viability.

Jewellery consumption patterns in India can be classified into three categories: bridal wear (50–55% market share), daily wear (35–40%), and fashion wear (5–10%). Among product types, bangles and chains dominate retail sales with a 30–40% share each, followed by necklaces (15–20%), and earrings and rings (5–15% each). Chains are integral to both daily and fashion wear, while bangles are key in bridal and daily segments. Necklaces span all three categories, contributing significantly to the industry's diversity in offerings.

Regional consumption trends also play a vital role. The southern region leads in jewellery consumption, accounting for 38–43% of the market, followed by the western region (22–27%), northern region (18–23%), and eastern region (13–17%). These differences are shaped by cultural preferences, regional traditions, and income distribution, leading to distinct jewellery buying behaviours across the country.

The Indian gems and jewellery market stands on the cusp of a transformative decade, backed by structural shifts, evolving consumer preferences, and strong macroeconomic fundamentals. The increasing formalisation of the sector, driven by policy interventions, greater transparency, and digitisation, is expected to accelerate the shift from unorganised to organised retail. With younger demographics showing a growing inclination towards lightweight, daily-wear, and studded jewellery, product innovation and design differentiation will be key to capturing market share. The rising demand for sustainable options, such as lab-grown diamonds, also signals a significant shift in consumer mindset. Moreover, the sector is poised to benefit from growing exports, wider adoption of omnichannel retail, and rising urban disposable incomes. As India continues to blend its rich cultural heritage with global design sensibilities, the industry is well-positioned to achieve sustained double-digit growth, potentially emerging as a global leader in both traditional and contemporary jewellery segments over the coming years.

DEMAND DRIVERS FOR GEMS AND JEWELLERY RETAIL INDUSTRY IN INDIA

Key events, including weddings and festivals drive demand in India

The demand of jewellery is mainly driven by weddings, festivals, birth and the harvest season. The seasonal nature of these events leads to demand for jewellery throughout the year. During festivals such as Diwali, Dussehra and Akshaya Tritiya, the tradition of buying jewellery is considered auspicious, resulting in consumers making significant purchases during these festivals. The demand for jewellery is also high during the wedding season. As jewellery is an integral part of Indian weddings, families invest in various types of gold, diamond and other precious jewellery. India's large population, along with a high %age of youngsters would mean high instances of marriages every year. Also, since a large demand of jewellery in India comes from rural areas, the harvesting season also promotes demand.

Rise in disposable income

India's per capita income grew to ₹ 108,786 in fiscal 2024 from ₹ 63,462 in 2012, logging a 4.5% CAGR. The per capita income is expected to continue its growth trajectory. With an increase in per capita income, disposable income levels increase, enabling consumers to spend more on luxury items such as diamond and gold jewellery.

Financial security

Indians consider gold as a safe and stable investment, owing to its intrinsic value against inflation and economic downturns. The metal is treated as a tangible and secure asset. Many a time, the jewellery is also passed down from generation to generation as a form of investment, savings for the family.

Government support

The government has taken various key initiatives to promote growth in the Indian jewellery industry. Introduction of the GST has led to simplified taxation for jewellers, which reduced their compliance burden. The hallmarking mandate by the government on gold jewellery and related items has established credibility of a jewellery's purity and enhanced trust among buyers.

Rising urbanisation

The urban population in India is projected to increase to ~40% by 2030 from ~31% of the total population in 2010, according to a UN report on urbanisation. The influx of migrants in metros results in the rise of economic

opportunities for workers, leading to availability of higher disposable incomes. The rise in disposable income due to urbanisation leads to demand in jewellery consumption.

Rise in preference for branded jewellery

In the competitive Indian jewellery market, companies offer unique and distinctive designs to differentiate themselves from other brands. Consumers find satisfaction in buying branded jewellery that offers distinctive designs. Branded jewellery instils trust in the buyers that the products they are purchasing are of standard quality. Branded jewellery companies maintain stores with helpful attendants and well displayed merchandise offering a superior shopping experience giving consumers a sense of living an upgraded lifestyle, which in turn, drives demand for this segment. In addition, Indian jewellery consumers are also becoming increasingly brand conscious and developing greater sophistication in their jewellery.

E-commerce and digitalisation

Like various retail sectors such as fashion, grocery and electronics, the online retail sector has penetrated the jewellery industry as well. Rise in smartphones and internet penetration have led to demand of jewellery online platforms, where brands can display their merchandise to consumers across regions, especially where it does not have a physical store, facilitating an online buying option through various modes of e-payment.

Exposure to global brands

With rising income levels, the preference for jewellery in India is also changing. At present, increasing travel and internet penetration in India have led to a rise in the exposure of Indian consumers to various global jewellery designs. Consumers, especially the millennials, follow various global influencers for key styling and design trends, the exposure of which increases demand.

REGULATORY ENVIRONMENT

Sovereign Gold Bond (SGB) Scheme:

Launched by the Government of India in 2015, the Sovereign Gold Bond scheme offers investors a digital alternative to holding physical gold. Issued by the Reserve Bank of India (RBI) on behalf of the government, these bonds are denominated in grams of gold and carry a fixed annual interest rate (currently 2.5%) payable semi-annually. At maturity, investors receive the prevailing market value of gold, ensuring both capital appreciation and regular income. Additionally, capital gains on redemption are tax-free, making SGBs a secure, cost-effective, and tax-efficient instrument for gold investment without storage hassles or purity concerns.

