Letter From Chairman

CA SUNIL PATODIA
CHAIRMAN

Dear Stakeholders,

As we start a new year, I would like to thank all the stakeholders, Board of Directors, employees and investors who believed in me and my vision and shall consider my appointment as the Chairman of the Company at the 28th Annual General Meeting.

A few years ago I saw a dream to become the leading financial services firm in the country and now I can proudly say that we have reached that level that I once hoped to achieve. This would have been an impossible task without the help and support of my colleague, business partner and more than that my friend Kamal Poddar, our Managing director and all my colleagues of the "Choice Parivaar".

A very famous life quote that I truly believe in, "Great things take time" and this is absolutely true in our case. We as a group are growing and giving our best foot forward always. The growth that once seemed unattainable is now within our reach. With constant hard work and determination of each and every person of the "Choice Parivaar", we can dare to dream higher and achieve many more impossible tasks.

"Choice" aims to become a fintech company and build a robust ecosystem for our customers and to aid in their end to end financial journey. The group as a whole is expanding geographically and has successfully added many business associates under its umbrella. Along with this, we are pleased with the financial growth of your group as we are growing organically and inorganically. We aim to continue this growth in the coming years and the goal is to make Choice one of the best financial services firm in the country.

"Growth is never by mere chance; it is the result of forces working together" and therefore, we have always believed in team work and working towards one common goal. The COVID-19 pandemic has taught us to fight our vulnerabilities and stand up against difficulties. Our vision to become "Sarvasresth" will always be our top most priority and we promise to grow your company in the future and put our best foot forward always.

With best wishes,
Thanking You,

From Managing Director's Desk

Mr. Kamal Poddar
MANAGING DIRECTOR

Dear Stakeholders,

The world has seen a turnaround in the last financial year due to COVID-19 and most of the economies have witnessed the most difficult times historically. But with strong determination and utmost strength we have all stood firm and faced these unprecedented times.

As this year has been difficult for everyone, I would like to take this opportunity and thank each and every employee and our stakeholders for your immense support. It is because of your hardwork and unconditional faith that we have been able to achieve our goals for the past year.

I can proudly say that we have managed to keep ourselves motivated during these hard times and have given the best services to all our stakeholders. We have handled all the key operations smoothly by working at 25-30% capacity and rest from home almost the entire year without hampering the day to day operations. We expect the same to continue for the next financial year as well.

In the financial year 2020-2021, the group has done really well in terms of business and financials. We have managed to clock in a growth of 35% YoY in our revenue with a growth of 25% YoY in our bottom-line. This was possible only through our efficiency in business and managing our operations well.

From the business perspective, I can proudly say that our equity broking business has achieved new heights this year and we now belong to the Top 25 broking houses in the country. We expect this bull run to continue for the next three years which will aid our future growth. As far as the other businesses our concerned, they are picking up steadily and we hope to clock in a hundred percent growth in revenue in the coming financial year.

Choice group now can be synonymously known as a Fintech company as we have managed to launch new fintech products in this financial year and have many more in the pipeline for the coming year which can be seen in the road map which forms the part of the report. We have launched a new fintech product for our customers called Alphabee (for long term investors) and are in process of launching multiple products like ISMOS, e-filex, SPARK, Credue and Optimo in the upcoming years. Choice is at the foothold for a very strong year ahead and we hope to launch a fintech ecosystem for our customers assisting them in their end-to-end financial journey.

We believe our employees are our strength and we have made all efforts to provide the best working infrastructure and support to them. This year we have decided to provide financial security to all its employees in case of an unfortunate incident with the member. Under this, the Group shall bear the expenses of their children's education till graduation for children below 18 years of age. In addition to this, the family shall get the last drawn salary of the deceased employee till 12 months.

I take this opportunity to thank all our stakeholders for their faith in our Company and further appeal for their continued support in achieving our vision of being "Sarvasrestha"

**With best wishes,
Thanking You,**

COVID-19 PANDEMIC

It has been more than one & half year since "COVID 19" pandemic infiltrated the Human Society, leaving each one of us in grief. After the first wave of the on-going pandemic there was a subsequent lifting of the Nation-wide Lockdown presuming the control over on-going active cases. However, situations got deteriorated even more in the month of March & April 2021, leaving us in the turmoil followed again with the State Lockdowns.

But it is always believed that, even the worst times teaches you the best lessons of life. Similarly the pandemic COVID-19 has forever reformed the operational synergies of how the organizations across the world operate.

The Pandemic has by no choice transferred the working culture from being Manual to Digital, the organisations across has entered in to the sphere of an "Digital Era". Likewise your Company too have by all means have transformed their Scope of Service in to an gamut of Digital Financial services under one gable with least human interference.

Further the Pandemic has also introduced the "Work from Home" policy in the interest of the employees of the company, your

company too has adopted the policy for the safety & security of our employees.

We are further glad to inform you that the Business activities of the Company & its Subsidiaries have not been halted at any point time. The Management of your Company do not anticipate any medium to long term risk in the Company's ability to continue as a going concern and meeting its liabilities. An elaborative narration on the impact of COVID-19 is detailed in notes to the Financial Statements.

Management Discussion & Analysis Report

GLOBAL ECONOMIC OUTLOOK

Global economic growth is now expected to be 5.8% this year, a sharp upwards revision from the December 2020 Economic Outlook projection of 4.2% for 2021. The upward revision reflects additional fiscal support in a few large economies, the anticipated vaccine-powered recovery in the second half of 2021, and continued adaptation of economic activity to subdued mobility.

World GDP growth is expected to be 4.4% next year but global income will still be some USD 3 trillion less by end 2022 than was expected before the crisis hit. High uncertainty surrounds this outlook, related to the path of the pandemic, the effectiveness of policy support to provide a bridge to vaccine-powered normalization, and the evolution of financial conditions.

<https://www.oecd.org/economic-outlook/>

The weakness in the global economy due to the pandemic was being expected to reflect in the numbers. While the global economy has now recovered, the recovery has been patchy, with the developing nations starting at weak annual numbers. Meanwhile, the companies catering to the WFH economy continue to report robust numbers.

The original virus may have moved out of focus, but it has left behind more virulent variants. Now, the most dangerous Delta variant is present in about 100 countries, according to the World Health Organisation (WHO). What has changed is the availability of vaccines. But even though the developed world has benefited the most, a big part of the world won't get access to any vaccine till late 2022 or early 2023. The pandemic has exposed the weaknesses in supply chains, not just for vaccines but also for sectors as diverse as semiconductors and chemicals. Already, many countries have started taking measures to mitigate the risks on this front. The focus is on a reduction in dependence on other countries for critical supplies.

The global economy is on course to rebound from the pandemic-induced recession in 2021 led by an increasing number of large economies. So far, outsized consumer demand for goods and exports to satisfy that demand have fuelled much of the global economic recovery. Importantly, considerable monetary and fiscal policy supports enabled select economies to capitalize on the goods consumption-exports revival more than others.

The 2020 global recession brought about the smallest inflation decline and the fastest subsequent inflation upturn of the last five global recessions. While global inflation is likely to continue to rise over the remainder of this year, inflation is expected to remain within target ranges in most inflation-targeting countries.

<https://conference-board.org/topics/global-economic-outlook>

Global equity markets continued to generate positive returns for the current year as vaccination campaigns accelerated in most developed economies. Governments in most developed markets continued to ease Covid-related mobility restrictions and activity levels picked up.

The global economic recovery continues, but with a widening gap

between advanced economies and many emerging markets and developing economies.

INDIAN ECONOMIC OUTLOOK

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's real gross domestic product (GDP) at current prices stood at USD 2.71 Tn in FY21, as per the second advance estimates (SAE) for 2020-21. The GDP, which shrank from USD 2.87 Tn in 2019-20 to USD 2.66 Tn in the following year, is estimated to reach around USD 4 Tn in 2024-25.

India's foreign exchange reserves stood at USD 582.04 Bn, as of March 12, 2021, according to data from RBI. RBI's interventions in forex markets ensured financial stability and orderly conditions, controlling the volatility and one-sided appreciation of the Rupee.

External debt stood at USD 556.2 Bn at the end of September 2020, a decrease of USD 2.0 Bn (0.4%) as compared to end-March 2020.

Last year, the coronavirus pandemic and shutdown measures to contain it plunged the Indian economy into recession for the first time in nearly a quarter of a century. Based on the OECD's Economic Outlook 2021, the Indian economy contracted by 7.7% in 2020 as domestic consumption declined. Despite the downturn last year, the OECD has projected India's economy to expand by 9.9% and become the fastest-growing G20 economy in 2021.

Although the OECD's projections provided a positive outlook for the Indian economy, the second wave and new virus variants have now posed a new risk to growth. For India to achieve its growth potential, the government will need to implement an effective vaccination rollout and promote a more resilient, inclusive, and sustainable economy. According to McKinsey Global Institute's latest report, India's economy has reached a 'decisive point', which requires reforms over the next 12 to 18 months to create jobs for millions of workers between now and 2030.

India's manufacturing and construction sectors could amplify growth the most, potentially adding 9.6% and 8.5% in annual GDP growth and creating 11 million and 24 million jobs, respectively, from 2023 to 2030.

INDIAN FINANCIAL SECTOR

India's financial sector is one of the most upcoming sectors globally and has seen robust growth in the past decade. The banking and financial services sector offers many investment opportunities. It is closely linked to the economy and has the potential to grow faster than the economy. This is reflected on the fact that the share of financial services in India's market capitalisation has increased from ~6 per cent in FY01 to ~24 per cent in FY21. Despite this considerable growth, there is under-penetration in various sub-segments of banking and financial services - be it loan products, mutual funds, demat accounts, insurance - life and non-life, wealth management, etc.

Almost all sub-sectors within the banking and financial services industry have barely scratched the surface in terms of reach. But the unlocking of the true potential of this sector to reach out to crores of Indians has just started off with the digital transformation that is currently happening.

With a rising era of digitization through smartphones and cheap data connections, Indians from even the remote areas of the nation can now apply digitally, complete KYC using Aadhar and link a bank account to make use of financial products like loans, mutual funds, insurance, demat account, wealth management services etc.

Today, financial technology companies or FinTech companies are using technology to improve reach and delivery of financial services. When most financial products are being sold by FinTech businesses, there is a conventional business behind the scene. This is made possible because of the JAM trinity (short for Jan Dhan-Aadhaar-Mobile) trinity refers to the government of India initiative to link Jan Dhan accounts, mobile numbers and Aadhaar cards of Indians to plug

the leakages of government subsidies), all of which is essential to making financial services accessible to the masses of a vast and diversified nation.

Normally, banking and financial services are intuitively related with banks, NBFCs and HFCs, but in reality, it is much more than lending businesses, and diversified with many sub-sectors such as asset management companies, brokerages, wealth management, depositories, exchanges, insurance companies such as life and non-life insurance and other entities, including Rating agencies.

Once the banking and financial services companies manage to increase their reach using the emerging technologies, they will be able to reduce their cost of operations sharply. This is an inflection point for the businesses engaged in the banking and financial services sector.

