Hindalco, the Aditya Birla Group flagship company, today announced its unaudited results for the quarter ended 30 September 2015.

Revenues for the quarter were higher by 4 per cent over the corresponding quarter of the previous financial year despite a sharp decline in realisations. Revenues rose on the back of the production ramp up at the company's new factories.

Operating results for the quarter were significantly impacted by the severe drop in London Metal Exchange prices and regional aluminium premium, the macro economic factors beyond the company's control. The combined decline on YoY basis was around USD 700 per tonne of aluminium.

Profit before Interest, Tax and Depreciation (PBITDA) at Rs.1,020 crore, reflecting robust operational performance in the face of economic headwinds. Higher other income for the quarter on account of certain non-recurring items contributed to the net profit of Rs.119 crore and partly due to dividend from subsidiaries.

ABOUT US (/ABOUT-US)

Depreciation and finance cost were higher given the progressive capitalisation of greenfield projects. These charges were higher by Rs.330 crore as compared with Q2 FY15. As a result, Profit before tax and before exceptional items was lower at Rs.109 crore.

On YoY basis net profit was higher in Q2 FY16 as the previous year's corresponding quarter had certain adverse exceptional items.

Compared to Q1FY16, revenues from operations were higher by 4 per cent mainly on account of higher volumes. However PBITDA declined by 5 per cent owing to sharp fall in realisations. Sequentially net profit was down 4 per cent.

Business results

(In Rs. crore)	Q2FY16	Q2FY15	Q1FY16	H1FY16	H1FY15
Aluminium segment					
Net sales	4,173	3,316	3,966	8,138	6,327
Earnings Before Interest & Tax (EBIT)	29	339	254	283	556
Copper segment					
Net sales	4,757	5,247	4,614	9,371	10,237
Earnings Before Interest & Tax (EBIT)	350	414	344	694	726

cent on YoY basis. In India, the company achieved full ramp up during the quarter, while Aditya smelter in Odisha is under ramp up. Despite higher volumes, the EBIT of aluminium segment declined because of lower realisations and higher depreciation.

The copper segment continued to deliver a solid performance supported by higher TcRc and acid realisations. YoY cathode production increased by 4 per cent to 100 KT, while fertiliser (DAP) production jumped by 18 per cent to 87 KT. On YoY basis, the EBIT in copper segment was lower due to removal of certain export incentives and significantly lower copper LME prices.

During the quarter, the Aditya and Utkal project loan was refinanced extending the tenor. In Aditya, the remaining life was extended from 5.83 years to 10.04 years with the last instalment payable in September 2030 against September 2023. In Utkal, the remaining life was extended from 3.97 years to 10.04 years with the last instalment payable in September 2030 against September 2021.

With macro-economic headwinds continuing, the company's focus will be on operational excellence and cash conservation in the coming quarters.