Indian Gold Coin (IGC) Scheme:

The Indian Gold Coin Scheme, launched as part of the Gold Monetisation initiatives in 2015, aims to promote the use of domestically manufactured gold coins and reduce reliance on imported gold. These coins, available in denominations of 5, 10, and 20 grams, are made of 24-karat gold and bear the Ashoka Chakra, ensuring authenticity and national branding. The coins are hallmarked for purity and have tamper-proof packaging, providing a trustworthy investment option. By encouraging consumers to buy certified Indian gold, the scheme also supports the broader Make in India initiative.

Gold Monetisation Scheme (GMS):

The Gold Monetisation Scheme was introduced to mobilise idle gold lying with households, trusts, and institutions, and to channel it into the financial system. Under the scheme, individuals and entities can deposit their physical gold (in the form of jewellery, bars, or coins) with authorised banks and earn interest on it. The gold is tested for purity, converted into equivalent gold value, and deposited for short, medium, or long-term tenures. Depositors earn interest (typically between 0.5%–2.5% depending on tenure) and get back either equivalent gold or cash at maturity. This scheme helps reduce gold imports and strengthens India's gold reserves by tapping into the estimated 20,000+ tonnes of privately held gold.

Amendment (March 2025):

- Discontinued: Medium-Term (5–7 years) and Long-Term (12–15 years) deposits
- Continued: Short-Term Bank Deposits (1–3 years) at banks' discretion.
- No new deposits or renewals allowed under discontinued categories.
- Existing deposits will continue until maturity.

Hall Marking Scheme

The Hallmarking scheme in India, introduced by the Bureau of Indian Standards (BIS), regulates, and authenticates gold jewellery to ensure its quality and purity. The scheme started in 2000 and provides consumers with confidence in their jewellery purchases.

Updates and phases of the scheme include:

- First Phase (June 23, 2021): Mandatory hallmarking was implemented in 256 districts across India.
- Second Phase (April 4, 2022): The scheme expanded to include an additional 32 districts.
- Introduction of HUID (July 1, 2021): A 6-digit Hallmark Unique Identification number was introduced for each article of jewellery, enhancing transparency and authenticity.
- Third Phase (September 8, 2023): The latest amendment extended mandatory hallmarking to 55 new districts, bringing the total to 343 districts covered by the scheme.

Under the Hallmarking scheme, registered jewellers are entrusted with the task of selling hallmarked Jewellery, working in tandem with recognized testing and hallmarking centres. These regulations, in place since June 14, 2018, are designed to empower consumers, enabling them to make informed choices when purchasing gold and sparing them from unnecessary confusion. This scheme plays a vital role in safeguarding the interest of jewellery buyers while upholding the integrity of the industry.

Prevention of Money Laundering Act (PMLA):

The Prevention of Money Laundering Act (PMLA) of 2002 was enacted to tackle the issue of money laundering, which involves making illegally obtained funds appear legitimate. The law authorises the government or designated authorities to confiscate properties that are financed by illicit money.

In accordance with this act, the central government has mandated that gold merchants keep records of transactions that exceed the value of Rs 10 lakhs for a period of five years.

Duty Drawback Scheme

The Duty Drawback Scheme is a program that enables exporters to obtain gold or inputs without paying duty charges. To participate, exporters must secure a one-time certificate from customs authorities and have membership certificates from bodies like the Gem and Jewellery Export Promotion Council (GJEPC). Once certified, they can acquire duty-free gold from nominated agencies and must export the gold within 90 days and receive payments within 120 days, providing documentation such as Customs Invoice Bill, Shipping Bill, and Bank Realization Certificate.

Exporters can claim a duty drawback, a refund for gold intended for export, indicated on a designated shipping bill. The scheme offers two options for exporters:

- **Outright Purchase:** Exporters can buy gold or silver for jewellery exports by making a full payment.
- **Metal Loan:** Exporters can take a duty-free gold loan for jewellery exports, backed by a Bank Guarantee or Cash Margin of 110% of the gold's notional value.

OPPORTUNITIES AND THREATS

FY 2024–25 marked a period of transition and opportunity for India's organised gold jewellery retail sector. With rising consumer preference for branded offerings, greater formalisation, and growing digital adoption, the long-term fundamentals remain strong. However, players must navigate a complex mix of economic uncertainty, regulatory vigilance, and evolving consumer behaviour. Companies that invest in design, digital engagement, inventory efficiency, and regional relevance are well-positioned to capture emerging opportunities and sustain competitive advantage.

OPPORTUNITIES

Formalisation of the Industry

The Indian jewellery industry is witnessing accelerated formalisation, driven by regulatory reforms such as mandatory hallmarking, the expansion of GST compliance, and stricter KYC norms. These measures have led to increased consumer trust and have enabled organised players to gain market share from unorganised and regional counterparts. Organised retailers, with established brand equity and transparent practices, are well-positioned to benefit from this structural shift.

Rising Urbanisation and Aspirational Demand

Continued urbanisation, rising disposable incomes, and evolving lifestyle aspirations have spurred demand for branded and designer gold jewellery. Young consumers, particularly in Tier 2 and Tier 3 cities, are gravitating toward trusted retail brands that offer product authenticity, variety, and superior in-store experiences. This demographic transition presents a significant growth opportunity for established organised players with strong regional or national retail footprints.

Favourable Gold Price Dynamics

Gold prices remained elevated throughout FY 2024–25 due to global macroeconomic uncertainty, sticky inflation, and geopolitical tensions. While higher prices initially weighed on volumes, they have enhanced the perceived value of gold jewellery as a dual-purpose asset serving both ornamental and investment functions. Organised retailers, with robust inventory management and product innovation, can leverage this trend to offer attractive designs across pricing segments.

