The company's raw material and finished products both have threats of potential diseases which has impact on finished goods market of the company's products. The company suffered heavy burden of power and fuel cost which is approximately 21% of sales in 2012-13. The CNG prices alone increased 40% during the last year and approximately 95% in the last 2 years. All the above adverse factors have resulted in inadequate profits of the company.

2) Steps taken and proposed to be taken for improvement:

Mr. Viren C. Mirani, the Managing Director has taken all possible steps to stabilize the Gelatine product by exploring various markets in Europe as well as South East Asia. He has also taken rigorous steps to promote the sale of Ossein to other foreign buyers and it has resulted into increase in exports during last 3 years as reported above.

3) Expected increase in productivity and profits in measurable terms:

Management Discussion & Analysis Report

GENERAL:

In recent years, the healthcare industry has been globally gaining unprecedented prominence. In addition to the increasing emphasis on the traditional pharmaceutical industry, there is a significant growth in the nutraceutical sector as well. While this growth is fueled by the increase in percentage of the ageing population in developed countries as well as owing to the buying power of the large young workforce in developing nations like India, the pharmaceutical/nutraceutical industry has propelled to new heights.

The growth in the pharmaceutical/nutraceutical industry has largely trickled down to the Gelatine industry, as there has been an increase in the overall consumption of Gelatine.

In the midst of such favourable circumstances, the company continued to make inroads into the global markets, with increase in value of exports of both Ossein & Gelatine.

EXPORT:

During the year in review, in revenue terms, the company's export grew by almost 12% further, given the deficiencies for the major raw materials around the world for Gelatine, the pressure on availability is likely to prevail in the coming year. In spite of these challenges the export sales of Ossein increased by 44% during the year. Whereas the revenue from Gelatine increased by about 2%

DOMESTIC:

With the accruing demand for Gelatine in pharmaceutical/nutraceutical industry, as well as that for DCP in the poultry feed industry, the domestic sales for all the products remained robust. Revenue from domestic sales increased by almost 15%. Moreover, future trends for both, Gelatine and DCP markets, appear to be buoyant.

THREATS:

Although the supply of the Crushed Bones, which is the primary raw material for Gelatine, has been fairly steady, potential challenges could be encountered in future. The cost of Crushed Bones increased by 4.5% during the year.

The detection of new diseases in animals continues to have a negative impact on the global consumption of Gelatine.

As the company primarily focuses on export sales, any further deterioration in the already fragile world economy, could lead to a setback of sales.

OPPORTUNITIES:

Investments aimed at increasing production are being made by the company and the results thereof are likely to be seen during the Financial Year 2013-14; the company endeavors to take advantage of the buoyant market conditions of Gelatine.

Amidst the shortages in global supply, as well as challenges associated with the traceability issues of Gelatine produced from other/competing raw materials around the world such as Bovine Hides and Pig skin, Bovine Bone Gelatine is gaining market share with the potential consumers of Gelatine.

OUTLOOK:

With the domestic as well as Global Gelatine market remaining relatively bullish, barring any unforeseen circumstances, the sales of Ossein and Gelatine are expected to be robust.

With the steady escalation in consumption of poultry products, the DCP market is likely to remain healthy during the coming year.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY:

The company has proper and adequate internal control systems to ensure that all assets are safeguarded and protected against loss from unauthorized use or disposition and those transactions are authorized, recorded and reported correctly.

The internal control is supplemented by an extensive programme of internal audit, review by management and documented policies, guidelines and procedures. The internal control is designed to ensure that the financial and other records are reliable for preparing financial statements and other data, and for maintaining accountability of assets. The management is committed to a regular review of this aspect.

FINANCIAL AND OPERATIONAL PERFORMANCE:

Turnover increased by 13.12% to ₹ 113.23 Crores during the year ended 31st March, 2013 as compared to ₹ 100.10 Crores during the previous year.

EBIDTA (Earning before Interest, Depreciation, Taxes and Extra Ordinary Item) for the Current year is ₹ 22.17 Crores as against ₹14.33 Crores in the previous year.

Directors recommended dividend @ 30% as against @ 25% in the previous year.
