Should known or unknown risks or uncertainties materialise, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated, or projected. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise.

CHAIRMAN'S MESSAGE

Dear Shareholder.

2015-16 has been another special year for your Company in its success journey. As the Indian commercial vehicle industry recovered, your Company ably positioned itself ahead of the growth curve. It was accomplished through a combination of structural improvements made in the Company, continuing emphasis on product strengths and added thrust in customer focus. I am delighted to present to you the success story of your Company during last year.

The total industry volume of medium & heavy duty commercial vehicles grew by 30% over the previous year to 302,373 vehicles in which the trucks grew by 32% and buses by 19%. Your Company achieved a sales figure in this segment of 98,809 vehicles registering a growth better than the market. The truck segment grew in all the geographic regions and creditably your Company has gained market share in each region. Spurred by growth in the private passenger segment, the bus volume was up by 19% over previous year, ahead of the market increase.

The light commercial vehicle market was stagnant; nonetheless your Company sold 13% more over previous year selling 30,695 vehicles and maintained the market share in the 2 to 3.5 tonne segment.

In the international markets, the sales volume in the medium & heavy segment was marginally down over last year at 10,951 vehicles due to economic slowdown in many target countries. However, the light commercial vehicle volume was up by 64%. Your Company continues to maintain stronghold in the Defence sector sale in both kits and CBU vehicles. Despite growth challenges in the addressable segments, the Power Solutions business was up by 11%. The after-market area has also registered a growth over last year from ₹ 820 crores to ₹ 855 crores.

Viewed from a financial perspective, your Company achieved a 39% increase in sales turnover at ₹ 18,822 crores compared to ₹ 13,562 crores, last year. Profit after tax after exceptional items for the year stood at ₹ 722 crores, as against ₹ 335 crores in the previous year, recording a growth of 115%. There was a remarkable improvement in Debt Equity ratio at 0.24:1. It is a matter of immense satisfaction for all of us that your Company continues to be among the best performing auto stocks globally for a second year in a row.

The all-time high achievements in sales volume, market share, operating profit and shareholder value have been possible only through the sheer determination, commitment and hard work by every member of the Ashok Leyland team.

Reaching the largest volume growth in your Company's truck sales from North

India, positioning a class leading 10x2 truck, winning the CV Maker of the Year award two years in a row, the Captain model getting the best Mobility Design award, gaining MCV Rigid Cargo of the Year award and the Company's Risk Management Programme coveting the Firm of the Year award are just a few high points that underscore the extent of management bandwidth in your Company.

Stemming from the avowed product philosophy of your Company to offer value products in line with market needs, your Company introduced *Sunshine*, an industry first model in the school bus segment, designed to be the safest bus for the transportation of children and *Guru*, an intermediate tonnage value truck model in the rated-load segment. To further sharpen the design & development processes, your Company has also recently formed Centres of Excellence for Cost and Reliability. The investment in R&D will continue at significant levels to enable your Company to be at the forefront in innovation and technology.

Moving forward, in 2016-17 and beyond, the cornerstones of the growth plans of your Company would be focused on the following:

- There would be an unwavering commitment towards the core business of commercial vehicles. A portfolio rationalisation which is already in process would see progressive exit from non-core and non-performing businesses.
- A renewed thrust in international markets in the target clusters would be undertaken with products developed specifically for the identified markets. The capacity of the Ras-Al-Khaimah plant is almost getting doubled this year. To cope up with increasing demand, a new assembly unit in Bangladesh is in the offing and further units in Africa are under active consideration.
- Defence-related business is being reappraised with a two-pronged strategy of growing the traditional tactical vehicles as well as broadening the offerings to address the government's Make in India requirements.
- To leverage availability of in-house developed world class Neptune engines and also respond to growing application needs, the Power Solutions Business would be implementing an updated strategic roadmap.
- Last but not the least is the After-market business in which a multi-layered action plan is being spearheaded to achieve leadership position in both profitability and Customer Satisfaction in all areas.