India equities represent one of the fastest growth sectors globally and the country is looked up at the top of the list with China for investment returns over the next 12-24 months (2021-22). The midcap and small cap space is providing investors with an attractive opportunity for long term investment at current valuations. This could be an apt time for investors to build their midcap and small cap portfolio while sticking to their asset allocation.

GROWTH OPPORTUNITY

India is being viewed as a potential opportunity by investors with the economy having the capacity to grow tremendously. Buoyed by strong support from the Government, FII investment have been strong and is expected to improve going forward. Foreign investors invested >INR 1.4 Tn (USD 19 Bn) in the Indian stock market in 2020. Foreign Portfolio Investors/Foreign Institutional Investors (FPIs/FIIs) have been one of the biggest drivers of India's financial markets, having invested -INR 2.59 Tn (USD 35.69 Bn) in 2020-21 (as of March 24, 2021).

Highly developed primary and secondary markets have attracted FIIs/FPIs to the country. FDI equity inflow grew by 40% in the first nine months of 2020-21 (USD 51.47 Bn) compared to the year ago period (USD 36.77 Bn) and the same year witnessed strong FPI inflows into the Indian equity markets of INR 2,74,034 Cr.

India's IPO fundraising is at a 13-year high due to increased foreign funds and rising interest from small investors, making it one of the hottest IPO markets in 2021. In 2021, Indian companies raised USD 2.2 Bn through initial public offerings (IPOs), the highest since 2008, as indicated by data from Refinitiv.

As of April 2021, AUM managed by the mutual funds industry stood at INR 3,237,985 Cr (USD 444.11 Bn). Inflow in India's mutual fund schemes via systematic investment plan (SIP) were INR 96,080 Cr (USD 13.12 Bn) in FY21. Equity mutual funds registered a net inflow of INR 8.04 Tn (USD 114.06 Bn) by end of December 2019.

Another crucial component of India's financial industry is the insurance industry. Insurance industry has been expanding at a fast pace. The total first year premium of life insurance companies reached INR 2.59 lakh crore (USD 36.73 Bn) in FY20. India's insurance penetration was pegged at 3.76% in FY20, with life insurance penetration at 2.82% and non-life insurance penetration at 0.94%. In FY21 (until March 2021), premium from new business of life insurance companies in India stood at USD 31.9 Bn.

In India, gross premiums written of non-life insurers reached USD 26.52 Bn in FY21 (between April 2020 and March 2021), from USD 26.49 Bn in FY20 (between April 2019 and March 2020), driven by strong growth from general insurance companies. In March 2021, health insurance companies in the non-life insurance sector increased by 41%, driven by rising demand for health insurance products amid COVID-19 surge.

According to S&P Global Market Intelligence data, India is the second-largest insurance technology market in Asia-Pacific, accounting for 35% of the US\$ 3.66 billion insurtech-focused venture investments

made in the country.

COVID19 is also considered as another landmark in fintech industry. In early covid period, it disrupted the business models of many FinTech, but throughout the year it has jumpstarted the digital or contactless payments and neo banks again. Between January and July 2020, fintech investments reached \$1.47 billion which is approximately a 60% jump when compared to 2019.

Online brokerages were gaining traction, encouraging investors to buy equities, IPOs, ETFs, mutual funds; UPI payments were skyrocketing; more and more people turned to online banking to socially separate themselves and keep themselves safe; and insurance transactions grew.

India stack continues to positively impact FinTech's with newer services. NeoBanks have emerged as a segment of choice for investors. Neo-Entrants are introducing "Fintech as a service line" in their current business models by either developing it organically or buying out fintech's. Lending start-ups are going through the evolution phase. Complex areas like Trade Finance and B2B start-ups are getting support in the new wave.

Government-led Initiatives: The Indian payments landscape has been revolutionized by the regulators and the central bank's proactive initiatives, e.g., India Stack and UPI. India has emerged as one of the most exciting markets for digital payments across the world. Last year, home-grown payment networks (Ru Pay and UPI) took the lion's share of the total digital transactions, i.e., 65%, showcasing how their efforts have been in the right direction for achieving targets.

Wayforward

- As indicated by provisional estimates released by the National Statistical Office (NSO), India posted a V-shaped recovery in the second half of FY21. As per these estimates, India registered an increase of 1.1% in the second half of FY21; this was driven by the gradual and phased unlocking of industrial activities, increased investments and growth in government expenditure.
- As per the Reserve Bank of India's (RBI) estimates, India's real GDP growth is projected at 9.5% in FY22; this includes 18.5% increase in the first quarter of FY22; 7.9% growth in the second quarter of FY22; 7.2% rise in the third quarter of FY22 and 6.6% growth in the fourth quarter of FY22.
- India is expected to be the fourth largest private wealth market globally by 2028.
- AMFI is targeting nearly five-fold growth in AUM to INR 95 lakh crore (USD 1.47 Tn) and more than three times growth in investor accounts to 130 Mn by 2025.
- India is today one of the most vibrant global economies on the back of robust banking and insurance sectors.
- Furthermore, India's leading bourse, Bombay Stock Exchange (BSE), will set up a joint venture with Ebix Inc to build a robust insurance distribution network in the country through a new distribution exchange platform.
- In India, the life insurance industry is expected to increase at a CAGR of 5.3% between 2019 and 2023.
- In a report, by Research and Markets, as of March 2020, the FinTech market in India is expected to expand at a CAGR of -22.7% during the 2020-2025 periods. India is strongly poised to realize a FinTech sector valuation of USD 150-160 Bn by 2025, translating to an incremental value-creation potential of approximately USD 100 Bn.
- The recent government initiative of establishing Fintech hubs and an allocation of INR 15 billion to boost digital payments will further immunize the industry in the coming years.

B) WEALTH SERVICES

The group offers its Wealth Services through our subsidiary M/s. Choice Wealth Private Limited. The segment majorly focuses on Mutual Fund Distribution.

General overview:

Investica is a state-of-the-art platform for investing in mutual funds. It provides individual investors in India with a simple, hassle-free investment experience. It is registered as a Mutual Funds Distributor with AMFI under the name "CHOICE WEALTH PRIVATE LIMITED" and the ARN -78908. The Investica brand is a part of the Financial Conglomerate-Choice Group.

Investica was launched in 2017, backed by a young and energetic team of skilled professionals with fresh ideas and enthusiasm. It is now celebrating its fourth anniversary with many successful 'firsts' and numerous satisfied investors.

Industry performance:

Mutual fund industry had a roller coaster ride this year. Since the onset of COVID-19, mutual fund firms have been issuing fewer NFOs, owing to the statewide lockdown and its impact on investor confidence. At the end of March, the mutual fund sector had assets under management (AUM) of 31.43 lakh crore, up from 22.26 lakh crore in March 2020.

Investing in open-ended equity schemes and open-ended debt schemes has remained positive. Equity schemes' AUMs fell slightly from March, while debt fund AUMs increased. After corporate and institutional investors redeemed their investments to pay taxes, money market fund categories faced the brunt of the outflow in the month, resulting in the net outflows of Rs 52,528 crore in March 2021, the worst since the Rs 1.95 lakh crore bleeding in March 2020 after the pandemic scare roiled the markets.

Mutual funds add more than 81 lakh investor accounts in 2020-21. As of April 30, 2021, there were 9.86 crore (98.6 million) accounts (or folios in mutual fund language), with roughly 8.25 crore folios under Equity, Hybrid, and Solution Oriented Schemes, where the greatest investment is from the retail segment (82.5 million).

The number of folios with 43 fund houses increased by 81.19 lakh to 9,78,65,529 at the end of March 2021, up from 8,97,46,051 in March 2020. Investors in equity-oriented schemes increased their holdings by 24.3 lakh to 6.68 crore at the end of the previous fiscal year, up from 6.44 crore in March 2020. In addition, the number of debt-oriented scheme folios increased by 16.16 lakh to 88.4 lakh.

In December 2020, SEBI changed the eligibility requirements for mutual fund sponsors, allowing enterprises with a net worth of Rs 100 crore to start up a fund even if they didn't match the profitability criteria. With this, fintech companies can now enter the mutual fund business if they have a net worth of at least Rs 100 crore irrespective of the company's profits.

portfolio analysis, basket of mutual funds, tracking your family's investments, scheme wise SIP calculator and a dramatic increase in digitization of client journeys, with account formation.

Digitalization, artificial intelligence, process reengineering, and increased client communication were all used to redefine and make client journeys more client-centric. A large number of service requests were completed within the specified time frame. There has been a rising emphasis on improving the technical and behavioral abilities of front-line employees. To automate, simplify, and personalize its range of products and services, the platform will continue to focus on customer-centric initiatives and innovations.

In the year 2020-21 major transaction took place is the acquisition of the bank bazaar, where it created a new client base for the Investica adding almost 8000 new clients. The number of clients increased by almost 113% growth compared to the last year. Assets under administration (AUA) were increased over 120% at the end of March 2021 compared to March 2020.

Wayforward:

Investica launched in 2017 with a vision of 'The Joy of Earning' our clients experience while investing in mutual funds. We take pride in its smooth, hassle-free investment experience and also a customized plan for our clients as per their risk appetite, budget and duration. It churns out a comprehensive investment plan for clients to accomplish their life goals and create wealth.

As per the current scenario, the situation is continuously changing, making it difficult to predict how the pandemic would progress. Fighting COVID-19 is contingent on the success of the vaccine campaign and how quickly the second wave of illnesses is contained. When things settle down following the current Covid-19 issue, many investors' personal finances and savings will resume, which will benefit the overall business as well as resurgence in market demand

and increased business earnings.

Also, with the enlarging scope of FinTech environment in India, management plans in the coming years to make Investica a "super app" by integrating many financial services catering to the needs of individual investors. We continuously work towards enhanced user experience with simplified onboarding process, improving our services in achieving the goals of investors.

Market Overview

The economic estimates for growth in India were not looking promising in FY 2020 itself. The government, recognizing the need of the hour, rolled out several economic packages to stimulate the economy which included a significant tax relief to the corporate sector in order to promote investments. However, due to the unprecedented COVID crisis, the stimulus couldn't deliver to its fullest extent.

By the end of FY 2020, the economic engines of India came to a near halt due to the stringent lockdown which was imposed by the government and lasted for more than three months. During the initial stages of the pandemic, the Indian GDP had shrunk by whopping 7.3%. Barring a few exceptions, almost every sector was experiencing an acute demand slump. Investment banking, like other sectors, was no exception to this crisis. However, in investment banking since the stakeholders are spread across varied verticals of industries, the complexities were compounded. Conducting transactions which require personal presence, like Mergers and Acquisitions & Due diligence were severely impacted.

During 3rd and 4th quarter of FY 2021, the markets began to bounce back as the government unveiled its plans for a Rs.2.6 Lakh Crore Stimulus package. Unfortunately as the 2nd wave of the pandemic began to grow, the government had to impose a strict lockdown again, thus putting brakes to an economy which was showing signs of returning to normalcy.

