Dear Sir/Madam,

National Stock Exchange of India Limited

The Manager, Listing Department "Exchange Plaza"

Bandra - Kurla Complex, Bandra (E)

Mumbai - 400 051

NSE Symbol: CHEMFAB

Sub: Submission of Investor presentation

This has reference to captioned subject above, please find enclosed Investor presentation for the quarter ended September 30, 2025.

The aforesaid presentation is also being hosted on the website of the Company viz. https://chemfabalkalis.com/

This is a voluntary submission for your information and records.

Thanking You,

Yours faithfully,

For CHEMFAB ALKALIS LIMITED

Bharatraj Panchal Company Secretary and Compliance officer FCS: 9828

This document which has been prepared by Chemfab Alkalis Limited (the "Company"), solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company. This document has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Document. This Document may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Document is expressly excluded. Certain matters discussed in this Document may contain statements regarding the Company's market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the Company's ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company's market preferences and its exposure to market risks, as well as other risks. The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Document. The Company assumes no obligation to update any forward-looking information contained in this Document. Any forward-looking statements and projections made by third parties included in this Document are not adopted by the Company and the Company is not responsible for such third-party statements and projections.

Quarterly Highlights

Management Commentary

In Q2FY26, our performance reflected the continued softness in global Caustic prices driven by tariff impacts, resulting in a moderation in ECU realisation from ₹40,955/MT in Q1FY26 to ₹36,700/MT in Q2FY26. While prices have largely bottomed out, a meaningful recovery is anticipated only from Q4 onwards.

Our Technology Modernisation Programme is progressing well, with pre-commissioning activities currently underway and completion targeted for November 2025. Once operational, this initiative will help enhance operating volumes and deliver improved cost efficiencies. The Captive Hybrid Power Plant is ready, though charging has been temporarily delayed pending transmission line clearance. Power supply is expected to begin from Q4FY26, which will support significant cost savings going forward.

In the OPVC segment, market demand growth remained subdued during the quarter owing to limited fund flow towards the Jal Jeevan Mission.

Allocations are expected to resume from the end of Q3FY26, which should drive demand revival. Encouragingly, we achieved meaningful progress in expanding the presence of OPVC pipes across new geographies, and the benefits of these efforts are expected to become visible from Q4FY26.

Our expansion initiatives are advancing as planned, placing us in a strong position to capture emerging growth opportunities. With the ongoing strategic investments in technology, energy efficiency, and capacity enhancement, we remain confident of improved performance and stronger profitability in the ensuing quarters.

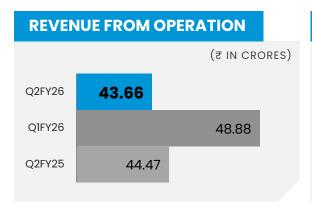

Mr. V.M. Srinivasan

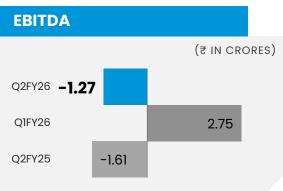

Chief Executive Officer

Company Overview

Introducing Chemfab Alkalis Limited

INTRODUCTION

As India's first adopter of membrane cell technology in 1985, the Company has established itself as one of the leading caustic soda manufacturer with 65,700 TPA capacity. Since 2018, the Company strategically expanded into manufacturing Oriented Poly Vinyl Chloride (OPVC) Pipes with superior strength and durability, capturing significant market share in OPVC Pipes especially in government infrastructure projects across states.

CHEMFAB ALKALIS LIMITED (CCAL)
OPERATES TWO DISTINCT BUSINESS

Innovation & Sustainability Milestones

1985

FIRST IN INDIA:

Introduced Membrane Technology in the Indian chlor-alkali sector, eliminating mercury and improving energy efficiency with a pilot capacity

1997

Capacity enhanced to 33,000 TPA

2003

GLOBAL FIRST:

Introduced Ultrafiltration membrane system for brine clarification—saving 28 MT of trees annually and offsetting 50 MT CO₂.

2005

INDIA's FIRST:

Developed an eco-friendly process to separate sodium sulphate from brine, cutting out barium chloride.

