Celebrating 5 Successful Years of Listing

Listing on 06th July, 2020

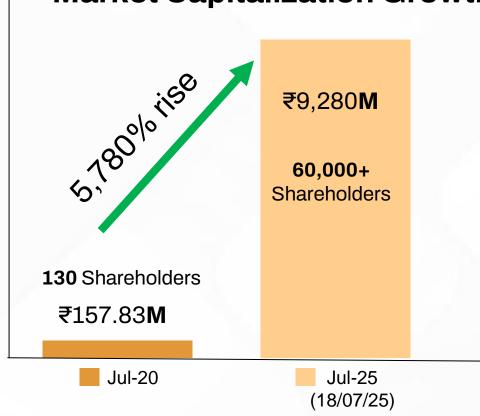

Trust & Stability

Successfully completed 5 years as a listed public limited company, reflecting strong market trust and organizational stability.

Strong Financial Growth

Achieved 10x Revenue & 50x Profit demonstrating robust financial health and growth momentum.

143%

Return on Equity (ROE)*

119%

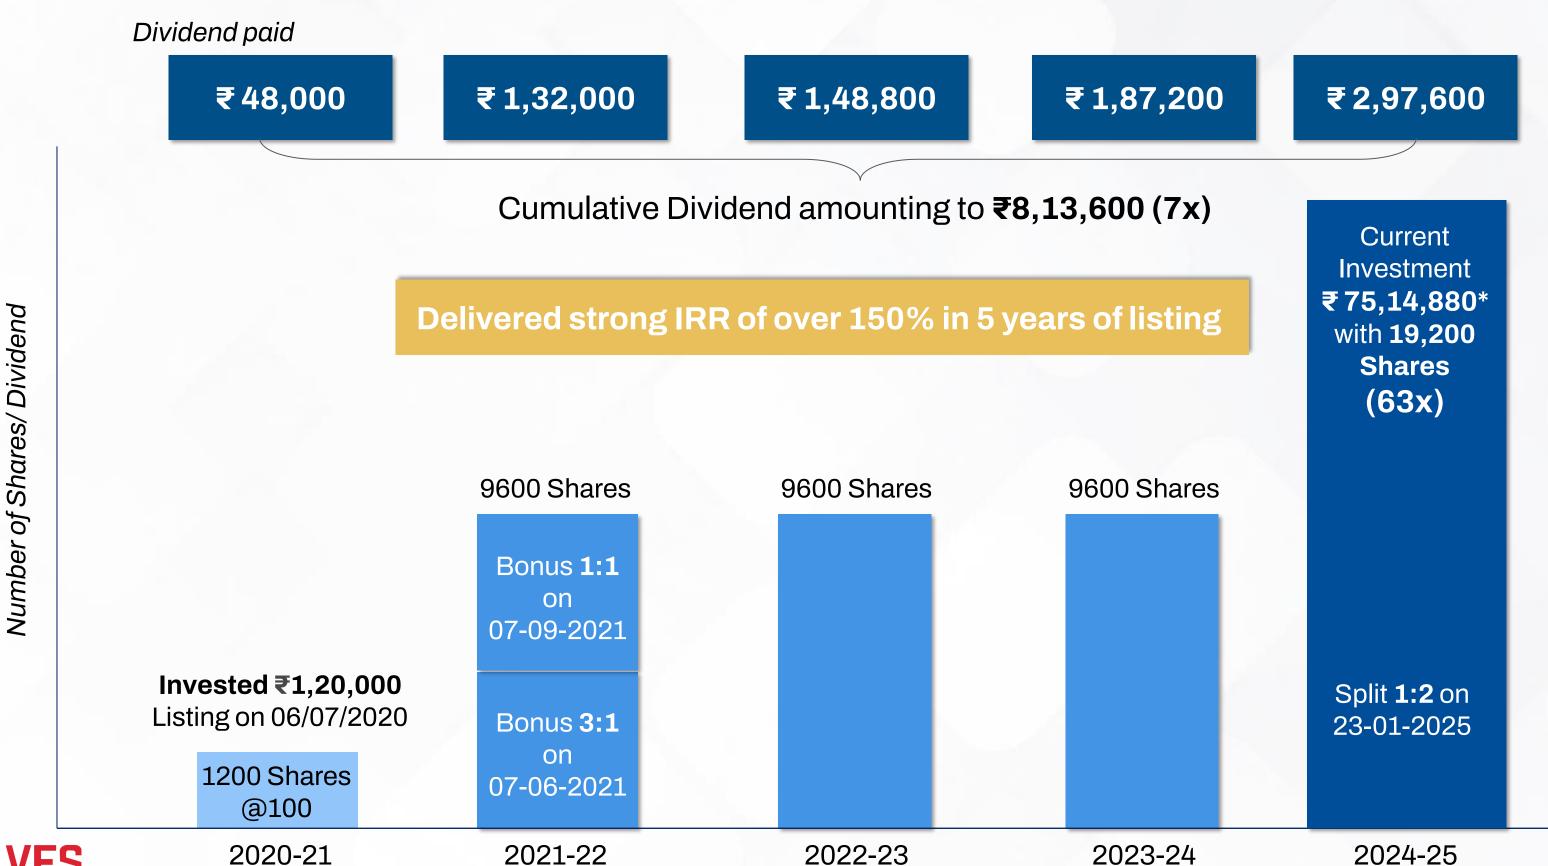

5-Year Profit CAGR*

205%

Return on Capital Employed (ROCE)* **Debt Free Company** since inception (Net)**

Value Creation for Our Shareholders

Our Strengths:

Built on 13 Years of Innovation and 5 Years of Trust

Solid Fundamentals Powering Consistent Returns

Efficient Working Capital & Receivables Management

Maintained improved working capital < 50 days and debtors < 60 days, ensuring strong cash flow and disciplined financial approach

Credit Risk Coverage for Defaults

Secured credit insurance, covering over 95% of revenue to mitigate any risk **Consistent and Healthy Dividend History**

Maintained a strong track record of timely and healthy dividend payouts every year since listing

The Three Pillars of Our Growth Strategy

Growth with Customers

Partnering with **SMEs** for mutual and concurrent growth

Starting small with large enterprises, scaling through proven value

Executing highimpact projects after steady pursuit (via RFPs and detailed deliberation)

Pillars of Growth

Starting Small with large enterprises & Scaling

New Client Business Expansion - U.S.-based E-commerce **Analytics Platform (B2B SaaS)**

- Engaged in January; scaled from 1 resource to a 10-member team within the quarter
- Team includes DevOps, Data Science, Frontend, and Backend engineers
- Rapid ramp-up enabled accelerated product development and infrastructure scaling
- Value approx. 100k USD

Existing Strategic Client – U.S.based Commercial Lending Company

- Long-standing partnership of 3 years, with steady business growth
- Recently expanded to a 6-member team across Java, Data Science, and DevOps
- Continued trust driven by consistent delivery and domainaligned expertise
- Value approx. 100k USD

Projects Secured through Deep Understanding, Tailored Solutions and Steady Pursuit.

Project

AI-Driven Market Research Platform (600k USD)

Client/Industry

Leading Market Research & Data Intelligence Firm

Nature of work

This engagement began in **February** with an on-site presence at the client's office to deeply understand their requirements.