Financial Performance

While we generated revenue of 150.62 Lakhs, this year hasn't been good for us. Our revenue stream fell by 80.13% owing to decreased business activity during the pandemic. However, we took this opportunity to improve our operating efficiency. We managed to optimize our fixed costs to a great extent which in-turn increased our gross profit margin by 22.44% from 37.93% to a whopping 60.37%. Our profit for the year stood at 12.62 Lakhs, we have optimized our PAT margin to 8.01% which more than doubled from FY 2020.

Wayforward

With a strong GDP forecast between 9% -10% for FY 2022, we are anticipating a quick recovery from the damaging effect of the pandemic. Post pandemic, we expect that companies will actively seek out M&A and fund raising activities in order to consolidate their position in the market which will in turn have a positive impact on the investment banking sector. Atop that, with the policy makers making conscious efforts to boost the economy, the market for investment banking is destined to grow.

OVERVIEW OF THE INDUSTRY

The Pandemic of Covid-19 have caused contraction in the world's output in year 2020, with many advanced economies and many

sectors such as infrastructure, travel, hospitality, transportation and aerospace and small enterprises getting impacted across the world. Consequently the global spend of infrastructure declined substantially on full year basis. The impact of Covid-19 on the infrastructure and construction sector in India has been extensive and damaging.

Major implications of pandemic on Infrastructure Segment:

1. Restriction imposed by the Government of India, State Governments and the Union Territories to control the spread and impact of the virus have prevented work in projects, adversely impacted supply chains, plant, equipment, materials and manpower.
2. Delays and disruptions to completion of projects are inevitable with growing losses, cost and expenses.
3. Declaration of force majeure by Contractors and Consultants.
4. Liquidity Challenges resulting in funding gaps.
5. Marginal decline in infrastructure funding by the Governments to prioritise its spending on public health and safety.
6. Availability of workers for infrastructure projects (construction) and operations.
7. Infrastructure funds and investors may diversify their portfolios from traditional infrastructure assets to IT, utilities and health.

Yet not all impacts in infrastructure have been negative, some services have actually seen an increase in demand or positive effects, reflecting a wide variation and heterogeneous nature of infrastructure. For example, construction or maintenance projects on roads may have advanced during confinement periods as less traffic on roads provided opportunity for construction crews to work unencumbered.

In this pandemic, we observed that, Societies cannot be resilient with resilient infrastructure. In the current crisis, the extent and quality of infrastructure related to health such as hospitals, water, and sanitation have proven to be important. Furthermore, there may be scope to consider where infrastructure can play role more generally in support of healthcare value chains, transportation infrastructure to support delivery of essential goods.

Notably, the crisis has brought renewed focus on social or "soft" infrastructure, which is sometimes overshadowed by hard infrastructure like energy and transportation in the context of resilience.

Company Operations

The COVID-19 pandemic and consequent nationwide lockdown announced by the Government of India since March 24, 2020 had a significant adverse impact on the operations of the Company as being faced by the Nation and the world. Since the Company is involved in infrastructure consulting related activities which falls under the non-essential category, the Company has temporarily suspended

operations in its ongoing projects at site, with intern result into unavailability of resources on timely manner, delays in execution of projects, operational issues etc. Such pandemic always gives an opportunity to bounce back with new initiatives, the recent impetus of the Government on increased budgetary allocation health, sanitation and other basic infrastructure facilities has led to growing opportunities for use and moved our focus on:

- Water Supply (Jal Jeevan Mission)
- Environment (Solid/Liquid waste management)
- Bharatmala Pariyojna
- Pradhan Mantri Awas Yojna

During the year under review, CCSPL has successfully bagged project in Water Supply in Rajasthan and Madhya Pradesh and the Company has ongoing projects in segments like Roads and Highways (Maharashtra, Himachal Pradesh and Karnataka), PMAY (Jharkhand, Chhattisgarh, Madhya Pradesh and Orissa), Public Financial Management (Goa and Uttarakhand)

With Indian economy gaining momentum, CCSPL ensures its continuous engagement with the industry through forward project management and emphasis on rational identification of new tender opportunities, aggressive bidding, speedy settlement of completed projects, timely execution of ongoing projects and prompt realisation of fees. Considering decent budget allocation by the Governments in the segments like public health, water, highways and waste management, the key opportunities includes infrastructure projects in Government funded water projects (Jal Jeevan Mission), Roads & Highways (Bharatmala) and waste management (Bioremediation), healthcare where some momentum is expected.

OUR DISTRIBUTION & NETWORK PLATFORM

The Distribution & Network services for increasing the number of Business Associates for distributing our group services is provided through our online platform "Choice Connect" under our subsidiary M/s. Choice Retail Solutions Private Limited.

1) Impact of the Pandemic on the Business Segment:

Although the pandemic had challenged the traditional approach of carrying out operations. We were quick to adapt and welcome the fresh change which was going digital and remote working. Because of this, there was not any substantial impact directly on the business. Streamlining our operations was our priority, and it was important to make our communication channel robust.

Apart from this, we onboarded more Business Partners and the rate of active BP and business leads increased exponentially. And as people realized the importance of health, insurance, and investment, the leads to insurance and other services grew.

We are happy that we could provide a source of income to our Business Partners.

2) Industry Facts:

Because of the pandemic, many lost their jobs or received pay cuts. This uncertainty made people consider the idea to have a passive source of income. Also, more and more people notice the importance of insurance and investments. This led to an increasing number of people buying insurance policies for their families and investing their money in equity and mutual funds.

It was reported that in pandemic the number of Demat accounts created rose to an all time high at 10.7 million in India. Plus more and more people are starting to buy insurance to be financially secure.

Overall, it had a good impact on the insurance and finance business.

3) Peer Review:

It was important to increase our brand awareness this time, as more and more people wanted to have a different source of income. For this, we increased our marketing and communication campaigns to convert prospects into Business Partners.

We ran many promotional contests, which helped many business partners to win something over and above their commission. We started providing extra incentives to our business partners, who were providing us with substantial business.

We increased our bandwidth to provide more sales & technical support to our business partners.

4) Our Services:

We have added many new services in our portfolio like Corporate fixed deposits, Bonds, Gold loans with our core services which are loans, Mutual funds, Stock market, and Insurance.

During the Year Choice Connect contributed 5000 new Clients In Insurance Service vertical. As of now we have more than 10,000+ business partners pan India who are bringing in more clients.

We are one of the few platforms in India where anyone can start earning a passive income without investing a rupee. Our business partner can diversify their income source from our platform as, unlike other platforms where you can provide only a particular product (Insurance or loan agent). With us, anyone can provide multiple services like loans, insurance, equity, corporate fixed deposit, mutual fund, etc.

We have assigned a dedicated Relationship Manager who will provide all marketing and sales material along with customer support. And by going digital we added a feature of booking corporate fixed deposits and buying an insurance policy online. This further reduced the delay in submitting documents and many business partners saved their client's time by directly buying the policy online from our portal.

HUMAN RESOURCE

Human Resource Development is the framework for helping employees develop their skills, knowledge, and abilities, which in turn improves an organization's effectiveness.

The focus of all aspects of Human Resource Development is on developing the most superior workforce so that the organization and individual employees can accomplish their work goals in service to customers.

HRD is needed by any organization that wants to be dynamic and growth-oriented or to succeed in a fast-changing environment. Organizations can become dynamic and grow only through the efforts and competencies of their human resources. Personnel policies can keep the morale and motivation of employees high, but these efforts are not enough to make the organization dynamic and take it in new

directions. Employee capabilities must continuously be acquired, sharpened, and used. For this purpose, an "enabling" organizational culture is essential. When employees use their initiative, take risks, experiment, innovate, and make things happen, the organization may be said to have an "enabling" culture.

We at Choice, follow the below ideas to manage and improve employee performance in our organization.

1. Communicate clear expectations

Making sure employees are clear about their work assignments means communicating those expectations well. Continue to manage what is expected through frequent communications.

2. Yearly performance appraisals

Regular and timely appraisals ensure employees know where they stand at all times. Conducting performance appraisals regularly helps in keeping goals in the forefront of daily tasks.

3. We make employee development a priority.

We work closely to fill any skill gaps which will help them achieve long-term goals in return helping the organization to fulfill business objectives.

4. We make sure to take the below steps towards improving morale

Employees perform better when they are satisfied with their job. We constantly review things such as:

- Work environment
- Employee Benefits
- Employee understanding of the mission and vision

Employees who understand how their role helps the company succeed often give their best.

5. We empower employees to do their jobs well

We have an open work environment which helps employees in taking quick decisions and the same results in faster output.

6. Use of right technologies

Implement technology platforms that drive performance and engagement daily. Technology is crucial in today's workforce.

Organizational success thrives when the right rules and systems are in place. Simply wanting to know how to improve employee performance without including employee considerations may not help to achieve the set goals.

Corporate Governance Report

There are four ingredients in true leadership Brain, Soul, Heart & Good Nerves (Good Governance)

-Nelson Mandela

Corporate Governance is all about, operating the Business not only in the outer shell of Rules imposed but conducting the Business activities indeed with the moral principles.

Corporate governance is much more than company management, it refers to a fair, efficient and transparent functioning of the organisation's management system. It refers to a structure, processes and practices which ensure that the Company is managed in the best interest of the Shareholders of the Company.

The practices and principles of good corporate governance have been progressed over a time which fuels the business of the Company rather than suppress it. In the on-going context of liberalization and globalisation there is increasing consciousness in the emerging economies including India that a country's business environment must be maintained and operated in a manner that is conducive to investors' confidence so that both domestic and foreign investors are induced to make adequate investment in Corporate sectors. This will be favourable to rapid wealth creation and constant growth of the economy.

Corporate Governance is concerned with holding the balance between economic and social goals between individual and communal goals. Perhaps one of the most important principles of corporate governance is the recognition of its stakeholders. By following the good governance practice, the organisation can aid its Shareholders better. Moreover the Veil of Corporate Governance is not restricted to its Shareholder's but the benefits of Good Governance extends to all its Stake Holders i.e. its Creditors, Customers, Employees & other associated people directly or indirectly & the Society at large.

To safeguard the interest of all its stakeholders, embedding a strong Corporate governance policy is indispensable.

The Board of Directors hereby present the Company's Report on Corporate Governance pursuant to the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('Listing Regulations') as amended for the year ended March 31, 2021.

Standalone Independent Auditor's Report

INDEPENDENT AUDITOR'S REPORT

To The Members of Choice International Limited Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **Choice International Limited** (the "Company"), which comprise the Balance Sheet as at 31st March 2021, and the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2021, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. We have determined that there are no key audit matters to communicate in our report.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the Directors report including annexures to Director's report, Management Discussion and Analysis Report and Report on Corporate Governance but does not include the standalone and consolidated financial statements and our auditor's report thereon, which is expected to be made available to us after the date of this auditor's report.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is

materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

- When we read the Director's Report including annexures to Director's report, Management Discussion and Analysis Report and Report on Corporate Governance, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 'The Auditor's responsibilities relating to Other Information'.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to

provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

- As required by Section 143(3) of the Act, based on our audit report, to the extent applicable that:
 - We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - The Balance Sheet, the Statement of Profit and Loss

including Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account.