Digital Adoption and Omni-Channel Retailing

The increasing convergence of physical and digital retail is reshaping consumer behaviour. Online catalogues, virtual try-ons, appointment-based store visits, and influencer-led digital campaigns are redefining the purchase journey. Organised players with investments in omni-channel infrastructure and digital marketing are well-equipped to engage with tech-savvy consumers and expand reach beyond physical catchments.

Access to Capital Markets

The recent wave of successful IPOs and stock market listings by jewellery companies has signalled renewed investor confidence in the long-term growth prospects of the organised retail jewellery sector. These market debuts have not only unlocked significant valuations but also created a robust funding pathway for sector participants. By accessing public capital markets, organised players now have greater financial flexibility to invest in brand building, expand their retail footprints across high-potential geographies, upgrade technology and supply chain systems, and strengthen working capital. This trend is encouraging more jewellery brands particularly those with strong regional presence and sound governance to consider capital market participation as a viable route for accelerating scale and institutionalising operations.

Government Support and Export Potential

The Government of India continues to support the sector through policy initiatives such as the revamped gold monetisation scheme, the proposed India International Bullion Exchange, and trade agreements aimed at enhancing jewellery exports. Organised jewellers with export-ready infrastructure and hallmark-compliant collections can tap into growing demand from overseas markets, especially the Middle East and Southeast Asia.

Shift Toward Lightweight and Contemporary Jewellery

Consumers are increasingly opting for lightweight, minimalist, and everyday wear jewellery. Organised brands, with in-house design teams and access to customer insights, can rapidly innovate and launch contemporary collections that cater to these evolving preferences, thereby increasing repeat purchases and enhancing wallet share.

THREATS, RISK & CONCERNS

High Volatility in Gold Prices

While elevated gold prices support the value of inventory, sharp price fluctuations can deter purchases, impact inventory planning, and reduce demand elasticity. Prolonged price volatility may lead to deferment of discretionary purchases, especially in rural markets, affecting overall industry volumes.

Regulatory Risks and Taxation

The sector remains sensitive to policy interventions such as import duties, GST structure revisions, and restrictions on cash transactions. Any adverse change in these regulatory norms can affect consumer demand, margins, and sourcing costs for retailers. Organised players are particularly impacted due to their high compliance standards and formal operating structures.

Intensifying Competition from unorganised sector

As the organised jewellery retail market matures, competition among branded players has intensified—driven by aggressive expansion, advertising spends, and discount-led marketing. This could result in margin pressures and brand dilution unless players differentiate through customer experience, design innovation, and loyalty programs. Despite formalization efforts, the unorganized sector still holds a significant market share. Price undercutting and lack of compliance can create uneven competition, especially in semi-urban and rural areas.

Dependence on Festive and Wedding Seasons

Gold jewellery purchases in India remain heavily skewed toward festivals, weddings, and auspicious occasions. This creates a seasonality in demand, exposing the business to quarter-to-quarter volatility. Any disruption in festive demand—due to adverse economic conditions, unseasonal rainfall impacting rural income, or consumer sentiment—can significantly impact sales performance. Organised retailers must focus on diversifying product portfolios and promoting jewellery as an everyday luxury to reduce this cyclicity.

Working Capital and Inventory Management

The jewellery retail business is inherently working capital-intensive, with significant investment required in gold and precious metal inventory. Managing inventory turnover while maintaining adequate variety and stock levels across multiple formats and locations is a constant challenge. Gold price fluctuations further impact capital efficiency. Any misalignment between demand forecasting and inventory planning may lead to liquidity stress or stock write-downs.

Rural Demand Sensitivity

A significant portion of India's gold jewellery consumption still originates from rural and semi-urban markets. Fluctuations in agricultural output, monsoon dependency, and rural income levels can directly impact festive and wedding-related jewellery sales. Organised players need tailored strategies to address affordability and cultural preferences in these regions.

Shift Towards Lab-Grown Diamonds and Alternatives

Changing consumer preferences and cost-consciousness are driving interest in lab-grown diamonds and alternative fashion jewellery, particularly among urban millennials. While not a direct threat to gold jewellery, this trend can divert a portion of discretionary spending away from traditional offerings.

Geopolitical and Global Economic Uncertainties

The gold retail sector remains indirectly exposed to global headwinds such as geopolitical conflicts, currency fluctuations, and changes in international gold demand-supply dynamics. These factors may impact sourcing costs, consumer sentiment, and export opportunities. Global supply chain issues, including delays in raw material imports or logistics bottlenecks, can affect inventory planning and delivery timelines, especially during peak seasons.

Talent Retention and Skills Gap

The jewellery industry is highly reliant on skilled artisans, designers, and sales personnel. Organised retailers need to constantly invest in talent acquisition, retention, and upskilling to maintain service quality and product excellence. The shortage of skilled manpower in certain roles, especially in regional markets, can impact customer experience and operational efficiency.

While the long-term outlook for the organised gold jewellery retail sector in India remains structurally positive, the industry must navigate a range of strategic and operational risks. Key among them are gold price volatility, evolving consumer preferences, regulatory shifts, and working capital challenges. Companies that invest in technology, brand differentiation, agile inventory systems, and workforce development will be better positioned to mitigate risks and capture long-term growth opportunities. For D.P. Abhushan Limited, proactive risk monitoring, prudent capital management, and customer-centric innovation remain at the core of its operational strategy.