We delivered a detailed Reverse Knowledge Transfer (KT) that was appreciated by the client.

Following the solution alignment, we secured first project, concurrently the second one with couple of additional opportunities under discussion.

Project

Digital Transformation for Industrial Weaving Solutions (550k USD)

Client/Industry

Technical Mesh Solutions Company (Indian)

Nature of work

This engagement began in **February** with an ad-hoc discussions. And, a small requirement ticket gradually grew into a comprehensive digital transformation project.

Our ability to address evolving needs and deliver value helped convert this into a full-scale on-going engagement.

Our Successful Participation at **Key Industry Events**

Events in Q1

Enhanced brand visibility, networking, and pipeline creation through strategic event participation

Journey to a Matured Business Model

Maturing Into a Full-Fledged Business Model

Moving toward turnkey projects and high-value service delivery

Adapting to project complexity and scope expansion

Product-Centric Growth Strategy

Significant revenue potential identified in product lines

If momentum continues, products will drive a major share of growth

Establish a dedicated profit center for products

Bigger Deals – Longer Clocks

Large projects in plate extending conversion timelines to months/quarters

Reflects scale-up and engagement depth

Longer Contracts, **Expanded Vison**

Bigger deals mean longer contracts—

Reflecting YoY growth over QoQ metrics

Emphasis on sustainable, long-term client relationships

Navigating Through Transition Fluctuations

Short-term variability expected as part of maturity journey

Strategic alignment is focused on scalable and repeatable value

Highlights of Our Major Wins

Secured and actively delivered a large-scale Big Data ingestion pipeline for one of North African largest telecom companies—fueling real-time intelligence and analytics across their national network

Onboarded a \$1B+ telecom provider in New Zealand for our Data Flow Manager—enabling real-time, scalable data orchestration across their mobile and broadband operations

Delivering an enterprise-grade Big Data (HBase) solution for a global leader in real-time digital commerce with revenue ~ 70 Million—enabling scalable, high-performance data infrastructure to support millions of transactions daily

SMS Ninja, Ksolves' flagship Salesforce SMS App, continues its strong growth trajectory, securing multiple annual contracts with new clients in the last quarter