- In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act.
- On the basis of the written representations received from the directors taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2021 from being appointed as a director in terms of Section 164(2) of the Act.
- With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
- With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid / provided by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.
- With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:
 - The Company has disclosed the impact of pending litigations on its financial position in its standalone financial statements.
 - The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - There has been no delay in transferring amounts, required to be transferred to Investor education and protection fund (IEPF) by the Company except for the following:

Nature of dues	Amount	Due date	Actually paid
Unclaimed Dividend	2,37,688	30.10.2020	08.04.2021

- As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

ANNEXURE "A" TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Choice International Limited** (the "Company") as of 31st March, 2021 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that are operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the standalone financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting are operating effectively as at 31st March, 2021, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

**ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT**

(Referred to in paragraph (2) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date to the members of Choice International Limited for the year ended 31st March, 2021)

(i) In respect of the Company's Property, Plant & Equipment:

- (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant & Equipment.
- (b) The Company has a program to verify Property Plant & Equipment once in every 3 years which, in our opinion, the same is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the program, the company had done physical verification in the financial year 18-19 and no Property Plant & Equipment were physically verified by the Management during the year.
- (c) According to the information and explanations given to us and the records examined by us and based on the examination of the registered conveyance deeds provided to us, we report that the title deeds, comprising the immovable property of land and building, which is freehold, is held in the name of the Company as at the balance sheet date.

(ii) The Company does not have any inventory and hence reporting under clause (ii) of the Order is not applicable.

(iii) According to the information and explanations given to us, the Company has granted loans, secured or unsecured, to companies covered in the register maintained under Section 189 of the Companies Act, 2013, in respect of which:

- (a) The terms and conditions of the grant of such loans are, in our opinion, prima facie, not prejudicial to the Company's interest.

Notes to the Standalone Financial Statements

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

1. Corporate Information

Choice International Limited (hereinafter referred to as "the Company") is a public limited company domiciled in India and incorporated under the provisions of the Companies Act 1956. The registered office of the Company is located at Shree Shakambhari Corporate Park, 156-158 Chakravorty Ashok Society, J.B. Nagar, Andheri (E) Mumbai Maharashtra 400099, India. The Company's shares are listed on the Bombay Stock Exchange (BSE).

The Company was registered with Reserve Bank of India as Non-Deposit Taking Non-Systemically Important Non-Banking Financial Services Company. The Company vide their letter dated August 20, 2018 had requested Reserve Bank of India (RBI) for cancellation of Certificate of Registration as NBFC and RBI has approved the same vide letter dated November 25, 2020 wef. October 23, 2020.

The main business of the Company is to provide business support services to the subsidiaries and other group companies

2. Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These accounting policies have been consistently applied to all the years presented by the Company unless otherwise stated.

Basis of preparation

i. Statement of compliance

These financial statements have been prepared in accordance with the Indian Accounting Standards ("Ind AS") notified under Section 133 of the Companies Act, 2013 ('the Act') read with Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and other relevant provisions of the Act.

The accounting policies are applied consistently to all the periods presented in the financial statements.

ii. Functional and presentation current

The Company's presentation and functional currency is Indian Rupees. All figures appearing in the financial statements are in Indian rupees in lakh rounded off to two decimal places as permitted by Schedule III to the Act. Per share data are presented in Indian Rupee to two decimal places.

iii. Basis of measurement

The financial statements have been prepared on historical cost basis except for certain financial assets and liabilities are measured at fair value as explained in the accounting policy. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Further assets and liabilities are classified as per the normal operating cycle (determined as 12 months).

iv. Fair value measurement

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date.

The best estimate of the fair value of a financial instrument on initial recognition is normally the transaction price. If the Company

determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently that difference is recognised in Statement of Profit and Loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- **Level 1 - Valuation using quoted market price in active markets:** The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price, without any deduction for transaction costs. A market is regarded as active, if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.
- **Level 2 - Valuation using observable inputs:** If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates most of the factors that market participants would take into account in pricing a transaction.
- **Level 3 - Valuation with significant unobservable inputs:** The valuation techniques are used only when fair value cannot be determined by using observable inputs. The Company regularly reviews significant unobservable inputs and valuation adjustments. Level 3 assets are typically very illiquid, and fair values can only be calculated using estimates.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

v. Use of judgment and Estimates

The preparation of the financial statements requires the management to make judgments, estimates and assumptions in the application of accounting policies that affects the reported amount of assets, liabilities and the accompanying disclosures along with contingent liabilities as at the date of financial statements and revenue & expenses for the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in outcomes different from the estimates. Difference between actual results and estimates are recognised in the year in which the results are known or materialise i.e. prospectively.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The key areas involving estimation uncertainty, higher degree of judgement or complexity, or areas where

assumptions are significant to the financial statements include:

- i) Impairment of financial assets
- ii) Estimation of fair value measurement of financial assets and liabilities
- iii) Effective interest rate
- iv) Business model assessment
- v) Provisions and Contingencies
- vi) Useful life and expected residual value of assets
- vii) Tax position for current tax and recognition of deferred tax assets/liabilities
- viii) Measurement of Defined Benefit Obligations and actuarial assumptions
- ix) Classification of lease and related discount rate

A. Summary of significant accounting policies

1. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realized within twelve months after the reporting date, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Based on the nature of products and services offered by the Company, operating cycle determined is 12 months for the purpose of current and non-current classification of assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents,

2. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured and there exists reasonable certainty of its recovery.

Sale of services

The Company recognizes revenue on accrual basis when the

significant terms of the arrangement are enforceable, services have been delivered and the collectability is reasonably assured. The method of recognizing the revenues and costs depends on the nature of the services rendered. Revenue is recognized when no significant uncertainty exists as to its realization or collection.

Interest Income

Interest income from financial assets is recognized when it is probable that economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial assets to that asset's net carrying amount on initial recognition.

Dividend Income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably).

3. Property, Plant and Equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the Balance Sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

All items of property, plant and equipment are initially recorded at cost. Such cost includes the cost of replaced part of the property, plant and equipment and borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying property, plant and equipment. The cost of an item of property, plant and equipment is recognized as an asset if, and only if, it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Subsequent to recognition, property, plant and equipment (excluding freehold land) are measured at cost less accumulated depreciation and accumulated impairment losses. When significant parts of property, plant and equipment are required to be replaced in intervals, the company recognizes such parts as individual assets with specific useful lives and depreciation respectively. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement cost only if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the Statement of Profit and Loss as incurred.

Depreciation is recognised so as to write off the cost of assets less their residual values over the useful lives as prescribed in Schedule II

of to the Companies Act, 2013, using the straight-line method ("SLM"). Residual value is considered nil in case of Computers, Server and network and 5% is considered in case of other assets.

Description of Asset	Useful Life
Buildings	60 Years
Computers and Printers, including Computer Peripherals	3 Years
Office Equipments	5 Years
Furniture & Fixtures	10 Years
Motor Vehicles (Motor Car)	8 Years
Solar Plant	25 Years
Electric Installation	10 Years
Server & Network	6 Years
Water Pumps and Borewell	5 Years

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual values, useful life and depreciation method are reviewed at each financial year-end to ensure that the amount, method and period of depreciation are consistent with previous estimates and the expected pattern of consumption of the future economic benefits embodied in the items of property, plant and equipment.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal or retirement of an item of property, plant and equipment is determined as the difference between sale proceeds and the carrying amount of the asset and is recognised in profit or loss.

4. Investment Properties

Investment properties are properties that is held for long-term rentals yields or for capital appreciation (including property under construction for such purposes) or both, and that is not occupied by the Company, is classified as investment property. Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated impairment loss, if any. Though the Group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer. Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition.

5. Intangible Assets

Intangible asset including intangible assets under development are stated at cost, net of accumulated amortisation and accumulated impairment losses, if any. Intangible assets acquired separately are measured on initial recognition at cost. The amortization period and the amortisation method are reviewed at the end of each financial year. The useful lives of intangible assets are assessed as either finite

or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with infinite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

6. Segment Reporting

The main business of the Company is to provide support services to the subsidiaries and other group companies. Further, all activities are carried out within India. Hence, there are no separate reportable segments as per Indian Accounting Standard (Ind AS)-108 on "Operating Segments".

7. Foreign exchange transactions and translations

a) Initial recognition: Transactions in foreign currencies are recognised at the prevailing exchange rates between the reporting currency and a foreign currency on the transaction date.

b) Conversion: Transactions in currencies other than Company's functional currency are recorded on initial recognition using the exchange rate at the transaction date. At each Balance Sheet date, foreign currency monetary items are reported at the prevailing closing spot rate. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are generally recognised in Statement of Profit and Loss.

Non-monetary assets and liabilities are carried at historical cost using exchange rates as on the date of the respective transactions and are not retranslated at the reporting date.

8. Taxation

Current taxes

Income tax expense is recognized in net profit in the statement of profit and loss except to the extent that it relates to items recognized directly in other comprehensive income or equity, in which case it is recognized in other comprehensive income or equity respectively. Current income tax is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The Company offsets, on a year to year basis, the current tax assets and liabilities, where it has legally enforceable right to do so and where it intends to settle such assets and liabilities on a net basis.

Deferred taxes

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences, and deferred tax assets are generally

recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside the profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity)

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Minimum Alternate Tax (MAT) credit entitlement (i.e. excess of MAT paid for a year over normal tax liability for that year) eligible for set off in subsequent years is recognised as an asset in accordance with Ind AS 12, Income Taxes, if there is convincing evidence of its realisation.

MAT credit is created by way of credit to the Statement of Profit and Loss. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

9. Impairment of Non-Financial Assets

At the end of each reporting period, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized in the profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

10. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

a) Initial recognition and measurement

All financial assets are recognised initially at fair value. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

On initial recognition, a financial asset is classified as measured at:

- Amortised cost
- FVOCI - debt instruments
- FVOCI - equity instruments
- FVTPL

Amortised cost - The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios being the level at which they are managed. The financial asset is held with the objective to hold financial asset in order to collect contractual cash flows as per the contractual terms that give rise on specified dates to cash flows that are solely payment of principal and interest (SPPI) on the principal amount outstanding. Accordingly, the Company measures Bank balances, Loans, Trade receivables and other financial instruments at amortised cost.

FVOCI - debt instruments - The Company measures its debt instruments at FVOCI when the instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets; and the contractual terms of the financial asset meet the SPPI test.

FVOCI - equity instruments - The Company subsequently measures all equity investments at fair value through profit or loss, unless the Company's management has elected to classify irrevocably some of its equity instruments at FVOCI, when such instruments meet the definition of Equity under Ind AS 32 Financial Instruments and are not held for trading.

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVOCI are measured at FVTPL. This includes all derivative financial assets.

**b) Subsequent measurement**

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in Statement of Profit and Loss. Any gain and loss on derecognition is recognised in Statement of Profit and Loss.

Debt investment at FVOCI are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in Statement of profit and loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to Statement of Profit and Loss.