Alongside implementing a considered business growth strategy, your Company is rapidly establishing robust business processes across the Company taking strides into the Digital Age. In today's connected world, we experience in our daily lives that Digital disruption is transforming not just the products and services that are offered, but even the future expectations from the customers. The pace of innovation, exponential idea generation, the anticipated speed of responses and the technology-led integration of the Value Chain impact all businesses in an unprecedented way. Your Company, fortunately, has envisioned such scenarios in time and a road map for the "Data Driven Ashok Leyland" is already in place. Essentially, the objective is that Digitisation will no longer feature as an additional component or an added value but will be the basis on which all the future products and processes would evolve.

A few recent well-received introductions deserve mention such as *MaxIT* for customer-centric sales and marketing process, *DigiSmart* for an interactive ecosystem among the Company, channel partner and customer, *Leyland Direct* for efficient Service access, *EasyPay* which is an e-wallet and *i-alert* that helps track the vital information of the vehicle on a real time basis for fast turnaround.

Your Company, as part of its CSR, has undertaken a major laudable initiative themed *Road to School* aimed at improving quality of education, nutrition and health of primary and upper primary school children. The activity is now centered near the Hosur plant involving about 4500 children in 36 schools. I am happy to share that we have already started to make a difference and this initiative is being extended in 2016-17 to a further 72 schools near Hosur and Chennai covering an additional 10,000 children.

Looking back at last year, one is reminded of the cataclysmic floods that affected Chennai. Rising up to the occasion, our employees participated in the relief measures contributing the much needed food, water, medicines and financial support. I would like to record our sincere appreciation of their efforts towards a worthy cause.

Summing up, I believe your Company has maintained its growth momentum last year setting new records of performance. Given the present economic indications and the plans developed for the future, I am confident that your Company will continue to better its performance in the coming years, also riding on the Digital wave.

I would like to express our gratitude for your confidence in us. I would also acknowledge the unfailing support of our extended family of customers, dealers, suppliers, financial institutions and partners, which has been a major source of inspiration to your Company.

Thank you,

Yours sincerely,

Dheeraj G Hinduja

COMPANY'S PERFORMANCE

After a period of recovery in the financial year 2014-15, the Medium & Heavy Commercial Vehicle (M&HCV) segment of the Commercial Vehicle industry has registered a growth of 30% in the financial year 2015-16. Despite a subdued trend in the industrial activity, the pick-up in M&HCV sales was driven by replacement-led demand by large fleet operators, pre-buying ahead of the implementation of BS-IV emission norms and gradual improvement in the viability of fleet operators due to declining diesel prices.

Your Company witnessed a 34% growth in sales (including LCV) during the financial year 2015-16, with total sales of 1,40,457 units as against 1,04,902 units during the previous financial year.

The market share in M&HCV grew from 27.2% to 31.3% facilitated by optimal product mix in the growth segments, a sustained focus on meeting customer requirements and network expansion.

Sales of Light Commercial Vehicle (LCV) have grown 13% to 30,695 units in 2015-16 as against 27,242 units during the previous financial year.

The Power Solution Business witnessed a growth of 11% over the previous year despite tepid demand on account of improved power availability and general slowdown in industrial and agriculture

A. MARKET TRENDS

Economy - India and the World

The Indian economy posted a robust 7.6% growth in the financial year 2015-16 (based on advance estimates as per the Finance Ministry's Economic Survey 2016-17) as against 7.2% in the previous financial year 2014-15. Industrial and Agricultural sectors have gained momentum with 7.3% over 5.9% and 1.1% over -0.2% respectively. In the Industrial Sector, manufacturing growth was significant at 9.5% as against 5.5% in the previous financial year 2014-15. The recovery in manufacturing growth was contributed by robust growth in petroleum refining, automobiles, chemicals, electrical machinery etc. Other major segments, mining, quarrying and construction activities, are stable. Growth in agriculture has slackened due to two successive years of less than-normal monsoon rains, which reflected in lower GDP growth of -0.2% and 1.1% for the financial year 2014-15 and 2015-16 respectively.

The forecast of an above average monsoon coupled with overall improving economic health and specific measures taken by government in the financial year 2015-16, union budget on increasing farm income through Pradhan Mantri Krishi Sinchai Yojana and various irrigation projects are likely to provide the impetus for growth in agriculture during the financial year 2016-17. There is also expectation for a growth in construction, infrastructure and mining sectors, which will drive the overall economic growth for the financial year. The Indian economy is expected to grow between 7.0-7.75% in the financial year 2016-17.