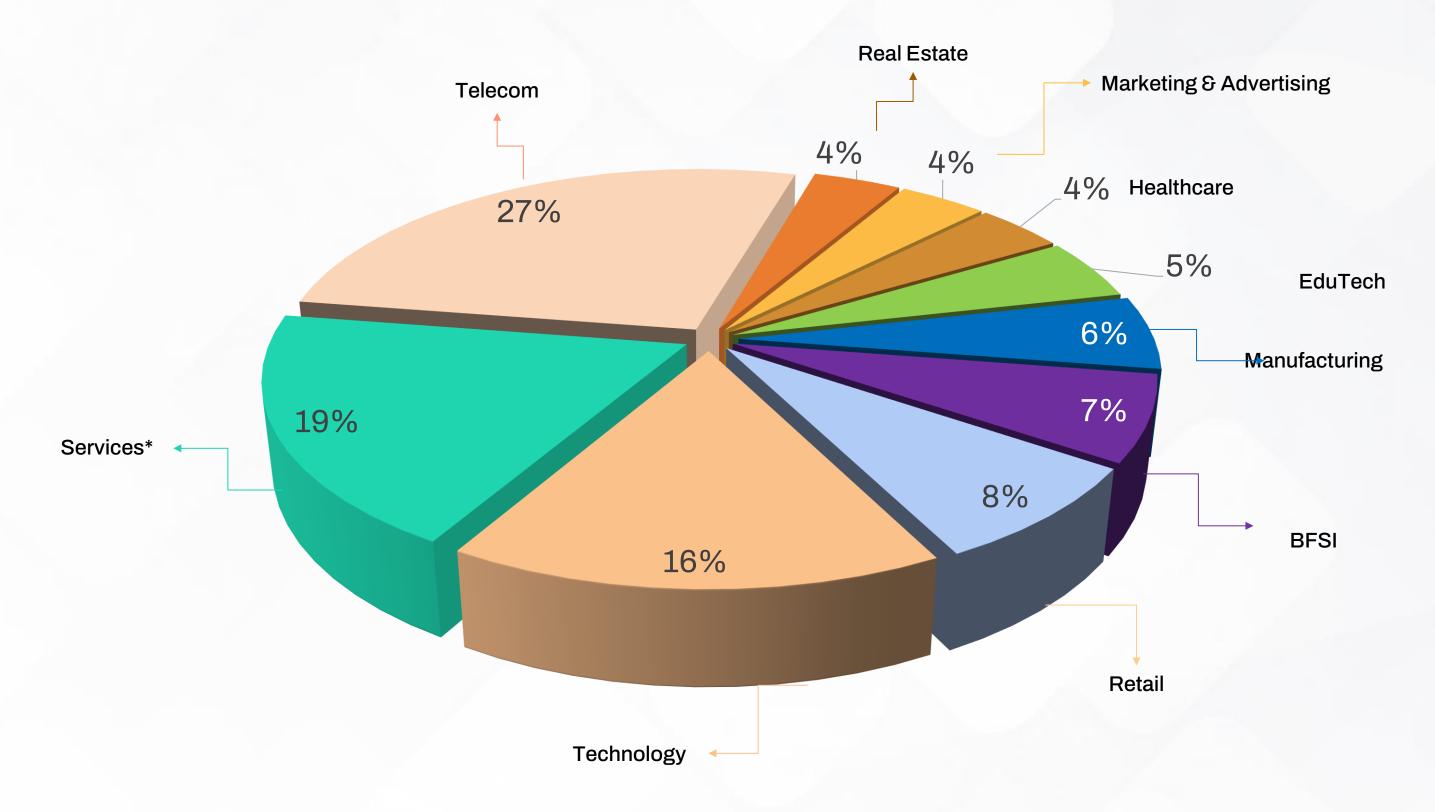

A renowned 60-year-old co-operative society with a retail presence across Goa has chosen Ksolves India Ltd. as its Odoo implementation partner. The engagement will commence with core modules including CRM, Sales, Purchase, Inventory, and Accounting

Ksolves successfully closed a Salesforce project with a leading U.S.-based healthcare services company. This engagement reinforces our growing presence in the healthcare technology sector

Engagements & Client Connect in this Quarter

Our Remarkable Journey...

Humble Beginnings

- Founded by Ratan Srivastava as Kartik Solutions.
- Evolved as **Ksolves India** Pvt. Ltd. with a focus on growth and innovation.
- Joined Nasscom & achieved ISO certification for quality excellence.