For equity investments, the Company makes selection on an instrument-by-instrument basis to designate equity investments as measured at FVOCI. These selected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to Statement of profit and loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for strategic purpose. Dividend income received on such equity investments are recognised in Statement of Profit and Loss. Equity investments that are not designated as measured at FVOCI are designated as measured at FVTPL and subsequent changes in fair value are recognised in Statement of Profit and Loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in Statement of Profit and Loss.

c) De-recognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the company balance sheet) when:

The rights to receive cash flows from the asset have expired, or

The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the company's continuing involvement. In that case, the company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying

amount of the asset and the maximum amount of consideration that the company could be required to repay.

d) Impairment of financial assets

The Company recognises impairment loss applying the expected credit loss (ECL) model on the financial assets measured at amortised cost, debt instruments at FVOCI, lease receivables, trade receivables, other contractual right to receive cash or other financial asset and financial guarantee not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 months expected credit losses.

For trade receivables or any contractual right to receive cash or other financial assets that result from transactions that are within the scope of Ind AS 115, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company applies 'simplified approach' permitted by Ind AS 109 Financial Instruments. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

In view of the fact that the entire trade receivables are from its subsidiaries and other group companies, there is no lifetime credit losses expected by the Company.

Write offs - The gross carrying amount of a financial asset is written-off (either partially or in full) to the extent that there is no reasonable expectation of recovering the asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off and when there is no reasonable expectation of recovery from the collaterals held. However, financial assets that are written-off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Presentation of allowance for ECL in the Balance Sheet - Loss allowances for ECL are deducted from the gross carrying amount of financial assets measured at amortised cost.

Financial Liabilities**a) Initial recognition and measurement**

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the company that are not designated as hedging instruments in hedge relationships as defined by Ind-AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk is recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. Such amortisation is included as finance costs in the statement of profit and loss.

Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 115.

c) Derecognition

A financial liability is derecognised when and only when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

11. Leases

The Company has adopted Ind AS 116 'Leases' with the date of initial application being April 1, 2019. The Company's lease asset classes primarily consist of leases for Premises. The Company, at the inception of a contract, assesses whether the contract is a lease or not lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a time in exchange for a consideration. This policy has been applied to contracts existing and entered into on or after April 1, 2018.

The Company evaluates each contract or arrangement, whether it qualifies as lease as defined under Ind AS 116. The Company as a lessee The Company assesses, whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract involves- a) the use of an identified asset, b) the right to obtain substantially all the economic benefits from use of the identified asset, and c) the right to direct the use of the identified asset.

The Company at the inception of the lease contract recognises a Right-of-Use (RoU) asset at cost and a corresponding lease liability, for all lease arrangements in which it is a lessee, except for leases with term of less than twelve months (short term) and low-value assets (assets of less than Rs. 10 Lakhs in value). Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The cost of the ROU assets comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the inception date of the lease plus any initial direct costs, less any lease incentives received. Subsequently, the right-of-use assets is measured at cost less any accumulated depreciation and accumulated impairment losses, if any. The ROU assets is depreciated using the straightline method from the commencement date over the shorter of lease term or useful life of ROU assets.

ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the

recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

For lease liabilities at inception, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate is readily determined, if that rate is not readily determined, the lease payments are discounted using the incremental borrowing rate.

The Company recognises the amount of the re-measurement of lease liability as an adjustment to the ROU assets. Where the carrying amount of the ROU assets is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognises any remaining amount of the re-measurement in the Statement of Profit and Loss.

For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the lease term.

12. Finance Costs

Finance costs include interest expense computed by applying the effective interest rate on respective financial instruments measured at amortised cost. Financial instruments include debt and borrowing. Finance costs are charged to the Statement of Profit and Loss. Ancillary and other borrowing costs are amortised on straight line basis over the tenure of the underlying debt and borrowing.

13. Goods and Service Input Tax Credit

Goods and Services tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/utilising the credits.

14. Dividend distribution to equity holders of the Company

The Company recognises a liability to make distributions to equity holders of the Company when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the Act, final dividend is authorised when it is approved by the shareholders and interim dividend is authorised when it is approved by the Board of Directors of the Company.

xvi. Provisions

Provisions are recognised only when:

- an entity has a present obligation (legal or constructive) as a result of a past event; and
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Further, long term provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost. A provision for onerous contracts is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the

Company recognises any impairment loss on the assets associated with that contract.

Contingent liability is disclosed in case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- a present obligation arising from past events, when no reliable estimate is possible.

Contingent Assets:

Contingent assets are not recognised in the financial statements.

15. Commitments:

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- estimated amount of contracts remaining to be executed on capital account and not provided for;
- uncalled liability on loan sanctioned and on investments partly paid; and
- other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

16. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- Weighted average number of equity shares that would have been outstanding assuming the conversion of all the dilutive potential equity.

17. Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), and highly liquid time deposits that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

18. Statement of Cash Flow

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- changes during the period in inventories and operating receivables and payables transactions of a non-cash nature;
- non-cash items such as depreciation, provisions, deferred taxes, unrealised foreign currency gains and losses, and undistributed profits of associates and joint ventures; and

- all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of Balance Sheet.

19. Employee Benefits

Short term employee benefits

Employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits and are expensed in the period in which the employee renders the related service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Long Term employee benefits

Company's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. Long-term employee benefit primarily consists of Leave encashment benefits wherein employees are entitled to accumulate leave subject to certain limits for future encashment/availment. Long-term compensated absences are provided for on the basis of an actuarial valuation at the end of each financial year using Projected Unit Credit (PUC) Method. Actuarial gains/losses, if any, are recognised immediately in the Statement of Profit and Loss.

Post-employment benefits

a) Defined contribution Plans

Provident fund: Contributions as required under the statute, made to the Provident Fund (Defined Contribution Plan) are recognised immediately in the Statement of Profit and Loss. There is no obligation other than the monthly contribution payable to the Regional Provident Fund Commissioner.

ESIC and Labour welfare fund: The Company's contribution paid/payable during the year to Employee state insurance scheme and Labour welfare fund are recognised in the Statement of Profit and Loss.

b) Defined benefit Plans

Gratuity liability is defined benefit obligation and is provided on the basis of an actuarial valuation performed by an independent actuary based on projected unit credit method, at the end of each financial year.

Defined benefit costs are categorised as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements)
- Net interest expense or income
- Re-measurement

Re-measurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in OCI, net of taxes. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the

discount rate used to measure the defined benefit obligation at the beginning of the annual period to the net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in Statement of Profit and Loss.

The Company's net obligation in respect of gratuity (defined benefit plan), is calculated by estimating the amount of future benefit that the employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. The retirement benefit obligation recognised in the Balance Sheet represents the actual deficit or surplus in the company's defined benefit plans. Any surplus resulting from this calculation is recognised as an asset to the extent of present value of any economic benefits available in the form of refunds from the plans or reductions in the future contribution to the plans.

20. Collateral

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as securities, letter of credit/guarantees, receivables, inventories, other non-financial assets and credit enhancements such as netting arrangements.

The Company provides fully secured, partially secured and unsecured loans to Corporates and individual.

21. Investment in Subsidiaries

Subsidiaries are all entities over which the Company has control. The Company controls an entity when the company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity.

Investment in subsidiaries are measured at cost less accumulated impairment, if any.

Total	0.39	0.59

2. Defined benefit plans

Gratuity (post-employment benefits)

The Company provides for gratuity to employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service. The gratuity plan is a funded plan and the Company makes contributions to recognised/approved funds in India. The Company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Gratuity

The following table sets out the amount recognised in the balance sheet and the movements in the net defined benefit obligations over the year are as follows:

	(Rs. in Lakhs)		
	Present value of obligation	Fair value of Plan assets	Net Amount

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

The net liability disclosed above relates to funded plans are as follows:

Particulars	(Rs. in Lakhs)	
	March 31, 2021	March 31, 2020
Present value of funded obligations	9.36	8.11
Fair value of plan assets	(0.11)	(0.15)
Deficit/(Surplus) of gratuity plan	9.24	7.97

Significant estimates- actuarial assumptions and sensitivity

The significant actuarial assumptions were as follows:

Particulars	(Rs. in Lakhs)	
	March 31, 2021	March 31, 2020
Discount rate	6.85%	6.85%
Salary growth rate (per annum)	6.00%	6.00%
Withdrawal rate (per annum)	5% at younger ages reducing to 1% at older ages	5% at younger ages reducing to 1% at older ages
Expected rate of return	6.85%	6.85%
Mortality Table	Indian Assured Lives Mortality (2012-14) Table	Indian Assured Lives Mortality (2012-14) Table

Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

	Change in assumption		Impact on defined benefit obligation		
			Increase in assumption		
	March 31, 2021	March 31, 2020	March 31, 2021	March 31, 2020	
Discount rate	0.50%	0.50%	Decrease by	5.53%	5.77%
Salary growth rate	0.50%	0.50%	Increase by	2.67%	2.92%
Withdrawal rate	W.R. x 110%	W.R. x 110%	Increase by	1.06%	1.22%

	Change in assumption		Impact on defined benefit obligation		
			Decrease in assumption		
	March 31, 2021	March 31, 2020	March 31, 2021	March 31, 2020	
Discount rate	0.50%	0.50%	Increase by	6.00%	6.29%
Salary growth rate	0.50%	0.50%	Decrease by	4.24%	2.75%
Withdrawal rate	W.R. x 90%	W.R. x 90%	Decrease by	1.09%	1.27%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Credit Risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including Fixed deposits with banks and financial institutions and other financial instruments.

Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's finance department in accordance with the Company's policy. Investments of surplus funds are made generally in the fixed deposits and for funding to subsidiary company. The investment limits are set to minimise the concentration of risks and therefore mitigate financial loss to make payments for vendors.

The Company's maximum exposure to credit risk for the components of the balance sheet at March 31, 2021 and March 31, 2020 is the carrying amounts as stated in balance sheet except for balances of subsidiary company.

Liquidity Risk

The Company monitors its risk of a shortage of funds using a liquidity planning tool.

The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and unsecured loans. The Company has access to a sufficient variety of sources of funding which can be rolled over with existing lenders. The Company believes that the working capital is sufficient to meet its current requirements.

Market Risk

Market risk comprises two types of risk: interest rate risk and currency risk. Financial instruments affected by market risk include loans and borrowings and deposits.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The Company's policy is to keep balance between its borrowings at fixed rates of interest. The difference between fixed and variable rate interest amounts calculated by reference to an agreed-upon notional principal amount.

The exposure of the Company to interest rate changes at the end of the reporting period are as under:

Particulars	(Rs. in Lakhs)	
	As at March 31, 2021	As at March 31, 2020
Variable Rate Borrowing	1,971.19	-
Fixed Rate Borrowing	1,421.19	2,329.94
Total	3,392.38	2,329.94

Interest rate Sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected, after the impact of hedge accounting. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Equity price risk

The Company's unlisted equity securities are of subsidiary and deemed cost of the same are taken as previous GAAP carrying value (i.e. cost of acquisition).

Note 41 : Capital Management

For the purpose of the Company's capital management, capital includes issued equity share capital, securities premium and all other reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the value of the share and to reduce the cost of capital.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company can adjust the dividend payment to shareholders, issue new shares, etc. The Company monitors capital using a gearing ratio, which is net debt divided by total equity. The Company includes within net debt, interest bearing loans and borrowings, less cash and cash equivalents.