INTERNAL FINANCIAL CONTROL

The Company has established and maintained adequate internal financial controls that are commensurate with the scale, complexity, and nature of its operations. These controls are designed to provide reasonable assurance regarding the accuracy and reliability of financial reporting and the preparation of financial statements in accordance with applicable accounting standards.

During the year, an independent agency conducted a detailed evaluation of the Company's internal financial control systems. Based on the findings of this assessment and further review by the management and the Audit Committee, the Board of Directors is of the opinion that, as of March 31, 2025, the Company had in place effective internal financial controls over financial reporting. These systems have operated effectively throughout the year, ensuring the integrity, transparency, and consistency of financial disclosures.

FINANCIAL PERFORMANCE

The financial statements of the Company have been prepared in accordance with the Indian Accounting Standards as specified under Section 133 of the Companies Act, 2013 and the applicable Rules, as amended from time to time and other applicable provisions. The salient parameters of the financial performance of the Company during the year under review as compared to previous year are as under:

KEY FINANCIAL RATIOS

Details of key financial ratios of the Company, changes therein as compared to previous financial year along with explanations are as under:

Key Ratios	Units	F.Y. 2024-25	F.Y. 2023-24	% Change	Explanations (Need to Update)
Current Ratio	Times	1.84	1.72	6.90%	The ratio is less than 2 which indicates the good financial capacity of the company to meet out its short-term obligations. This may be due to higher cash balances, better receivables management, or reduced short-term obligations.
Debt Equity Ratio	Times	0.41	0.67	-39.24%	A significant reduction in the Debt Equity Ratio reflects lower reliance on debt, signaling reduced financial risk. This could be due to loan repayments, issue of new equity shares, or retention of earnings.
Inventory Turnover Ratio	Times	5.64	5.86	-3.76%	The slight decline indicates inventory is turning over a bit slower, possibly due to higher inventory levels.
Net Profit Ratio	%	3.40%	2.64%	76 in Bps	This could be due to higher sales, better cost control, or improved operational efficiencies.
Interest Coverage Ratio	Times	11.46	8.18%	328 in Bps	The rise indicates the company's earnings are covering interest payments much more comfortably, often a result of increased operating profit or reduced interest costs from lower debt.
Operating Profit Margin	%	7.68%	6.63%	105 in Bps	The increase highlights improved core profitability, most likely due to higher sales.
Return on Net Worth	%	4.97	2.78	219 in Bps	A higher Return on Net Worth signals better returns for equity holders, often driven by increased profitability or more efficient use of equity resources.

OPINION

We have audited the Standalone Ind AS financial statements of **D.P. ABHUSHAN LIMITED** ('The Company') which comprise the Balance Sheet as at 31st March, 2025, the statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity for the year ended on 31st March, 2025, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information. (Hereinafter referred to as "standalone financial statements")

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Standalone Ind AS Financial Statements give the information required by the Companies Act, 2013 as amended ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, its profit including other comprehensive income, its cash flow and the changes in equity for the year ended on that date.

BASIS OF OPINION

We conducted our Audit of the Standalone Ind AS Financial Statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Standalone Ind AS Financial Statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the Standalone Ind AS Financial Statements.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of utmost significance in our audit of the Standalone Ind AS Financial Statements of the current period. These matters were addressed in the context of our audit of the Standalone Ind AS Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For matter below, our description of how our audit addressed the matter is provided in that context.

KEY AUDIT MATTERS	HOW THE MATTER WAS ADDRESSED IN OUR AUDIT?
REVENUE RECOGNITION Revenue from sale of goods is recognized when control of the products being sold is transferred to the customer and when there are no other unfulfilled obligations. The performance obligations in the contracts are fulfilled at the time of dispatch, delivery or upon formal customer acceptance depending on customer terms. We identified revenue recognition as a key audit matter because the Company and its external stakeholders focus on revenue as a key performance indicator. This could create an incentive for revenue to be overstated or recognized before control has been transferred.	In view of the significance of the matter we applied the following audit procedures in this area, among other procedures, to obtain sufficient appropriate audit evidence: 1. We assessed the appropriateness of the revenue recognition accounting policies and its compliances with applicable Indian Accounting Standards. We read the contracts with customer, distributors, franchisees etc. to determine appropriateness of revenue recognition. 2. We evaluated the design of key internal financial controls and operating effectiveness of the relevant key controls with respect to revenue recognition on selected transactions. 3. We evaluated the design, implementation and operating effectiveness of management's general IT controls and key application controls over the Company's IT systems which govern revenue recognition, including access controls, controls over program changes and interfaces between different systems.
INVENTORY VALUATION The Company is engaged in Manufacturing and Trading of Gold and other precious ornaments. - Raw materials are valued at cost. - Valuation of inventories is done at Cost or NRV whichever is lower. As inventories of the company comprise of high value items, we have identified valuation of inventory as a key audit matter	Our audit procedures over the valuation of Inventories included the following: - We evaluated the design, implementation and tested the effectiveness of controls that the company has in place to safeguard and physical verification of inventories including appropriateness of the Company's procedure for conducting and reconciling physical verification of inventories. - Participated and observed physical verification of inventory conducted by the management at retail outlet on sample basis. - We compared the net realizable values on sample basis of gold, silver and platinum inventories calculated based on the current market price with their carrying value of Inventories.

INFORMATION OTHER THAN THE FINANCIAL STATEMENTS AND AUDITOR'S REPORT THEREON

The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance Report, and Shareholder Information, but does not include the Standalone Ind AS Financial Statements and our auditor's report thereon.