Growth and Expansion

- · Achieved a solid upward revenue trajectory.
- Expanded to a family of **250**+ achievers.
- Opened a **new office in Noida** and crossed 50+ clients
- · Launched Odoo Products, topping the Odoo App Store with Dashboard Ninja.
- Opened **new office in Indore**

Listing, Partnerships and Recognition

- **Listed on NSE & migrated to** the mainboard of NSE and BSE.
- · Upgraded to Salesforce Ridge Partner and Odoo Gold Partner.
- Achieved CMMI Level 3 certification.
- Became a registered **RedHat ISV Partner**, expanding our technological reach and capabilities.
- · Opened new office in Pune

Excellence and **Global Reach**

- Became Salesforce Crest (Gold) and Summit (Platinum) Partner.
- Surpassed Rs 100 cr revenue and grew to 520+ achievers.
- **Expanded** operations in Noida.
- Incorporated a 100% subsidiary in the UAE, marking our global expansion

Driving Growth with Innovation

- Scaling in evolving tech € accelerating business growth with **GenAI**
- · High expectations from our new product, Data Flow Manager (DFM) — the firstever one-click, UI-based NiFi deployment tool for simplifying data pipeline management.

...guided by visionary leadership...

Ratan Srivastava

Chairman & Managing Director

Ratan Srivastava holds a degree in Bachelor of Technology in Computer Science & Engineering. He serves as a cornerstone of our company's core management, where he spearheads major policy decisions. With 20+ years of extensive experience in the industry, Ratan is the driving force behind formulating business strategies and their effective implementation. His responsibilities encompass overseeing the expansion and overall management of our business operations. His leadership qualities have been instrumental in leading the core team of our company.

Growth & Strategy

Our Strategic Elements...

Driving Digital Transformation

Powering Intelligence through AI

Strategic Alliances for Global Growth

Financial Profitability for Long-term Success

Empowering Our K-Team

Pioneering next-gen tech to drive client success through innovative solutions and experienced digital transformation frameworks

Harnessing artificial intelligence (including GenAl) and machine learning to deliver smarter, scalable, and data-driven solutions

Building strategic collaborations with industry leaders to strengthen service offerings and global reach

Focused on long-term growth with a sustainable financial model ensuring profitability and value creation for shareholders

Empowering and enhancing a diverse and skilled workforce, committed to innovation, excellence, and customer satisfaction.

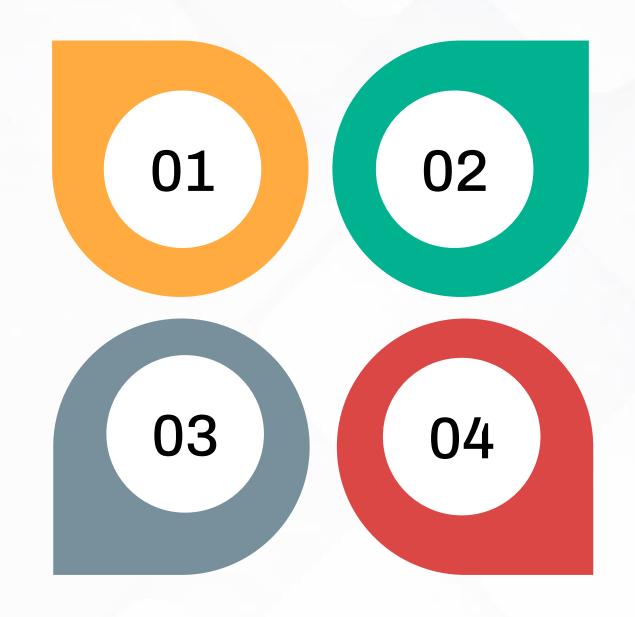

...that continuously fuels our Growth Drivers...

Increased Utilization

Increased utilization percentage and better recoveries for legacy contract helped in improving the operating profit margin.

Smart Investments

Large investments in building top class teams including lateral hiring in key focus areas of IT services and Onshore presence of Sales and Client Management Teams will continue.

Tech Partnerships

Continued focus on building on the technology partnership program as quality assurance frameworks. Such partnerships add to the Company's credentials in front of existing and prospective clients.

Client Relationships

Clients appreciate the company's accountability culture and treats Ksolves as their development partner instead of just being a vendor, and that also gets reflected in relatively high CSAT across engagements.

...and embracing the future with AI

Delivering Value to Clients and Ongoing Projects

In addition to our services, Integrated AI into existing products to further enhance operational efficiency and drive innovation

DFM 01

> Al to automate Apache NiFi flow deployment and management

Dashboard Ninja with Al

> Transforms data visualization with real-time AI analytics and personalized dashboards

03

LMN

Al for lead scoring, predictive analytics, and workflow automation, boosting lead conversion rates 04

Mind AI

Revolutionizes enterprise knowledge retrieval with AI-driven multimodal RAG search across text, image, and video

Enhancing Operational Efficiencies

Exploring and utilizing **GenAI** across internal processes to drive productivity

Mind Al Ninja (MAN): Our proprietary tool designed to optimize workflows and reduce effort, improving overall operational efficiency

Focused on automating repetitive tasks and reducing human intervention, ensuring faster project delivery and quality outcomes

Mastering Complexity: Our Project Highlights

How We Solve the Toughest Project Challenges

Big Data, ERP, & Al **Transformation**

Industry: Forbes 500 Telecom **Multinational**

Complexity: We successfully integrated complex big data solutions with Odoo ERP for the client, and later expanded the engagement to include AI-based innovations. The solution we delivered is now patented by the client and has earned us formal recognition for its impact and value.

Product Evolution to GenAl

Industry: Market Research & Data Intelligence

Complexity: We began by building the client's core product platform, earning their trust through consistent delivery. This trusted partnership has now evolved into ongoing discussions for high-value Generative AI integrations to enhance their offerings.

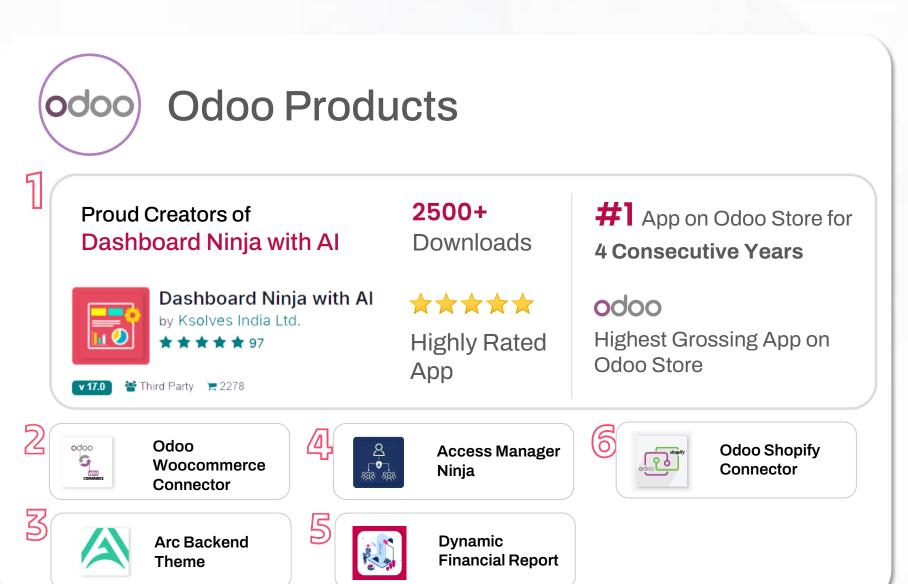

Enterprise Data Platform Modernization

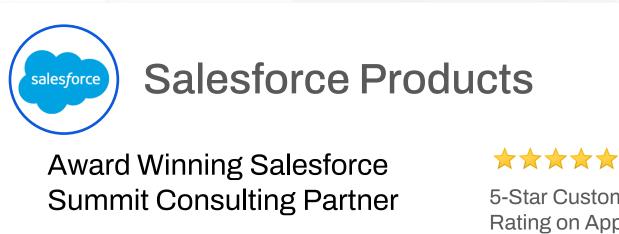

Industry: American Investment **Management Division**

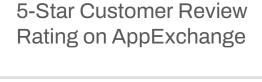

Complexity: We helped the client migrate from a restrictive enterprise data solution to a flexible, scalable open-source platform. This has unlocked new growth opportunities, and we continue to enhance and scale the solution to meet their evolving business needs.

Annexures

Key Features/ Benefits

WHAT

- Private and Customized AI GPT Search for all Enterprise Employees and Customers.
- Benefits all Org. in any Industry.

KMS / GenAl Market Opportunity

- Part of GenAl market growing at CAGR of 39.6% - \$16 B in '24 to \$109 B by '30.
- Untapped Potential in SMBs, Gov, and Enterprises, Healthcare, eCommerce- underserved by existing Al Orgs.

User Experience and Collaboration

- Integrated User Feedback.
- Enhanced Collaboration.
- Efficient Caching.

WHY

- Removes Info. Overload and Silos for Teams.
- Easy human-like response.
- Helps make Quicker and Smarter Decisions.

Customization and Personalization

- Hyper-Customized and Personalized Responses.
- Integrates with popular Clouds and Systems and supports Multi-Format and Multi-Source Support (PDF, Doc, XML, HTML, etc).

Security, Administration and Scalability

- Security and Privacy of Proprietary Data.
- Enhanced Administration Features.
- Data and Cost Control and Optimization.
- Scalability and Flexibility.

HOW

- Supports Fast and Seamless Data Ingestion.
- Combines State-Of-The-Art Al Techniques and Models.
- Unique Algos to reduce cost and improve Accuracy

Additional Features

- Conversation Flow Identification.
- Multi-Department SaaS Support.
- Reduced Dependency on External Vendors.

What's New

- New Features and integrations
- Tailored for specific domains

Ksolves' NiFi Product Data Flow Manager

Key Features/ Benefits

WHAT

 Ksolves Data Flow Manager (KDFM) offers a user-friendly web interface for Managing NiFi Deployments

WHY

• Simplifies flow promotion, eliminates scripting, reduces errors through automation, and centralizes cluster information.