Consolidated Independent Auditor's Report

INDEPENDENT AUDITORS' REPORT

To The Members of Choice International Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of Choice International Limited (the "Holding Company") and its subsidiaries, (Holding Company and its subsidiaries together referred to as "the Group") which includes the Group's share of profit in its associate, which comprise the Consolidated Balance Sheet as at 31st March 2021, and the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Cash Flow Statement and the Consolidated Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information, in which includes jointly controlled operations of the Group accounted on proportionate basis.

In our opinion and to the best of our information and according to the explanations given to us, and based on the consideration of reports of the other auditors on separate financial statements jointly controlled operations, subsidiaries, and associate referred to in the Other Matters section below, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS"), and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at 31st March 2021, and their consolidated profit, their consolidated total comprehensive income, their consolidated cash flows and their consolidated changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group and its associate in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in the sub-paragraphs (a) and (b) of the Other Matters section below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Emphasis of Matter

We draw attention to Note 56 to the consolidated financial statements, in which the Group describes the continuing uncertainties arising from COVID 19 pandemic.

Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial

statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matters to be communicated in our report.

Impairment of loans measured at amortized cost (refer note 50 to the consolidated financial statements)

Key Audit Matter Description

As at the year end, the Group has reported financial assets carried at amortised cost in the form of loans granted by subsidiaries aggregating Rs. 24,597.53 lakhs net of provision for expected credit loss of Rs. 123.61 lakhs.

This is considered as a key audit matter because measurement of loan impairment involves application of significant judgement by the management. The most significant judgements includes:

- Timely identification and classification of the impaired loans which also include considering the impact of recent RBI's COVID-19 regulatory circulars.
- Determining the probability of defaults based on historical credit loss and estimation of loss given defaults based on the value of collaterals and relevant factors.
- Inputs and Judgements used in determination of management overlay at various asset stages considering the current uncertain economic environment arising out of the COVID 19 Pandemic.

How the Key Audit Matter was addressed in the Audit

The principle audit procedures performed included the following:

- Evaluation of the Group's internal control system in adhering to the policy for identification of and provisioning for Expected Credit Loss ("ECL") on loans;
- Identification and testing of the design and implementation as well as operational effectiveness of key control pertaining to identification, classification and staging of loans in correct buckets; key assumptions used for the purpose of determination of impairment provision, completeness and accuracy of the data inputs used and monitoring of overdue positions by business and finance team;
- Test check loans to examine the approval process, validity of the recorded amounts, loan documentation, examination of the statement of accounts, indicators of impairment, expected credit loss provision, additional provisions made on loans considering the current uncertain economic environment arising out of COVID 19 pandemic and compliance with identification of and provisioning for ECL on loans;
- Evaluation of management judgment, governance process and review controls; and discussion on the process and assumptions for identification of and provisioning for ECL on loans with senior management.

Information Other than the Financial Statements and Auditor's Report Thereon

- The Holding Company's Board of Directors is responsible for the preparation of other information. The other information comprises the Directors' Report including annexures to Directors' Report, Management Discussion and Analysis Report and Report on Corporate Governance, but does not include the standalone financial statements and consolidated financial statements and our auditors' report thereon, which is expected to be made available to us after the date of this auditor's report.

- Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.
- In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, compare with the financial statements of the jointly controlled operations, subsidiaries and associate audited by the other auditors, to the extent it relates to these entities and, in doing so, place reliance on the work of the other auditors and consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. Other information so far as it relates to the jointly controlled operations, subsidiaries and associate, is traced from their financial statements audited by the other auditors.
- When we read the Director's Report including annexures to Director's report, Management Discussion and Analysis Report and Report on Corporate Governance, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 'The Auditor's responsibilities Relating to Other Information'

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated changes in equity of the Group including its associate in accordance with the Ind AS and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group and of its associate are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and its associate and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associate are responsible for assessing the ability of the respective entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the respective Board of Directors either intends to liquidate their respective entities or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associate are also responsible for overseeing the financial reporting process of the Group and of its associate.

Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associate to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and its associate to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its associate to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such branches or entities or business activities included in the consolidated financial statements of

which we are the independent auditors. For the other branches or entities or business activities included in the consolidated financial statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

- We did not audit the financial statements of two jointly controlled operations included in the standalone financial statements of the company included in the Group whose financial statements reflect total assets of Rs. 189.62 lakhs as at 31st March 2021 and total revenue of Rs. 108.12 lakhs for the year ended on that date, as considered in the respective standalone financial statements of the companies included in the Group. The financial statements of the jointly controlled operations have been audited by the other auditors whose reports have been furnished to us, and our opinion in so far as it relates to the amounts and disclosures included in respect of the jointly controlled operations and our report in terms of subsection (3) of Section 143 of the Act, in so far as it relates to the aforesaid jointly controlled operations, is based solely on the report of such other auditors.
- We did not audit the financial statements of six subsidiaries, whose financial statements reflect total assets of Rs. 2,128.98 lakhs as at 31st March, 2021, total revenues of Rs. 1,597.33 lakhs and net cash outflows amounting to Rs. 5.68

lakhs for the year ended on that date, as considered in the consolidated financial statements. These financial statements have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and our report in terms of subsection (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries is based solely on the reports of the other auditors.

- The consolidated financial statements include the Group's share of net profit of Rs. Nil for the year ended 31st March, 2021, as considered in the consolidated financial statements, in respect of an associate whose financial information have not been audited by us. These financial information are unaudited and have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of the subsidiary and associate, is based solely on such unaudited financial information. In our opinion and according to the information and explanations given to us by the Management, these financial information are not material to the Group.

Our opinion on the consolidated financial statements above and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors and the financial information certified by the Management.

Report on Other Legal and Regulatory Requirements

- As required by Section 143(3) of the Act, based on our audit and on the consideration of the reports of the other auditors on the separate financial statements of the jointly controlled operations, subsidiaries and associate referred to in the Other Matters section above we report, to the extent applicable that:
 - We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
 - In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors.
 - The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss including Other Comprehensive Income, the Consolidated Cash Flow Statement and the Consolidated Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.

ANNEXURE "A" TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Choice International Limited (hereinafter referred to as "the Holding Company") as of and for the year ended 31st March, 2021, we have audited the internal financial controls over financial reporting of the Holding Company, its subsidiary companies and its associate company, which are companies incorporated in India to whom internal financial controls over financial reporting is applicable, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company, its subsidiary companies and associate company, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding Company, its subsidiary companies and associate company which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness

exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the subsidiary companies and associate company which are companies incorporated in India, in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Holding Company, its subsidiary companies and associate company which are companies incorporated in India and where such reporting under Section 143(3) of the Act is applicable.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors referred to in the Other Matters paragraph below, the Holding Company, its subsidiary companies and its associate company which are companies incorporated in India, and where such reporting under Section 143(3) is applicable, have, in all material respects, an adequate internal financial controls

system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2021, based on the criteria for internal financial control over financial reporting established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to six subsidiary companies, which are companies incorporated in India, and where such reporting under Section 143(3) is applicable, is based solely on the corresponding reports of the auditors of such companies incorporated in India.

Two jointly controlled operations of the subsidiary company which is not a Company incorporated in India, to whom reporting on internal

financial controls system over financial reporting is not applicable and hence no reporting under the internal financial controls system over financial reporting has been made.

Reporting on internal financial controls system over financial reporting with respect to an associate company is not applicable and hence no reporting under the internal financial controls system over financial reporting has been made.

Our opinion is not modified in respect of the above matters.

Notes to the Consolidated
Financial Statements

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021****1. Corporate Information**

Choice International Limited (hereinafter referred to as "the Holding Company") is a public limited company domiciled in India and incorporated under the provisions of the Companies Act 1956. The registered office of the Company is located at Shree Shakambhari Corporate Park, 156-158 Chakravorty Ashok Society, J.B. Nagar, Andheri(E) Mumbai -400099, Maharashtra, India.

The Holding Company's shares are listed on the Bombay Stock Exchange (BSE).

The Holding Company along with its subsidiaries (collectively referred to as "the Group") and an associate is an integrated and diversified financial services group. They provide services like Broking & Distribution, Investment Banking, Financial services to Business Advisory, Regulatory Compliances to Government authorities & other corporate entities, Retail Loan distribution, Mutual Fund distribution, technical services and other ancillary services.

2. Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements. These accounting policies have been consistently applied to all the years presented by the Group unless otherwise stated.

A. Basis of preparation**i. Statement of compliance**

The consolidated financial statements of the Group have been prepared in accordance with the Indian Accounting Standards ('Ind AS') notified under Section 133 of the Companies Act, 2013 ('the Act') read with Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and other relevant provisions of the Act.

ii. Functional and presentation currency

The Group's presentation and functional currency is Indian Rupees. All figures appearing in the consolidated financial statements are in Indian rupees in lakh rounded off to two decimal places as permitted by Schedule III to the Act. Per share data are presented in Indian Rupee to two decimal places.

iii. Basis of measurement

The consolidated financial statements have been prepared on historical cost basis except for certain financial assets and liabilities are measured at fair value as explained in the accounting policy. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Further assets and liabilities are classified as per the normal operating cycle (determined as 12 months).

iv. Preparation of Consolidated financial statements

The Holding Company has surrendered its NBFC license therefore as per the format prescribed under Division II of Schedule III to the Companies Act, 2013, the holding company presents the Balance sheet, the statement of Profit and Loss and the Statement of Changes in Equity.

v. Principle of Consolidation and equity accounting**Subsidiaries-**

The consolidated financial statements have comprised financial statements of the Company and its subsidiaries, subsidiaries are all

entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group.

The Group combines the financial statements of the Holding Company and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealized gains on transactions within the Group are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss, consolidated statement of changes in equity and balance sheet respectively. Statement of Profit and Loss including Other Comprehensive Income (OCI) is attributable to the equity holders of the Holding Company and to the non-controlling interest basis the respective ownership interest and such balance is attributed even if this results in controlling interest is having a deficit balance.

Associates-

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting (see (iii) below), after initially being recognized at cost.

Equity Method-

Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognized as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealized gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the

subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized within equity.

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is re-measured to its fair value with the change in carrying amount recognized in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income are reclassified to profit or loss where appropriate.

vi. Fair value measurement

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date.