Our opinion on the Standalone Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone Ind AS Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

When we read the other information identified above, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

MANAGEMENT AND BOARD OF DIRECTORS RESPONSIBILITY FOR THE STANDALONE IND AS FINANCIAL STATEMENTS

The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to preparation of these Standalone Ind AS Financial Statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act, read with companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgment and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal control that were operating effectively for ensuring the accuracy and completeness of accounting records, relevant to preparation of Standalone Ind AS Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE STANDALONE IND AS FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the Standalone Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Ind AS Financial Statements

As part of an audit in accordance with SA's, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: -

- Identify and assess the risks of material misstatement of the Standalone Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls. (Annexure B is our Report on Internal Financial Control)..
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Ind AS Financial Statements, including the disclosures, and whether the Standalone Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of utmost significance in the audit of the Standalone Ind AS Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the **"Annexure A"** a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

ANNEXURE-B TO THE AUDITORS' REPORT

Annexure-B to the Independent Auditor's Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to financial reporting of **M/s D. P. ABHUSHAN LIMITED** ("The Company") as on 31st March, 2025 in conjunction with our audit of the Financial Statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these Standalone Ind AS Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these Standalone Ind AS Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting with reference to these Standalone Ind AS Financial Statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these Standalone Ind AS Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting with reference to these Standalone Ind AS Financial Statements.

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING WITH REFERENCE TO THESE STANDALONE IND AS FINANCIAL STATEMENTS

A Company's internal financial control over financial reporting with reference to these Standalone Ind AS Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting with reference to these Standalone Ind AS Financial Statements includes those policies and procedures that-

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
3. Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting with reference to these Standalone Ind AS Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these Standalone Ind AS Financial Statements to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these Standalone Ind AS Financial Statements and such internal financial controls over financial reporting with reference to these Standalone Ind AS Financial Statements were operating effectively as at 31st March 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. 1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS AND MATERIAL ACCOUNTING POLICIES

1.1 Basis of Preparation of Financial Statements

• Statement of Compliance

The standalone financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Companies Act, 2013 ("the Act") (as amended from time to time) and presentation and disclosure requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS Compliant Schedule III) as amended from time to time, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, from time to time and other accounting principles generally accepted in India. The Company follows indirect method prescribed in Ind AS 7 – Statement of Cash Flows for presentation of its cash flows.

• Functional and Presentation Currency

The Standalone Ind AS Financial Statements are presented in Indian Rupees (INR), and all the values are rounded to the nearest Lakhs with two decimals, except when otherwise indicated.

• Basis of Measurement

The Standalone Ind AS Financial Statements have been prepared on accrual basis under the historical cost convention, except for the following assets and liabilities which have been measured at fair value as required by relevant Ind AS:

- ✧ Certain financial assets and liabilities (refer accounting policy regarding Financial Instruments), and
- ✧ Defined employee benefit liability

• Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, (regardless of whether that price is directly observable or estimated using another valuation technique). In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability, if market participants would take those characteristics into account when pricing the asset or liability, at the measurement date.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- **Level 1** inputs are quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date;
- **Level 2** inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- **Level 3** inputs are unobservable inputs for the asset or liability.

Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36

• Significant accounting judgements, estimates and assumptions

The preparation of the Company's Standalone Ind AS Financial Statements requires the management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, the accompanying disclosures and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. Estimates and assumptions are reviewed on periodic basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

The key assumptions concerning the future and other key sources of estimation, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities, within the next financial year, are described below. The Company has based its assumptions and estimates on parameters available when the Standalone Ind AS Financial Statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Information about critical judgments in applying accounting policies, as well as estimates and assumptions that have the most significant effect to the carrying amounts of assets and liabilities within the next financial year, are included in the following notes:

A. Measurement of defined benefit obligations: The cost of the defined benefit gratuity plan and other post-employment retirement benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

B. Measurement and likelihood of occurrence of provisions and contingencies: A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. A disclosure for contingent liabilities is made where there is a possible obligation or a present obligation that may probably not require an outflow of resources. When there is a possible or a present obligation where the likelihood of outflow of resources is remote, no provision or disclosure is made in the financial statements.

C. Recognition of taxes: Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

D. Useful life of Property, Plant and Equipment and Intangible Assets: The Company reviews the estimated useful lives of property, plant and equipment and intangible assets at the end of each reporting period. During financial year ended 31 March 2025, there were no changes in useful lives of property plant and equipment and intangible assets other than those resulting from store closures / shifting of premises.

The Company at the end of each reporting period, based on external and internal sources of information, assesses indicators and mitigating factors of whether a store (cash generating unit) may have suffered an impairment loss. If it is determined that an impairment loss has been suffered, it is recognised in statement of profit or loss.

E. Going concern: During the current year ended March 31, 2024, management has performed an assessment of the entity's ability to continue as a going concern. Based on the assessment, management believe that there is no material uncertainty with respect to any events or conditions that may cast a significant doubt on the entity to continue as a going concern, hence the Standalone Ind AS Financial Statements have been prepared on going concern basis.

F. Current and Non-Current classification: All assets and liabilities are classified into current and non-current.

Assets

An asset is classified as current when it satisfies any of the following criteria:

- I. It is expected to be realised in, or is intended for sale or consumption in, the Company normal operating cycle;
- II. It is held primarily for the purpose of being traded;
- III. It is expected to be realised within 12 months after reporting date; or
- IV. It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets. All other assets are classified as non current.

Liabilities

A liability is classified as current when it is satisfying any of the following criteria:

- I. It is expected to be settled in the Company's normal operating cycle;
- II. It is held primarily for the purpose of being traded;
- III. It is due to be settled within 12 months after the reporting date; or
- IV. The Company does not have as unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of the liability that could, at the option of the counterparty, result in its settlement by the issue of equity instrument do not affect its classification.