HOW

 Add clusters via NiFi URL and certificates, import nodes and namespaces, display and promote namespaces, and manage user access.

Flow Management

- Intuitive UI for promoting NiFi flows.
- Reduces errors through automated processes.
- Supports deployment at the sub-process group level.

User Experience and Collaboration

- Easy-to-use web-based interface.
- Provides overview of cluster.
- Integrated user feedback and collaboration.

Security and Compliance

- Create users and grant access to clusters or specific namespaces.
- Ensures secure access.
- Manages sensitive parameters securely.

Administration and Scalability

- Supports monitoring, node management, and cluster creation.
- Reduced supervision with automation and ready-to-use flow catalogs.
- Compatible with container and non-container setups.

Ksolves' Salesforce Product Rollup Magic

Key Features/ Benefits

WHAT

 Create custom rollup summaries for any Salesforce data, including lookup relationships

Seamless GA4 Integration

Integrate smoothly with GA4 for advanced analytics.

User Experience Improvement

Identify and fix customer journey pain points.

WHY

 Admins create roll-ups without Apex. Supports sum, count, average, min, and max. Real-time updates keep data current. Automates roll-ups, reducing manual effort. Users can create custom filters.

Real-Time Data Collection

Instant insights for quick decision-making.

Enhanced Customer Insights

Detailed behavior data for marketing decisions.

HOW

 Select parent and child objects, set criteria, choose aggregation type, specify fields, define updates, and activate to start data aggregation.

Sales Performance Tracking

Monitor metrics to boost conversions and revenue.

Customizable Integration

Tailor GAC to fit your unique business needs.

Ksolves' Salesforce Product Google Analytics Connector

Key Features/ Benefits

WHAT

 GAC integrates with GA4 for SFCC, tracking diverse e-commerce events and providing deep customer behavior insights.

Quick Setup

Easy configuration with a user-friendly interface

Single Screen Rollup Setup

Enable to set up your roll-ups on a single screen.

WHY

 Captures e-commerce events, analyzes behavior, and monitors site performance and product popularity.

Create Up to Five Rollups Free

Access to five roll-ups in our free version.

Free Developer Support

Includes 20 hours of support with a paid subscription.

HOW

 Our solution tracks customer interactions in GA4, offering insights for better decisions, optimized marketing, and improved conversions. Enhances navigation, checkout, and provides realtime data for agile strategies.

User-Friendly Interface

Intuitive design for effortless navigation.

Advanced Error Handling

Ensure smooth error handling with instant notifications.

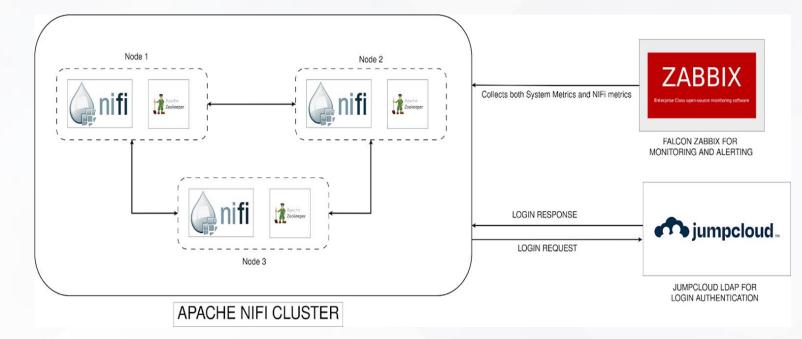

Case Study 1: NiFi High Availability

Big Data

Challenges

Solution

- Customer running standalone NiFi instances to handle their data pipelines and they wants it to be high available and secure and fast processing
- Customer has also no access control RBAC policies configured so they want to integrate with exiting LDAP (Jampcloud) and in force RBAC policies and access control
- They also want NiFi specific matrixes integrated with their monitoring tools Zabbix, that was not previously
- Need a certificate based authenticated user to handle LDAP lockout scenario
- Upgraded their single NiFi instances to NiFi secure 3 node NiFi cluster and also helped to setup DR NiFi cluster
- Integrated Cluster with existing LDAP (Jumpcloud)
- Integrated NiFi specific matrix in Zabbix
- Done load and failover testing to make sure it is meeting their current SLA and Disaster recover requirements
- Added and tested a certificate based authenticated user with LDAP lockout scenario