2014

FIRST IN INDIA:

- Upgraded to BiTAC® electrolysers, further enhancing production efficiency replacing old Manopolar plant installed in 1985
- · Implemented all fourteen elements of Process Safety Management as per OSHAS guidelines.
- Became the first Chlor-Alkali plant in India to be certified to ISO 14001 and ISO 45001 management systems, demonstrating excellence in environmental and occupational health & safety management.

2013

CARBON LEADERSHIP:

First Indian chlor-alkali plant to conduct a carbon footprint study. Achieved industry-low 1.93 TCO2/MT by 2021-22.

2012

CARBON REDUCTION BREAKTHROUGH:

Patented the process to produce soda ash from flue gas, cutting 250 TCO₂ annually.

2011

WORLD-CLASS SAFETY:

Patented the Fully Enclosed Negative Pressure System (FENPS) for chlorine gas containment—a world first.

2007

ENERGY RECOVERY INNOVATION:

Installed HCl synthesis plant with heat recovery, generating steam from waste heat and earning 4,600 carbon credits.

2017

ZFRO-WASTF INNOVATION:

Patented a process to convert brine sludge into bricks/blocks, eliminating solid waste disposal.

2018

BIODIVERSITY FIRST:

Conducted India's first biodiversity assessment in the chlor-alkali sector to evaluate plantation and carbon sequestration potential.

OPVC COMMISSIONING:

Diversified in OPVC Pipes business and set up plant in Sri City, Tada. First Line with capacity of 3,000 TPA was commissioned in Dec'18 adopting Technology of Spanish company with Molecor Technología S.L (Spain)

2020

OPVC GROWTH:

Commissioned Line 2, doubling capacity to 6,000 TPA

2021

- Caustic Capacity enhanced from 33,000 TPA to 45,600 TPA
- Water Sustainability Milestone: Installed a Membrane-based 2 MLD Treated Sewage Water Plant to provide a sustainable source of water, as part of its ESG commitment. This was the first Treated Sewage Water Plant in Puducherry.

2022

Caustic capacity further enhanced from 45,600 TPA to 65,700 TPA

2024

MAJOR OPVC EXPANSION: Commissioned Lines 3 & Line 4 increasing product range from 110 mm upto 630 mm. Capacity enhanced from 6,000 TPA to 14,000 TPA

CCAL

- Company has announced further expansion of OPVC Pipes capacity enhancement from 14,000 TPA to 23,000 TPA adding further 3 lines at Sri City, Tada. This expansion is expected to be completed during FY26
- **CLEAN ENERGY MILESTONE:** Transitioned from furnace oil to LNG. eliminating the use of fossil fuels and significantly reducing emissions.
- DIGITAL TRANSFORMATION: Migrated from Tally to SAP S/4 HANA Public Cloud, enabling end-to-end integration, real-time visibility, and enterprise-grade scalability.
- ALUMINIUM CHLORIDE PLANT COMMISSIONING & EXPANSION:
 Feb 2024: As part of forward integration
 Strategy for Chlorine utilisation, invested
 into Anhydrous Aluminium Chloride plant at Karaikal under WOS Chemfab Alkalis Karaikal Limited. Plant commissioned in Feb 2024
- **BRICKS COMMERCIALIZATION:** In 2024, the manufacture of bricks from brine sludge, which began as an innovative waste-to-wealth solution, was successfully stabilized and entered commercial production, contributing to both sustainability and part of Company strategy to have Zero Solid waste
- Tied up for Hybrid power though ISTS and power is expected to commence from Q2FY26. This will enhance renewable power contributing to 45% of total sourcing

2023

IODIDE REMOVAL BREAKTHROUGH:

Patented a technology to remove trace iodide from brine—an industry-first.

Steering Chemfab's Growth and Innovation

Mr. Suresh Krishnamurthi Rao

Chairman

Provides strategic leadership and vision, backed by decades of industry experience.

Mr. V.M. Srinivasan

CFO

Leads Chemfab's growth journey through a strong focus on long-term value creation and strategic initiatives.

Mr. Prasath S

CFO

Ensures financial discipline, transparency and sustainable financial performance.