Current liabilities include current portion of noncurrent financial liabilities. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities respectively.

G. Operating Cycle: Based on the nature of services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current – non-current classification of assets and liabilities.

H. Classification of Leases: The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgement. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an options to extend the lease if the Company is reasonably certain to exercise that options; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that options. In assessing whether the company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

1.2 Material accounting policies

• Property Plant & Equipment

Property, Plant and Equipment are carried at acquisition cost, net of accumulated depreciation and accumulated impairment losses, if any. Subsequent expenditures related to an item of tangible asset are added to its book value if due to such expenditure it is probable that future economic benefits will arise to the company. Gains or Losses arising from disposal of tangible assets are recognized in the Statement of Profit and Loss.

Property, plant and equipment not ready for the intended use on the date of balance sheet are disclosed as "Capital work-in-progress". Capital work in progress is stated at cost, net of accumulated impairment loss, if any.

• Depreciation

Depreciation on tangible assets has been provided using straight line method over its useful life (once asset is available for intended use) which is in compliance with schedule II of Companies Act, 2013.

Asset Class (Straight Line Basis)	Useful Life
A. Building	60 Years
B. Plant & Machinery	15 Years
C. Furniture & Fittings	10 Years
D. Motor Car (4-Wheeler)	8 Years
E. Motor Vehicle (2-Wheeler)	10 Years
F. Computer & Computer Peripherals	3 Years
G. Office Equipment	5 Years
H. Leasehold Improvements	Primary Period of Lease

Depreciation method, useful lives and residual values are reviewed at each financial year end and adjusted, if appropriate. During the year, a reclassification of certain assets has been done where by Certain assets Falling under Plant and Machine, Furniture and Fixture has been transferred to Office Equipment, Computer & Computer Peripherals and Lease hold improvement. The reclassification of assets has resulted into change in useful lives of Assets and consequent change in Depreciation of assets.

Depreciation for the year is recognised in the Statement of Profit and Loss.

• Intangible Assets

Intangible assets are recognised only when it is probable that the future economic benefits that are attributable to the assets will flow to the Company and the cost of such assets can be measured reliably. Intangible assets are stated at cost less accumulated amortisation and impairment loss, if any. All costs relating to the acquisition are capitalised.

Intangible assets are amortised in the Statement of Profit or Loss over their estimated useful lives, from the date that they are available for use based on the expected pattern of consumption of economic benefits of the asset.

• Amortisation

Amortisation of Intangible Assets has been provided using straight line method over its useful life as per Schedule II of the Companies Act, 2013.

Asset Class (Straight Line Basis)	Useful Life
A. Trademark	10 Years
B. ERP Software and Further Developments	5 Years

Intangible Assets not ready for the intended use on the date of balance sheet are disclosed as "Intangible Assets Under Development". Intangible Assets Under Development is stated at cost, net of accumulated impairment loss, if any.

Amortisation method and useful lives are reviewed at each reporting date. If the useful life of an asset is estimated to be significantly different from previous estimates, the amortisation period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortisation method is changed to reflect the changed pattern.

• Leases

As per Ind AS 116- Lease, the determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Where the Company is the lessee

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the statement of profit and loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the company's general policy on the borrowing costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the Statement of Profit and Loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

Where the Company is the lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

• Investments Property

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Upon initial recognition, an investment property is measured at cost. Subsequent to Initial recognition, investment property is measured at cost less accumulated depreciation and accumulated impairment losses, if any.

The Company depreciates investment properties over a period of 30 years on a straight-line basis over its estimated useful life.

Any gain or loss on disposal of an investment property is recognised in statement of profit and loss.

The fair values of investment property are disclosed in the notes. Fair values is determined by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

• Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

• Revenue Recognition

Revenue is recognised upon transfer of control of promised goods or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those goods or services.

SALE OF GOODS

Revenue from the sale of products is recognised at the point in time when control is transferred to the customer.

Revenue is measured based on the transaction price, which is the consideration, net of customer incentives, discounts, variable considerations, payments made to customers, other similar charges, as specified in the contract with the customer. Additionally, revenue excludes taxes collected from customers, which are subsequently remitted to governmental authorities.

OTHER INCOME

Interest Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

• Inventories

- ✧ Inventories of Raw materials are valued at Cost. The Cost is determined on Weighted Average Cost Method Basis.
- ✧ Stock of Work-in-progress is valued at cost. The Cost is determined on Weighted Average Cost Method Basis.
- ✧ Stock of Finished goods is valued at cost or net realizable value basis, whichever is lower. The Cost is determined on Weighted Average Cost Method Basis.

The Market value of inventories is determined, verified and certified by the management of the company. In respect of non-availability of market value of some items on balance sheet date, they are valued at their cost only.

- ✧ Packing Material and Consumables are valued at Cost on FIFO Basis.

Cost of inventories comprises all costs of purchase and, other duties and taxes (other than those subsequently recoverable from tax authorities), costs of conversion and all other costs incurred in bringing the inventory to their present location and condition.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated completion cost and the estimated cost necessary to make the sale.

• Foreign Currency Transactions

Transaction denominated in foreign currencies are normally recorded at exchange rate prevailing on the date of transactions. Exchange differences arising on foreign currency transaction settled during the period are recognised in the statement of Profit and Loss except in case where they relate to acquisition of fixed assets, are adjusted with the carrying cost of such assets.

Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated into functional currency at the exchange rates at the reporting date. The resultant exchange differences are recognized in the Statement of Profit and Loss.

• Retirement and other Employee Benefits

✧ Defined contribution plan

- ▶ The Company's employees are covered under state governed provident fund scheme and employees' state insurance scheme which are in nature of Defined Contribution Plan.
- ▶ The contribution paid/payable under the schemes are recognised during the period in which the employee renders the related service. The company's contributions to Employees PF and ESI are charged to statement of profit and loss.

✧ Defined Benefit Plans

- ▶ Employee gratuity fund scheme is the defined benefit plan. Provision for gratuity has been made in the accounts in respect of employees who have completed required number of years of service as on date of balance sheet based on Actuarial Valuation Report obtained from Actuarial Consultant using Projected Unit Credit Method. Gratuity is paid at the time of retirement of employees.

- ▶ Short Term Employee Benefits like leave benefit, if any, are paid along with salary and wages as and when accrued, bonus to employees are charged to profit and loss account on the basis of actual payment on year to year basis.

• Borrowing Cost

Borrowing costs consist of interest and other costs (including exchange differences to the extent regarded as an adjustment to the interest costs) incurred in connection with the borrowing of funds.

Borrowing costs directly attributable to the acquisition or construction of an asset, as defined in Ind AS 23, that necessarily takes a substantial period of time to get ready for its intended use are capitalized as a part of the cost of such assets. All other borrowing costs are recognized as an expense in the period in which they are incurred.

• Income Taxes

Income tax expense comprises current tax and deferred tax. It is recognised in the Statement of profit and loss except to the extent that it relates to an item recognized directly in equity or in other comprehensive income.

Current tax

The Income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. Income tax assets and liabilities are

measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in India. Current income tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in OCI or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. The management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences, except: When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.” Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised, except when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date, and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority. Current tax and deferred tax relating to items recognised outside the Statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in OCI or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

- **Earnings per Share**

Basic earnings per share are calculated by dividing the net profit for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equities shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive.

- **Provisions, Contingent Liabilities and Contingent Assets**

The Company creates a provision when there is a present obligation as a result of past event that probably require an outflow of resources and a reliable estimate can be made of the amount of obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the balance sheet date and are not discounted to the present value. These are reviewed at each year end and adjusted to reflect the best current estimate.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may or may not require an outflow of resources. When there is a possible obligation or present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent Assets are neither recognised nor disclosed in the financial statements.

- **Cash and Cash Equivalents**

Cash and Cash Equivalents in the balance sheet and for the purpose of cash flow statement comprise cash in hand and cash at bank including fixed deposit with original maturity period of three months and short-term highly liquid investments with an original maturity of three months or less as they are considered an integral part of the Company's cash management.

- **Financial Instruments**

A Financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

FINANCIAL ASSETS

Initial recognition and measurement:

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under Ind AS 115.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset."

FINANCIAL ASSET

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- a) Debt instruments at amortised cost

- b) Debt instruments at fair value through other comprehensive income (FVTOCI)
- c) Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- d) Equity instruments measured at fair value through other comprehensive income (FVTOCI)

DEBT INSTRUMENTS AT AMORTISED COST

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables."

DEBT INSTRUMENT AT FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency. The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

EQUITY INVESTMENTS

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

DE-RECOGNITION OF FINANCIAL ASSETS

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's consolidated balance sheet) when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

IMPAIRMENT OF FINANCIAL ASSETS

In accordance with Ind-AS 109, the Company applies Expected Credit Loss ("ECL") model for measurement and recognition of impairment loss on the financial assets measured at amortized cost and financial assets measured at FVOCI. For financial assets other than trade receivables, as per Ind AS 109, the Company recognises 12 month expected credit losses for all originated or acquired financial assets if at the reporting date the credit risk of the financial asset has not increased significantly since its initial recognition. The expected credit losses are measured as lifetime expected credit losses if the credit risk on financial asset increases significantly since its initial recognition. The Company's trade receivables do not contain significant financing component and loss allowance on trade receivables is measured at an amount equal to life time expected losses i.e. expected cash shortfall.

The impairment losses and reversals are recognised in Statement of Profit and Loss.

FINANCIAL LIABILITIES

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

The measurement of financial liabilities depends on their classification, as described below:

FINANCIAL LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

Financial liabilities at fair value through profit and loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit and loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit and loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

LOANS AND BORROWINGS

This is the category most relevant to the Company. After initial recognition, interest -bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

DE-RECOGNITION

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

OFFSETTING

Financial assets and financial liabilities are offset and the net amount is presented in the Balance Sheet, if the Company currently has a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

33.2 Financial Instruments - Fair values and risk management**33.2.1 Financial Instruments - Fair values**

Accounting classification and fair values

Carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy, are presented below.

- a) The fair value of financial instruments has been classified into three categories depending on the inputs used in the valuation technique. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and lowest priority to unobservable inputs (Level 3 measurements).

The categories used are as follows:

- **Level 1:** Quoted prices for identical instruments in an active market;
- **Level 2:** Directly or indirectly observable market inputs, other than Level 1 inputs; and
- **Level 3:** Inputs which are not based on observable market data.

33.2.2 Financial risk management

The company's principal financial liabilities, other than derivatives, comprise loans and borrowings, trade and other payable. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables and cash and cash equivalents that derive directly from its operations.

The company is exposed to market risk, credit risk and liquidity risk. The company's senior management

oversees the management of these risks. It is the Company's policy that no trading in derivatives for speculative purposes may be undertaken. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

A. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counter party to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's exposures to trade receivables (mainly institutional customers and credit sales), deposits with landlords for store properties taken on leases and other receivables including balances with banks.

