### **Overview of Indian Economy**

India's economy shows robust expansion, with real GDP for FY25 estimated at Rs. 1,87,97,000 crore (US\$ 2.20 trillion), from Rs. 1,76,51,000 crore (US\$ 2.06 trillion) in FY24 with a growth rate of 6.5%. This growth is driven by rising employment and stronger private consumption, supported by improving consumer sentiment, which is expected to keep the momentum going in the near future.

Trade remains a critical pillar of India's growth story with exports reaching Rs. 37,31,000 crore (US\$ 436.6 billion) in FY25, led by Engineering Goods (26.88%), Petroleum Products (13.86%) and Electronic Goods (8.89%). These exports helped the economy stay resilient during the pandemic when other sectors slowed. Union Minister of Commerce and Industry, Mr. Piyush Goyal projects exports to reach Rs. 85,44,000 crore (US\$ 1 trillion) by 2030.

India's ability to attract Foreign Direct Investment (FDI) has also strengthened. The country received record FDI inflows amounting to Rs. 4,21,929 crore (US\$ 49.3 billion) in FY25 a 15% increase over FY24, supported by a stable policy environment, a large domestic market and steady economic growth positioning the country as a key destination for global capital. This capital inflow also complements government plans for increased investment in infrastructure and asset-building projects to further boost economic growth.

India's external economic position is improving. The current account deficit narrowed to Rs. 1,98,726 crore (US\$ 23.30 billion), or 0.6% of GDP, in FY25 from Rs. 2,21,754 crore (US\$ 26.00 billion), or 0.7% of GDP, in FY24. This improvement was due to higher net receipts from services and secondary income, according to the Reserve Bank of India (RBI)

### **Textile Industry overview**

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk, and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

According to Crisil Ratings, the organised retail apparel sector is projected to achieve revenue growth of 8-10% in FY25, driven by rising demand from a normal monsoon, easing inflation, and the festive and wedding seasons.

The increasing preference for affordable, trendy fashion clothing that mimics high-fashion designs is expected to be the primary revenue driver. In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

**BILLWIN INDUSTRIES LIMITED**  
**CIN : U18104MH2014PLC252842**  
**NOTES FORMING PART OF FINANCIAL STATEMENTS**

**1. SIGNIFICANT ACCOUNTING POLICIES AND EXPLANATORY NOTES ON FINANCIAL STATEMENTS**

**(A) Corporate Information:**

The Company was originally incorporated on February 5, 2014 vide Certificate of Incorporation bearing Registration Number 252842 issued by the Registrar of Companies, Mumbai. The Company changed its name from Billwin Waterproof Private Limited to Billwin Industries Private Limited on 09.07.2019 and again changed its name to Billwin Industries Limited on 28.01.2020.

The Company is engaged in the manufacturing of protective gears which are manufactured by using coated fabric as the raw material.

**(B) Basis of Preparation:**

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on an accrual basis and under the historical cost convention. The accounting policies have been consistently applied except where specifically stated in financial statement and notes to accounts of the non-conformity with the relevant Accounting Standard.

**(C) Significant Accounting Policies:**

**(a) Use of Estimates:**

The preparation of financial statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the end of the reporting period and the reported amounts of revenue and expenses during the reported period. Although these estimates are based on management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the Carrying amounts of Assets or Liabilities in future periods.

**(b) Property, Plant & Equipment and Intangible Assets:**

Property, Plant and Equipment is stated at acquisition cost net of accumulated depreciation and accumulated impairment losses, if any. Cost of acquisition or construction of property, plant and equipment comprises its purchase price including import duties and non-refundable purchase taxes after deducting trade discounts, rebates and any directly attributable cost of bringing the item to its working condition for its intended use.

Subsequent costs are included in the assets' carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance cost are charged to the statement of profit and loss during the period in which they are incurred.

Gains or losses that arise on disposal or retirement of an asset are measured as the difference between net disposal proceeds and the carrying value of property, plant and equipment and are recognised in the statement of profit and loss when the same is derecognised.

Depreciation is calculated on pro rata basis on Written Down value basis based on life assigned to each asset in accordance with Part C of Schedule - II of the Companies Act, 2013 or as per life estimated by the Management.

**BILLWIN INDUSTRIES LIMITED**

**NOTES FORMING PART OF FINANCIAL STATEMENTS**

**(c) Revenue Recognition:**

The company generally follows the mercantile system of accounting and recognizes Income & Expenditure on accrual basis.

Revenue from sale of goods and services are recognised when control of the products being sold is transferred to our customer and when there are no longer any unfulfilled obligations. The performance obligations in our contracts are fulfilled at the time of dispatch, delivery or upon formal customer acceptance depending on customer terms.

Revenue is measured on the basis of sale price, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the Government such as goods and service tax etc. Accumulated experience is used to estimate the provision for such discounts and rebates. Revenue is only recognised to the extent that it is highly probable a significant reversal will not occur.

**(d) Impairment of Assets:**

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of the asset's net selling price and value in use, which is determined by the present value of the estimated future cash flows.

**(e) Investments:**

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of Investments.

On disposal of investment, the difference between its carrying amount and net disposal proceeds are charged or credited to the statement of profit and loss.

Inventories consisting of Raw Materials, W-I-P and Finished Goods are valued at lower of cost and net realizable value unless otherwise stated. Cost of inventories comprises of material cost on FIFO basis and expenses incurred in bringing the inventories to their present location and condition.