The best estimate of the fair value of a financial instrument on initial recognition is normally the transaction price. If the Group determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently that difference is recognised in Statement of Profit and Loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- **Level 1 - Valuation using quoted market price in active markets:** The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price, without any deduction for transaction costs. A market is regarded as active, if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.
- **Level 2 - Valuation using observable inputs:** If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates most of the factors that market participants would take into account in pricing a transaction.
- **Level 3 - Valuation with significant unobservable inputs:** The valuation techniques are used only when fair value cannot be determined by using observable inputs. The Company regularly reviews significant unobservable inputs and valuation

adjustments. Level 3 assets are typically very illiquid, and fair values can only be calculated using estimates.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

vii. Use of judgment and Estimates

The preparation of the consolidated financial statements requires the management to make judgments, estimates and assumptions in the application of accounting policies that affects the reported amount of assets, liabilities and the accompanying disclosures along with contingent liabilities as at the date of consolidated financial statements and revenue & expenses for the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in outcomes different from the estimates. Difference between actual results and estimates are recognised in the year in which the results are known or materialise i.e. prospectively.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The key areas involving estimation uncertainty, higher degree of judgement or complexity, or areas where assumptions are significant to the consolidated financial statements include:

- i) Impairment of financial assets
- ii) Estimation of fair value measurement of financial assets and liabilities
- iii) Effective interest rate
- iv) Business model assessment
- v) Provisions and Contingencies
- vi) Useful life and expected residual value of assets
- vii) Tax position for current tax and recognition of deferred tax assets/liabilities
- viii) Measurement of Defined Benefit Obligations and actuarial assumptions
- ix) Classification of lease and related discount rate

Further an entity is consolidated as a subsidiary if the Company has control over the said entity based on the management evaluation of investments and related agreements/ deeds and determine that the Group has control over the said entity in terms of Ind AS-110 on Consolidated Financial Statements. Control shall include the right to appoint majority of the directors or to control the management or policy decisions exercisable by a person or persons acting individually or in concert, directly or indirectly, including by virtue of their shareholding or management rights or shareholders' agreements or voting agreements or in any other manner.

B. Summary of significant accounting policies**1. Current versus non-current classification**

The Group presents assets and liabilities in the balance sheet based on current/non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting date, or

- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Based on the nature of products and services offered by the Group, operating cycle determined is 12 months for the purpose of current and non-current classification of assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

2. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

Sale of services

The Group recognizes revenue on accrual basis when the significant terms of the arrangement are enforceable, services have been delivered and the collectability is reasonably assured. The method of recognizing the revenues and costs depends on the nature of the services rendered. Revenue is recognized when no significant uncertainty exists as to its realization or collection.

Interest Income

Interest income from financial assets is recognized when it is probable that economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial assets to that asset's net carrying amount on initial recognition.

Income from sale of investment

Gains or losses on the sale of investments are recognised in Statement of profit and loss on trade date basis as the difference between fair value of the consideration received and carrying amount of the investment securities.

Dividend Income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably).

Brokerage Income

Brokerage income in relation to stock broking activity is recognised on trade date basis.

3. Property, Plant and Equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and

accumulated impairment losses. Freehold land is not depreciated.

All items of property, plant and equipment are initially recorded at cost. Such cost includes the cost of replaced part of the property, plant and equipment and borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying property, plant and equipment. The cost of an item of property, plant and equipment is recognized as an asset if, and only if, it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Subsequent to recognition, property, plant and equipment (excluding freehold land) are measured at cost less accumulated depreciation and accumulated impairment losses. When significant parts of property, plant and equipment are required to be replaced in intervals, the group recognizes such parts as individual assets with specific useful lives and depreciation respectively. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement cost only if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the Statement of Profit and Loss as incurred.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and useful lives.

Depreciation is recognised so as to write off the cost of assets less their residual values over the useful lives as prescribed in Schedule II of to the Companies Act, 2013, using the straight-line method ("SLM"). Residual value is considered nil case of Computers, Server and network and 5% is considered in case of other assets.

Description of Asset	Useful Life
Buildings	60 Years
Computers and Printers, including Computer Peripherals	3 Years
Office Equipments	5 Years
Furniture & Fixtures	10 Years
Motor Vehicles (Motor Car)	8 Years
Motor Vehicle (Motor Cycle)	10 Years
Solar Plant	25 Years
Electric Installation	10 Years
Server & Network	6 Years
Water Pumps and Borewell	5 Years

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual values, useful life and depreciation method are reviewed at each financial year-end to ensure that the amount, method and period of depreciation are consistent with previous

estimates and the expected pattern of consumption of the future economic benefits embodied in the items of property, plant and equipment.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal or retirement of an item of property, plant and equipment is determined as the difference between sale proceeds and the carrying amount of the asset and is recognised in profit or loss.

4. Investment Properties

Investment properties are properties that is held for long-term rentals yields or for capital appreciation (including property under construction for such purposes) or both, and that is not occupied by the Group, is classified as investment property. Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated impairment loss, if any. Though the Group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer. Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition.

5. Intangible Assets

Intangible asset including intangible assets under development are stated at cost, net of accumulated amortisation and accumulated impairment losses, if any. Intangible assets acquired separately are measured on initial recognition at cost. The amortisation period and the amortisation method are reviewed at the end of each financial year. The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with infinite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

6. Segment Reporting

The Group operates operations predominately relates to four business segment i.e Broking & Distribution services, Advisory services, NBFC services and IT Services Business segments have been identified as separate reportable segments as per Ind-AS 108.

7. Foreign Currencies

The group's consolidated financial statements are presented in INR (rounded off to lakhs), which is also the group's functional currency.

Transaction and balances

Transactions in foreign currencies are initially recorded by the Group in their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at

the reporting period.

Exchange differences arising on the settlement of monetary items or on translating monetary items are recognized in the statement of profit or loss except:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- exchange differences on transactions entered into in order to hedge certain foreign currency risks;
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e. translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

8. Taxation

Current taxes

Income tax expense is recognized in net profit in the statement of profit and loss except to the extent that it relates to items recognized directly in other comprehensive income or equity, in which case it is recognized in other comprehensive income or equity respectively. Current income tax is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The Group offsets, on a year to year basis, the current tax assets and liabilities, where it has legally enforceable right to do so and where it intends to settle such assets and liabilities on a net basis.

Deferred taxes

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences, and deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax relating to items recognised outside the profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity).

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or

part of the asset to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

9. Impairment of Non-Financial Assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized in the profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

10. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

a) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

b) Subsequent measurement

Equity Instruments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as

at FVTPL. For all other equity instruments, the Group may make an irrevocable election to present subsequent changes in the fair value in OCI. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

Dividends from such investments are recognized in profit or loss as other income. There is no recycling of the amounts from OCI to Profit and Loss, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments subsequently measured at fair value through profit or loss are measured at fair value with all changes recognized in the statement of profit and loss.

c) De-recognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the group's balance sheet) when:

The rights to receive cash flows from the asset have expired, or

The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement, and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the group continues to recognise the transferred asset to the extent of the group's continuing involvement. In that case, the group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the group could be required to repay.

d) Impairment of financial assets

The Group recognises impairment loss applying the expected credit loss (ECL) model on the financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual right to receive cash or other financial asset and financial guarantee not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights.

The Group measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12 months expected credit losses.

For trade receivables or any contractual right to receive cash or other financial assets that result from transactions that are within the scope of Ind AS 115, the Group always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Group applies 'simplified approach' permitted by Ind AS 109 Financial Instruments. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

For loan given measured at amortised cost or FVTOCI, except for investments in equity instruments, Group follows a 'three-stage' model for impairment based on changes in credit quality since initial recognition.

Stage 1 (Performing Assets) – includes financial assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date. For these assets, 12-month ECL is recognised and interest income is calculated on the gross carrying amount of the assets (that is, without deduction for credit allowance). 12-month ECL are the portion of ECL that results from default events on a financial instrument that are possible within 12 months after the reporting date, if the credit risk has not significantly increased since initial recognition.

Stage 2 (Underperforming Assets with significant increase in credit risk since initial recognition) – includes financial instruments that have had a significant increase in credit risk since initial recognition (unless they have low credit risk at the reporting date) but that do not have objective evidence of impairment. For these assets, lifetime ECL are recognised, but interest income is calculated on the gross carrying amount of the assets. Lifetime ECL are the expected credit losses that result from all possible default events over the expected life of the instrument.

Stage 3 (Non-performing or Credit-impaired assets) – includes financial assets that have objective evidence of impairment at the reporting date. For these assets, lifetime ECL is recognised and interest income is recognised on Net exposure (that is Gross carrying amount less Provision for Expected credit losses).

Financial Liabilities

a) Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the group that are not designated as hedging instruments in hedge relationships as defined by Ind-AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk is recognized in OCI. These gains/ loss

are not subsequently transferred to P&L. However, the Group may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Group has not designated any financial liability as at fair value through profit and loss.

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. Such amortisation is included as finance costs in the statement of profit and loss.

Financial guarantee contracts

Financial guarantee contracts issued by the group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss

d) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

11. Leases

The Group has adopted Ind AS 116 'Leases' with the date of initial application being April 1, 2019. The lease asset classes primarily consist of leases for Premises. The Group, at the inception of a contract, assesses whether the contract is a lease or not lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a time in exchange for a consideration. This policy has been applied to contracts existing and entered into on or after April 1, 2018.

The Group evaluates each contract or arrangement, whether it qualifies as lease as defined under Ind AS 116. The Group as a lessee

The Group assesses, whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract involves- a) the use of an identified asset, b) the right to obtain substantially all the economic benefits from use of the identified asset, and c) the right to direct the use of the identified asset.

The Group at the inception of the lease contract recognises a Right-of-Use (RoU) asset at cost and a corresponding lease liability, for all lease arrangements in which it is a lessee, except for leases with term of less than twelve months (short term) and low-value assets. Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The cost of the ROU assets comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the inception date of the lease plus any initial direct costs, less any lease incentives received. Subsequently, the right-of-use assets is measured at cost less any accumulated depreciation and accumulated impairment losses, if any. The ROU assets is depreciated using the straightline method from the commencement date over the shorter of lease term or useful life of ROU assets.

ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

For lease liabilities at inception, the Group measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate is readily determined, if that rate is not readily determined, the lease payments are discounted using the incremental borrowing rate.

The Group recognises the amount of the re-measurement of lease liability as an adjustment to the ROU assets. Where the carrying amount of the ROU assets is reduced to zero and there is a further reduction in the measurement of the lease liability, the Group recognises any remaining amount of the remeasurement in the Statement of Profit and Loss.

For short-term and low value leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the lease term.

12. Finance Cost

Finance costs include interest expense computed by applying the effective interest rate on respective financial instruments measured at amortised cost. Financial instruments include debt and borrowing. Finance costs are charged to the Statement of Profit and Loss. Ancillary and other borrowing costs are amortised on straight line basis over the tenure of the underlying debt and borrowing.

13. Goods and Service Input Tax Credit

Goods and Services tax input credit is accounted for in the books in the period in which the supply of goods or service received is

accounted and when there is no uncertainty in availing/utilising the credits.

14. Dividend distribution to equity holders of the Group

The Group recognises a liability to make distributions to equity holders of the Group when the distribution is authorised and the distribution is no longer at the discretion of the Group. As per the Act, final dividend is authorised when it is approved by the shareholders and interim dividend is authorised when it is approved by the Board of Directors of the Group.

15. Provisions

Provisions are recognised only when:

- an entity has a present obligation (legal or constructive) as a result of a past event; and
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation

These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Further, long term provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost. A provision for onerous contracts is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

Contingent liability is disclosed in case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- a present obligation arising from past events, when no reliable estimate is possible.