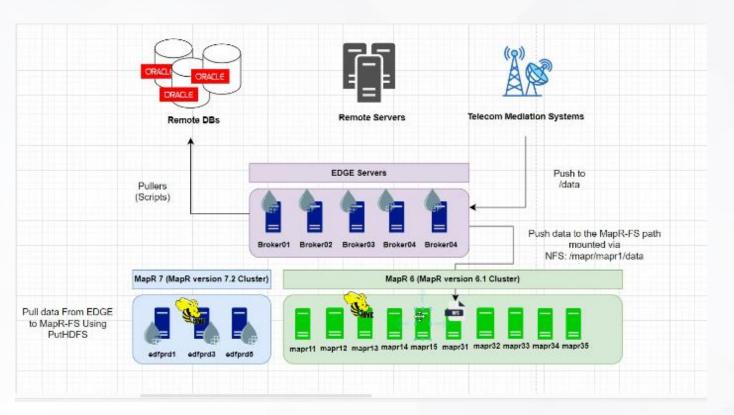

Case Study 2: NiFi & Spark Optimizations in Telecom **Big Data**

Challenges

Solution

- Customer is looking to migrate from MapR6 to MapR7 that includes also NiFi flow migrations.
- Optimize existing NiFi based file transfer flow from MapR7 NiFi edge server to MapR7 MapR-FS.
- Sync data from MapR6 to MapR7 using NiFi to support legacy system.
- Sync historical data from MapR6 to MapR7 using NiFi.
- Migrated Drill script to Spark and Optimize existing Spark script for better performance and SLA
- Migrated and reconfigured NiFi flow from MapR6 to MapR7
- Optimized NiFi existing flows
- Created NiFi flows to migrate data from MapR6 to MapR7 and vice-versa
- Migrated Drill script to Spark and Optimized existing spark scripts
- Extended MapR7 cluster 3 node cluster to 10 node Cluster

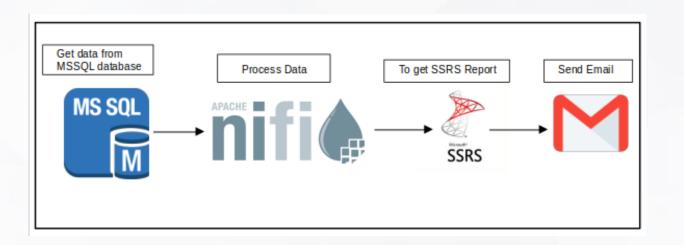

Case Study 3: NiFi in FinTech

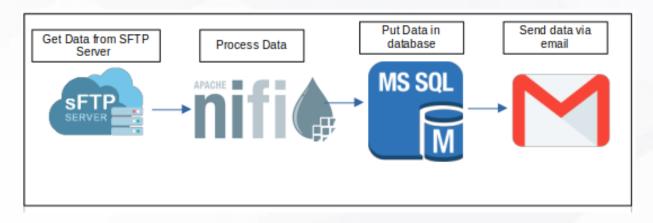

Big Data

Challenges

Solution

- Customer wants to migrated SSIS and open source tech for data transfer pipelines
- Integrate open source ETL with SSRS server and send the reports in email
- Pull data from SFTP server do transformation and store in MSSQL and send notification for success and failed files
- Integrate Azure bus service with ETL tool to pull and push data
- Monitor audit logs table and do data transfer as logs changes
- Created Open Source NiFi cluster and replace SSIS data pipeline with NiFi data pipeline to save cost.
- Integrated NiFi with SSRS server and email service and created and tested required pipeline to generate and send SSRS report in email
- Integrated NiFi with SFTP server, MSSQL and email service and created required data pipeline
- Integrated Azure bus service with NiFi and created required data pipeline