TRADE RECEIVABLES AND OTHER DEPOSITS

The Company's retail business is predominantly on 'cash and carry' basis which is largely through cash and credit card collections. The credit risk on such credit card collections is minimal, since they are primarily owned by customers' card issuing banks. The Company has adopted a policy of dealing with only credit worth counterparties in case of institutional customers and credit sales and the credit risk exposure for institutional customers and credit sales are managed by the Company by credit worthiness checks. The Company also carries credit risk on lease deposits with landlords for store properties taken on leases, for which agreements are signed and property possessions timely taken for store operations. The risk relating to refunds of deposits after store shut down is managed through successful negotiations or appropriate legal actions, where necessary.

OTHER FINANCIAL ASSETS

The Company maintains exposure in cash and cash equivalents and term deposits with banks. The Cash and cash equivalents and term deposits are held with the banks with good credit ratings.

The Company's maximum exposure to credit risk as at 31st March 2025 and 31st March 2024 is the carrying value of each class of financial assets.

B. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an on-going basis to meet operational needs. Any short term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in interest bearing term deposits with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

EXPOSURE TO LIQUIDITY RISK

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted, and include estimated interest payments:

MARKET RISK

i. Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

ii. Interest rate risk

Interest rate risk can be either fair value interest rate risk or cash flow interest rate risk. Fair value interest rate risk is the risk of changes in fair values of fixed interest bearing financial assets or borrowings because of fluctuations in the interest rates, if such assets/borrowings are measured at fair value through profit or loss. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing borrowings will fluctuate because of fluctuations in the interest rates.

EXPOSURE TO INTEREST RATE RISK

The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows.

Particulars	Nominal Amount	
	31 st March 2025	31 st March 2024
Fixed-rate instruments		
Financial liabilities		
Auto Loan	508.72	58.65
Floating-rate instruments		
Financial liabilities		
Cash credit from banks	968.41	1,622.08
Secured term loans from banks	309.05	639.81
ECLGS	0.00	95.94
Working capital demand loans from banks	12,055.56	11,804.80

The Company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

33.3 Capital Management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital as well as the level of dividends to ordinary shareholders.

The board of directors seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position. The primary objective of the Company's Capital Management is to maximise shareholder value. The Company manages its capital structure and makes adjustments in the light of changes in the economic environment and the requirements of the financial covenants, if any.

The Company monitors capital using a ratio of 'adjusted net debt' to 'equity'. For this purpose, adjusted net debt is defined as total borrowings, comprising interest-bearing loans and borrowings less cash and cash equivalents. Equity comprises all components of equity.

The company's adjusted net debt to equity ratio was as follows.

(₹ in Lakhs)

* Basis & Reasonableness of Valuation Assumptions

DISCOUNT RATE

The rate used to discount post-employment benefit obligations (both funded and unfunded) shall be determined by reference to market yields at the end of the reporting period on high quality corporate bonds. In countries where there is no deep market in such bonds, the market yields (at the end of the reporting period) on government bonds shall be used. The currency and term of the corporate bonds or government bonds shall be consistent with the currency and estimated term of the post-employment benefit obligations.

The estimated term of the Obligation is around 10.70 years. The yields on the government bonds as at the 31-03-2025 were 6.80%.

SALARY GROWTH RATE

This is Management's estimate of the increases in the salaries of the employees over the long term. Estimated future salary increases should take account of inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

The salary escalation assumption reflects the expected 'average' over the entire population, as well as over time. When setting the assumption, companies must consider what Cumulative Average Growth Rate (CAGR) in salaries of the existing employees is expected over the duration of the liabilities.

RATE OF RETURN ON PLAN ASSETS

This assumption is required only in case of funded plans. Interest income on plan assets is calculated using the rate used to discount the defined benefit obligation.

WITHDRAWAL RATES

This is Management's estimate of the level of attrition in the company over the long term. Estimated withdrawal rates should take into account the broad economic outlook, type of sector the company operates in and measures taken by the management to retain/ relieve the employees.

MORTALITY RATES

Mortality rate is a measure of the number of deaths (in general, or due to a specific cause) in population, scaled to the size of that population, per unit of time.

REASONABLENESS OF ASSUMPTIONS

The Salary growth rate & Withdrawal rate assumptions are the expectation of the Management for the future years. It should be noted that we have not performed any validation check for appropriateness and adequacy of assumptions. The importance and broad guidelines related to assumptions were shared to clients.

The Assumptions provided by the Management have been accepted since The Management is best aware of the various factors that affects future trends and since It is Management responsibility to decide the future trends.

ix) The principal actuarial risks to which the Company is exposed are investment risk, interest rate risk, salary risk and longevity risk.

Actuarial Risk

It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons:

Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected.

Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity Benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cash flow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate.

Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity Benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.

Investment Risk	For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter-valuation period.
Liquidity Risk	Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign/retire from the company there can be strain on the cash flows.
Market Risk	Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate/government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.
Legislative Risk	Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation/regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation and the same will have to be recognized immediately in the year when any such amendment is effective.

x) Sensitivity Analysis

Sensitivity analysis is performed by varying a single parameter while keeping all the other parameters unchanged.

Sensitivity analysis fails to focus on the interrelationship between underlying parameters. Hence, the results may vary if two or more variables are changed simultaneously.

The method used does not indicate anything about the likelihood of change in any parameter and the extent of the change if any.