Contingent Assets:

Contingent assets are not recognised in the consolidated financial statements

16. Commitments:

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- estimated amount of contracts remaining to be executed on capital account and not provided for;
- uncalled liability on loan sanctioned and on investments partly paid; and
- other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

17. Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be

required to settle the obligation. The Group does not recognize a contingent liability but discloses its existence in the consolidated financial statements. Payments in respect of such liabilities, if any are shown as advances.

18. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- Weighted average number of equity shares that would have been outstanding assuming the conversion of all the dilutive potential equity.

19. Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), and highly liquid time deposits that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

20. Employee Benefits

Short term employee benefits

Employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits and are expensed in the period in which the employee renders the related service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Long Term employee benefits

Groups' net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. Long-term employee benefit primarily consists of Leave encashment benefits wherein employees are entitled to accumulate leave subject to certain limits for future encashment/availment. Long-term compensated absences are provided for on the basis of an actuarial valuation at the end of each financial year using Projected Unit Credit (PUC) Method. Actuarial gains/losses, if any, are recognised immediately in the Statement of Profit and Loss

Post-employment benefits

a) Defined contribution Plans

Provident fund: Contributions as required under the statute, made to the Provident Fund (Defined Contribution Plan) are recognised immediately in the Statement of Profit and Loss. There is no obligation other than the monthly contribution payable to the Regional Provident Fund Commissioner.

ESIC and Labour welfare fund: The Group's contribution paid/payable during the year to Employee state insurance scheme and Labour welfare fund are recognised in the Statement of Profit and Loss.

b) Defined benefit Plans

Gratuity liability is defined benefit obligation and is provided on the basis of an actuarial valuation performed by an independent actuary based on projected unit credit method, at the end of each financial year.

Defined benefit costs are categorised as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements)
- Net interest expense or income
- Re-measurement

Re-measurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in OCI, net of taxes. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in Statement of Profit and Loss.

The Groups net obligation in respect of gratuity (defined benefit plan), is calculated by estimating the amount of future benefit that the employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. The retirement benefit obligation recognised in the Balance Sheet represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is recognised as an asset to the extent of present value of any economic benefits available in the form of refunds from the plans or reductions in the future contribution to the plans.

21. Share-based Payments

Shared based compensation benefits are provided to employees via Vakrangee Limited Employee Stock Option Plan.

Employee options

The cost of equity-settled transactions is determined by the fair value of the options granted at the date when the grant is made. The fair value of options granted under the Employee Option Plan is recognised as an employee benefits expense with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted:

- including any market performance conditions (e.g., the Group's share price)
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining employee of the entity over a specified time period), and
- including the impact of any non-vesting conditions (e.g. the requirement for employee to save or holding shares for a specific period of time).

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the Group revises its estimates of the number of options that are expected to be vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a

corresponding adjustment to equity.

22. Collateral

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as securities, letter of credit/guarantees, receivables, inventories, other non-financial assets and credit enhancements such as netting arrangements.

The Group provides fully secured, partially secured and unsecured loans to Corporates and individual.

23. Business combinations

Acquisitions of businesses are accounted for using the acquisition method as per Ind AS 103 - Business Combinations. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in Statement of Profit and Loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value at the acquisition date, except that:

Deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 Income Taxes and Ind AS 19 Employee Benefits respectively;

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured at the noncontrolling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

24. Goodwill

Goodwill arising on an acquisition of a business is carried at cost established at the date of acquisition of the business less accumulated impairment loss if any.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash generating units (CGU) that is expected to benefit from the synergies of the combination.

A CGU to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired, if the recoverable amount of the CGU is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the units pro-rata based on the carrying amount of each asset in the unit, any impairment loss or goodwill is not reversed in subsequent period.

On disposal of relevant CGU the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

2. Defined benefit plans
Gratuity (post-employment benefits)

The Group provides for gratuity to employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement / termination is the employees last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service. The gratuity plan is a funded plan and the Group makes contributions to recognised / approved funds in India. The Group does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Gratuity

Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

	Change in assumption		Impact on defined benefit obligation		
			Increase in assumption		
	March 31, 2021	March 31, 2020	March 31, 2021	March 31, 2020	
Discount rate	0.50%	0.50%	Decrease by	280.07	247.43
Salary growth rate	0.50%	0.50%	Increase by	318.04	282.47
Withdrawal rate	W.R. x 110%	W.R. x 110%	Increase by	301.04	266.77

	Change in assumption		Impact on defined benefit obligation		
			Decrease in assumption		
	March 31, 2021	March 31, 2020	March 31, 2021	March 31, 2020	
Discount rate	0.50%	0.50%	Increase by	321.68	286.22
Salary growth rate	0.50%	0.50%	Decrease by	282.38	249.92
Withdrawal rate	W.R. x 90%	W.R. x 90%	Decrease by	298.53	264.84

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Risk Exposure

Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed

Investment risk	The present value of defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds. Most of the plan asset investment is in fixed income securities with high grades and in government securities which are subject to interest rate risk. A portion of the funds are invested in equity securities. The Company intends to maintain the above investment mix in the continuing years.
Interest risk	A decrease in the market yields in the government bond will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of defined benefit plan liability is calculated using a discount rate which is determined by reference to the best estimate of the mortality of plan participants both during and after employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of defined benefit plan liability is calculated using a discount rate which is determined by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Maturity profile of gratuity liability and Employer contribution

Expected contributions to post-employment benefit plans for the year ending 31 March 2021 are Rs. 70.77 lakhs (as at March 31, 2020: Rs. 73.16 lakhs).

The weighted average duration (based on discounted cash flows) of the defined benefit obligation is 13.79 years (14.62 years 2019-20).

The expected maturity analysis of undiscounted gratuity is as follows

	(Rs. in Lakhs)	
	2020-21	2019-20
Less than one year	13.79	6.15
Between 1-2 years	9.91	9.04
Between 2-5 years	43.41	25.48
Over 5 years	70.38	80.00
Total	137.49	120.67

Note 50 : Financial Risk Management Objectives and Policies

The Group's principal financial liabilities comprise of loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations directly or indirectly. The Group's principal financial assets include investments, loans, trade and other receivables, cash and cash equivalents that derive directly from its operations.

The Group is exposed to market risk, credit risk and liquidity risk. The below note explains the sources of risk which the entity is exposed to and how the entity manages the risk:

Risk	Exposure arising from	Measurement	Management
Credit Risk	Cash and cash equivalents, trade receivables, financial instruments, Fixed Deposit with Banks, financial assets measured at amortised cost.	Aging analysis and Credit ratings	Diversification of Existing credit limits Unutilised from Consortium Bankers.
Liquidity Risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed Credit lines and borrowing facilities
Market Risk - foreign exchange	Future commercial transactions. Recognised financial liabilities not denominated in Indian Rupee (INR)	Cash flow forecasting and Sensitivity analysis	Forward foreign exchange contracts
Market Risk - interest rate	Long-Term borrowings at variable rates	Sensitivity analysis	Interest Rate Swaps

Credit Risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including Fixed deposits with banks and financial institutions and other financial instruments.

An impairment analysis is performed at each reporting date on an individual basis for major customers. In addition, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed.

On account of adoption of Ind-AS 109, the Group uses expected credit loss model to assess the impairment loss or gain. The Group uses a provision matrix to compute the expected credit loss allowance for trade receivables. The provision matrix takes into account available external and internal credit risk factors and the Group's historical experience for customers.

The Group has made adjustments in ECL Model to consider the impact of the Covid-19 pandemic on the provision. The probability of default has been assessed considering the likelihood of increased credit risk and consequential default due to pandemic. The impact on collateral values is also assessed for determination of loss given default and reasonable haircuts are applied wherever necessary. The moratorium benefit wherever extended has been taken into consideration for staging of loans in the Model.

The Group offers loans secured by real estate/housing property/investments. In order to mitigate credit risk, the Group also seeks collateral appropriate to the product segment and also ensure that Loan to value ratio is maintained as specified by regulator.

An impairment analysis is performed at each reporting date based on the facts and circumstances existing on that date to identify expected losses on account of time value of money and credit risk. The credit quality of Loans and advances measured at amortised cost is primarily assessed by the Days Past Due (DPD) status and other qualitative factors leading to increase in credit risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

In assessing the impairment of financial assets under the expected credit loss defines default when a loan obligation is overdue for more than 90 days (net of subsequent receipts as on the reporting date) and credit impaired.

Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Group's finance department in accordance with the Company's policy. Investments of surplus funds are made generally in the fixed deposits and for funding to subsidiary company. The investment limits are set to minimise the concentration of risks and therefore mitigate financial loss to make payments for vendors.

The Group's maximum exposure to credit risk for the components of the balance sheet at March 31, 2021 and March 31, 2020 is the carrying amounts as stated in balance sheet except for balances of subsidiary company.

Liquidity Risk

The Group monitors its risk of a shortage of funds using a liquidity planning tool.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and unsecured loans. The Group has access to a sufficient variety of sources of funding which can be rolled over with existing lenders. The Group believes that the working capital is sufficient to meet its current requirements.

Market Risk

Market risk comprises two types of risk: interest rate risk and currency risk. Financial instruments affected by market risk include loans and borrowings and deposits.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

The Group manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The Group's policy is to keep balance between its borrowings at fixed rates of interest. The difference between fixed and variable rate interest amounts calculated by reference to an agreed-upon notional principal amount.

The exposure of the Company to interest rate changes at the end of the reporting period are as under:

(Rs. in Lakhs)

Particulars	As at March 31, 2021	As at March 31, 2020
Variable Rate Borrowing	2,805.34	236.86
Fixed Rate Borrowing	177.28	200.49
Total	2,982.62	437.35

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected, after the impact of hedge accounting. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

(Rs. in Lakhs)

Particulars	Increase/ Decrease in basis points	Effect on Profit before Tax
March 31, 2021	+ 1%	28.05
	- 1%	(28.05)
March 31, 2020	+ 1%	2.37
	- 1%	(2.37)

Foreign Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates to purchase of raw material of chemical and fertilizer products from out of the India. The Company manages its foreign currency risk by hedging the payables as an when considered necessary. When a derivative is entered into for the purpose of being a hedge, the Company negotiates the terms of those derivatives to match the terms of the hedged exposure. The Company hedges its exposure to fluctuations on the translation into INR of its foreign payables in foreign currencies and by using foreign currency option or forward contracts.

Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in foreign exchange rate, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities.

- The voting period begins on Monday, September 20, 2021 @ 09.00 AM and ends on Wednesday, September 22, 2021 @ 5. PM. During this period shareholders' of the

Company, holding shares either in physical form or in dematerialized form, as on the cut-off date (record date) of September 16, 2021 may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.

(ii) Shareholders who have already voted prior to the meeting date would not be entitled to vote at the meeting venue.

(iii) Pursuant to SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 09.12.2020, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions. However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

(iv) In terms of SEBI circular no. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. Shareholders are advised to update their mobile number and email id in their demat accounts in order to access e-Voting facility.

Pursuant to abovesaid SEBI Circular, Login method for e-Voting and joining virtual meetings for Individual shareholders holding securities in Demat mode is given below:
