Anant J. Talaulicar, Chairman & Managing Director, Cummins India Limited, said, “The Company’s performance for the year ended March 31, 2014 was impacted by a continued slowdown in the domestic market. Power Generation sales declined due to low demand for capital goods while Industrial sales were flat due to Industrial OEM’s exporting more equipment out of India. I am happy to relay that our team has executed our value engineering and cost reduction program very well utilizing our time tested Six Sigma approach. This was instrumental in our being able to maintain our profitability.

Even as the macro-economic conditions remain challenging in the short and medium term, we are confident about our long-term growth prospects based on our market leadership, technology strength, customer support and people talent.”