The global economy grew by 3.1% in the calendar year 2015 (Source: International Monetary Fund). The growth was driven primarily by the developing economies, aided by a stable growth in the United States and moderate recovery in Japan and the European Union.

The global economy is projected to grow at 3.2% in the calendar year 2016 and 3.5% in 2017. Growth in advanced economies is projected to increase from 1.9% in 2015 to 2% in 2016 and hold steady in 2017. The Euro zone is witnessing modest recovery and Japan is also expected to be firm in 2016, on the back of fiscal support, lower oil prices, accommodative financial conditions, and rising incomes.

Growth in emerging economies is projected to increase from 4.0% in 2015 to 4.1% and 4.6% in 2016 and 2017, respectively. B. ASHOK LEYLAND - THE YEAR (2015-16) IN BRIEF

Aided by replacement demand, wider sales and service network and the appropriate product mix in the growth segments, your Company managed to increase its market share in the domestic

2004-05 2005-06 2006-07 2007-08 2008-09 2009-10 2010-11 2011-12 2012-13 2013-14 2014-15 2015-16

market to a record high in the financial year 2015-16. Your Company sold 98,809 M&HCVs in the domestic market, which included 19,586 M&HCV buses and 79,223 M&HCV Trucks.

The 49% growth in M&HCV volumes demonstrates the strength of the Company to take advantage of the upturn in the industry.

Your Company has been giving considerable emphasis on product development to meet evolving customer expectations and upcoming regulatory requirements. The challenge ahead is to develop BS-VI vehicles with right technology and competitive cost within the time stipulated. The transformation program from BS-IV to BS-VI and development in the electric vehicle space will require investments, changes in design requirements and training across all touch points. Your Company unveiled the future ready Intermediate Commercial Vehicle (ICV) and School Bus products at the SIAM Auto Expo in February 2016. These products are a welcome addition to our class-leading portfolio and will provide further fillip to our growth. GURU with highest payload capacity in its class, lower maintenance cost and longer service intervals and SUNSHINE school bus for the children with better safety, hygiene and comfort are planned for launch in financial year 2016-17.

Your Company also showcased the futuristic products in the form of India's first, a 4940 tractor and a Euro 6 Hybrid Bus at the Auto Expo.

In the financial year 2015-16, your Company completed its fourth full year of participation in LCV segment with current products, DOST Strong and PARTNER four-tyre version have gained significant positive response across the country. Your Company added around 40 touch points to the existing LCV network bringing the total 390 touch points. With 3 consecutive years of slowing LCV demand, Dost has maintained its market share and sold more than 25,000 vehicles this year.

The Power Solutions Business witnessed a 11% growth over the previous year. This was achieved despite a de-growth in Industrial segment, an un-seasonal monsoon resulting in a lower crop harvest and a shortened fishing season, and improved power availability across the grids, which all pulled down the overall demand for engines in the financial year 2015-16. Revenues from the Spare Parts were maintained at the same level as the financial year 2014-15. The Defence business gained momentum with respect to last year and sale of Kits improved over last year. Your Company also won additional tenders from the Indian Defence establishments for supply of advanced-technology products. Your Company is on the path of building capability to increase product lines, integrate sub-systems on vehicle platforms, and increase our contribution to the Indian Defence requirements.

In summary, your Company having used the challenging economic scenario to transform itself into an agile player is now appropriately positioned for sustainable growth and effectively exploiting the market upturns.

C. OPPORTUNITIES AND THREATS

The Commercial Vehicle industry has grown substantially over the last two years, driven by improving viability for fleet operators due to reduction in operating cost, replacement-led demand and pre-buying ahead of implementation of BS-IV emission norms and Anti-Lock Braking Systems (ABS). The improvement in cash flows of fleet operators has also started showing as improved collection efficiency for CV financiers.

The Union Budget for the financial year 2016-17 is positive for the automotive sector with significant growth focus in enhancing farm income, rural development initiatives and infrastructure development, which will enhance transportation and logistics. The auction of coal mines, opening up of mines in Karnataka and Goa and easing of movement of sand will enhance the construction and mining. These are likely to drive the growth momentum for M&HCVs.

Demand for LCVs is likely to pick-up in the financial year 2016-17 on back of a replacement-led demand (after the last 3 years of declining sales), pre-buying ahead of the implementation of BS-IV norms and the Swachh Bharat urban initiatives. In contrast, to a decline in the financial year 2015-16, this segment is projected to witness a growth during the financial year 2016-17.

With an overall recovery and new orders placed by STUs (under the JnNURM programme), projection for overall bus segment is positive in the financial year 2016-17. Apart from existing orders, the domestic bus sales are also likely to benefit from the Government's recent proposal for opening up the passenger transport sector to private players. In addition, the higher budgetary allocation towards urban development projects and other initiatives such as "Smart Cities" will also enhance the bus demand.

D. RISK MANAGEMENT

During the year, the Company continued to outperform the CV industry and has made significant gains in market share and sales volume by focusing on innovation, intensive marketing strategies and network expansion. Managing risks while strategising was key in the successful outcome of these initiatives. Enhancing service outlets and brand image, new product launches, targeting new domestic markets across the country, developing alternate international markets and focusing on cost control and debt reduction were some of the key risk mitigation actions executed during the year. These measures have enabled the Company to bring value product for its customers, strengthen dealer relationship and achieve substantial reduction in interest cost.

The Company continues to work on innovative and cost-effective technology solutions like development of powertrains and vehicles through strategic partnerships to meet the regulatory requirements pertaining to the upcoming emission norms.

The Company has an established and robust Enterprise Risk Management (ERM) framework encompassing all functions for identifying, evaluating, mitigating and monitoring risks related to the achievement of organisational objectives.

The ERM framework supports a sound risk culture along with pro-active identification of risks that would enable it to adapt to the changing scenario, gain competitive advantage and thus provides confidence to the stakeholders that the Company's risks are known and managed. The process of risk management is initiated at the stage of strategy setting wherein risks inherent to the strategy are identified and the critical assumptions underlying the strategy are also considered. Such risks would be internal risks (like operational, financial, compliance and people) and external risks (like legal and regulatory, political, economic, competitive environment at domestic and international levels).

The ERM in the Company is overseen by the Board of Directors, through the Risk Management Committee (RMC) which is responsible to ensure that the Company has an appropriate and effective ERM framework. The RMC apprises the Board on a periodic basis on the effectiveness of the ERM framework, the enterprise risks faced by the Company and how these are managed. It also reviews the organisation's Risk Appetite statement on an annual basis.

The Steering Committee, consisting of core business vertical heads, is responsible for the risk management process including risk identification, impact assessment, effective implementation of risk mitigation plan and risk reporting. The Steering Committee, chaired by CEO & MD, reviews on a quarterly basis the enterprise risks which are tabled at the RMC for its review.

 We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has determined its operating cycle as twelve months for the purpose of current non current classification of assets and liabilities.

1.3 Use of estimates

3.7 Derivatives

The Company uses derivative financial instruments such as forward contracts, currency swap to hedge certain currency exposures, present and anticipated, denominated mostly in US dollars, EURO, Japanese YEN and Great Britain Pounds. Generally such contracts are taken for exposures materialising in the next twelve months. The Company actively manages its currency / interest rate exposures through a centralized treasury division and uses derivatives to mitigate the risk from such exposures. The use of derivative instruments is subject to limits and regular monitoring by appropriate levels of management. The limits and monitoring systems are periodically reviewed by management and the Board. The market risk on derivatives is mitigated by changes in the valuation of underlying assets, liabilities or transactions, as derivatives are used only for risk management.

3.8 Accounting for long term monetary items in foreign currency, forward contracts and Advances designated as cash flow hedge

3.8.1 Exchange difference in Long term monetary items in foreign currency

Exchange difference on translation or settlement of long term foreign currency monetary items at rates different from those at which they were initially recorded or April 1, 2007, in so far as it relates to acquisition of depreciable assets are adjusted to the cost of the assets. In other cases, such exchange differences are accumulated in "Foreign currency monetary item translation difference account" and amortised by recognition as income or expense in each year over the balance term till settlement occurs but not beyond March 31, 2020 (notified earlier as March 31, 2011). The un-amortized net exchange difference in respect of long term monetary items relating to other than acquisition of depreciable assets, is a loss of ₹ 2,428.53 lakhs as at March 31, 2016 (March 31, 2015: loss of ₹ 1,424.85 lakhs). These amounts have now been reflected as part of the "Reserves and Surplus" in line with the guideline issued by the Institute of Chartered Accountants of India.

3.8.2 Forward contracts and Advances designated as cash flow hedges

The Company had adopted the principles of Accounting Standard 30 - Financial instruments: Recognition and measurement, issued by the Institute of Chartered Accountants of India, with effect from April 1, 2008, in respect of forward contracts for firm commitments and highly probable forecast transactions meeting necessary criteria for designation as "Cash flow hedges". The gains and losses on effective Cash flow hedges are recognized in Hedge Reserve Account till the underlying forecast transaction occurs.

ANNEXURE "A" TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 13(f) under "Report on Other Legal and Regulatory Requirements" section of our report of even date) Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Ashok Leyland Limited (hereinafter referred to as "the Holding Company"), its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, as of March 31, 2016 in conjunction with our audit of the consolidated financial statements of the Holding Company as of and for the year then ended.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company, its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

- Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding Company, its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note issued by the Institute of Chartered Accountants of India and the Standards on Auditing, deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
- Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that, except for the matter referred to in paragraph 8 below, the audit evidence we have obtained and the audit evidence obtained by the other auditors of the subsidiary companies, associate companies and jointly controlled companies, which are companies incorporated in India, in terms of their reports referred to in the paragraph 11 below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the aforesaid entities.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Qualified Opinion

- The Company has consolidated financial statements for the year ended March 31, 2016 of three companies carrying on joint venture operations on the basis of unaudited financial statements as referred to in Note 3.15 to the consolidated financial statements. Since the financial statements of these companies are unaudited, we have not been provided with reports of the auditors on internal financial controls over financial reporting in respect of these companies and hence have not included the same in this report by us under section 143(3)(i) of the Act.
- In our opinion, to the best of our information and according to the explanations given to us and taking into consideration the reports of the other auditors referred to in the

ANNEXURE "A" TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 13(f) under, "Report on Other Legal and Regulatory Requirements" section of our report of even date)

paragraph 11, except for the matter referred to in paragraph 8, the Holding Company, its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note issued by the Institute of Chartered Accountants of India.

Derivatives

The Group and the Jointly Controlled Entities uses derivative financial instruments such as forward contracts, currency swap to hedge certain currency exposures, present and anticipated, denominated mostly in US dollars, EURO, Japanese YEN and Great Britain Pounds. Generally such contracts are taken for exposures materialising in the next twelve months. The Group and the Jointly Controlled Entities actively manage its currency / interest rate exposures through a centralized treasury division and uses derivatives to mitigate the risk from such exposures. The use of derivative instruments is subject to limits and regular monitoring by appropriate levels of management. The limits and monitoring systems are periodically reviewed by management and the Board. The market risk on derivatives is mitigated by changes in the valuation of underlying assets, liabilities or transactions, as derivatives are used only for risk management.

The information on derivative instrument is as follows:

3.9 Accounting for long term monetary items in foreign currency, forward contracts and Advances designated as cash flow hedge

3.9.1 Exchange difference in Long-term monetary items in foreign currency

Exchange difference on translation or settlement of long term foreign currency monetary items at rates different from those at which they were initially recorded on April 1, 2007, in so far as it relates to acquisition of depreciable assets are adjusted to the cost of the assets. In other cases, such exchange differences are accumulated in "Foreign currency monetary item translation difference account" and amortized by recognition as income or expense in each year over the balance term till settlement occurs but not beyond March 31, 2020 (notified earlier as March 31,2011). The un-amortized net exchange difference in respect of long term monetary items relating to other than acquisition of depreciable assets, is a loss of ₹2,496.62 lakhs as at March 31, 2016 (March 31, 2015: loss of ₹1,472.65 lakhs). These amounts have now been reflected as part of the "Reserves and Surplus" in line with the guideline issued by the Institute of Chartered Accountants of India.

3.9.2 Forward contracts and Advances designated as cash flow hedges

The Group had adopted the principles of Accounting Standard 30 - Financial instruments: Recognition and measurement, issued by the Institute of Chartered Accountants of India, with effect from April 1, 2008, in respect of forward contracts for firm commitments and highly probable forecast transactions meeting necessary criteria for designation as "Cash flow hedges". The gains and losses on effective Cash flow hedges are recognized in Hedge Reserve Account till the underlying forecast transaction occurs.