Mr. A. Janakiraman

Independent Director

Brings in-depth knowledge in chemical engineering and business strategy.

Mrs. Drushti Desai

Independent Director

Financial specialist with a sharp focus on regulatory compliance and governance.

Mrs. Sujatha Jayarajan

Independent Director

Advocates strong corporate governance and responsible business practices with financial insight.

Additional Director

Brings expertise from managing large businesses. Offers operational expertise, strategic inputs and process excellence

Mr. R. Mahendran

Director

Drives excellence in project execution and technical operations.

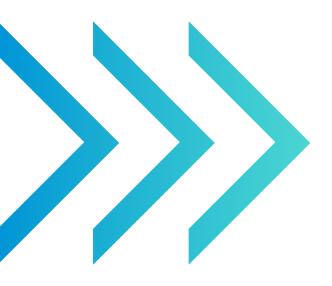

Mr. Nitin S Cowlagi

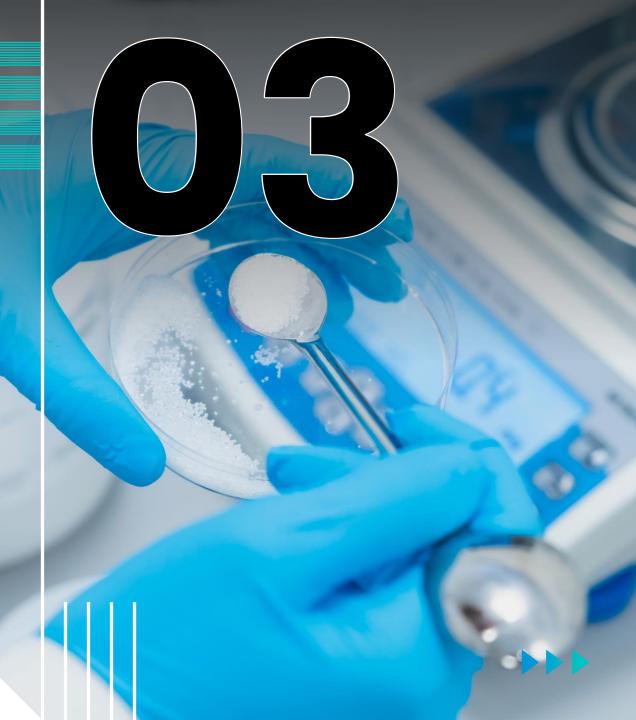

Director

Instrumental in steering strategic growth and business transformation.

Chlor Alkali Business

CCAL CHEMFAB ALKALIS LIMITED

Our Chlor Alkali Portfolio

OUR CHLOR-ALKALI DIVISION AT PUDUCHERRY, MANUFACTURES SIX ESSENTIAL CHEMICAL PRODUCTS POWERING MULTIPLE INDUSTRIES WHILST CONSISTENTLY IMPLEMENTING CUTTING-EDGE GREEN TECHNOLOGIES.

Caustic Soda Lye

- · Neutralising agent
- Cleaning agent
- pH regulator
- Aluminium
- Paper & Pulp
- · Soaps & Detergents

Caustic Soda Flakes

- Chemical synthesis
- Soap manufacturing
- Chemical manufacturing
- **Pharmaceuticals**
- Food processing

Liquid Chlorine

- Disinfection
- Bleaching
- · Chemical synthesis

- Water treatment
- · Vinyl manufacturing
- · Inorganic chemicals, paper & pulp
- Pharmaceuticals

Key:

Key **Application**

Hydrogen Gas

Fuel source

- Hydrogenation of oils & fats
- Chemical industry
 - Fuel cells

Hydrochloric Acid

- · Pickling agent
- pH regulation
- Priming

- Steel
- Water treatment Plant, Effluent Treatment Plant
- Pharmaceuticals
- Oil & Gas

Sodium Hypochlorite

- Bleaching
- Disinfection

- Textiles
- Water treatment
- Pharmaceuticals

Our End-to-End Manufacturing Infrastructure

OUR PUDUCHERRY FACILITY STANDS AS THE CORNERSTONE OF OUR CHEMICAL BUSINESS WITH 65,700 TPA CAUSTIC SODA CAPACITY. THIS TECHNOLOGICALLY ADVANCED PLANT MAINTAINS INDUSTRY-LEADING UTILISATION RATES WHILE DEMONSTRATING OUR ENVIRONMENTAL COMMITMENT WITH OVER 70% OF ITS 37-ACRE CAMPUS PRESERVED AS GREEN BELT.

Production Capabilities

Current Capacity

65,700 TPA of caustic soda with consistent utilisation of above 80%

Quality Assurance

NABL-accredited laboratory for comprehensive product testing

Integrated Process

By-products from caustic production channeled into value-added products

Industry Firsts

1985

Established India's first membrane cell technology installation for caustic soda production

2014

First chemical manufacturer in India to adopt advanced BiTAC® electrolyzers

Environmental Pioneer

Among the first in the industry to maintain over 70% of industrial area as green belt Many awards and recognition with respect to excellence in Environment and sustainability

Quality Leadership

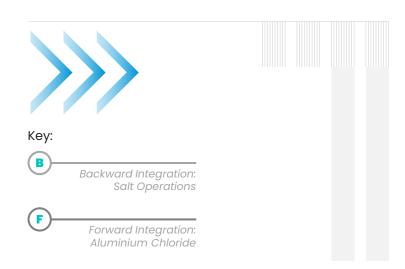

Early adopter of NABL accreditation for in-house testing laboratories

First in India to convert Sludge to Bricks

Our Vertical Integration Strategy

OUR VERTICAL INTEGRATION STRATEGY, ENCOMPASSING BOTH BACKWARD AND FORWARD INTEGRATION, ENSURES RAW MATERIAL SECURITY, OPTIMIZES COSTS, AND MAXIMIZES VALUE CREATION ACROSS OUR CHEMICAL VALUE CHAIN.

Strategic Rationale

- Insulate from market price volatility
- Ensure reliable, cost-effective supply

- Address negative chlorine realisations
- Create value-added product
- Diversify into new market segments
- Enhance overall business sustainability

Scale

- Total salt holdings: 2,370+ acres
- Kanthadu: 1,223 acres (Villupuram)
- Chunampet: 450 acres (Chengalpattu)
- Mariyur: 700 acres under development

 Capacity: 10,000 TPA Aluminium Chloride

Operational Details

- Production since: 1992
- Process: Natural solar evaporation
- Location:

 30 km from main plant

- Structure:

 Under Chemfab
 Alkalis Karaikal
 Limited (CAKL)
- Investment: ₹50 crore (Phase 1)
- Status: commissioned in February 2024

Key Advantages

- Minimal environmental impact
- Cost-effective raw material supply
- Quality control over critical input

- Captive consumption of chlorine
- Efficient Utilisation of Chlor-Alkali plant capacity

Strategic Upgrades Underway

ASPECT	TECHNOLOGY MODERNISATION	POWER EFFICIENCY PROJECT
INVESTMENT	₹60 crore	₹15 crore
OBJECTIVE	Replace 1994 based electrolyser technology with latest state of the art plant	Hybrid power project under SPV
EXPECTED BENEFITS	Improved efficiency and Power cost savings	Reduced power costs
FINANCIAL IMPACT	Improved profitability	₹15 crore saving annually
TIMELINE	Commissioning in Q2FY26	Commissioning in Q2FY26
OPERATIONAL IMPACT	Shutdown for 15 days	No impact

OPVC PIPES Business

OPVC PIPES BUSINESS Pioneering **Advanced Water** Infrastructure for a Sustainable India CHEMFAB ALKALIS LIMITED | INVESTOR PRESENTATION 2025

IN 2018, CHEMFAB ALKALIS LIMITED (CCAL) STRATEGICALLY DIVERSIFIED INTO THE MANUFACTURING OF ORIENTED POLY VINYL CHLORIDE (OPVC) PIPES, POSITIONING ITSELF AT THE FOREFRONT OF INDIA'S EVOLVING WATER INFRASTRUCTURE LANDSCAPE. OPVC PIPES, A NEW-GENERATION POLYMER PRODUCT, OFFERS SUPERIOR STRENGTH, DURABILITY, AND COST-EFFECTIVENESS COMPARED TO TRADITIONAL PIPING SOLUTIONS, PARTICULARLY DUCTILE IRON (DI) PIPES.