Overview

Case Study 4: Renewable Energy Sector

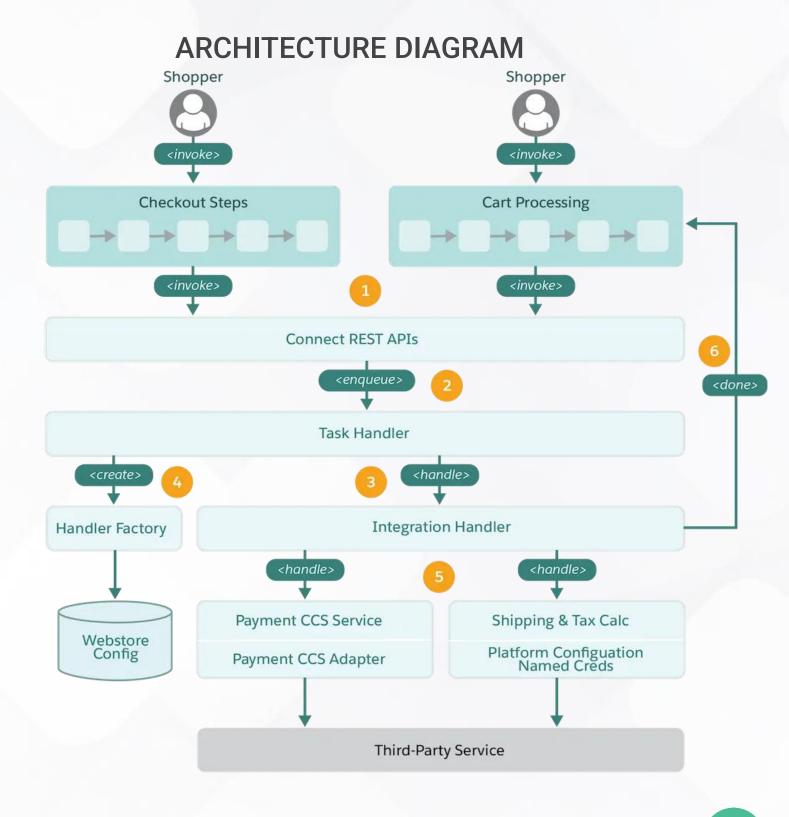

Salesforce

Challenges

Solution

- A prominent player in the renewable energy sector, particularly in wind and solar power generation, faced challenges stemming from outdated systems and processes..
- The presence of multiple siloed legacy systems hindered the sales and service teams from obtaining a holistic view of the customer, leading to disjointed and ineffective interactions.
- the existing front-end sales and service applications were insufficient, adversely affecting the overall customer experience.

- Implementation of B2B Commerce Portal made online part ordering is faster & easier.
- Integration with RACES & mirakl to provide real-time product pricing and availability on the cart.
- Integration with the client's transportation management provide real-time delivery tracking.
- Implementation of Punchout which eliminates the need for manual data entry by allowing users to make purchases directly from the supplier's catalog.

Case Study 5: Power Sector

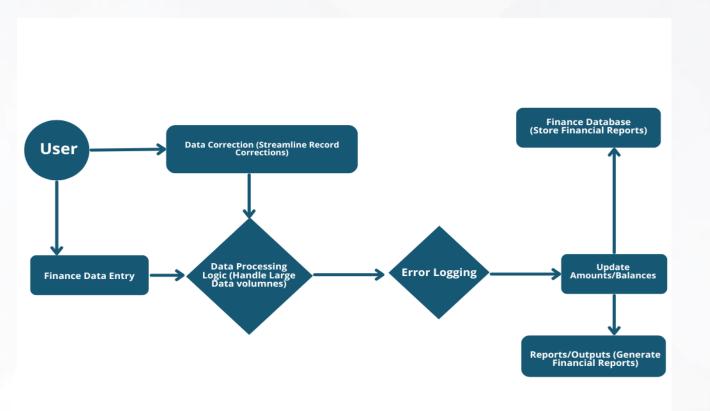

Salesforce

Challenges

Solution

Kalpa Power, a provider of turnkey solar solutions, is facing several issues with its systems, leading to inefficiencies and data inconsistencies: The finance system struggles to handle large amounts of data, leading to incorrect pricing and balance updates, which require manual corrections.

- Inefficient Data Correction Process: Modifying amounts forces the cancellation and recreation of entire records, further complicating data management and increasing workload.
- Technical Challenges: The company requires a solution that enhances data handling in the finance module, improves code quality through better test coverage and error logging, and optimizes query performance to prevent governor limit issues.
- Implemented scalable logic to handle large volumes of data in the finance tables, along with a robust mechanism for data correction, ensuring system efficiency and accuracy.
- Added an error logging object to track and manage errors, making them accessible for reporting and debugging, improving overall system reliability.
- Refactored lengthy code into modular, reusable functions using OOP principles, enhancing maintainability and simplifying future development.

Machine Learning

Challenges

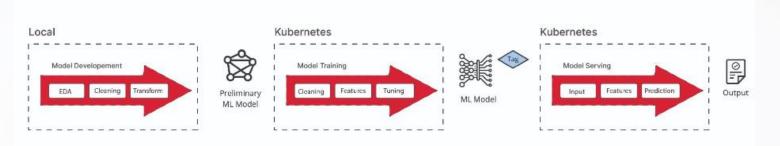

Solution

• Compressor on-time in refrigerators plays a crucial role in **Energy Optimization**. By accurately predicting and managing compressor activity using temperature data, operational costs can be minimized.

Case Study 6: Predictive Model for Energy Efficiency

- Traditional maintenance practices wait for a failure to occur before taking action, which can lead to higher repair costs. By predicting short cycling using ML, we can perform maintenance proactively, reducing downtime and costs.
- Our goal was to predict compressor on-time in a 24-hour window using temperature data, as compressor efficiency significantly impacts energy optimization, cost savings, and environmental sustainability.
- Temperature data collected alongside amperage was correlated with ontime values, creating a labeled dataset for supervised learning.
- Unsupervised learning models were trained separately for three refrigerator types, predict short-cycling with high accuracy. This methodical approach ensures efficient energy management and cost savings.
- Our approach achieved high accuracy in detecting short cycles, reducing false positives and negatives, and was deployed via Flask API, transforming maintenance practices effectively and improving Energy Efficiency,