Key Highlights of our OPVC Pipes Business

One of the first companies to introduce OPVC Pipes in India

Currently having the largest operational capacity in India (4 lines with 14,000 TPA capacity)

First in the OPVC
Pipes Industry to
receive BIS Certificate
of Appreciation for
"Zero Failures"

Offering the widest product range in India (110 mm to 630 mm diameter pipes)

OPVC Pipes: The Future of Water Infrastructure

ORIENTED POLY VINYL CHLORIDE (OPVC) PIPES REPRESENT A SIGNIFICANT LEAP FORWARD IN WATER INFRASTRUCTURE TECHNOLOGY, OFFERING SUPERIOR PERFORMANCE, COST-EFFECTIVENESS, AND SUSTAINABILITY COMPARED TO TRADITIONAL DUCTILE IRON (DI) PIPES.

PARAMETER	OPVC PIPES	DUCTILE IRON PIPES
LIFESPAN	100+ years	75 years
WEIGHT	6-12 times lighter than DI pipes	Since they are iron pipes, they are heavier and require heavy machinery for installation
HYDRAULIC CAPACITY & ENERGY EFFICICENY	Upto 30% higher flow capacity. Lower pumping costs over the lifespan of the project due to smoother surface	Lower flow capacity. Higher pumping costs over the lifespan of the project due to higher frictional losses
CORROSION RESISTANCE	Immune to corrosion	Requires protective coating with additional costing
INSTALLATION COST	Lower installation and handling costs	Higher installation and handling costs
SIZE RANGE	110 mm to 630mm diameter	Wide range of sizes
ENVIRONMENTAL IMPACT	Lower carbon footprint	Higher carbon footprint

OPVC's Journey in Reshaping Indian Infrastructure

ORIENTED POLY VINYL CHLORIDE (OPVC) PIPES HAVE EMERGED AS A TRANSFORMATIVE TECHNOLOGY IN INDIA'S WATER INFRASTRUCTURE LANDSCAPE SINCE THEIR FORMAL STANDARDIZATION IN 2017. BACKED BY AMBITIOUS GOVERNMENT INITIATIVES AND EVOLVING INDUSTRY STANDARDS, OPVC PIPES ADOPTION HAS GROWN EXPONENTIALLY OVER THE YEARS.

2017

MILESTONE

INTRODUCTION of BIS IS 16647:2017 for OPVC Pipes

IMPACT

First national standard aligning with ISO 16422, enabling mass production

2018-19

MILESTONE

Few early manufacturers begin OPVC Pipes production

IMPACT

Industry opens up to a new product category

2019

MILESTONE

Jal Jeevan Mission (JJM) launches with ₹3.6 lakh crore budget

IMPACT

Targets 14.6 crore rural households, driving OPVC Pipes demand

2024

MILESTONE

Increased acceptance by state Governments

IMPACT

13 states approve OPVC Pipes for Water infrastructure projects

2025

MILESTONE

Jal Jeevan Mission extended until 2028

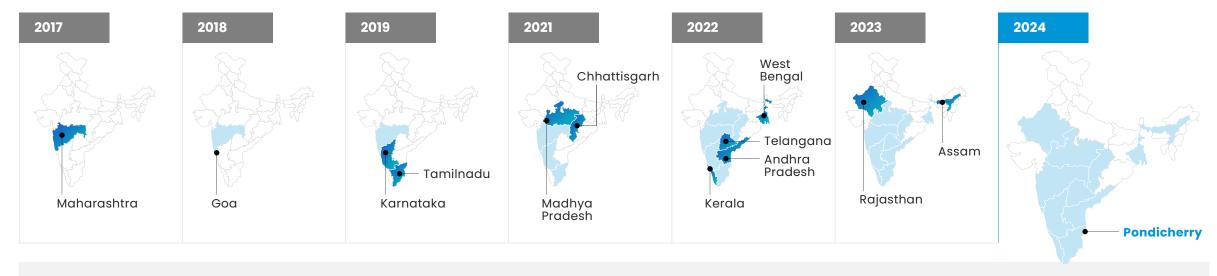

IMPACT

Budgetary allocation of ₹67,000 crore for JJM in 2025-26

Increasing Acceptance across the Country

State-wise Year of Acceptance

Other Key Developments

OPVC pipes widely accepted for projects up to 400mm diameter across India.

TN & Maharashtra emerged as the leading state in the OPVC Pipes market by 2023, attributed to its robust infrastructure sector and extensive agricultural activities. Central region (Chhattisgarh) held the largest market share in FY24 An increasing number of states are now incorporating OPVC pipes into their projects

The OPVC pipes market was valued at ₹275 crore in FY25 and is projected to expand fivefold to ₹1,400 crore by FY28*

^{*} As per management estimates

OPVC PIPES BUSINESS

Launch & Objectives

Launched

15th August 2019

Aim

Provide Functional Household Tap Connections (FHTCs) to every rural household by 2024 now extended till 2028

Progress

2019

3.23 crore (17%) rural households (HHs) had tap water connections

State Wise Progress

8 states and 3 Union Territories have achieved 100% coverage

2024

Around 15 crore rural households, accounting for 80%, have been covered so far. However, substantial work remains to be completed in several states.

2.28 lakh villages and 190 districts achieved 'Har Ghar Jal' status

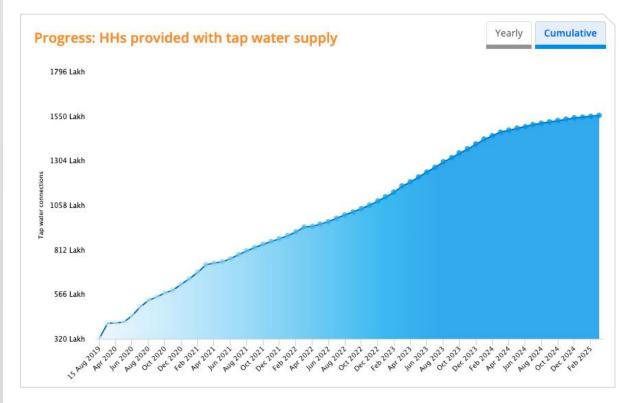

Budgetary Allocation

2024-25

₹22,694 crore allocated (against original allocation ₹70,000 crore)

2025-26

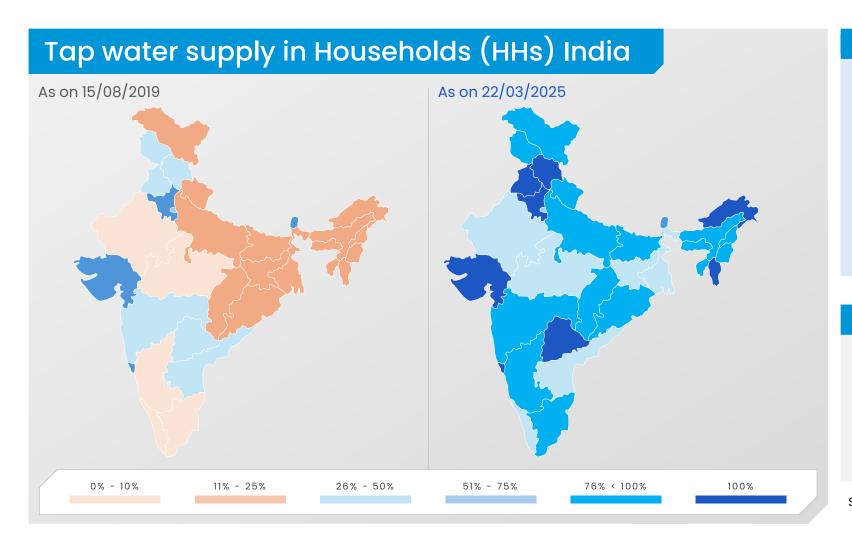

₹67,000 crore allocated

Source Data: JJM

Growth Drivers - Jal Jeevan Mission

Extension and Future Plans

- Mission extended till 2028 to cover remaining 20% rural households
- Focus on improving infrastructure quality and ensuring operation and maintenance
- Fresh MoUs will be established with states and union territories to promote sustainable and citizen-focused water service delivery

OPVC Pipes Opportunity

- Extension till 2028 ensures continued demand for OPVC Pipes
- High visibility for OPVC Pipes players due to ongoing infrastructure development

Source Data: JJM

Growth Drivers – AMRUT 2.0

THE ATAL MISSION FOR REJUVENATION AND URBAN TRANSFORMATION (AMRUT) 2.0, LAUNCHED ON 1 OCTOBER 2021, IS A SIGNIFICANT CATALYST FOR OPVC PIPES ADOPTION IN INDIA'S URBAN WATER INFRASTRUCTURE PROJECTS. THIS AMBITIOUS SCHEME AIMS TO PROVIDE UNIVERSAL WATER SUPPLY AND IMPROVED SANITATION ACROSS URBAN INDIA, CREATING SUBSTANTIAL OPPORTUNITIES FOR OPVC PIPES MANUFACTURERS.

Key Facts and Figures

Total Outlay (₹ In crore)

2,99,000

Including ₹76,760 crore central share

Duration (In Years)

5

(FY22 to FY26)

Coverage (In #)

500

All statutory towns for water supply; 500 AMRUT cities for sewerage management **Target** (In crore)

2.68

household tap connections and 2.64 crore sewer/septage connections

AMRUT 2.0 Objectives Driving OPVC Pipes Demand

Source Data: PIB

The Backbone of our **OPVC Pipes Leadership**

Sri City Plant, Andhra Pradesh (Operational Since December 2018)

Scale & Capabilities

4 operational lines (14,000 TPA capacity)-India's Largest

First Indian Manufacturer producing pipes upto 630 mm diameter

Highly automated facility requiring just 10 permanent staff per shift on the Shop Floor

Quality & Compliance Edge

BIS IS 16647:2017 + ISO 16422:2014 compliance

First Indian OPVC Pipes maker with BIS Zero Failures Certification

38 quality checks per production batch

Full raw material batch tracking from source to site

Our Global Technology Advantage

CHEMFAB ALKALIS LIMITED LEVERAGES CUTTING-EDGE TECHNOLOGY FROM GLOBAL LEADER MOLECOR TO PRODUCE HIGH-QUALITY OPVC PIPES, POSITIONING ITSELF AT THE FOREFRONT OF INDIA'S WATER INFRASTRUCTURE REVOLUTION.

Key Technological Advantage

Utilises a continuous sequential twostage extrusion technique, ensuring optimal molecular orientation and superior pipe strength.

Plug-and-play model allows new production lines to be operational within 15 days of installation.

Class 500 OPVC Pipes, which is the highest degree of Orientation, manufactured along with Socket homogeneously in a Single stage Orientation process ensuring uniform strength throughout the pipe.

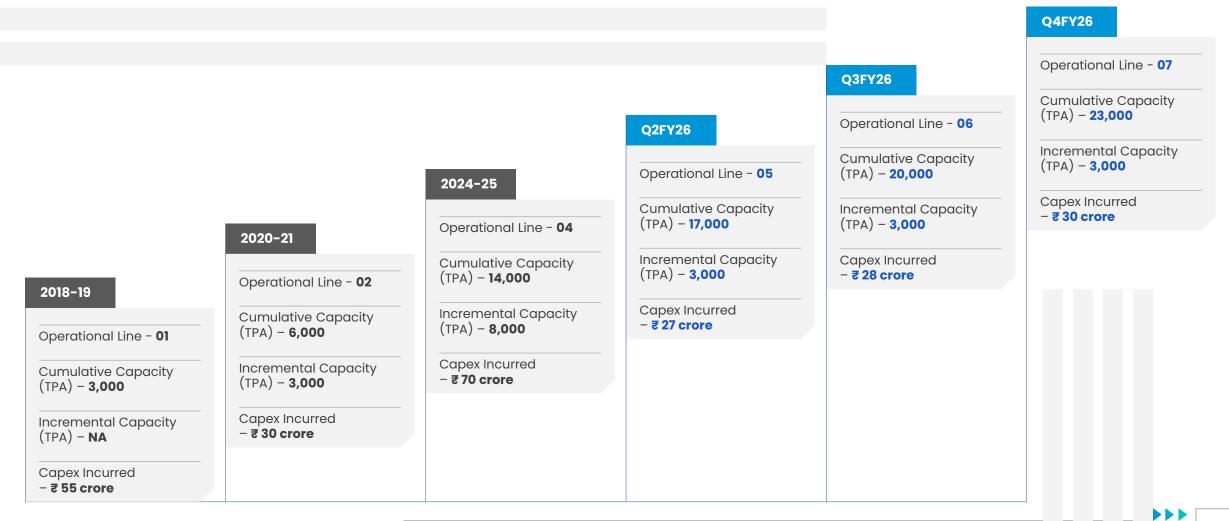

Ability to manufacture pipes ranging from 110mm to 630mm in diameter, with Chemfab being the only Indian manufacturer producing up to 630mm.

The partnership with
Molecor not only provides
Chemfab with technological
superiority but also offers a
competitive edge in the
Indian market. As one of only
seven authorised Molecor
partners in India, Chemfab
benefits from limited
competition and high entry
barriers in the OPVC Pipes
sector.

State-of-art laboratory conducts 38 quality checks per production batch, ensuring compliance with IS 16647:2017 standard.

Capacity Expansion Roadmap in Sri City

OPVC PIPES BUSINESS

Unit Economics of CAPEX

Unit Economics of Line Additions

Per Line Capacity

2,500-3,000 TPA, depending on size of pipe manufactured

Revenue Potential per Line

₹45-50 crore at full utilisation depending on the mix of size of pipe

Payback Period

~2-2.5 years per line

Strategic Insights

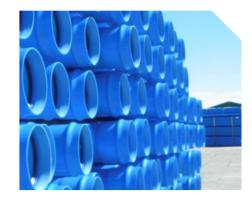

Rapid Scale-Up

Plug-and-play model enables new lines to stabilise within just 15 days of installation.

Capacity at Sri City

Plans to exhaust Sri City's capacity with up to 7 operational lines by FY26.

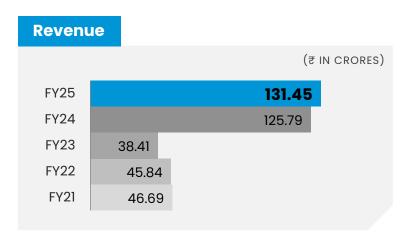

Future Expansion

Evaluating a potential Central India facility to cater to growing demand beyond FY27.

Strategic Way Forward

Our Blueprint for Sustained Growth

OPVC Pipes Business

CAPACITY EXPANSION IN OPVC PIPES

- Rapidly scaling production capacity from 14,000 TPA (FY25) to 23,000 TPA (FY26) with new lines in Sri City.
- Evaluating potential expansion in Central India to cater to growing demand beyond FY26.
- Increasing investments and strategic focus on the pipes business to capture emerging market opportunities.

TECHNOLOGICAL EXCELLENCE

- Leveraging strategic partnership with Molecor Tecnología S.L (Spain) for advanced OPVC Pipes manufacturing capabilities.
- Ensuring consistent product quality by leveraging state-ofthe-art testing infrastructure and full compliance with BIS standards.

MARKET PENETRATION AND DEMAND VISIBILITY

- Expanding presence in 13 approved states and working towards getting acceptance in new markets/ more states.
- Targeting government initiatives like Jal Jeevan Mission (extended to 2028) and AMRUT 2.0 for sustained demand visibility.

OPERATIONAL EFFICIENCY

- Maintaining low OPEX in the OPVC Pipes division through high automation and lean operations.
- Targeting rapid payback of 2-2.5 years per production line, ensuring efficient capital deployment.

Chlor-Alkali Business Optimisation

Investing ₹60 crore in technology modernisation to improve power efficiency by July 2025.

Investing in hybrid power project to reduce the power cost and improve profitability.

Evaluating other Speciality Chemicals opportunities.
